If you are unsure of a major, then the University Advising Program is the right place for you.......

How do I know which major to choose?

Majors that have a close match to your interests, personality, skills and values may be more personally rewarding. The more information you have about yourself, majors and careers, the easier it is to choose a major. Advisors in UAASC can help you in the process of deciding on a major by guiding you through four steps: self-assessment, major and career research, decision making and goal setting.

(For detailed description of these steps go to www.wiu.edu/advising/current/exploration.php)

Advisors in the University Advising Program for undeclared students are full time academic support professionals committed to student success. They view themselves as mentors and resource people who recognize that some students will experience difficulties adjusting to university life. In addition to assisting with course selection, advisors help students explore major and career options and facilitate their transition to college life.

Students who choose this program rather than a major upon entering the university will not be at a disadvantage since all students take classes in the General Education Curriculum which provides exposure to a variety of areas of study. Rather these students get the advantage of exploring areas of interest while making progress toward their degree.

It is common for undeclared students to worry about not having a major. They might feel that they should hurry and make a choice quickly but it is completely normal to explore different academic options at Western thus allowing the students to make the best informed decision for them.

Plan for your education!

Nationally, undeclared and exploratory students represent a significant proportion of the entering student body at most colleges and universities. The University Advising Program is in fact the largest major for entering freshmen at Western. Many other students (between 60% - 75%) who declare a major when beginning university studies, change their major at least once before they graduate (National Academic Advising Association, Commission on Undecided/Exploratory Students).
FREQUENTLY ASKED QUESTIONS FROM PARENTS

What do Academic Advisors do?
Academic Advisors know about University policies and procedures, so they can assist students with navigating and interpreting General Education requirements and additional university publications. They work with students in researching and exploring majors, selecting courses, and registering for classes. Advisors also refer students to resources available both on and off campus.

Advisors focus on the basics, such as what is a credit, how do you create a class schedule, how should you manage your time, etc. In addition to the basics, advisors will also work with students in a developmental way. Developmental advisors recognize the importance of interactions between the student and the campus environment, focus on the whole person, and work with the student at that person’s own life stage of development.

What do Academic Advisors expect from students?
Advisors expect students to review and identify courses of interest from the General Education Handbook and undergraduate catalog. Students need to research and investigate majors that interest them and ask questions.

STUDENT SUCCESS ..... CONNECT TO TUTORING AND LEARNING RESOURCES

- Math Department Help Center
- SWELL—Student Workshops for Excellence in Learning and Life - online workshops that cover time management, being an engaged student, study skills and test taking

Your college major does not train you for a single, specific job. Instead, it seeks to develop your aptitude and abilities so that you can use them in the broadest variety of careers. That is why it is important to choose a major that allows your individual talents to flourish. Find a major that fits YOU, rather than trying to fit yourself into a major. Undergraduate education is not so much a determinant of what you want to BE, as much as what you are prepared to BECOME.

Top Qualities & Employable Skills.....

**Communication skills**
*Verbal:* Able to communicate with others, including those from different cultures; *Written:* possessing knowledge and use of grammar, spelling, and sentence structure; *Presentation:* skilled at creating and presenting information and ideas to individuals and groups.
