Higher Values in Higher Education

The History and Heritage of Western Illinois University

Founded in 1899, the Western Illinois State Normal School was established as an Illinois public institution to address teacher preparation in the state’s grammar schools. The faculty and students of Western were eager to meet this need, and the institution soon became known for its well-rounded, deeply committed graduates, a tradition that continues.

As the years passed and the name was changed to Western Illinois State Teachers’ College in 1921, and then to Western Illinois University in 1957, the institution’s mission continually broadened to include academic majors that prepared high school teachers; the state’s earliest and most successful extension program; a multifaceted graduate school; a liberal arts program; and, eventually, distinguished colleges devoted to Arts and Sciences, Business and Technology, Education and Human Services, and Fine Arts and Communication.

Throughout time, and most recently as Western celebrated 50 years as a University during academic year 2007–2008, we have earned and maintained a reputation for expanding public access to affordable, high-quality degree programs and fostering student involvement in University activities.

We are now a leading University with a residential campus in Macomb; a metropolitan, commuter campus in the Quad Cities; and extension and distance learning programs. With an outstanding, diverse faculty and staff committed to multicultural and international education, Western Illinois University offers undergraduate and graduate programs of study to approximately 7,600 students from Illinois, across the nation, and around the world.

The Present and Future of Western Illinois University

With more than a century of growth and development, and more than 100,000 living alumni, Western Illinois University maintains a strong sense of community and historic commitments to student access, affordability, and success. Western has consistently been recognized as a “Best Midwestern College” by the Princeton Review, and WIU was recognized in 2019 for the sixteenth consecutive year as a “Best Midwestern University” by U.S. News & World Report, one of only 36 Midwestern public universities in the top tier. Western is also identified in the U.S. News & World Report top-tier list of “Best Regional Universities,” one of only three Illinois public universities in the top 70. U.S. News & World Report also recognizes WIU as a “Best for Veterans School” and a “Best Value School.”

Western Illinois University is accredited by the Higher Learning Commission. The University’s teacher licensure programs are approved by the Illinois State Board of Education. The University also maintains a strong commitment to discipline-based accreditation and licensure, where appropriate to the discipline. In academic year 2019–2020, Western Illinois University maintained accreditation/licensure with 15 agencies, ranging from the American Speech–Language–Hearing Association to the Association to Advance Collegiate Schools of Business.

These external recognitions and peer-based accreditations showcase our high academic standards, quality instruction, proven opportunities for job and graduate school placement, outstanding academic and residential facilities, exciting
extracurricular activities, and institutional commitments to sustainability and affordability.

These recognitions also reinforce the unique mission and niche of Western Illinois University in the state’s system of public higher education. Keeping focused on our vision, mission, and values is critical for continued student success and our progress, growth, and contributions to the state and beyond. Western Illinois University, along with all other 11 Illinois public universities, is currently being challenged by a declining number of Illinois high school graduates; decreasing state support (appropriations) for higher education; and increasing costs, maintenance, technological, infrastructure, and accountability needs.

Through continued successful implementation of Higher Values in Higher Education, the institutional planning, resource allocation, and accountability reporting process established in academic year 2002–2003, we will continue to build upon our strengths and take advantage of opportunities. Western Illinois University will continue to prepare our students and graduates to lead in the global community. We will do so in a manner that is distinctive and nationally recognized for successful implementation of our vision, mission, and values.

**Our Vision**

Western Illinois University aims to be the leading public regional university in providing educational quality, opportunity, and affordability.

**Our Mission**

Western Illinois University empowers students, faculty, and staff to lead dynamic and diverse communities. We provide student-centered undergraduate and graduate programs characterized by innovative teaching, research, and service, grounded in multidisciplinary, regional and global perspectives. We engage our students in educational opportunities guided by a professional and diverse faculty and staff in collaboration with alumni and community partners.

**Our Values**

*Academic Excellence:* Central to our history is the commitment to teaching, to the individual learner, and to active involvement in the teaching-learning process. Western Illinois University’s highly qualified and diverse faculty promotes critical thinking, engaged learning, research, and creativity in a challenging, supportive learning community. We are committed to student success in an academic environment that encourages lifelong development as learners, scholars, teachers, and mentors.

*Educational Opportunity:* Western Illinois University values educational opportunity and welcomes those who show promise and a willingness to work toward achieving academic excellence. We are committed to providing accessible, high-quality educational programs and financial support for our students.

*Personal Growth:* Western Illinois University values the development of the whole person. We are committed to providing opportunities for personal growth in a transformative educational environment that supports the development of wellness, ethical decision making, and personal responsibility in the global community.
**Social Responsibility:** Western Illinois University is committed to civic and community engagement, equity, social justice, and diversity and will maintain the highest standards of integrity in our work with others. We create an environment that fosters and promotes citizenship. We serve as a resource for and stimulus to educational, cultural, environmental, community, and economic development in our region and well beyond it for the public good.

**University Profile**

Western Illinois University serves approximately 7,600 students in the heart of the Midwest through its traditional, residential four-year campus in Macomb, IL (population 20,000) and its metropolitan, commuter campus in the Quad Cities/Moline, IL (QC population 384,000; Moline population 43,000). WIU’s friendly, accessible, nurturing campus communities are dedicated to Higher Values in Higher Education and are comprised of strong faculty, state-of-the-art technology and facilities, and a wide range of academic and extracurricular opportunities for students and staff. Committed to empowering students through the opportunity to earn a high-quality education that is also affordable, WIU’s GradTrac and Cost Guarantee programs ensure that students can achieve their degrees within four years while paying a fixed rate for tuition, fees, and room and meal plan. WIU remains the only University in Illinois to guarantee the cost for tuition plus fees and room and meal plan for students over a four-year period at both the undergraduate and graduate level. WIU’s Cost Guarantee program is the model for the state’s “truth-in-tuition program” that has helped students control cost.

The University offers 62 undergraduate degree programs, 38 master’s/specialist degree programs, and 2 doctoral programs. Approximately 78 percent of WIU students are undergraduates and 22 percent are graduate students. The curriculum includes the natural sciences, humanities, social sciences, fine arts, business, education, and a number of pre-professional and technical fields of study. Although students primarily come from Illinois, more than 980 are from out of state, and approximately 300 are international students. Between July 2018 and June 2019, 1,749 students completed undergraduate degree requirements.

**Faculty:** Providing excellent instruction is the highest priority of the University’s 537 faculty members. The faculty is responsible for 96 percent of the total student credit hours earned at the undergraduate level with graduate teaching assistants contributing the remaining 4 percent. As a group, full professors devote approximately 90 percent of their professional responsibilities to undergraduate instruction. The on-campus ratio of students to faculty is 13:1, and the average undergraduate class size is 18. Although primarily dedicated to teaching, WIU faculty members participate in extensive research and creative activities.

**Libraries:** University Libraries provides research assistance; instruction in library use; group study space; lectures and special events; regional archives; and is a Federal Depository location. The libraries house an extensive collection and offer online access to thousands of academic journals and publications. The Leslie F. Malpass Library in Macomb is the main branch and provides an inviting environment for research and study. The Macomb campus also has two specialized branch libraries for music and curriculum. The WIU—Quad Cities campus houses a branch library and provides access to the same materials as the Macomb libraries.
Computing Facilities: WIU provides approximately 500 computers for use in 10 general use computer labs and 13 computer resource centers throughout the Macomb campus and 2 computer labs at the Quad Cities campus. Detailed listings and a map of the computing facilities can be found on the WIU website (wiu.edu/university_technology/student_resources/computer-lab.php). Computer labs are locations with computers for use that are staffed with a worker to help aid students with their computing needs, while computer resource centers contain computers for use but are unstaffed. The University also provides access to numerous software packages, the Internet, e-mail, campus information systems, and other resources. Students have access to Macintosh and Windows-compatible computers, scanners, laser printers, and CD/DVD readers/writers. Personal file storage is available via a personal network drive known as Samba (or the P:\ drive), unlimited file storage on Google Drive (drive.g.wiu.edu), and 1TB of free file storage when signed up for a free Office 365 account available to all students.

Cultural Center: The College of Fine Arts and Communication is at the center of the rich cultural and artistic community at Western. Students, faculty, and guest artists of the School of Music perform over 180 exhilarating concerts and recitals every year. The Department of Theatre and Dance produces eight major theatrical and dance productions and more than 12 studio shows in Western’s three theatres. This is drama, comedy, and musical theatre at its finest. The Department of Broadcasting and Journalism is at sports and breaking news events daily reporting on radio, TV, and the web. The University Art Gallery exhibits work by the talented WIU students and faculty, as well as nationally-recognized artists. The Bureau of Cultural Affairs (BCA) brings comedy, music, and magic to campus, and students get to attend most events FREE. Check us out. There is something for everyone!

Campus: Fifty-nine buildings are situated on more than 1,000 acres in Macomb. In addition, the University operates the Alice L. Kibbe Life Sciences Station on the Mississippi River, the Frank J. Horn Field Campus, and the University Farm, which provide nearby facilities for students enrolled in Agriculture; Biology; and Recreation, Park and Tourism Administration courses. Western Illinois University—Quad Cities Riverfront Campus in Moline provides baccalaureate degree, graduate degree, and post-baccalaureate certificate programs in various disciplines, along with Museum Studies courses at the Figge Museum.

Costs: New students can attend Western Illinois University for approximately $26,700 in 2020–2021, including tuition, fees, room, meal plan, books, and personal expenses. Financial assistance is provided for qualified students. More than 76 percent of Western’s undergraduate students receive some type of financial assistance. In 2019–2020, more than $117 million total in financial assistance was distributed. Of that total, over $53 million was in the form of grants/scholarships which do not have to be repaid, and $64 million was through loans and campus employment.

Location: The main campus is located in Macomb, the McDonough County seat, 40 miles east of the Mississippi River. The city has a population of almost 20,000. Two U.S. highways, 136 and 67, intersect at Macomb and provide direct access to Interstates 74, 80, and 55. Rail passenger service is available twice daily from Quincy and Chicago to Macomb. Western Illinois University—Quad Cities is located in Moline, Illinois, which is approximately 80 miles north of the main campus in Macomb.
Residence Halls: Residence hall facilities provide more than 3,000 students with living and dining services. Several residence halls offer lifestyle floors such as honors, First Year Experience, major, and wellness. Grote Hall, featuring a state-of-the-art suite-style environment, is the University’s newest residence hall. All residence halls are smoke-free and wired for Internet and LAN use. Many off-campus housing possibilities, including fraternities and sororities, are open to upper-division students.

Student Organizations: More than 250 student organizations on campus represent a wide range of interests. Opportunities for participatory student governance are provided by the Student Government Association, Inter-Residence Hall Council, Panhellenic Council, Student Tenant Union, Black Student Association, Latin American Student Organization, International Friendship Club, and other organizations.

Sports: Western offers a broad-based athletics program, sponsoring 19 NCAA Division I intercollegiate varsity sports (9 for men/10 for women). Football competes in the NCAA Division I Football Championship Subdivision through the Missouri Valley Football Conference; all other varsity sports compete at the Division I level through the Summit League. More than 50 different intramural events and a variety of sports clubs are available to Western students.

Western Illinois University—Quad Cities (WIU—QC): Western Illinois University offers several undergraduate degree programs in Moline, Illinois, which is approximately 80 miles north of the residential campus in Macomb. Undergraduate majors are offered in the following disciplines at WIU—QC: Accountancy; Bilingual/English as a Second Language Education; Civil Engineering; Communication; Electrical Engineering; Elementary Education (Elementary Education option); Engineering; Engineering Technology; English (Literature and Language option); General Studies; Human Resource Management; Information Systems; Law Enforcement and Justice Administration; Liberal Arts and Sciences; Management; Marketing; Mechanical Engineering; Psychology; Recreation, Park and Tourism Administration; and Supply Chain Management. Several online undergraduate degree programs are available to Quad Cities area students, along with eighteen graduate degree programs and seven post-baccalaureate certificate programs offered at the WIU Quad Cities campus.

Accreditation

Western Illinois University is accredited by the Higher Learning Commission. In addition, many of its departments and schools are accredited by professional agencies, including the following:

ABET: Engineering Accreditation Commission of ABET
Academy of Nutrition and Dietetics
American Speech–Language–Hearing Association
Association to Advance Collegiate Schools of Business (AACSB International)
Commission on Collegiate Nursing Education
Commission on English Language Program Accreditation
Council for Accreditation of Counseling and Related Educational Programs
Council on Social Work Education
Iowa College Student Aid Commission
Masters in Psychology and Counseling Accreditation Council
National Association of Schools of Art and Design
Western Illinois University is approved by the Illinois Board of Higher Education to participate in the National Council for State Authorization Reciprocity Agreements (NC-SARA). As such, the University’s distance learning program follows policies and standards that are overseen by the National Council for State Authorization Reciprocity Agreements and administered by four regional higher education compacts. For additional information, please visit http://nc-sara.org.

Comments and Complaints

Participants in the Title IV Federal Financial Aid under the Higher Education Act of 1965, as amended, are required to direct students to a state agency for assistance with unresolved complaints. Related regulations require all Title IV participating institutions, regardless of the origin of their state authorization to operate, to comply with state agency complaint process and to communicate such information publicly. Under Federal rule 34 CFR §600.9 and §668.43(b), Title IV eligible institutions must make available to students or prospective students, upon request, a copy of the documents describing the institution’s accreditation and state authorization. The institution must provide its students or prospective students with contact information for filing complaints with the University, its accreditor, and the state.

Student and graduate comments and complaints are addressed separately for discrimination, ethics, police conduct, and/or all other institutional issues. University policy, procedure, and contact information for each type of complaint are described below.

All student complaints should first be addressed at the local level (the level at which the complaint arises). If it cannot be resolved at the local level, the complainant should express his/her complaint to the head of the academic department or administrative unit after referring to the University Organizational Chart (wiu.edu/president/pdfs/FY2020-OrganizationalChart.pdf) or the University Directory (directory.wiu.edu/) to determine the appropriate contact. If the complaint is not resolved at this level, the following individual(s) should be contacted:

**State of Illinois:** The Illinois Board of Higher Education (IBHE) maintains the master plan which guides development of the state’s system of public and private colleges and universities, and it maintains an online complaint system for registering institutional complaints at complaints.ibhe.org/. This website includes step-by-step instructions and key information regarding the complaint process.

**State of Iowa:** Western Illinois University is certified by the State of Iowa to provide educational certificates and degree programs in Museum Studies and distance education in Iowa. In serving students from Iowa, the Iowa College Student Aid Commission maintains a system (form available at [https://iowacollegeaid.gov/StudentComplaintForm](https://iowacollegeaid.gov/StudentComplaintForm)) to document concerns, questions, and complaints related to post-secondary educational institutions.

**Out-of-State Distance Learning Students:** Students enrolled in distance learning classes who live outside Illinois are protected by the State Authorization and Reciprocity Act (SARA) consumer protection provisions. These provisions require the investigation and resolution of allegations of dishonest or fraudulent activity, including the provision of false or misleading information. The SARA Student Complaints process and directions are available at [https://www.nc-sara.org/student-complaints-process](https://www.nc-sara.org/student-complaints-process).

**Equal Opportunity and Access**

Western Illinois University complies fully with all applicable federal and state nondiscrimination laws, orders, and regulations. The University is committed to providing equal opportunity and an educational and work environment for its students, faculty, and staff that is free from discrimination based on sex, race, color, sexual orientation, gender identity, gender expression, religion, age, marital status, national origin, disability, genetic information, veteran status, or any other classes protected by state or federal law.

Further, the University is committed to a comprehensive Affirmative Action program that ensures access and equity in educational programs, activities, and employment.

The Office of Equal Opportunity and Access is responsible for administering and monitoring Western Illinois University’s Equal Opportunity/Affirmative Action policies and procedures. Inquiries about or complaints alleging violation of the policies should be directed to the Office of Equal Opportunity and Access,

**Religious Observance Policy**

Consistent with Illinois Public Act 84-212, an act to prohibit public school districts and institutions of higher education from discriminating against students for observing religious holidays (effective August 26, 1985), Western Illinois University subscribes to the following policy and procedures:

Western Illinois University supports the concept of “Reasonable Accommodation of Religious Observances” in regard to admissions, class attendance, and the scheduling of examinations and other academic work requirements.

