

Elementary Education

School of Education, College of Education and Human Services

Program of Study

Students combine a foundation of general studies with major courses and clinical experiences with children as they complete the elementary education curriculum. A Bachelor of Science in education with a major in elementary education leads to Illinois teacher licensure in grades first through sixth grade (self-contained classrooms).

In addition to extensive coursework in the major, students begin observing children early in the program and begin working with them as tutors and classroom aides in their junior year. During the comprehensive pre-student teaching field experience in the first semester of their senior year, students teach lessons in mathematics, science, reading, language arts and social studies. The program culminates in a 16-week student teaching experience.

Faculty

The professors in the WIU School of Education have a strong interest in helping students develop into skilled, competent and creative professionals. The faculty members hold advanced degrees from notable universities across the United States and are all experienced public school teachers. The faculty engage in a wide variety of scholarly activities that enhance their teaching: collaborating with local education agencies, participating in professional organizations, providing continuing education workshops, delivering professional conference presentations, publishing in education journals, authoring books and book chapters and writing grants. Several have won teaching, technology and/or research awards.

Scholarships

A number of scholarships are available to academically talented students through the WIU School of Education, the Center for Preparation of Education Professionals (CPEP) advising office and the College of Education and Human Services. Information about these scholarships can be found on the department website at wiu.edu/curriculum.

Honors College

Entering students with high ACT or SAT scores and/or top placement in their high school graduating classes may be eligible for the Centennial Honors College. Transferring students with high GPAs may be eligible as well. General honors seminars in the humanities, sciences and social sciences provide students with the opportunity to explore key academic issues with distinguished faculty members. To find out more, visit wiu.edu/Honors.

Transfer Students

Many students enroll in Western's programs after completing one or two years at a community college. Because the programs are very specific and courses are sequential, it is imperative that students who are considering transferring into our program contact the CPEP advising office early for assistance with selecting appropriate community college classes to ensure a smooth transition from the community college to Western.

Student Activities

Students participate in professional groups such as the WIU Student Education Association, Council for Exceptional Children, Kappa Delta Pi International Honor Society in Education and Society of Educators. Students are also involved in the PreK-8 Science Update Conference, Assistive Technology Conference, WIU SEA Spring Conference and KDP Fall Conference. Further information about other student activities and organizations available to all Western students can be found at wiu.edu/osa.

Special Opportunities

The elementary education program is accredited through the National Council for the Accreditation of Teacher Education (NCATE). The faculty in the department are committed to meeting the needs of individual students and communicate with them frequently. Elementary education majors complete three reading, two social studies, two science and one mathematics teaching methods courses that fully prepare them for the demands of the classroom. The use of technology and techniques to accommodate the needs of individual children are emphasized throughout the program. Students apply the knowledge gained in the classroom as they complete a variety of field experiences and student teaching. The department's Outstanding Pre-service Teaching Award (OPTA) recognizes students who have demonstrated excellence in their academic coursework and teaching experiences.

College of Education and Human Services' Special Facilities

The facilities of the College of Education and Human Services (COEHS) include the 12,000-unit Children's Literature Examination Center (CLEC), 18,000-unit Curriculum Library, state-of-the-art Interactive Multimedia (IMM) Lab and WIU Infant/Preschool Center licensed daycare and lab training site.

After College

Nationwide studies indicate teacher shortages in some areas and suggest that job opportunities are increasing. All graduates of the elementary education program are qualified to teach in self-contained first through sixth grade classrooms. Graduate coursework is available for licensed teachers, qualifying them to serve as reading specialists, principals, curriculum directors and superintendents.

For More Information

For more information, contact the CPEP advising center in Horrabin Hall 40 at (309) 298-2117 or the School of Education in Horrabin Hall 115 at (309) 298-1183.
