
Managing Content

Center for Innovation in Teaching and Research

Presenter: Chad Dennis

Instructional Technology Systems Manager

ce-dennis@wiu.edu

There are many apps to help you organize and manage content. This handout will highlight a few.

WESTERN
ILLINOIS
UNIVERSITY

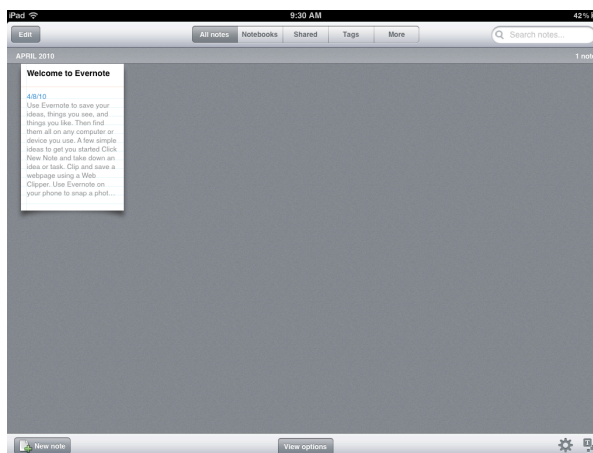

Dropbox

Dropbox is a free cloud service that allows you to access your files from anywhere on any device. You can store all of your docs, photos, video and any other files in your dropbox folder on your computer and access it later on your iPad, iPhone, or another computer.

Evernote

Evernote is designed for note taking and archiving. A "note" can be a piece of formatted text, a full webpage or webpage excerpt, a photograph, a voice memo, or a handwritten "ink" note. Notes can also have file attachments. Notes can be sorted into folders, then tagged, edited, given comments, searched and exported as part of a notebook.

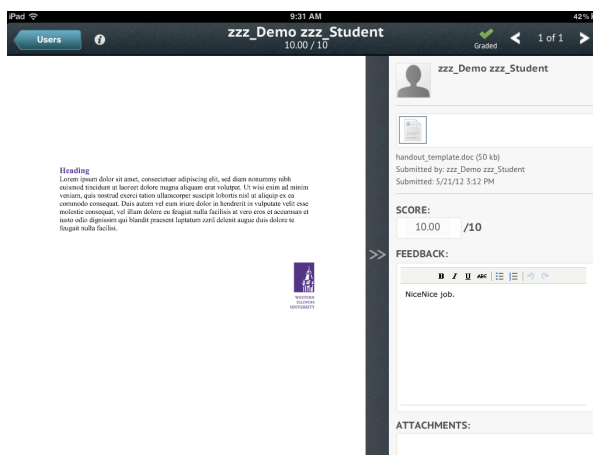

Educreations

Educreations is a recordable interactive whiteboard that captures your voice and handwriting to produce video lessons that you can share online. Students can replay your lessons in any web browser, or from within the app on their iPads.

D2L Assignment Grader

The D2L Assignment Grader app allows instructors to manage, grade, and provide feedback on dropbox (assignment) submissions right from the iPad. You can enter grades while online or offline.

News

The screenshot shows the 'Getting started' mind map in the Mind Maps app. The central node is 'Welcome to Total Recall'. It branches into several categories of tasks:

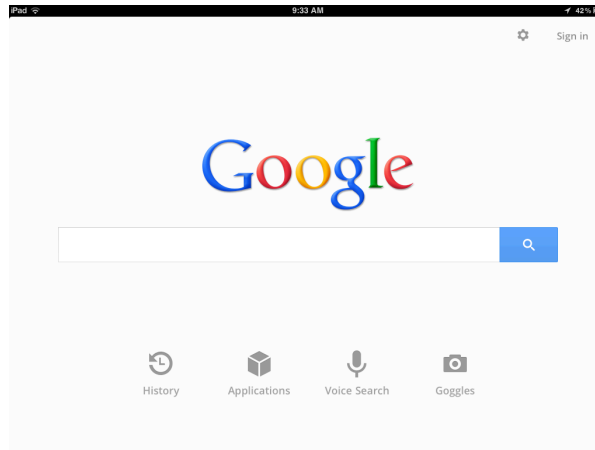

- Map creation and editing:**
 - Use the pointer button to change the color of buttons.
 - Tap the plus button in the lower right corner to activate automatic mapping.
 - To move a button, hold it briefly, pressing down then drag it around.
 - Double tap a button to change the text.
- Importing and exporting:**
 - Export mind maps to various formats.
 - Send mind maps to other users.
 - Open mind maps directly from a search.
 - Save mind maps to the phone's address book.
 - Send mind maps to a remote storage or PDA.
- Navigation and interaction:**
 - Use your finger to move the card around.
 - Press with two fingers to open a card and
 - Stretch with one or two fingers to zoom in and out.
- Integration and availability:**
 - Available for iPhone, iPod touch and iPad.
 - Syncs with your device.
 - Share between the plus buttons.
 - Tap on an existing button to add a linked button.
 - Tap on a new button to add a new button.

The interface includes a top status bar with 'iPad', signal strength, '9:32 AM', and battery level '43%'. The app's title bar shows 'Mind maps' and 'Getting started'. The bottom dock contains icons for Home, App Store, Safari, Mail, and Settings.

Google

Google has a number of apps available for a variety of different tasks including search, maps, documents, and much more.

Prezi Viewer

View and present your prezi presentations anywhere with simple, intuitive multitouch gestures. Revise and retouch, correct typos and adjust your presentations on-the-fly. Prezi Viewer is the perfect companion to your Prezi experience.