1. A student who is unable because of the observance of a religious holiday to attend classes on a particular day or days or at a particular time of day shall be excused from taking any examination or any study or other academic work assignments on such days or times.

2. Faculty and administrative personnel may require up to 5 calendar days advance notice of absences to observe religious holidays.

3. It is the responsibility of the faculty and administrative personnel to make available to such students an equivalent opportunity to make up the examinations, study, or other academic work requirements which they missed due to such absences.

4. It is the responsibility of all students who are also employees of the University to make arrangements to fulfill their obligations to the University in advance of their absence, and/or to utilize accrued leave (if applicable) during the absence. (See section II.)

5. No fees or penalties may be imposed against the students who exercise such afforded opportunities. If a student believes she/he has been a victim of discrimination on grounds of religious observances, she/he may seek redress under the existing Discrimination Complaint Procedures.

A student who feels that he or she has been unreasonably denied an educational or employment benefit due to religious beliefs or practices should contact the Office of Equal Opportunity and Access.

Western Illinois University’s full Reasonable Accommodation of Students’ and Employees’ Religious Observance Policy is available at [wiu.edu/ias/policies/religiousobserv.php](http://wiu.edu/ias/policies/religiousobserv.php).

**Student Right-to-Know**

Information complying with the Federal Student Right-to-Know legislation, including the Campus Safety and Security Act (Clery Law), is available in the Office of Public Safety and University Relations. The information contains campus crime statistics and graduation rates at Western Illinois University and is also available at [wiu.edu/clery](http://wiu.edu/clery).
Undergraduate Programs

Western Illinois University's undergraduate academic programs are offered through four academic colleges, each of which includes several academic departments. Information about the colleges is given in the Colleges section of this catalog (p. 81). Most departments offer one or more undergraduate programs of study leading to the baccalaureate degree. Information about departments and degree program requirements is given in the Academic Departments, Programs, and Courses section (p. 103).

The chart below provides page references for information in this catalog about major and minor programs of study available at the undergraduate level. The chart shows whether a Bachelor of Arts (B.A.), Bachelor of Business (B.B.), Bachelor of Fine Arts (B.F.A.), Bachelor of Liberal Arts and Sciences (B.L.A.S.), Bachelor of Music (B.M.), Bachelor of Science (B.S.), Bachelor of Science in Education (B.S.Ed.), Bachelor of Science in Nursing (B.S.N.), or Bachelor of Social Work (B.S.W.) is offered. Fields of study for which “Option” is indicated lead to degrees through the completion of option requirements in a broader field of study. For example, students majoring in Zoology earn a B.S. in Biology by completing the Zoology option requirements in the Biology degree program. The chart also shows the fields of study that are available for Teacher Education and as academic minors and undergraduate certificates at the University. “GradTrac” is indicated for the disciplines that are included in the GradTrac program. Information about GradTrac is given in the GradTrac section (p. 79). “Integrated Degree” is indicated for the disciplines for which an integrated baccalaureate and master’s degree program is offered. For more information about integrated degree programs, please see the Integrated Baccalaureate and Master’s Degree Programs section (p. 59), the respective academic department, and the WIU Graduate Catalog.

*Program is available at WIU-Quad Cities.
**Final two years are completed at WIU-QC campus.

Information about WIU’s Teacher Education requirements appears in the Teacher Education section (p. 346). Information about interdisciplinary minors appears in the Interdisciplinary Minors and Courses section (p. 235).

In addition to the programs of study listed on the chart, pre-professional programs are offered at the University in the following fields:

- Engineering
- Forestry
- Health
- Law
- MBA
- Veterinary Medicine

Dual programs are available in Clinical Laboratory Science, Engineering, and Law in cooperation with approved schools of medical technology, John Marshall Law School, and the University of Illinois. Students can complete requirements for a bachelor’s degree in the College of Arts and Sciences while working toward a professional degree or certificate. An additional dual program is available in Doctor of Chiropractic with Palmer College of Chiropractic. Students can complete requirements for a Bachelor of Arts in General Studies while working toward a professional degree or certificate. For more information, please see the Pre-Professional and Dual Programs section (p. 318).

Graduate Programs

The University confers 12 advanced degrees—Doctor of Education, Doctor of Philosophy, Education Specialist, Specialist in School Psychology, Master of Accountancy, Master of Arts, Master of Business Administration, Master of Fine Arts, Master of Liberal Arts and Sciences, Master of Music, Master of Science, and Master of Science in Education. Graduate programs are available in the following degrees and fields of study:

**Doctor of Education**
Educational Leadership*

**Doctor of Philosophy**
Environmental Science: Large River Ecosystems**

**Education Specialist**
Educational Leadership*

**Specialist in School Psychology**
School Psychology
**Academic Programs**

**Master of Accountancy**

**Master of Science in Education**
Counseling**, Curriculum and Instruction*, Educational Studies*, Educational Leadership*, Reading*, Special Education*

**Post-Baccalaureate Certificates**

* Program available at WIU—Quad Cities and Macomb
** Program available at WIU—Quad Cities only

For more information, see the Western Illinois University Graduate Studies Catalog.
Centennial Honors College

The Centennial Honors College provides academically talented and motivated undergraduate students an enriched academic curriculum and opportunities for leadership, professional development, and service learning. The program includes 62 academic majors or areas of study from four colleges, as well as special pre-professional honors options such as the Pre-Law Honors minor. Within General Education, honors students are provided a curriculum of special General Honors tutorials, colloquia, seminars, and independent research. Within departments, students are offered in-course honors experiences, seminars, recitals, and internship opportunities. For more information about the Centennial Honors College, please see page 100.

Four-Year Guarantees

GradTrac: Freshman students in eligible majors who wish to ensure graduation within four years may apply to GradTrac. A GradTrac Agreement assures students that they will complete their requirements in four years if they comply with the provisions of the GradTrac Agreement. GradTrac uses WIU’s automated degree audit system, which allows students and their advisors to monitor progress in their degree plan. Students who sign the GradTrac Agreement must meet with their advisors regularly, complete required coursework as prescribed for their degree program, maintain a grade point average designated by their program, and maintain continuous enrollment at the University. If a student meets all the requirements of the GradTrac Agreement but is unable to graduate due to the unavailability of a course, the University will waive or substitute the course(s) needed to allow graduation in the prescribed number of semesters. If a waiver or substitution is not possible, then the University will waive the tuition for the course(s) still needed if taken at Western Illinois University. For more information on GradTrac, please see page 79.

Cost: Western Illinois University guarantees a four-year rate for tuition, fees, and room and meal plan for new undergraduate students entering the University. All new undergraduate students, full- and part-time, are automatically included in the plan. The per-hour rate for tuition and fees will be fixed for a four-year period along with room and meal plan rates as long as the student maintains continuous enrollment. If a student’s major is recognized as requiring more than four years to complete, the guaranteed rate will be extended to cover the expected time for degree completion. Each year the University’s Board of Trustees sets new rates for the entering class. If a fee is added and approved by the Board, such as funding a new student service, the fee will apply to all students when implemented. For more information on the Cost Guarantee, please contact the Office of Admissions, located in Sherman Hall 115, telephone (309) 298-3157.

Individualized Degree Program

Bachelor of Arts in General Studies Degree Program: The Bachelor of Arts in General Studies degree program is a highly flexible approach to undergraduate education without a traditional major. The program is designed for students who are place-bound by work and/or family responsibilities. The fully online degree program permits maximum transfer of credit, as well as credit earned for individually selected courses, prior learning portfolios, military training, and proficiency
examinations. Those students unable to attend classes on the WIU campuses in Macomb or the Quad Cities may enroll in online courses or coursework offered at extension sites. For more information on the Bachelor of Arts in General Studies degree program, please see page 217 of this catalog or go to wiu.edu/bgs.

Integrated Baccalaureate and Master's Degree Programs

Western Illinois University offers the following integrated baccalaureate and master's degree programs:

Bachelor of Business in Accountancy / Master of Accountancy
Bachelor of Business in Accountancy / Master of Business Administration
Bachelor of Science in Agriculture / Master of Business Administration
Bachelor of Arts in Anthropology / Master of Arts in Museum Studies
Bachelor of Arts in Anthropology / Master of Liberal Arts and Sciences
Bachelor of Arts in Art / Master of Arts in Museum Studies
Bachelor of Fine Arts in Art / Master of Arts in Museum Studies
Bachelor of Arts in Broadcasting and Journalism (Sports Broadcasting option) / Master of Science in Sport Management
Bachelor of Business in Business Analytics / Master of Science in Applied Statistics and Decision Analytics
Bachelor of Science in Chemistry / Master of Science in Chemistry
Bachelor of Arts in Communication / Master of Arts in Communication
Bachelor of Science in Computer Science / Master of Science in Computer Science
Bachelor of Science in Computer Science / Master of Business Administration
Bachelor of Arts in Economics / Master of Science in Quantitative Economics
Bachelor of Business in Economics / Master of Science in Quantitative Economics
Bachelor of Business in Economics / Master of Business Administration
Bachelor of Business in Finance / Master of Business Administration
Bachelor of Arts in Foreign Languages and Cultures / Master of Liberal Arts and Sciences
Bachelor of Science in Forensic Chemistry / Master of Science in Chemistry
Bachelor of Arts in General Studies / Master of Science in Education in Educational Studies (Language, Culture, and Education option)
Bachelor of Arts in General Studies / Master of Science in Instructional Design and Technology
Bachelor of Arts in General Studies / Master of Arts in Public Safety Administration
Bachelor of Science in Geographic Information Science / Master of Science in GIScience and Geoenvironment
Bachelor of Arts in History / Master of Arts in History
Bachelor of Science in Human Resource Management / Master of Business Administration
Bachelor of Science in Law Enforcement and Justice Administration / Master of Arts in Public Safety Administration
Bachelor of Science in Law Enforcement and Justice Administration / Master of Business Administration
Bachelor of Liberal Arts and Sciences / Master of Liberal Arts and Sciences
Bachelor of Business in Management / Master of Business Administration
Bachelor of Business in Marketing / Master of Business Administration
Bachelor of Science in Mathematics (Mathematics and Data Science and Statistics options) / Master of Science in Mathematics
Bachelor of Science in Meteorology / Master of Science in GIScience and Geoenvironment
Bachelor of Science in Physics / Master of Science in Physics
Bachelor of Arts in Political Science / Master of Arts in Political Science
Bachelor of Science in Recreation, Park and Tourism Administration / Master of Science in Recreation, Park and Tourism Administration
Bachelor of Science in Recreation, Park and Tourism Administration / Master of Arts in Museum Studies
Bachelor of Arts in Sociology / Master of Arts in Sociology
Bachelor of Business in Supply Chain Management / Master of Business Administration

These programs are administered by the respective academic departments. An integrated baccalaureate and master's degree program provides the opportunity for outstanding undergraduates to earn both degrees in five years. Typically, a baccalaureate degree requires four years to complete, and a master's degree requires an additional two years. However, the integrated degree programs are intended to be accomplished over a period of five years. In addition to allowing students to earn both degrees a year early, the integrated programs may include additional opportunities to participate in a variety of experiential educational activities such as a master's project or thesis. For additional information about the integrated baccalaureate and master's degree programs, please refer to the Western Illinois University Graduate Studies Catalog.

Office of Study Abroad and Outreach

Study Abroad allows students to complement and enhance their classroom instruction by experiencing the culture and language of another country. Through WIU's Office of Study Abroad and Outreach, students can participate in a wide variety of educational programs located in more than 60 countries worldwide. Many programs take place over Spring and Winter breaks or in the Summer, or students may choose to participate in semester- or year-long programs. Many Study Abroad programs are comparable in cost to studying on WIU's Illinois campuses, and financial aid and scholarships are available to qualified students. Undergraduate students may participate in a Study Abroad program if they are in good academic and judicial standing, have a cumulative GPA of 2.5 or better, and have completed 12 s.h. of undergraduate work at WIU. Internships and service learning programs are also available. Certain programs may have additional eligibility criteria. For more information about Study Abroad at WIU, please contact the Office of Study Abroad and Outreach at (309) 298-2504 or go to wiu.edu/studyabroad.

University Advising Program (for undeclared students)

Many students choose to explore several major options when entering college. Western Illinois University designates these persons as University Advising students, who can remain in this category until they have earned 45 credit hours. Students are required to declare a major at this point. The University Advising and Academic Support Center is responsible for advising University Advising students.

The University Advising Program enables students to examine major and career options while concentrating on coursework necessary for the University General Education Curriculum. The emphasis on General Education courses permits students to make progress toward graduation while still undecided about a specific
major. Advisors help students evaluate interests, goals, values, and abilities, and apply this self-knowledge to the exploration of various majors.

University Advising is a positive option for students who are uncertain about their future plans and wish to explore academic and career possibilities during their first semesters at the University.

**Western's English as a Second Language (WESL) Institute**

Western's English as a Second Language (WESL) Institute, accredited by the Commission on English Language Program Accreditation, provides an intensive program in academic English for international students who are preparing to enter an American college or university, as well as for others needing ESL services. The WESL curriculum is designed and taught by professional faculty to prepare students academically, socially, and culturally for success as University students. The English as a Second Language Program is offered during the Spring, Summer, and Fall semesters. It consists of three levels of instruction: Foundation, Intermediate, and University Preparation. Upon arrival, international students take the WESL English Placement Test and are thereby placed in the appropriate level of English study or directly into the University. The WESL program consists of two 16-week semesters which follow the WIU academic calendar, and a ten-week Summer session. For additional information on WESL, please go to [wiu.edu/international](http://wiu.edu/international).

Admission

Admission Procedures

Western Illinois University is an Equal Opportunity/Affirmative Action educational institution and does not discriminate in any aspect of its educational programs or activities on the basis of sex, race, color, sexual orientation, gender identity, gender expression, religion, age, marital status, national origin, disability, or veteran status.

Western Illinois University offers 58 majors and programs at the Macomb campus, 20 at the Quad Cities campus, and 14 online. WIU seeks students who have excelled academically in the classroom and who have demonstrated preparedness for a rigorous college experience.

High school seniors and graduates interested in attending Western Illinois University should apply at wiu.edu/apply.

Office of Undergraduate Admissions
Sherman Hall 115
1 University Circle
Western Illinois University
Macomb, IL 61455-1390

Supportive admission documents sent with admission forms are not returnable or transferable.

Applications processed through Undergraduate Admissions must include a non-refundable application fee of $30.

Withholding information requested in the application or giving incorrect statements may render a student ineligible for admission or may result in dismissal.

Freshmen

All new freshman applicants to Western Illinois University must submit the following supporting documents:

1. A listing of courses taken and in progress with grades earned, or an official current transcript listing courses taken and in progress. A final official transcript must be submitted immediately upon completion of high school.

2. The results of either the SAT test or the ACT test for students with less than a cumulative grade point average of 3.30 on a 4.00 scale. Self-reported scores will be considered for admission, but an official score must be provided prior to enrollment. SAT or ACT scores affixed to the official transcript shall be accepted to meet this requirement. Applicants may alternatively request that scores be sent to Western Illinois University Undergraduate Admissions either at the time of testing or online at:
   SAT: collegeboard.org (WIU code is 1900)
   ACT: actstudent.org (WIU code is 1158)

Students in the top 10% of their high school class at an accredited Illinois public or private high school will be automatically admitted to WIU.

High school graduates and GED holders who have been out of school for five years or more do not need to submit SAT or ACT scores.

Admission Standards

Western Illinois University is committed to admitting students whose academic records indicate a high potential for success. Students are generally considered for freshmen admission if they are currently enrolled in high school or if they have never attended a college or university since graduating from high school. Students must earn a high school diploma.

- GPA Only: Students with a 2.75 high school grade point average or higher (on a 4.00 scale) will be admitted.
• GPA Plus Other Criteria: Applications from students with a high school grade point average between 2.00 and 2.74 (on a 4.00 scale) will receive a personal review. These students are encouraged to submit SAT/ACT scores if they have taken either exam. WIU may request other information, as needed.

Profile of the Freshman Class of Fall 2019

SAT Total (average) 1057
SAT Total (middle 50%) 950–1150
ACT Composite Score (average) 22
ACT Composite Score (middle 50%) 18–25
High School GPA (average) 3.40
High School GPA (middle 50%) 2.72–3.50

Applicants whose SAT/ACT score or high school GPA falls below regular admission criteria are considered for admission through alternative credential evaluation. For consideration, students are encouraged to submit a personal statement which addresses their academic goals, study habits, or extenuating circumstances that may have affected their academic performance in high school. Letters of recommendation, if provided, may also be considered. Students may be admitted regularly or into the Reach Program (alternative admission program). To guarantee full consideration for admission as an incoming freshman through this alternative credential evaluation, applicants are encouraged to submit an application and supporting materials by March 15. For more information about the Reach Program, please visit wiu.edu/reach.

Note: WIU considers applications on a rolling admission basis. Students are encouraged to submit all documentation prior to August 1 for the fall semester.

High School Course-Specific Requirements:

Freshmen entering WIU are to have completed the following high school coursework before entering the University:

a. English: four years with an emphasis on written and oral communication and literature.
b. Social Studies: three years with an emphasis in history and government.
c. Mathematics: three years of introductory through advanced algebra, geometry, trigonometry, or fundamentals of computer programming.
d. Science: three years of laboratory sciences which include biology, chemistry, physics, earth science, or other college preparatory sciences.
e. Other: two years to be selected from art, film, foreign language, music, speech, theatre, journalism, religion, philosophy, and vocational education.

In the event that new students have deficiencies in course-specific requirements, the University will consider alternative evidence or other academic activities in determining the mastery of the knowledge and skills in the area(s) of the deficiency.

Linkages Program

The Linkages Program is a concurrent enrollment program whereby students enroll at Western Illinois University (Macomb or Quad Cities campus) and a participating community college. The goal is to help students reduce tuition costs and ensure a seamless transition into a WIU major. The Linkages Program is designed for college-ready students who will take one 100-level or 200-level course at Western Illinois University and register for the remainder of their classes at the participating community college. The Linkages Program is also a way for students to “lock in” WIU’s 4-year cost guarantee and become part of the WIU community. A current list of participating community colleges is available from the WIU Undergraduate Admissions website at wiu.edu/linkages. Students who are interested in the Linkages Program must submit a complete application for admission to the University.
Other Special Admission Provisions

Applicants without a High School Diploma

Persons who do not have a high school diploma and are not currently attending high school may apply for admission if they have passed the General Educational Development (GED) test and have received the SAT or ACT scores required for regular admission. Applicants must submit official GED test scores and SAT/ACT scores to WIU Undergraduate Admissions. GED holders who have earned their GED five or more years ago are not required to provide an SAT or ACT score for admission. GED holders will meet with advisors who will discuss specific courses needed to meet any deficiencies in academic requirements.

Non-Degree Status

Any student who has earned a high school diploma or its equivalent may attend Western as a non-degree student without meeting the regular admission requirements under the following provisions:

1. The student may enroll in no more than six semester hours per term, and may accrue no more than 30 semester hours at WIU.
2. Students who have earned more than 30 semester hours of college credit at Western Illinois University are not normally eligible for non-degree status. However, such students may appeal to the Council on Admission, Graduation, and Academic Standards (CAGAS) for non-degree status.
3. Students currently on academic probation or suspension are ineligible for non-degree status.
4. Non-degree students must apply to CAGAS if they wish to be considered for degree candidacy.
5. Non-degree students are not eligible for financial aid.

Dual Enrollment High School Students

High school students may be accepted for special admission to enroll in University courses while concurrently enrolled in secondary school. The following provisions apply:

1. The student must meet regular admission criteria or have earned a cumulative unweighted 3.0 GPA or higher after at least three semesters of high school coursework.
2. The high school principal, counselor, or an appropriate designee must provide written support for the admission application.
3. Students must agree to pursue academic advising through the University Advising and Academic Support Center in Macomb or Quad Cities Student Services, as appropriate. International students must agree to pursue academic advising through the Center for International Studies.
4. Students may enroll for a maximum of two courses per term without permission of the Council on Admission, Graduation, and Academic Standards (CAGAS).
5. Only 100- or 200-level courses, in which the student meets WIU placement or prerequisite requirements, may be taken without permission of the appropriate department chairperson.
6. Exceptions to the above policy must be approved by CAGAS.

Visiting Students

A student who is a degree candidate at another institution may attend Western for one term under the following provisions:

1. The student must submit an application to Undergraduate Admissions for one semester.
2. The student must submit an official transcript from their last school attended verifying that he/she is in good status at that institution, OR
Complete a personally signed WIU Visiting Student Form attesting good standing at the last school attended.
3. Subsequent enrollment terms will be applied for through the Office of the Registrar as a re-entry student.

Transfer Students

General Requirements

Prospective transfer students who wish to apply should visit our website at wiu.edu/apply.
Transfer students at select two-year institutions may choose from two program options when transferring to Western Illinois University. Students may participate in the Transfer Admission Guarantee program or the traditional transfer program. Please speak with your advisor for specific details on each program, and for assistance to identify which program may best meet your needs.

Transcripts from each college and university attended must be sent directly from the institution(s) attended to Undergraduate Admissions at Western Illinois University. The recommended application deadline for students applying for Fall semester is August 1, and December 1 for Spring semester. Failure to report any previous college work may result in dismissal from the University. Transcripts received from other colleges and universities are utilized for admission purposes only and are not returnable or transferable.

Applicants who have earned 24 or more semester hours (36 or more quarter hours) of college work will be considered for admission on the basis of college performance only. A combined 2.0 on a 4.0 scale for all hours attempted from all institutions attended and good standing at the last college/university attended are required for admission.

Applicants who have earned fewer than 24 semester hours (36 or fewer quarter hours) of college work must meet the freshman admission standards, have a combined C average for all hours attempted from all institutions attended, and be in good standing at the last college/university attended. In addition, transfer students with fewer than 24 semester hours (36 quarter hours) must meet the high school course-specific requirements (p. 25).

Students who have earned fewer than 24 semester hours (36 or fewer quarter hours) of college work and who meet freshmen admission standards, but who are not in good standing at the last college/university attended, may be considered for admission by the Council on Admission, Graduation, and Academic Standards (CAGAS).

Transfer credits may be accepted from another college or university of recognized standing. If the applicant is not from a regionally accredited school, credits may be accepted only after examination or by validation through satisfactory work at WIU. WIU will not accept for transfer credit a course equivalent to ENG 180 or 280 in which below C level work was recorded at a previous institution. This provision does not apply to students entering under the Community College Compact Agreement or the IAI General Education Core Curriculum.

To earn a baccalaureate degree, a transfer student must complete a minimum of 120 semester hours of credit, of which 60 semester hours must be completed at Western Illinois University or another accredited four-year institution. Exceptions may be made for courses that are required for a student’s major, and when the course is not offered at the Western Campus for which the student is enrolled, nor is there distance education access through Western. A minimum of 42 semester hours credit must be earned in upper-division courses (courses numbered 300 or above) from Western Illinois University or another accredited four-year institution. The student must also fulfill the University’s General Education requirements (please see University General Education Curriculum, p. 70) and meet
graduation requirements for a degree from WIU (please see Graduation Requirements, p. 48).

New transfer students who appeal and are accepted on probation are required to earn a minimum 2.00 cumulative grade point average by the end of their first term of enrollment.

Transfer Admission Guarantee Program (TAG)

Students who intend to earn 30 credit hours or fewer from an accredited institution before attending WIU are eligible for the Transfer Admission Guarantee Program. It is highly recommended that students attending a community college complete the Associate of Arts or Associate of Science degree, but it is not required.

The TAG Program helps bridge the transfer process between accredited institutions and Western Illinois University. Additional information regarding the application process is available at wiu.edu/TAG.

Students who are interested in participating in the TAG Program while enrolled at their accredited institution must complete a WIU application indicating the future term they plan to attend.

At the end of each semester, the student will send official or unofficial transcripts or a grade report to WIU for Western's Audit of Requirements for Degree (WARD) Report and an evaluation of transfer credit.

Partner Schools (2+2 Degree Plans)

Western Illinois University is committed to facilitating the best transfer experience possible. 2+2 Degree Plans are designed to facilitate conversations between the student and his/her academic advisor at the community college. For more information, please contact Undergraduate Admissions at (877) PICK-WIU or by email at transfer@wiu.edu. For the most up-to-date list of WIU's partner schools, please see wiu.edu/2plus2.

Illinois Statewide Articulated Baccalaureate-Oriented Associate Degrees

Associate of Arts or Associate of Science and Art Degree Graduates—Compact Agreement

All Illinois public community colleges, the Eastern Iowa Community College District, Southeastern Community College (Iowa), Indian Hills Community College (Iowa), Iowa Valley Community College (Iowa), Kirkwood Community College (Iowa), Northeast Iowa Community College (Iowa), and Lincoln College have a written articulation commitment (compact agreement) from Western Illinois University. Additional agreements are being developed with other public and private colleges in Illinois and Iowa. Completion of an associate's degree in a baccalaureate-oriented program (A.A. or A.S.A.) at an accredited Illinois two-year institution (and selected other colleges) provides that the student will: (a) be accepted with junior standing, and (b) be considered to have completed the General Education requirements (University General Education Curriculum) at Western Illinois University. The associate's degree must include the equivalent of 60 semester hours with at least a C average. Western Illinois University will honor the community college commitment if Western Illinois University credit is used to complete the associate's degree.

Exceptions: An A.A. or A.S.A. degree graduate from an accredited Illinois two-year college (and other selected colleges) who is a candidate for a degree in the College of Arts and Sciences may be required to complete additional semester hours of coursework at WIU to satisfy college curriculum requirements.

Associate of Arts in Teaching (Early Childhood Education, Mathematics Education, Science Education, or Special Education) Degree Graduates

Western Illinois University is a participant in four statewide articulated Associate of Arts in Teaching (A.A.T.) degree programs—Early Childhood Education, Mathematics Education, Science Education, and Special Education. Completion of an A.A.T. degree must be in one of four fields (Early Childhood Education, Mathematics Education, Science Education, or
Special Education) and will only be accepted for transfer into a Teacher Education program in that same field. Students transferring into Western Illinois University with an A.A.T. must meet cumulative GPA requirements for being accepted into Western’s Teacher Education Program. Those completing the A.A.T. in Mathematics Education and Science Education must have a cumulative GPA of 2.5 from the community college at which they completed their program; and those completing the A.A.T. in Early Childhood Education and Special Education must have a cumulative GPA of 2.75.

Early Childhood/Mathematics/Special Education: Completion of an approved statewide articulated A.A.T. degree in Early Childhood Education, Mathematics Education, and Special Education at an accredited Illinois two-year institution provides that the student will: (a) be accepted with junior standing, and (b) be considered to have completed the General Education (University General Education Curriculum) requirements at Western Illinois University.

Science Education: Completion of an approved statewide articulated A.A.T. degree in Science Education at an accredited Illinois two-year institution provides that the student will be accepted with junior standing. Students must fulfill the University’s lower-division General Education requirements by completing: (1) the 37 s.h. Illinois Transferable General Education Core Curriculum, or (2) the 43 s.h. WIU General Education Curriculum.

Associate of Engineering Science or Associate of Fine Arts (Art, Art Education, Music, or Music Education) Degree Graduates

Completion of an approved statewide articulated Associate of Engineering Science (A.E.S.) or an Associate of Fine Arts (A.F.A.) in Art or Music degree at an accredited Illinois two-year institution provides that the student will be accepted with junior standing. Students must fulfill the University’s lower-division General Education requirements by completing: (1) the 37 s.h. Illinois Transferable General Education Core Curriculum, or (2) the 43 s.h. WIU General Education Curriculum.

Illinois Articulation Initiative (IAI)

Western Illinois University is a participant in the Illinois Articulation Initiative (IAI), a statewide agreement that allows transfer of the completed Illinois General Education Core Curriculum between participating institutions. Completion of the transferable General Education Core Curriculum at any participating college or university in Illinois assures transferring students that lower-division General Education requirements for a bachelor's degree have been satisfied. WIU will award transfer credit for Illinois General Education Core Curriculum courses taken at other institutions of higher education in accordance with the evaluation of transfer credit policy provided below. The following codes identify qualifying General Education courses: IAI C (Communication), IAI F (Fine Arts), IAI H (Humanities), IAI L (Life Sciences), IAI M (Mathematics), IAI P (Physical Sciences), and IAI S (Social/Behavioral Sciences). The appropriate IAI code follows the course descriptions of matching WIU courses in the Academic Departments, Programs, and Courses section of the catalog (p. 103). A complete listing of the WIU courses that match IAI Transferable General Education Core Curriculum course descriptions as of July 1, 2020, is provided on page 394.

Evaluation of Transferable General Education Credit

The following guidelines will govern the evaluation of transfer credit for the University General Education Curriculum.*

- **Courses taken at other accredited Illinois institutions.** Western Illinois University will accept for credit toward completion of the University General Education Curriculum courses taken at other accredited Illinois institutions of higher education. Students who have completed courses equivalent to those in the Illinois Transferable General Education Core Curriculum or WIU General Education Curriculum will be granted credit toward fulfilling WIU’s General Education Curriculum requirement. Students
may also be eligible to receive credit toward WIU's General Education requirement for completion of transfer coursework viewable at transfer.org/uselect.

- **Students who have completed an Illinois associate's degree.** Transfer students who complete an associate’s degree in a baccalaureate-oriented program (that meets general education requirements) at an accredited two-year institution (and selected other colleges) will: (a) be accepted with junior standing at Western Illinois University, and (b) be considered to have completed the University General Education Curriculum. The associate’s degree must include the equivalent of at least 60 s.h. with at least a C average. Students who have completed the Associate of Science, Associate of Arts in Teaching in Science Education, the Associate in Engineering Science, or the Associate in Fine Arts in Art or Music must fulfill the University’s lower-division General Education requirements by completing: (1) the 37 s.h. Illinois Transferable General Education Core Curriculum, or (2) the 43 s.h. WIU General Education Curriculum.

- **Students who have completed the Illinois Transferable General Education Core Curriculum but have not earned an associate’s degree.** Transfer students from accredited Illinois institutions of higher education who have not earned an associate’s degree in a baccalaureate-oriented program but have completed the Illinois Transferable General Education Core Curriculum will be considered to have completed the University General Education Curriculum. Western Illinois University will honor the Illinois Transferable General Education Core Curriculum if Western Illinois University credit is used to complete the Illinois Transferable General Education Core Curriculum.

- **Students who have not completed the Illinois Transferable General Education Core Curriculum or an associate’s degree.** Transfer students from accredited Illinois institutions of higher education who have not earned an associate’s degree or completed the Illinois Transferable General Education Core Curriculum, but have been granted at least 30 semester hours of transfer credit by Western Illinois University, must complete one of the following: (1) the 37 s.h. Illinois Transferable General Education Core Curriculum, or (2) the 43 s.h. WIU General Education Curriculum. If fewer than 30 semester hours of transfer credit are granted, the student must complete one of the following: (1) the 37 s.h. Illinois Transferable General Education Core Curriculum plus an additional 6 s.h. from any approved IAI or WIU General Education course, or (2) the 43 s.h. WIU General Education Curriculum. Students who have satisfactorily completed courses within the Illinois Transferable General Education Core Curriculum will be granted credit towards fulfilling comparable lower-division General Education requirements at WIU.

- **Non-accredited and out-of-state institutions without a compact agreement.** Individuals who have earned credits at non-accredited or out-of-state institutions will be evaluated on a course-by-course basis.

- **Students with quarter-system credits.** The University will waive a fraction of a semester hour of the minimum hours required from a specific area of the University General Education Curriculum for students with quarter-system credits.

---

*1. In addition to the General Education Curriculum, students must complete major, minor, college-specific, and other requirements to earn the baccalaureate degree.
2. Coursework completed at community colleges and lower-division coursework completed at four-year institutions will transfer to WIU as lower-division credit, even if the equivalent WIU course is offered as an upper-division course. Lower-division transfer coursework will satisfy General Education requirements even though the equivalent WIU course is upper-division.
3. To satisfy the Communication Skills writing requirement, transfer students must have earned a grade of C or better in each of the courses noted as equivalent to ENG 180 and ENG 280 unless waived by the Community College Compact Agreement or the IAI Transferable General Education Core Curriculum.
Evaluation of Baccalaureate Major Transfer Credit

The following guidelines will govern the evaluation of transfer credit for the baccalaureate major:**

- Western Illinois University may accept for credit toward completion of a baccalaureate major courses taken at other accredited institutions of higher education. Transfer students who have completed courses in a transferable IAI baccalaureate major program that are equivalent to courses required for the appropriate WIU major will be granted direct equivalent credit toward completion of the WIU major. Students may also be eligible to receive credit toward major requirements for the completion of transfer coursework included at itransfer.org.
- Suggested coursework in a transferable IAI baccalaureate major that is determined not to have a WIU equivalent will be accepted as a Department Elective. Electives may apply towards completing the minimum 120 s.h. requirement for the baccalaureate degree. The major department will determine if such courses may apply toward completing specific requirements for the major.
- Individuals who have earned credits at non-accredited or foreign institutions will be evaluated on a course-by-course basis.

** Coursework completed at community colleges and lower-division coursework completed at four-year institutions will transfer to WIU as lower-division credit, even if the equivalent WIU course is offered as an upper-division course.

Reverse Transfer Credit

Pursuant to the Student Transfer Achievement Reform Act [110 ILCS 150], Reverse Transfer is a program designed for students who transferred from an Illinois public community college to WIU, but without earning their associate's degree prior to transfer. Transfer students with at least 15 transferrable credit hours from a public community college in Illinois are eligible for reverse transfer consideration upon achieving junior standing (60 hours earned). Through reverse transfer, eligible students may transfer WIU courses back to the community college in order to determine if an associate's degree may be awarded, while pursuing their baccalaureate degree. To opt-in to the Reverse Transfer program, visit wiu.edu/registrar/revtransfer.php.

Veterans

Veterans returning from at least one year of active military service who have received an honorable discharge will be admitted to Western Illinois University without regard to previous academic performance provided that WIU is the first school that the veteran attends after leaving the service. Applicants in this category are required to have graduated from a recognized high school or to have earned a High School Equivalency Certificate. Applicants must submit the same academic documents required of those not in this admission category. In addition, veterans must submit a copy of form DD-214. Documents can be mailed or emailed.

These provisions also apply to individuals who have served for at least a year in VISTA, the Peace Corps, or similar programs.

International Students

To be considered for undergraduate admission, international applicants must meet the following requirements:

1. If applying as a freshman, hold an academic credential that is comparable to a U.S. high school diploma and have a cumulative grade point average greater than or equal to 2.5 on a 4.0 scale.
Admission

2. If applying as a transfer student with the equivalent of 24 or more semester credit hours at a recognized post-secondary institution, have a cumulative grade point average greater than or equal to 2.0 on a 4.0 scale on all post-secondary academic coursework.

3. If English is not the student’s native language, English proficiency must be demonstrated prior to beginning the academic program at Western Illinois University. Evidence of English proficiency must be dated no more than two years prior to the date of matriculation to WIU. Evidence of English proficiency may be met by one of the following means:

- TOEFL score of 533 or greater (paper version/PBT) or 73 or greater (internet based version/iBT).
- IELTS score (academic format) of 6.0 or better.
- PTE Academic score of at least 49.
- ITEP score of at least 3.7.
- Freshman: Have studied in residence a minimum of two years at a state recognized U.S. high school and earned at least a 2.50 GPA (on a 4.00 scale) in an academic core curriculum.
- Transfer: Have studied in residence at a regionally accredited U.S. post-secondary institution and have earned at least 24 semester hours of transferable degree credit, which must include ENG 180 and 280 with a grade of “C” or higher; OR earned an Associate of Arts, Associate of Science, or Associate of General Studies degree while completing the equivalent of ENG 180 and 280 with a grade of “C” or higher.
- Completion of a minimum of two academic years of full-time study at the secondary or post-secondary level in a country where English is the native language (not merely the language of instruction), immediately prior to the proposed date of enrollment.
- Graduation from Western's English as a Second Language (WESL) program.
- Obtain a satisfactory score on Western's English as a Second Language (WESL) placement test.

Only students whose native language is English are exempt from the English proficiency requirements. All students who have not provided evidence of English language proficiency before arrival on campus must take the WESL placement test during New International Student Orientation week.

Students who meet the minimum requirements but need further English language instruction as assessed by the School of Global Education and Outreach administrative staff and/or individual undergraduate departments will be required to take the WESL placement test upon arrival to campus and may be required to enroll in and graduate from WESL prior to beginning their academic program.

International applicants need to refer to the School of Global Education and Outreach website at wiu.edu/global_education/global.php for information about submission dates and the international application process. Inquiries from international applicants may be directed to International-Ed@wiu.edu.

United States citizens living abroad and undocumented persons domiciled in the United States who fall under House Bill 60 (students who have been in high school for three years in the State of Illinois) are not considered international applicants for purposes of this requirement and should contact Undergraduate Admissions.

Bachelor of Arts in General Studies Degree

The Bachelor of Arts in General Studies degree program provides place-bound students an opportunity to earn a regionally accredited bachelor's degree that can be completed fully online, and requires no on-campus attendance. The General Studies program allows for
maximum transferability of courses and is designed to meet the student’s individual needs. A major is not designated for this highly individualized and flexible degree program, but students may earn academic minors. Please see page 217 of this catalog or wiu.edu/bgs for additional information on the Bachelor of Arts in General Studies degree program.

**Exceptional Cases**

Adults who wish to enroll as full-time or part-time students but do not wish to enroll in any of the special admission categories described above should email or call Undergraduate Admissions and explain their circumstances and plans. The office will explain the various options available and recommend those most appropriate.

**Administrative Admission**

If a prospective student does not meet admission requirements or has been denied admission, any member of the University staff, faculty, administration, or Board of Trustees may recommend the student for admission consideration when there are mitigating circumstances.

**Credit by External Examination**

Western Illinois University grants college-level credit to students successfully completing any of the programs listed below prior to enrollment at Western. Students can receive up to 30 semester hours of credit for graduation from military, external testing, or a combination of both.

- College Level Examination Program (CLEP)
- Defense Activity for Nontraditional Education Support (DANTES)
- International Baccalaureate (IB)
- Proficiency Examination Program (PEP)
- Seal of Biliteracy (HB 4330)
- Advanced Placement (AP) — note this is not included in the 30 s.h. limit

For specific information related to score requirements and academic areas covered by these programs, please contact Undergraduate Admissions, Sherman Hall 115, telephone (309) 298-3157 or wiu.edu/admissions.

**Concurrent Admissions Program (ConAP)**

ConAP is a program for students who are planning to enlist directly into military service after high school or community college. Sponsored by the U.S. Army Recruiting Command and the Servicemembers Opportunity Colleges, the program allows individuals to seek admission to a college or university at the same time they enlist in the Army or Army Reserve. Enrollment is deferred until completion of active military service. The student must meet admission and degree requirements of the catalog in effect at the time of enrollment in classes at WIU. In addition, veterans must submit a copy of form DD-214. Enrollment of a ConAP student who has attempted college coursework elsewhere is subject to academic performance standards stated in the catalog. A ConAP student receiving less than an honorable discharge must meet regular freshman and/or transfer admission requirements. For additional information, please contact Undergraduate Admissions, Sherman Hall 109, telephone (309) 298-3157.

**Readmission**

Any former undergraduate who has not attended Western Illinois University for one or more Spring or Fall terms must submit an undergraduate readmission form to the Office of the Registrar, Sherman Hall 110. An electronic application may be accessed online at wiu.edu/registrar. If the student has taken any college-level coursework since attending
Admission

WIU, he or she must have an official transcript of this work sent directly to the Office of the Registrar. A student who has been academically suspended and inactive one regular semester following the suspension will be readmitted without appeal to the University by completing the readmission application form. The student will be placed on academic probation and required to meet specific stipulations assigned by the University. A student who has been academically dismissed (has one or more academic suspensions) can attend Western only during the Summer terms. If at the end of any Summer term, the student’s cumulative grade point average is equivalent to 2.00 or higher, the student may continue at Western.

Readmission applications and necessary transcripts must be on file at least two weeks prior to the term for which the student is applying.

Students who re-enter the University after an absence of two regular terms must meet the requirements of the current catalog unless they receive written permission from the dean of the college in which they are enrolled to continue under an earlier catalog. This written permission must be filed in the Office of the Registrar within nine weeks of matriculation, and the catalog chosen may not predate re-enrollment by more than three years.

New Start Policy

This policy is designed for former WIU students with a severe cumulative honor point deficiency who have not attended WIU for a minimum of three years.

1. Former WIU students who have not attended WIU for at least three years may petition the Council on Admission, Graduation, and Academic Standards (CAGAS) to have prior grades excluded from subsequent grade point average calculations. Such appeals must be received and approved prior to the student’s re-entry to WIU.

2. All hours earned will count toward total hours for graduation.

3. All students must have at least a C average in all WIU courses counted toward the major and the minor for graduation.

The New Start provision may be exercised only once, and all grades that a student has received at WIU will be used to determine class rank and honors. Any student under this policy must complete a minimum of 30 semester hours after returning to WIU to qualify for graduation. All courses taken and grades earned will appear on the transcript.

Immunization Policy

Illinois state law and University policy require all enrolled students to provide official written evidence to Beu Health Center of current immune status with respect to certain communicable diseases. Effective July 21, 2016, the diseases to which all enrolled students must show immunity are meningitis, measles, mumps, rubella, tetanus, and diphtheria.

This policy is implemented under the authority of the College Student Immunization Act (110 ILCS 20) and associated rules (Title 77, Chapter 1, Subchapter k, Part 694). Please refer to wiu.edu/vpas/policies/immun.php for Western Illinois University’s current Immunization Protocol policy.
Tuition and Fees

*Tuition and University fees are subject to change without notice by action of the Western Illinois University Board of Trustees.*

Western Illinois University offers guaranteed tuition and fees, as well as guaranteed room and meal plan rates for each new class of entering students. The guaranteed rates remain in effect for four years as long as students maintain continuous enrollment. Students who finish a degree program and who continue at the University will be assessed the appropriate rate in effect at the time of their next enrollment. The tuition and fee rates for new undergraduate students (first enrolled Fall 2020, Spring 2021, or Summer 2021) appear below. Tuition and fee rates for returning students may be obtained by contacting the Billing and Receivables Office located in Sherman Hall 106, telephone (309) 298-1831, or at *wiu.edu/billing*.

The 2020-2021 University fee rate is $94.69 per semester hour at the Macomb campus and $42.33 per semester hour at the Quad Cities campus. Summer fee rates may be obtained at *wiu.edu/billing*.

Health insurance will also be assessed for students enrolled nine or more hours. The 2020–2021 student insurance rate is $795.00 per semester.

Dual Enrollment High School Students are not assessed University fees. For additional information regarding this admission status, please see *wiu.edu/student_services/undergraduate_admissions/prospective/nontraditional.php*.
Miscellaneous Fees and Charges

_Audited Courses:_ Audited courses are assessed tuition and fees per hour based upon the appropriate rate schedule.

_Orientation:_ A non-refundable Orientation Fee is assessed to first-time students attending the Macomb campus. This fee encompasses publications and programs coordinated by Admissions.

_Transcript:_ A $15 non-refundable transcript fee will be assessed to all new matriculating students. This fee entitles the student to unlimited paper transcripts. An additional charge applies to expedited transcripts.

On-Campus Housing

Because living in the residence hall is such an important part of a student’s college experience, all freshman and sophomore students (defined as fewer than 60 credit hours) are required to live in a University residence hall. All exceptions to this policy must be approved in writing through the petition process.

Students residing with parents or a legal guardian within a 40-mile radius of Macomb; veterans with one year of active service; students who are married, or in a documented domestic partnership; or students who have primary custody of dependent children are exempt from this policy but must contact University Housing and Dining Services in writing to obtain an official exemption. All exemptions to this policy must be approved in advance by submitting a petition form to University Housing and Dining Services, Seal Hall. Freshman and sophomore students not in compliance with the University’s residency policy will be restricted from registering for classes and may be subject to the appropriate financial charges for the period they were not in compliance with the policy. Residence hall applications/contracts are for the full academic year for all students.

Students of junior and senior standing (at least 60 credit hours) may reside in accommodations of their choosing.

Western Illinois University offers guaranteed room and meal plan rates as well as guaranteed tuition rates for each new class of entering students. The guaranteed rates remain in effect for four years as long as students maintain continuous enrollment. The 2020–2021 residence hall room and meal plan rates per semester for new students appear below. Room and meal plan rates are subject to change without notice by action of the WIU Board of Trustees.

Expected Expenses

A full-time, domestic, new undergraduate student with 15 semester hours could expect to incur the following expenses during the 2020–2021 academic year:
Amounts are subject to change without notice by action of the WIU Board of Trustees.

A cost estimator, which allows individuals to obtain cost estimates based upon specific student choices, is available on the Billing and Receivables Office website, wiu.edu/billing.

**Billing System**

The student receivables system brings University charges and credits into one account. The Billing and Receivables Office will compile the latest information from University offices (i.e., Financial Aid, Registrar, and University Housing and Dining) and prepare the monthly billing statement. A finance charge of 1% per month on the unpaid balance from the prior month's billing will be assessed. A student with an account balance will be denied registration and academic transcripts. Fall semester charges are due August 28, Spring semester charges are due January 28, and Summer charges are due June 28.

The University bills by semester, not by academic year. Actively enrolled students will receive their billing statement notification via WIU email. Notification will be sent to the student at his/her WIU e-mail address when each bill is ready to view on STARS. Students may establish additional e-mail addresses to which the notification may also be sent on STARS. The e-mail will include the account balance and the due date. Details must be viewed on STARS. Failure to view a bill will not excuse finance charge assessments or late payment of the account. It is the student's responsibility to correct and update his/her address and e-mail addresses on STARS.

Automated Payment Plan: The Automated Payment Plan provides students a structured option for budgeting educational expenses over several months. The monthly payments will be deducted from a bank account on the 5th of each enrollment month. The 1% finance charge listed in the basic restrictions is not assessed on the contract amount; however, there is a $2 per month transaction fee to cover processing. Additional charges incurred above the contract amount will be billed and subject to the 1% finance charge assessment if not paid by the due date. A completed agreement form on STARS is required to participate in this plan. Students and individuals with login information to Parent & Guest Access may complete the B/R Automated Payment Plan on STARS. Other payment options can be found on our web page at wiu.edu/payments.

**Student Health Insurance**

The student health insurance program is administered in cooperation with Beu Health Center through the Student Health Insurance Office. Students registered and assessed fees for nine hours or more, and all graduate assistants under contract to the University taking one hour or more of any type of classes, are automatically assessed the insurance fee. Students taking WIU—Quad Cities, distance and outreach, or web-based classes, as well as students with fewer than nine hours of Macomb campus classes, are not automatically assessed the student health insurance fee but may be able to purchase insurance. Additional information may be
obtained by contacting the Student Health Insurance Office, located in the Lower Level of Beu Health Center, at (309) 298-1882.

Students whose coverage meets or exceeds the University waiver criteria may apply to opt out of the student insurance program by completing the online waiver application. Contact the Student Health Insurance Office at (309) 298-1882 for information on the waiver process. The final deadline for filing an insurance waiver form is the 10th day of the Fall or Spring semester or the 6th day of the Summer session.

University Credit/Refund Policy

The following refund/credit policy is for regularly scheduled classes. Refund/credit periods for irregularly scheduled classes and independent study courses offered through the School of Global Education and Outreach vary. Please refer to wiu.edu/registrar for more detailed information.

Dropped Course

Students enrolled in any combination of sessions, either on-campus or off-campus, must drop from the desired class within that session’s 100 percent refund/credit period to avoid assessment of tuition and mandatory fee charges. Students will be assessed full tuition and fees in accordance with the University’s tuition and fee schedule for classes dropped after the 100 percent refund/credit period. The 100 percent refund/credit periods for regularly scheduled classes are as follows:

Fall and Spring semesters: on or before the 10th class day of the semester.

Summer session: on or before the 6th class day of the session.

Total University Withdrawal

Procedures: Any student making a TOTAL University withdrawal MUST withdraw within established refund/credit dates to avoid charges. Prior to the first day of the semester, a student may completely withdraw from the University through STARS. On or after the first day of the semester, in order to completely withdraw from the University, students who are classified as full-time students must contact the Student Development Office [(309) 298-1884] to withdraw from the University.

A student may withdraw during the first ten weeks of a regular semester. After the first ten weeks, a student may not withdraw from the University unless there are exceptional and documented circumstances. Withdrawal may affect a student’s eligibility for current or future financial aid.

Fall and Spring Semesters: A student who has registered for regularly scheduled classes and officially and TOTALLY withdraws from Western Illinois University in accordance with established University procedures on or before the tenth class day of the semester shall receive credit for all tuition, mandatory fees, and pro-rated credit for room and meal plan charges.

Students who officially and TOTALLY withdraw after the tenth day of the semester shall be entitled to a refund/credit of tuition, mandatory fees, and room and meal plan charges as follows:

<table>
<thead>
<tr>
<th>Week</th>
<th>Refund Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Remainder of Week 3</td>
<td>80% refund</td>
</tr>
<tr>
<td>Week 4</td>
<td>70% refund</td>
</tr>
<tr>
<td>Week 5 and Week 6</td>
<td>60% refund</td>
</tr>
<tr>
<td>Week 7 and Week 8</td>
<td>50% refund</td>
</tr>
<tr>
<td>Week 9</td>
<td>40% refund</td>
</tr>
<tr>
<td>Week 10</td>
<td>30% refund</td>
</tr>
<tr>
<td>After Week 10</td>
<td>0% refund</td>
</tr>
</tbody>
</table>
Summer Session: The University designates shorter withdrawal credit periods for the Summer session and special courses and short courses scheduled during that term. Withdrawal credit periods are available on the Office of the Registrar website at wiu.edu/registrar.

Residency Status Regulations

In-state and out-of-state tuition is assessed based on the following regulations. All questions related to residency may be directed to the Office of the Registrar, Sherman Hall 110, telephone (309) 298-1891.

1. Definitions

For purposes of this regulation, the following definitions pertain:

a. An “adult student” is a student who is eighteen or more years of age.

b. A “minor student” is a student who is less than eighteen years of age.

c. An “emancipated minor student” is a completely self-supporting student who is less than eighteen years of age. Marriage or active military service shall be regarded as effecting the emancipation of minors, for the purposes of this regulation.

d. “Residence” means legal domicile. Voter registration, filing of tax returns, proper license and registration for driving or ownership of a vehicle, and other such transactions may verify intent of residence in a state. Neither length of University attendance nor continued presence in the University community during vacation periods shall be construed to be proof of Illinois residence. Except as otherwise provided in this regulation, no student, parent, or legal or natural guardian will be considered a resident unless the student, parent, or guardian maintains a bona fide and permanent residence in Illinois, except when temporarily absent from Illinois, with no intention of changing his or her legal residence to some other state or country.

2. Residency Determination

The University shall determine the residency status of each student enrolled in the University for the purpose of determining whether the student is assessed in-state or out-of-state tuition. Each applicant for admission shall submit at the time of application evidence for determination of residency in accordance with this regulation. The office responsible for admissions shall make a determination of residency status.

a. If a non-resident is classified by error as a resident, a change in tuition charges shall be applicable beginning with the term following reclassification. If the erroneous resident classification is caused by false information submitted by the student, a change in tuition charges shall be applicable for each term in which tuition charges were based on such false information. In addition, the student who has submitted false information may be subject to appropriate disciplinary action.

b. If a resident is classified by error as a non-resident, a change in tuition charges shall be applicable during the term in which the reclassification occurs, provided that the student has proven residency in accordance with this regulation.

3. Residency Requirements

a. Adult Students

To be considered a resident, an adult student must be a bona fide resident of Illinois as defined in 1.d. In the case of adult students who reside with their parent(s), the student will be considered a resident if one of the parents has established and is maintaining a bona fide residence in Illinois.

To be considered a resident, an adult student not residing in Illinois must be a bona fide resident of one of the approval states outside of Illinois. The Board of Trustees will approve the appropriate states which will be listed in the cost section of the official Western Illinois University catalog.
b. Minor Students
The residence of a minor student shall be considered to be the same as that of his/her parents or that of either parent if the parents are separated or divorced or that of his/her legally appointed or natural guardian such as a grandparent, adult brother or adult sister, adult uncle, or adult aunt by whom the minor has been supported.

c. Emancipated Minors
If emancipated minors actually reside in Illinois, such minors shall be considered residents even though their parents or guardians may not reside in Illinois.

d. Minor Children of Parents Transferred Outside the State of Illinois
The minor children of persons who have resided in Illinois immediately prior to a transfer by their employers to some location outside of the State of Illinois shall be considered residents. This rule shall apply, however, only when the minor children of such parents enroll in the University within five years of the time their parents are transferred by their employer to a location outside the State of Illinois.

e. Married Students
A non-resident student, whether a minor or adult, who is married to a person who meets and complies with all of the applicable requirements of these regulations to establish residence status, shall be classified as a resident.

f. Armed Forces Personnel
Non-residents of Illinois who are on active duty with one of the services of the Armed Forces of the United States who are stationed in Illinois and who submit evidence of such service and station, as well as the spouses and dependent children of such persons, shall be considered residents as long as such persons remain stationed in Illinois and the spouses and/or dependent children of such persons also reside in Illinois. If such persons are transferred to a post outside the continental United States but such persons remain registered at the University, residency status shall continue until such time as these persons are stationed within a state other than Illinois within the continental United States. Effective July 1, 2015, students using benefits under the federal Post-9/11 Veterans Educational Assistance Act of 2008 (Chapter 33), the All-Volunteer Force Educational Assistance (Chapter 30), or any subsequent variation of those Acts, WIU shall deem that student an Illinois resident for tuition purposes regardless of the covered student’s state of residence.

g. Staff Members of the University, Allied Agencies, and Faculty of State-Supported Institutions in Illinois
Staff members of the University and of allied agencies, and faculties of state-supported institutions of higher education in Illinois, holding appointment of at least one-quarter time, and their spouses and dependent children, shall be treated as residents.

h. Teachers in Public and Private Illinois Schools
Teachers in the public and private elementary and secondary schools of Illinois shall, if subject to payment of tuition, be assessed at the resident rate during any term in which they hold an appointment of at least one-quarter time, including the summer session immediately following the term in which the appointment was effective.

4. Residency Status Appeal Procedure
Students who take exception to their residency status classification shall pay the tuition assessed but may appeal to the University Registrar by proving Illinois residency in accordance with these regulations. The appeal must be filed within sixty (60) calendar
days from the date of the tuition bill or the student loses all rights to a change of residency status for the term in question. If the student is dissatisfied with the ruling in response to the appeal made within said period, the student may file a written appeal within thirty (30) calendar days of receipt of the decision of the Administrative Hearing Committee, which shall consider all evidence submitted in connection with the case and render a decision which shall be final.

5. Special Situations

The President may, in special situations, grant residency status to categories of persons otherwise classified as non-residents under this regulation.
State and federal student loans and grants, as well as scholarships, work-study programs, and campus jobs, are available to help ease the cost of attending college. Seventy-six percent of WIU students receive some type of financial assistance. Financial assistance is traditionally awarded in the form of scholarships, grants, loans, and student employment.

Scholarships

Scholarships at WIU provide educational opportunities for many students. Through the generosity of alumni, faculty and staff, friends, parents, corporations, and foundations, WIU disburses several million dollars in scholarships each year. Scholarship opportunities exist for all class levels, and most are based on academic achievement. For additional scholarship information, please contact the Office of University Scholarship Activities, Sherman Hall 308, telephone (309) 298-2001, email sc-office@wiu.edu, or wiu.edu/scholarships.

The Department of Military Science (ROTC) has two-, three-, and four-year federal scholarships that pay 100 percent of tuition and fees, or up to $10,000 of room and meal plan, plus $1,200 annually for books and an annual stipend ranging between $4,000 and $5,000. In addition to the federal scholarships, ROTC has 40 Illinois ROTC tuition waivers which cover full tuition and some fees for up to four years. (Additionally, students who transfer from an Illinois Community College to WIU and enroll in ROTC can apply for a tuition waiver that covers full tuition and some fees for four years.) For additional information, please contact the Department of Military Science in Horrabin Hall 103, telephone (309) 298-1161.

Talent Grants and Tuition Waivers are awarded to students based on demonstrated talent in music, art, theatre, dance, and skills such as leadership or academic achievement. Students majoring in Art, Music, or Theatre should contact the appropriate academic department to get information about the availability of talent grants. Awards based on leadership and academic achievement are usually given after students have generated a GPA at WIU, and/or become involved with various campus organizations.

Veterans Benefits: Students who are eligible to receive benefits under the Montgomery GI Bill® are certified by a designated school official. The Illinois Veterans Grant and the Illinois National Guard Grant are administered through the Financial Aid Office. Questions related to such benefits should be directed to the Veterans Resource Center located at 333 North Ward Street, telephone (309) 298-3505. GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government Web site at https://www.benefits.va.gov/gibill.

Athletic Scholarships: Western Illinois University competes at the NCAA Division I level in the Summit League and Missouri Valley Football Conference. Athletic scholarships are highly competitive. Prospective student-athletes interested in scholarship opportunities should contact the respective coaches/recruiting coordinators in their varsity sport of interest.

Grants and Loans

Information about federal and state student grants and loans is available from the Office of Financial Aid, Sherman Hall 127, telephone (309) 298-2446. Financial aid advisors are available to answer questions and to help with the application process. Most grants and loans are awarded on the basis of financial need as determined from the Free Application for Federal Student Aid (FAFSA), which is available through the Financial Aid website at wiu.edu/fa. Students are encouraged to apply early since some funds are limited.

Employment

Most students enrolled for at least six semester hours during the academic year can apply for on-campus, regular student employment. Some students can qualify for Federal Work-Study positions based on financial need as determined by the Free Application for Federal
Student Aid (FAFSA). Students should not work more than 20 hours per week while classes are in session. Information on regular student employment and Federal Work-Study jobs is available online at wiu.edu/studentemployment. For additional information on student employment opportunities, please contact the Student Employment Office, Sherman Hall 127, telephone (309) 298-1996.

Senior Citizen Tuition Waivers

Students accepted for admission who are 65 years of age or older, and who are legal residents of Illinois with an annual combined household income less than the threshold amount provided in Section 4 of the “Senior Citizens and Disabled Persons Property Tax Relief and Pharmaceutical Assistance Act”, shall be permitted to enroll in regularly scheduled courses, on a credit or noncredit basis, without the payment of tuition and mandatory fees provided that available classroom space exists and tuition-paying students enrolled constitute the minimum number required for the course. This regulation shall not apply to courses offered only on a noncredit basis or to courses designed especially for senior citizens. Please contact Financial Aid, Sherman Hall 127, telephone (309) 298-2446, for further information.
Family Educational Rights and Privacy Act (Notification to Students) Policy

Western Illinois University, in full compliance with the Family Educational Rights and Privacy Act of 1974, shall make educational records available to students upon request. Likewise, in accordance with the law, individually identifiable educational records will not be released to other than authorized individuals without written consent of the student. Students have the right to file complaints with the Family Educational Rights and Privacy Act (FERPA) Office concerning alleged failures by the institution to comply with the Act.

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. (An “eligible student” under FERPA is a student who is 18 years of age or older or who attends a postsecondary institution.) These rights include:

1. The right to inspect and review the student’s education records within 45 days after the day Western Illinois University receives a request for access. A student should submit to the registrar, dean, head of the academic department, or other appropriate official, a written request that identifies the record(s) the student wishes to inspect. The school official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the school official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.

2. The right to request the amendment of the student’s education records that the student believes is inaccurate, misleading, or otherwise in violation of the student’s privacy rights under FERPA.

A student who wishes to ask the school to amend a record should write the school official responsible for the record, clearly identify the part of the record the student wants changed, and specify why it should be changed.

If the school decides not to amend the record as requested, the school will notify the student in writing of the decision and of the student’s right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

3. The right to provide written consent before the university discloses personally identifiable information (PII) from the student’s education records, except to the extent that FERPA authorizes disclosure without consent.

The school discloses education records without a student’s prior written consent under the FERPA exception for disclosure to school officials with legitimate educational interests. A school official is a person employed by Western Illinois University in an administrative, supervisory, academic, research, or support staff position (including law enforcement unit personnel and health staff); a person serving on the board of trustees; or a student serving on an official committee, such as a disciplinary or grievance committee. A school official also may include a volunteer or contractor outside of Western Illinois University who performs an institutional service or function for which the school would otherwise use its own employees and who is under the direct control of the school with respect to the use and maintenance of PII from education records, such as an attorney, auditor, or collection agent or a student who is volunteering to assist another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibilities for Western Illinois University.

Upon request, the school also discloses education records without consent to officials of another school in which a student seeks or intends to enroll. The Access to and Release of Student Information Policy (wiu.edu/policies) includes additional disclosures that are permitted by FERPA without prior written consent.
4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by Western Illinois University to comply with the requirements by FERPA. The name and address of the Office that administers FERPA is:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, DC 20202

Western Illinois University considers the following categories to be directory information, and, as such, may release it to any or all inquirers in such forms as news releases, directories, or computer address lists:

1. the student's name,
2. school and home address,
3. WIU e-mail address,
4. telephone number,
5. major field of study,
6. dates of attendance,
7. full- or part-time status,
8. classification,
9. degrees, honors, and awards received (including Dean's List) and date granted,
10. anticipated graduation date,
11. most recent previous educational agency or institution attended,
12. participation in officially recognized activities and sports, and
13. for members of athletic teams, weight and height.

Students who do not wish this information to be released may prevent such release by submitting an Exclusion of Directory Information Form to the Office of the Registrar, Sherman Hall 110. The request for exclusion of directory information will be honored indefinitely; however, it does not affect directory information already published or released. By requesting exclusion of directory information, students should be aware that all future requests for this information by anyone other than school officials with legitimate educational interests will be refused.

University Graduation Requirements

Students at WIU may graduate with Bachelor of Arts, Bachelor of Business, Bachelor of Fine Arts, Bachelor of Liberal Arts and Sciences, Bachelor of Music, Bachelor of Science, Bachelor of Science in Education, Bachelor of Science in Nursing, or Bachelor of Social Work degrees. Degrees are awarded at the end of each semester.

Specific requirements for each degree will be found in the catalog descriptions under the appropriate colleges and departments. In addition, all students who wish to graduate must:

1. **General Education:** Complete all the General Education Curriculum requirements.

2. **Grade Point Average (GPA):** Earn a minimum overall grade point average of 2.00 (C), and a minimum grade point average of 2.00 or better in their major and minor or comprehensive major. (See individual college requirements.)

3. **Major/Minor:** Complete the departmental requirements for their major or comprehensive major; complete at least 16 semester hours for a minor. A comprehensive major must include at least 48 semester hours. A major must include at least 32 semester hours.

   **Note:** A maximum of five semester hours of credit of a single, specific course, required by both a major and a minor, may be used by a student to fulfill requirements for both that major and minor when the major and minor are from different programs. This course cannot also be used to satisfy University General Education.

4. **Foreign Language/Global Issues:** Fulfill the foreign language/global issues requirement for their major. (See p. 64.)

5. **Writing Instruction in the Disciplines (WID):** Fulfill the Writing Instruction in the Disciplines (WID) requirement in their major. (See p. 61.)

6. **Semester Hours:** Earn a minimum of 120 semester hours of credit. At least 60 of those hours must be from a four-year college or university; at least 42 must be earned in upper-division courses (numbered 300 and above, or their equivalent) from a four-year institution.

7. **Residency:** Complete at least 30 semester hours while in residence at WIU, at least 15 of which must be taken in the year prior to graduation. No more than 10 of these hours can be taken in Pass/Fail or non-credit courses. Credit earned by proficiency examination does not satisfy residence requirements.

8. **Military Credit/External Testing:** Count no more than 30 semester hours toward credit for graduation by military credit, external testing, or a combination of these.

9. **First Year Experience:** Complete the First Year Experience requirement. (See p. 58.)

10. **Math Competency:** Demonstrate their ability to use baccalaureate-level skills in Mathematics. (See University General Education Requirements, p. 70.)

11. **Graduation Application:** File an application for graduation in the Office of the Registrar during the last semester as a junior.

12. **University Encumbrances:** Clear all financial and administrative obligations to the University before proof of degree will be provided.

Catalog Use

**Former students:** A student who re-enters the University after an absence of two or more semesters, excluding Summer session, must meet the requirements of the current catalog unless he or she receives written approval from the dean of the college in which he or she is enrolled to continue under an earlier catalog. This written permission must be filed in the Office of the Registrar within nine weeks of matriculation, and the catalog chosen may not predate re-enrollment by more than three years.

**Transfer students:** Transfer students accepted for admission to Western Illinois University may elect to meet the requirements of the catalog in effect when they first enrolled at a community college or other four-year institution, provided this Western Illinois University catalog does
not antedate the catalog in effect upon their initial enrollment at Western by more than three years. They may also elect to meet the requirements of the current catalog. Catalog choice must be made within nine weeks of matriculation at Western Illinois University.

**Certificate of Undergraduate Study**

A certificate of undergraduate study is an approved, specific set of upper-division undergraduate courses focused around an interdisciplinary- or single discipline-specific theme. These certificates are designed to offer added value to students seeking a degree, advance employment opportunities, further personal growth, or additional knowledge in a focused subject.

Some certificates of undergraduate study may have specific admission requirements. Transfer coursework may not be used to fulfill the requirements of a certificate. Courses taken to satisfy certificate requirements may be used to satisfy baccalaureate degree requirements at the University. Notation of a specific certificate of undergraduate study will be posted on the student's transcript upon successful completion of a bachelor's degree.

**Commencement and Issuance of Diploma**

Students who anticipate completion of academic requirements for graduation are eligible to participate in Commencement ceremonies. Although attendance at Commencement ceremonies is optional, students who wish to attend must indicate this on the graduation application and have that application on file in the Office of the Registrar no later than 60 days prior to Commencement exercises. Students who anticipate graduating at the end of the Spring or Summer term attend the May ceremony; students who anticipate graduating at the end of the Fall semester attend the December ceremony.

Diplomas will be mailed to all students who have completed all graduation requirements and who do not have any University holds.

**Degrees with Distinction and Honors Scholar**

**Academic Distinction**

Candidates for the baccalaureate degree who have done outstanding work may graduate with academic distinction upon completion of their degree programs. To qualify for academic distinction, students must have completed at least 60 semester hours of letter-graded coursework (including S/U) at WIU, in addition to meeting the grade point requirements described below.

Students who have completed all of their coursework at WIU and who have a cumulative grade point average of 3.60 to 3.74 for all work completed will graduate “Cum Laude.” Candidates who have a cumulative grade point average of 3.75 to 3.89 for all work completed will graduate “Magna Cum Laude.” Candidates who have a cumulative grade point average of 3.90 or higher for all work will graduate “Summa Cum Laude.”

Students who have attempted or completed coursework at other institutions of higher education are also eligible to be considered for academic distinction. Grades for all coursework completed at WIU must meet the qualifications described above. In addition, grades for all coursework attempted at any other institution of higher education will be evaluated for academic distinction in the following manner: If the combined grade point average of grades for WIU coursework and coursework attempted at other institutions does not meet the thresholds listed above, then the student will not qualify for academic distinction. If the grade point average for coursework from all other institutions is higher than the WIU grade point average, only the WIU grade point average will be taken into account in the determination of academic distinction.

In accordance with WIU’s policy on repeating a course for grade replacement, for purposes of calculating graduation with academic distinction, honors points for all attempts of a course will be averaged.
Graduation

Honors Scholar
Students who have completed the requirements of the Centennial Honors College may graduate with the distinction General Honors Scholar, Major Honors Scholar, or University Honors Scholar. Please see page 100 for additional information on the Centennial Honors College.

Double Major
A student may graduate with two majors by meeting the following requirements:
1. One major must be declared as the primary major. The student must meet the General Education Curriculum requirements appropriate for the primary major.
2. The requirements for the secondary major are only those required by the specific major.
3. No minor is required for a student graduating with a double major.
4. Primary and secondary majors must be so designated on the graduation application.

Important Note: Students completing two majors are granted only one degree with the degree title dictated by the primary major. Only one diploma will be issued.

Minor
All non-comprehensive majors require completion of a minor for graduation. Students enrolled in a non-comprehensive major must officially declare a minor before they earn 75 semester hours. Students must take at least one course from their minor at Western Illinois University in order to establish a grade point average (GPA) in the minor. A minimum GPA of 2.00 in the minor is required for graduation.

Option
An option is a subdivision of a major academic field of study. Successful completion of an option is designated on the University transcript upon receipt of the degree.

Second Baccalaureate Degree
To be eligible for a second baccalaureate degree, after having been granted one by an accredited institution, a candidate must comply with the following:
1. The candidate must apply to and be accepted by the School of Graduate Studies for admission to the University.
2. The candidate must submit a program from the major department to be approved by the Council on Admission, Graduation, and Academic Standards (CAGAS).
3. The candidate must secure approval from CAGAS prior to enrolling.
4. The candidate becomes an undergraduate upon approval of the second degree plan. All undergraduate University policies are applicable.
5. The candidate must earn a minimum of 30 additional semester hours in residence. Courses in the degree plan may not be taken Pass/Fail.
6. The candidate must complete an undergraduate application for graduation at least one semester prior to graduation.

Note: The grade point average calculation for second baccalaureate degree students will not utilize any grades from previous degrees.
Credits, Honor Points, and Grade Point Average

Academic credit is expressed in semester hours. Honor points are assigned to the following letter grades and are used to determine the academic standing of the student:

- Each credit hour of A…………………………………………………………………………………...4.00 honor points
- Each credit hour of A-…………………………………………………………………………………3.67 honor points
- Each credit hour of B+…………………………………………………………………………………3.33 honor points
- Each credit hour of B…………………………………………………………………………………..3.00 honor points
- Each credit hour of B-…………………………………………………………………………………..2.67 honor points
- Each credit hour of C+…………………………………………………………………………………..2.33 honor points
- Each credit hour of C…………………………………………………………………………………..2.00 honor points
- Each credit hour of C-…………………………………………………………………………………..1.67 honor points
- Each credit hour of D+…………………………………………………………………………………..1.33 honor points
- Each credit hour of D…………………………………………………………………………………..1.00 honor point
- Each credit hour of D-…………………………………………………………………………………..0.67 honor points
- Each credit hour of F, FN, or FW……………………………………………………………………0.00 honor points

The symbols I, W, X, UX, P, S, N, and U do not carry honor point values.

The grade point average is the total of all honor points divided by the total of all credit hours attempted and graded using honor point bearing letter grades. An audited course may not be repeated later for credit.

Dean’s List (Semester and Summer Session Honors)

To be eligible for semester honors, a student must be in good standing, earn a minimum of 12 hours of credit in courses graded using honor point bearing letter grades, and earn a 3.60 average for the semester.

To be eligible for Summer session honors, a student must be in good standing, earn a minimum of six hours of credit in courses graded using honor point bearing letter grades, and earn a 3.60 average for the Summer session.

Grade Change

When an error has been made in computing or reporting a student’s course grade, the reported grade may be changed. The request for a change should be reported to the Registrar within three weeks after the next term begins.

The student initiates the procedure for the change by contacting the course instructor. The instructor completes a Grade Change Request. The Request must be acknowledged by the department chair.

Upon receipt of a valid Grade Change Request, the Registrar will change the student’s permanent record. Notification of the change will be emailed to the student and the student’s academic advisor.

Incompletes

A temporary symbol of I (Incomplete) for a course may be given only when a student, due to circumstances beyond his or her control, has been unable to complete the course requirements within the official limits of the term. The circumstances must be documented to the instructor’s satisfaction. Students and faculty members are encouraged to use the optional request for an incomplete form to document expectations for successful completion of remaining course requirements. The I must be replaced with a grade by the end of the ninth week of the next semester in which the student is enrolled. If the student is not enrolled during the next two semesters, the I must be replaced with a permanent grade no later than one calendar year subsequent to the incurrence. If the I is not replaced by these deadlines, it will automatically become an F. For S/U graded courses, the I will become a U.
The permanent grade which replaces the I will be used to determine the student's academic standing and progress toward the degree. Any changes in the student's status resulting from the assignment of the permanent grade become effective at the time of the change from I to the permanent grade.

**Pass/Fail System**

The Pass/Fail grading option is open to all undergraduate students in good academic standing. Undergraduate courses open to the Pass/Fail option carry the following limitations:

1. Only courses that will be used as general electives may be taken Pass/Fail. (No General Education, major, or minor requirements can be fulfilled with a P/F course.)
2. Students wishing to register for a course on a Pass/Fail basis must indicate this option when registering.
3. A student may change from Pass/Fail to regular grading or from regular grading to Pass/Fail up until the end of the scheduled program change period.
4. Students withdrawing from a course taken on a Pass/Fail basis follow the usual withdrawal procedures.
5. Final letter grades of D- or above are recorded as pass (P) by the Registrar, and the student receives the credit hours for the course. However, this will not affect the student's grade point average. A “P” becomes the official designation for the course and may not be changed. Students wishing to transfer to another college or university are cautioned to determine the transfer school's policies regarding the transferability of P grades. An F in a course taken for Pass/Fail is recorded as such and affects the grade point average accordingly.
6. A student may earn a maximum of 12 semester hours of credit in Pass/Fail to be applied toward general electives within the graduation requirement.
7. Instructors will not be informed as to which students have elected Pass/Fail in their courses, but will evaluate all students by the regular University grading system.

**Permanent Grades**

There are 14 permanent grades which indicate the quality of a student's work in a course. Eleven of these indicate successful completion of the course: A (highest), A-, B+, B, B-, C+, C, C-, D+, D, and D- (lowest). The remaining three permanent grades (F, FN, and FW) indicate failure to complete the course successfully: F indicates failure to meet the academic requirements of the course, FN indicates failure because the student never attended/ accessed/participated, and FW indicates failure because the student stopped attending class or completing coursework.

Several other symbols may appear on student transcripts. The symbol P indicates that the student has passed a course taken under the Pass/Fail option. The symbols S (Satisfactory) and U (Unsatisfactory) are assigned in courses in which a student receives credit for hours earned but does not receive honor (grade) points. The symbol W is entered on the transcript when the student withdraws from a course or is withdrawn from a course as the result of action by the Council on Admission, Graduation, and Academic Standards (CAGAS). The symbol N (never attended) is entered on the transcript when CAGAS grants a withdrawal from a course because the student never attended and did not complete any coursework.

The symbol X denotes that a course has been audited; the symbol UX denotes an unsatisfactory audit, given when the student has not attended a sufficient number of classes. An audited course may not be taken for credit at a later date.
Transcripts

All new matriculating students pay a $15 non-refundable transcript fee which entitles the student to unlimited hard-copy transcripts. Upon written request of the student, the Office of the Registrar issues a transcript of a student’s record. Transcripts are not issued for persons under financial and administrative obligation to Western Illinois University. Western Illinois University follows the condition set forth in the General Education Provisions Act of 1974 (as amended in 1976).

Withdrawal from Courses or from the University

The symbol W on a student transcript indicates official withdrawal from a course. A student may withdraw from a course or totally withdraw from the University during the first ten weeks of a semester. After the first ten weeks, a student may not drop individual courses or withdraw from the University. For academic courses of an irregular length, the withdrawal date shall be 0.6 of the length of the course. If the student has been found guilty of academic dishonesty and the penalty of F (Fail) is assigned, a W cannot be granted.
Course Credit

Numbering of Courses

100 series ........................................................................................................................... Freshmen
200 series .......................................................................................................................... Sophomores
300 series .......................................................................................................................... Juniors
400 series .......................................................................................................................... Seniors
500–999 series .................................................................................................................. Graduate

400-level courses listed with a G suffix may be taken for graduate credit.

A student ordinarily should not enroll in a course more than one year out of his or her classification.

Prerequisites/Corequisites

Prerequisite: A course that must be completed prior to enrollment in a particular course. Prerequisite may also refer to acceptable class standing, prior academic standing, permission of instructor, departmentally determined competencies, or other departmental requirements.

Corequisite: A course that must be taken simultaneously with another course.

Note: It is the responsibility of the student to comply with the prerequisites/corequisites as stated in the University catalog and course syllabus for each course he/she plans to take. Instructors may withdraw a student who does not meet course prerequisites/corequisites at any time from course registration through the 100 percent refund/credit period by sending the student written notification (e-mail or letter) with a copy to the Registrar. The written notification must include the reason why the student is being withdrawn from the course and must allow the student five working days to respond to the instructor to determine if the prerequisites/corequisites have been or will be satisfied. After the five working days, unless otherwise notified by the instructor, the Registrar will drop the course from the student’s schedule and send an updated schedule confirmation. Departments may also designate specific course sections as having enforced prerequisites. During registration, these courses will be identified on STARS, and students who do not meet the requirements will be deleted prior to the first day of class.

Proficiency Examination Regulations

Proficiency examinations may be taken by regularly enrolled students with the permission of both the department and the Council on Admission, Graduation, and Academic Standards (CAGAS) or its designated representatives. Proficiency examinations are open to all WIU students, including freshmen entering directly from high school. Forms may be secured at wiu.edu/registrar/forms.

Proficiency examinations may not be taken at a level more elementary than completed coursework or if the student has received course credit after completion of the course.

In general, proficiency examinations cover elementary coursework and should therefore be taken early in the student’s college career, preferably in the freshman or sophomore year.

Credit earned by proficiency examination is recorded on the student’s permanent record with the designation of S. Hours earned are not included in calculating the grade point average, but they are counted toward University degree requirements.

Credit earned by proficiency examination does not satisfy residency requirements and does not satisfy minimum hours earned for graduation with academic distinction.

The maximum number of credit hours which may be earned by proficiency examination is 16 semester hours, no more than nine of which may be earned in one subject matter field.

Proficiency examinations, where applicable, may be taken in place of General Education Curriculum courses. If successfully completed, credit is recorded on the permanent
transcript. Course credit only is given. No other requirements are then imposed in lieu of the courses so completed.

Proficiency credit does not apply toward the determination of full-time status.

**Repeatable Courses**

Some courses are designated in the catalog description as repeatable for credit. These courses are not eligible for grade replacement.

**Repeating a Course for Grade Replacement**

If a course not designated in the catalog as repeatable for credit is retaken, the following policy regarding repeating a course for grade replacement will apply:

1. The repeated course must be taken from Western Illinois University.
2. A course may not be repeated more than two times (taking it a maximum of three times). Subsequent attempts to repeat a course will not result in credit or honor point replacement.
3. Credit and applicable honor points will be awarded only once, the final time, for a repeated course. Only the grade for the most recent class will be used for the grade point average calculation. Grade symbols of “I”, “N”, “P”, “S”, “U”, “UX”, “W”, or “X” will not replace the GPA impact of a previous grade.
4. A student retaking a course under the Grade Replacement Policy may not enroll in that course on a Pass/Fail basis.
5. All prior enrollments and grades earned will remain on the permanent academic record and will carry an indicator that the course has been repeated.
6. For purposes of calculating graduation with academic distinction (Cum Laude, Magna Cum Laude, Summa Cum Laude), honor points for all attempts of a course will be averaged.
7. This policy does not supersede the policies on Incompletes or Withdrawals.
8. Once the degree is conferred and a student has graduated, no coursework toward that degree may be subsequently repeated under the provisions of this policy.
9. The student may not replace a grade of “F” under this policy if the student was assigned the grade as a result of an Academic Integrity violation. If the course is retaken, both the failing grade and the grade earned by repeating the course will appear on the transcript and will be used to calculate the student’s grade point average.

Repeating a course for grade replacement will not retroactively alter any previously earned academic status (i.e., academic warning, probation, suspension, or dismissal).

Tuition and applicable fees must be paid for all courses retaken. Students should be aware that many graduate and professional schools recalculate grade point averages taking into account every grade that appears on the transcript. Students who are receiving financial aid must consider the impact of repeating classes on their eligibility for financial aid for future semesters.

Courses taken prior to Fall 1978 are not eligible to be repeated for grade replacement.

**Undergraduate Enrollment in Graduate-Level Courses**

Under certain circumstances, an undergraduate student may enroll in graduate-level courses for either graduate or undergraduate credit.

*Regulations governing graduate course offerings for undergraduate credit are as follows:*

1. The student must be of senior classification and in good academic standing.
2. The student must apply to take the course for undergraduate credit through the Office of the Registrar, Sherman Hall 110, prior to enrolling in the course. A form, requiring the signatures of the advisor and the Registrar, must be completed by the student.

3. The student must satisfy the prerequisites of the course.

4. No more than nine semester hours of graduate-level courses (numbered 500 and above) may be taken for undergraduate credit.

5. These courses may not be used for a future graduate program unless approved as a bridge course for integrated degree programs.

**Regulations governing graduate course offerings for graduate credit are as follows:**

1. The student must be of senior classification.

2. The student must fulfill prerequisites of the course.

3. The student must apply to take the course for graduate credit through the Office of the Registrar, Sherman Hall 110. A form, requiring the signatures of the designated authorities in the Offices of the Registrar and Graduate Studies, must be completed by the student. The application form must be filed in the Office of Graduate Studies prior to enrolling in the course.

4. The student must file a graduation application in the Office of the Registrar and an application for admission to the School of Graduate Studies prior to enrolling in graduate-level courses for graduate credit.

5. The student must have a grade point average of 3.00 or better if a first-semester senior and must meet admission requirements to graduate school if a second-semester senior.

6. The student may enroll in a maximum of three graduate-level courses for graduate credit unless an exception is made by the designated authority in the Graduate Studies office.

**Regulations regarding bridge course offerings for integrated degree programs are as follows:**

1. The student must be of senior classification and have filed an application for graduation in the Office of the Registrar.

2. The student must have fulfilled all prerequisites for the course.

3. The student must have applied to the School of Graduate Studies and have been accepted into an integrated degree program.

4. A form must be completed by the student. This form requires signatures of the undergraduate academic advisor, the graduate department chairperson, and designated authorities in the Offices of the Registrar and Graduate Studies.

5. The completed form must be filed in the Office of Graduate Studies prior to enrolling in the course for bridge credit.

**Variable Credit Courses**

Courses with a variable credit designation [e.g., “ENG 409, Independent Study (1–3)’’] may be taken with a different number of credit hours. Students should consult the course instructor or the department offering the course to determine the number of semester hours for which they may register.
Academic Load

Students are required to adhere to the following guidelines with respect to academic load.

The load figures are based on a regular 16-week semester. Summer session load should be prorated according to the same guidelines.

1. Academic load for students in good standing:
   a. Minimum load for full-time status: ...................................................... 12 semester hours
   b. Normal or average load: ................................................................. 15–16 semester hours
   c. Maximum load (without approvals): ................................................... 18 semester hours
   d. Maximum load for students with at least a 3.00 cumulative GPA (Students with a 2.50–2.99 cumulative GPA need approval of the college dean or his/her designee): ................................................................. 19–21 semester hours

2. Academic load for students not in good standing (including academic warning or probation):
   a. Minimum load for full-time status: ...................................................... 12 semester hours
   b. Maximum load (without approval of the Council on Admission, Graduation, and Academic Standards): ................................................................. 16 semester hours
   c. Maximum load—Summer session: ....................................................... 6 semester hours

Assessment

The University-wide assessment program measures student progress toward educational goals, determines academic progress, improves teaching and learning, and evaluates institutional effectiveness. It assesses students at entrance, mid-career, and graduation to provide information on their academic achievement. Alumni are also surveyed to ascertain their perceptions of the effectiveness of their curriculum in preparing them for post-graduation study and/or work experience.

The plan of assessment of student learning includes the three academic components forming the undergraduate degree requirement: the General Education Curriculum distribution requirements, the development of baccalaureate-level skills, and the major. Program and curricular improvement is achieved through assessment of General Education and program majors. Individual student learning and progress is ascertained through assessment of baccalaureate skills and assessment in the major.

Class Attendance

Students are expected to attend all classes in which they are enrolled. Instructors should exercise good judgment in considering excuses for absences, but it is the student’s responsibility to confer with the instructor and to agree to any reasonable arrangements to compensate for his/her non-attendance.

Classification of Students

Students are classified by the number of semester hours earned as follows:

Freshman ................................................................................................................. Fewer than 30
Sophomore ............................................................................................................. 30–59
Junior ..................................................................................................................... 60–89
Senior ..................................................................................................................... 90 to completion of degree requirements

Early Warning Notification

Western Illinois University provides an early warning (mid-term) notification procedure to alert undergraduate students to poor academic performance in time for them to take
corrective measures. Instructors are encouraged to identify students who are performing below C level work. These deficiencies are reported to the students so they can seek special help from instructors, academic advisors, or the University Counseling Center.

Eligibility to Represent the University

1. Any student who is permitted to register for classes at Western Illinois University is eligible to participate in activities officially sanctioned by the University, subject to compliance with all eligibility rules established by the duly constituted authorities responsible for specific activities.

2. Any student who has been academically dismissed from the University and who appeals to the Council on Admission, Graduation, and Academic Standards (CAGAS) for readmission may be declared ineligible to participate in some or all University-sanctioned activities until he or she achieves good academic standing. In such cases, the temporary ineligibility will become a part of the CAGAS stipulation for readmission. Any student who is unwilling to accept the stipulation will not be readmitted. Any student who violates the stipulation after readmission will be subject to immediate academic suspension.

Warning: Any student who is not in good academic standing should carefully weigh the amount of time and energy required for a given activity and should consider whether continued participation in such an activity will jeopardize his or her academic performance at the University.

First Year Experience (FYE)

The First-Year Experience (FYE) program is intended to create a positive transition to college and to encourage students who become more active and enthusiastic learners, both in and outside of the classroom. The FYE program incorporates the primary aspects of traditional students' first college year: academic, co-curricular activities, and residence hall life.

Upon initial or re-entry full-time enrollment at Western Illinois University, students with 23 or fewer semester hours completed must enroll in and pass one FYE course. FYE courses are limited enrollment classes for first-year students only and are designated with the suffix “Y” in class schedules for each academic term.

Full-Time Student

A full-time student is one who is enrolled for a minimum of 12 semester hours of credit during any regular semester (Fall or Spring) or for six semester hours of credit during the Summer term.

Good Academic Standing

New freshmen and transfer students will be considered in good academic standing if regular admission standards are met. A student will be considered in good academic standing if he or she maintains a minimum cumulative grade point average of 2.00.

Scholarship Requirements

All students are expected to meet or exceed the grade point average of 2.00 to be in good academic standing.

Once transfer students have been admitted, only the semester hours earned at Western Illinois University are then used in calculating the grade point average. An exception to this policy is graduation with Academic Distinction. Please see page 49 for Academic Distinction requirements.
Integrated Baccalaureate and Master’s Degree Programs

An integrated baccalaureate and master’s degree program provides the opportunity for outstanding undergraduates to earn both degrees in five years. Typically, a baccalaureate degree requires four years to complete and a master’s degree requires an additional two years. However, the integrated degree programs are intended to be accomplished over a period of five years. Some advanced coursework (referred to as bridge courses, which carry a “B” designator following the course number) completed while the student is at the baccalaureate level will also be used to satisfy requirements for the master’s degree. In addition to allowing students to earn both degrees a year early, the integrated program may include additional opportunities to participate in a variety of experiential educational activities, such as a master’s project or thesis.

Admission to Integrated Degree Programs: Undergraduate students may apply for admission to an integrated program after completing 60 semester hours of undergraduate coursework, of which a minimum of 30 semester hours must be completed at WIU. Integrated degree applicants must meet the cumulative grade point average and the grade point average for their major as specified by their integrated degree program. Admission must be granted by the School of Graduate Studies before a student will be allowed to enroll in graduate-level courses. Students may begin taking bridge courses after the completion of 90 semester hours, or when beginning their final two semesters (fall and spring) as demonstrated by a written degree completion plan.

Academic Requirements: Students must have a minimum cumulative grade point average of 3.25 and a minimum of 3.25 grade point average in the major or a minimum cumulative grade point average of 3.0 and a minimum 3.3 grade point average in the last 30 credit hours taken at WIU prior to enrolling in bridge courses. The work required for the integrated baccalaureate and master’s degree program must be completed within six consecutive calendar years from the time of first enrollment in courses which are part of the integrated program. Upon completion of all requirements of the baccalaureate degree, such degree will be awarded. Subsequently, after completing the requirements of the master’s degree (including the bridge courses), such degree will be awarded. All grades of C or lower earned, including those taken for bridge (“B”) credit, count toward the six-hour C rule. Students in this program are not eligible for assistantship positions until the baccalaureate degree has been conferred. Students in an integrated program who do not complete the required bridge (“B”) courses prior to completion of their baccalaureate degree will be removed from the integrated program and must meet regular admission standards.

Penalties for Grade Point Average Deficiencies

All students who are on academic warning or probation must confer with their academic advisor during the term of warning or probation to facilitate progress toward achieving good standing.

A student who is in good academic standing who earns less than a 1.00 semester GPA resulting in less than a 2.00 cumulative GPA is automatically placed on probation.

Academic Warning

If, at the end of a grading period (semester or Summer term), a student’s cumulative grade point average in courses taken at the University falls below a 2.00, but not so low as to warrant academic probation, that student will be placed on academic warning.

Students who are placed on academic warning status may enroll for no more than 16 hours in a regular semester and no more than 6 hours in a Summer term. Students may not enroll exclusively in S/U graded courses while on academic warning status. Academic warning students will be suspended if their semester grade point average is below 1.00.
**Student Academic Progress**

*Academic Probation*

If, at the end of a grading period (semester or Summer term) on academic warning, a student's cumulative grade point average in courses taken at the University falls below a 2.00, but not so low as to warrant academic suspension, that student will be placed on academic probation.

Students who are placed on a probationary status may enroll for no more than 16 hours in a regular semester and no more than 6 hours in a Summer term. Students may not enroll exclusively in S/U graded courses while on probationary status.

A student on academic probation must achieve at least the following grade point average each grading period until good academic standing is reached or he/she will be academically suspended:

a. Freshmen and sophomores MUST earn a minimum term GPA of 2.10.

b. Juniors and seniors MUST earn a minimum term GPA of 2.25.

*Academic Suspension*

A student will be academically suspended if at the end of any grading period the student on academic probation fails to make satisfactory progress toward good academic standing as defined under Academic Probation above.

*Reinstatement Following Academic Suspension*

Students suspended for poor scholarship must remain out of the University for at least one regular semester. After the inactive semester, students suspended for the first time will automatically be eligible for reinstatement and may re-enter the University at the beginning of a Fall or Spring semester or a Summer term, provided they indicate their intentions to do so prior to established deadlines by filing a re-entry application. If they have attended another school, an official transcript from that school must be on file in the Office of the Registrar at the time of registration.

Reinstated students re-enter the University with the same cumulative GPA they had upon suspension and are placed on academic probation. This probationary status will continue as long as the student satisfies the conditions specified in the section on Academic Probation. Students failing to make satisfactory progress are dismissed and may not be reinstated a second time except by approval of the Council on Admission, Graduation, and Academic Standards (CAGAS).

*New Start Policy*

This policy is designed for former WIU students with a severe cumulative honor point deficiency who have not attended WIU for a minimum of three years.

1. Former WIU students who have not attended WIU for at least three years may petition the Council on Admission, Graduation, and Academic Standards (CAGAS) to have prior grades excluded from subsequent grade point average calculations. Such appeals must be received and approved prior to the student’s re-entry to WIU.

2. All hours earned will count toward total hours for graduation.

3. All students must have at least a C average in all WIU courses counted toward the major and the minor for graduation.

The New Start provision may be exercised only once, and all grades that a student has received at WIU will be used to determine class rank and honors. Any student under this policy must complete a minimum of 30 semester hours after returning to WIU to qualify for graduation. All courses taken and grades earned will appear on the transcript.
Satisfactory Academic Progress Policy for Financial Aid

Students must meet all of the following satisfactory academic progress criteria for federal and state financial aid eligibility:

1. **Minimum Cumulative Pace (Credit Hour Completion Rate):** Students must earn credit for at least 67% of the total cumulative hours attempted, including enrolled hours during which Title IV aid was not received. This includes transfer hours, incomplete grades, and withdrawal hours for all semesters.

2. **Minimum Cumulative Grade Point Average (GPA):** Students must have a cumulative 2.0 GPA at WIU (grades for transfer hours are not included).

3. **Maximum Time Frame:** Students must graduate before exceeding 150% of hours required for degree. This includes all hours attempted: transfer hours, incomplete grades, and withdrawn hours for all terms, and includes terms in which Title IV aid was not received.

**Student Responsibility**

Students are responsible for knowing degree requirements and enrolling in courses that will enable them to complete their degree programs. It is also their responsibility to know the University regulations for the standard of work required to continue in good academic standing. Degree requirements are presented in this publication. Additional details about requirements, procedures, and policies are available from the academic departments and advisors.

**Writing Instruction in the Disciplines (WID)**

After students have completed their composition sequence in the Department of English, they must complete the next academic portion of WIU’s writing program, a Writing Instruction in the Disciplines (WID) requirement for their major. WID courses are designed to help students learn both the forms and values for the writing needed to be effective professionals in their fields.

All WID courses provide a variety of opportunities for writing development accompanied by instructional support, build in early opportunities for revision, require disciplinary writing throughout the course for a significant part of the course grade, and maintain a student-faculty ratio no greater than 25:1. For in-depth WID criteria and links to resources, please see [wiu.edu/WID](http://wiu.edu/WID). Individual departmental WID requirements are specified in the curriculum for each academic program.
Council on Admission, Graduation, and Academic Standards (CAGAS)

The Council on Admission, Graduation, and Academic Standards (CAGAS) is responsible for recommending and evaluating policies concerning admission, retention, graduation, and academic standards and for establishing some of the procedures to carry out such policies. It also serves as an appellate body regarding such policies and procedures. CAGAS (ten faculty and two student members) meets weekly during Fall and Spring semesters, as well as several times during the Summer.

Academic Dishonesty Appeal

Western Illinois University is dedicated to the discovery and communication of knowledge. The University can best function and accomplish its objectives in an atmosphere where high ethical standards prevail. For this reason, and to ensure that the academic work of all students will be fairly evaluated, the University strongly condemns academic dishonesty. WIU’s policy on academic integrity is available at wiu.edu/policies/acintegrity.php.

Grade Appeal

It is the responsibility of any student wishing to pursue an academic grade appeal involving a faculty member to discuss the matter privately with the professor involved by the end of the second week of the regular semester (Fall or Spring) following the term in which the student received the grade in question. Grade appeal hearings are normally heard during the Fall/Spring semesters unless all parties agree to an earlier hearing. In the event the student is unable to contact the professor by the beginning of the third week of the regular semester (Fall or Spring), the student should contact the department chairperson in order to set up a meeting with the faculty member (or to meet with the department chairperson if the faculty member is no longer on campus). WIU’s grade appeal policy is available at wiu.edu/policies/gradeapp.php.

Oral English Proficiency Appeal

Students who have complaints concerning the oral English proficiency of faculty providing classroom instruction should contact the department chairperson or the immediate supervisor of the appropriate faculty member. The complaint should be as specific as possible and should include a written summary.

All complaints shall be investigated by the department chairperson including, but not limited to, classroom visitation. If the department chairperson finds the faculty member’s oral English proficiency is satisfactory, he/she will so notify the student.

Students may appeal the department chairperson’s satisfactory evaluation of oral English proficiency to the appropriate dean who shall investigate the complaint. If the dean finds the faculty member’s oral English proficiency is satisfactory, the dean will so notify the student. In the event of such a finding, the decision of the dean shall be final.

If the department chairperson or dean finds the faculty member’s oral English proficiency is unsatisfactory, a recommendation shall be submitted to the Academic Vice President for consideration. The Academic Vice President will notify the student and the faculty member of his/her decision.

At all levels of this procedure, the student’s identity will remain confidential.

Right of Academic Appeal

Students have the right to appeal the implementation of any University regulation which relates to admission, academic standards, or graduation by submitting a formal written appeal to the Council on Admission, Graduation, and Academic Standards (CAGAS). Such appeals must be based upon the existence of unusual or extenuating circumstances which have prevented the student from achieving the normal University standard, and evidence
of these unusual or extenuating circumstances must be presented with the appeal. Such appeals must be submitted to the CAGAS office, Sherman Hall 110.

**Withdrawal from an Individual Course Appeal**

Students may appeal to the Council on Admission, Graduation, and Academic Standards (CAGAS) for a late withdrawal from an individual course, provided the student can document extenuating circumstances. All appeals should include sufficient documentation of any extenuating circumstances which explain why a student was unable to follow the proper procedure for withdrawing from the course prior to the end of the tenth week of the term. The student must also have the instructor of the course send a statement verifying grades on quizzes, tests, assignments, and last date of attendance. Appeals and support documentation must be submitted to the CAGAS office, Sherman Hall 110.

**Withdrawal from the University Appeal**

Students may appeal for a late withdrawal from the University and receive a W for each course, provided the student can document extenuating circumstances. All requests should include sufficient documentation of any extenuating circumstances which explain why a student was unable to follow the proper procedure for withdrawing from the University prior to the end of the tenth week of the term. The student's request must be submitted in writing with appropriate, supporting documentation to the Student Development and Success Center.

If the Student Development and Success Center denies the request, the student may appeal the decision to the Council on Admission, Graduation, and Academic Standards (CAGAS). Students are advised to attend classes, if possible, until a final decision is reached.

After the close of the semester, a student may appeal directly to CAGAS for late withdrawal.
Candidates for a baccalaureate degree at Western Illinois University are required to complete the Foreign Language/Global Issues requirement established for their major program of study. Students will complete at least one of the options listed below, as determined by their academic department. Students should refer to the specific Foreign Language/Global Issues requirement for their degree program in the Academic Departments, Programs, and Courses section of this catalog (p. 103).

1. Successfully complete one of the following options:
   - Complete three years of high school language study in a single language with an average grade of C or better.
   - For students whose native language is English, pass an appropriate test offered by the WIU Department of Foreign Languages and Literatures.
   - Complete, with a grade of C or better, a University-level course which meets the goals and objectives of the foreign language requirement.
   - For international students whose native language is not English and who have been admitted to WIU, satisfy WIU’s admission requirements for English language proficiency.

2. Earn credit for a General Education course that is designated as “Global Issues.”

3. Earn credit for a 300-level or higher course in the major, or in another department, that is designated as “Global Issues.”

4. Successfully complete a WIU Study Abroad program of sufficient length and breadth.

Philosophy and Goals of General Education

General Education is the component of the undergraduate curriculum devoted to those areas of knowledge, methods of inquiry, and ideas that the University and scholarly community believe are common to well-educated persons. General Education provides a foundation for future learning.

The generally well-educated student will demonstrate:

1. broad knowledge and understanding of the natural sciences, social sciences, and humanities;
2. an ability to analyze, think critically, and form reasoned conclusions;
3. competence in communicating his or her views and ideas clearly and cogently;
4. an understanding of the methods by which people pursue knowledge;
5. an understanding of the differences and relative power among peoples, both in the United States and across the globe; and
6. knowledge of the principle of wellness for living a healthy and fit life, both physically and mentally.

I. Communication Skills

Communication is the art of expressing and exchanging meaning among people. At the University, meaning or knowledge is developed as teachers and students share insights, exchange ideas, and debate positions. Reading, speaking, research, and writing all play important roles in this construction and extension of knowledge.

College Writing

The writing course sequence enables students to use language actively in diverse ways and settings to gain and share knowledge about their experiences and concepts. They also reflect on that language use by examining their processes of writing and reading in order to understand both the texts they create and the texts they encounter.

Courses in the writing sequence will teach students to:

a. make writing choices within the rhetorical contexts of academic writing, with attention to the particular audiences, subjects, and purposes of writing;
b. understand and incorporate into their own writing each stage of the writing process: exploration, invention, drafting, revising, editing;
c. improve their ability to analyze on multiple levels the texts that they read, and to recognize and synthesize connections among texts;
d. discover a variety of argumentative strategies in academic writing and incorporate those strategies in the development of several essays;
e. explore in depth at least one significant subject of academic interest by extensive reading, peer discussion, and the use and citation of research materials; and
f. demonstrate control over the conventions of edited American English.

Public Speaking

The oral communication course develops students' awareness of the communication process; focuses on the skills of invention, organization, and expression; promotes understanding of, and adaptation to, a variety of communication contexts; and emphasizes critical skills in listening, reading, thinking, and speaking.

The communication course will teach students to:

a. create effective speeches through careful selection of topics and analysis of audience needs, situational factors, and speaker purposes;
b. gather, evaluate, organize, and outline supportive materials into persuasive and informative messages that reflect an understanding of the appropriate use of evidence, reasoning, and language;

c. deliver effective speeches that demonstrate proficiency in articulation, nonverbal behaviors, and visual aids that reinforce the message and promote clarity and interest; and

d. become more discriminating consumers of messages through critical listening.

II. Natural Sciences and Mathematics

Part A—Mathematics Competency

Competency in baccalaureate-level Mathematics enables students to successfully engage in the mathematical thinking encountered in undergraduate studies and in daily living. Central to this competency is the ability to solve problems, to use mathematical modeling, and to evaluate mathematical calculations and reasoning. Students are expected to express and interpret mathematical information in written and oral forms and to use technology (calculators, computers, etc.) appropriately.

Mathematics competency courses will teach students to:

a. use basic Mathematics in problem solving and modeling strategies as needed for college coursework and for living in today's and tomorrow's world;

b. clearly express mathematical ideas and calculations in writing; and

c. make valid inferences from mathematical formulas, graphs, tables, and data.

Part B—General Education

Studying the Natural Sciences and Mathematics enables students to understand the physical and natural world and the scientific and mathematical concepts, theories, and principles that explain the world. That is, students broaden and deepen their understanding of the diversity and interrelatedness of human knowledge in the sciences and Mathematics and are better able to explain the similarities and differences that exist among the sciences. By studying the methods of inquiry practiced by scientists in the search for answers to yesterday's and today's issues and problems, they experience both the power and limitations of this knowledge while growing in their appreciation of the scientific perspective and its impact on their lives and society.

General Education courses in the Natural Sciences and Mathematics will allow students to:

a. demonstrate understanding of basic terms, concepts, principles, processes, and systems in the Natural Sciences and Mathematics;

b. draw conclusions and/or identify relationships by synthesizing from relevant information;

c. demonstrate the ability to apply appropriate investigative methodologies in laboratory courses; and

d. demonstrate the ability to use and understand scientific and mathematical terminology in writing assignments and/or classroom discussion.

III. Social Sciences

In their Social Science coursework, students explore aspects of their own cultures and beliefs and the cultures and beliefs of others within a context of empirical research findings and theoretical speculation.

They examine anthropological, economic, geographical, political, psychological, and/or sociological aspects of individuals and groups in various cultures and the social problems that these individuals and groups attempt to overcome.
They apply a variety of methodologies (e.g., laboratory experiments, case studies, naturalistic observations) to studies of individual and group behavior.

General Education courses in the Social Sciences will allow students to:

a. gain insight into the diversity of human motivations and institutional forces that influence social behavior;

b. recognize multiple methods and modes of inquiry used in the Social Sciences and their appropriate application;

c. develop analytical and critical thinking skills as applied to the study of the Social Sciences; and

d. communicate ideas and explain concepts and analyses using the language of the Social Sciences.

IV. Humanities and Fine Arts

In studying the Humanities and Fine Arts, students learn to explore issues fundamental to human identity, as these are expressed in the artistic, cultural, and intellectual traditions of the world's civilizations. Courses in the Humanities and Fine Arts reveal ways to give meaning to human experience through the study of fine arts, philosophical thought, literature and film, interpretations of history, rituals and belief systems of religion, communication, and foreign languages. After studying the Humanities and Fine Arts, students will have the tools and knowledge to respond more knowledgeably and actively to those humanistic and artistic works and traditions created by people of various societies and times.

General Education courses in the Humanities and Fine Arts will allow students to:

a. learn to perceive accurately, describe carefully, and analyze systematically various humanistic expressions and works such as literary, philosophical, and historical texts; artistic forms and musical works; and ritual, drama, and other forms of symbolic action and speech;

b. learn the significant concepts and issues that continue to structure and guide study in the Humanities disciplines;

c. learn to identify, analyze, and interpret the historical, social, or cultural contexts for these humanistic works and expressions;

d. examine and come to understand human values as they are represented, reasoned about, and justified through various humanistic works and traditions; and

e. develop reading, critical reasoning, and communication skills important for understanding and effectively communicating ideas and perspectives regarding humanistic works and traditions.

V. Multicultural Studies

Through Multicultural and Cross-Cultural Study, students will develop an understanding of diversity in the United States and of the larger world as a complex network of interdependent societies, cultures, histories, and world views. The courses offered challenge narrow conceptions of Self and Other by fostering in students an appreciation for cultural diversity, as well as the critical ability to discern the impact of large-scale cultural and historical forces on their lives. Students may choose among courses focusing on contemporary national and world politics (which could include such issues as conflict and cooperation, economy, the environment, and so on); the comparative study of cultures, societies, politics, and/or belief systems within and beyond the United States; and the dilemmas for the global majority—the three-quarters of the world's population who live where they may have to strive for national identity as well as economic and political development.
All courses in this area, whether focused on the United States or the world, encourage a better understanding of the dimensions of experience and belief that distinguish cultures and societies from one another as well as the commonalities that knit together all people. Understanding various dimensions of human experience helps break down barriers among groups and stimulates dialogue about solutions to many complex social problems. Through Multicultural and Cross-Cultural Studies, students will recognize the historical, political, and cultural forces that foster inequality and injustice, while becoming aware of strategies of change that improve the quality of life for all people. The courses, therefore, stress the necessity of enhancing international and multicultural understanding and communication.

General Education courses in Multicultural Studies will allow students to:

a. develop an informed perspective on (1) traditionally underrepresented groups in the U.S., and/or (2) world societies, which would include knowledge of one or more of the following: culture, history, and social institutions;

b. learn the significant conditions and contributions of (1) traditionally underrepresented groups in the U.S., and/or (2) different world societies;

c. become aware of significant ways that the fact of underrepresented groups and/or multiple world societies affects decisions about human rights, social justice, and equality; and

d. understand multiple approaches to issues of social justice.

VI. Human Well-Being

In studying Human Well-Being, students will come to understand and develop healthy lifestyles and practices. The educational experiences in this area will enable students to examine issues and form reasoned conclusions about factors affecting personal wellness.

General Education courses in Human Well-Being will allow students to:

a. identify information and practices that will promote personal wellness;

b. acquire practical knowledge that can be applied toward living a healthy and fit life;

c. explain the factors that affect the quality of a healthy leisure lifestyle; and

d. relate the effects of personal choices to the principle of wellness for living a healthy and fit life, both physically and mentally.

University General Education Requirements

Candidates for a baccalaureate degree at Western Illinois University are required to complete the General Education Curriculum approved by the University faculty. General Education courses should ordinarily be taken during the freshman and sophomore years, and the entire 43 semester hours should be completed no later than the last semester of the junior year. Individual colleges and departments may require additional courses, and students should refer to the section of the catalog for the college in which they are enrolled for requirements beyond the University General Education Curriculum.

The following restrictions apply:

(1) No courses numbered 275, 298, 450, 475, and 498 are acceptable for credit in the General Education Curriculum;

(2) Students may not use any one course to satisfy two General Education distribution requirements;

(3) Students may not count more than two courses from the discipline in which they major toward satisfaction of the General Education requirements;

(4) No courses under the Pass/Fail option may apply to the General Education requirements.
General Education Categories:

I. Communication Skills

A. ENG 180—College Writing I (3)
B. ENG 280—College Writing II (3)
C. COMM 241—Introduction to Public Speaking (3) OR
   COMM 242—Fundamentals of Public Speaking (3)

College Writing

All students enrolled in the University must demonstrate their ability to write and speak clearly, accurately, and effectively. Entering students' writing skills are assessed upon initial registration. Students placed in ENG 100 must complete that course with a grade of C or better before enrolling in ENG 180. Further, all General Education courses contribute to students' writing competency by including written assignments in the course requirements.

ENG 180 must be taken either semester of the freshman year. Students who fail to receive a grade of C or better must repeat the course.

ENG 280 is to be taken before 60 semester hours earned. ENG 180 is a prerequisite. Students who fail to receive a grade of C or better in 280 must repeat the course.

Students may also receive credit for all or part of the writing requirement by (1) passing the appropriate proficiency examination, (2) completing the stated requirements of GH 101, or (3) completing a comparable course or courses at another university with a grade of C or better.

Public Speaking

Students may also receive credit for the oral communication requirement by (1) completing the accelerated section 50 of COMM 241 with a grade of B or above, (2) completing the Honors section 25 of COMM 241, or (3) satisfactorily completing a comparable course at another college/university.

II. Natural Sciences and Mathematics

Students must fulfill the competency requirement of Part A and the General Education requirement of Part B of the Natural Sciences and Mathematics category.

Part A—Competency

All students enrolled in the University must demonstrate their ability to use general baccalaureate-level skills in Mathematics by one of the following means:

(1) Receive University credit for MATH 100—Core Competency in Mathematics;
(2) Receive a satisfactory score on an assessment examination instrument designated by the Department of Mathematics; or
(3) Receive University credit for a Mathematics course which lists MATH 100 as a prerequisite.

Entering students' Mathematics skills are assessed upon initial registration. All freshmen who are placed in MATH 099 are required to pass the course before the start of the second semester of their second year. Transfer students who are placed in MATH 099 are required to pass it during their first year at WIU.

Part B—General Education

Students must complete 10 s.h. from the courses listed below. At least one laboratory course must be included. Students may take no more than two courses from any one grouping below.

III. Social Sciences .............................................................................................................. 9 s.h.

Students must take at least three courses in the Social Sciences. Students may take no more than two courses from any one grouping below.

**Anthropology**
* ANTH 110—Introduction to Cultural Anthropology (3)
* ANTH 111—Introduction to Physical Anthropology and Archaeology (3)
* ANTH 210—Medical Anthropology (3)
* ANTH 215—Fantastic Archaeology: Ancient Astronauts, Shape Shifters, and Bigfoot (3)

**Communication**
COMM 235—Communicating in Small Groups (3)

**Economics**
ECON 100—Introduction to Economics (3)
ECON 231—Principles of Macroeconomics (3)
ECON 232—Principles of Microeconomics (3)

**General Honors**
G H 102—Freshman Social Sciences Tutorial (2–3)
G H 202—Sophomore Social Sciences Tutorial (2–3)
G H 302—Advanced Social Sciences Seminar (2–3)

**Geography**
GEOG 100—Introduction to Human Geography (3)
* GEOG 110—World Regional Geography (3)
* GEOG 251—Principles of Urban and Regional Planning (3)

**Political Science**
POLS 101—Introduction to Political Science (3)
POLS 122—American Government and Politics (3)
POLS 200—Introduction to Political Thought (3)
POLS 228—Fundamentals of International Relations (3)
POLS 267—Introduction to Comparative Government and Politics (3)

**Psychology**
PSY 100—Introductory Psychology (3)
PSY 221—Psychology of Child Development (3)
PSY 250—Human Social Behavior (3)
PSY 251—Personality and Adjustment (3)

**Sociology**
SOC 100—Introduction to Sociology (3)
SOC 200—Contemporary Social Problems (3)
SOC 250—American Institutions (3)
SOC 272—Individual and Society (3)
* SOC/WS 285—Women: A Global Perspective (3)

**Women’s Studies**
* WS/SOC 285—Women: A Global Perspective (3)

* Dual-category course. Students may only count a dual-category course to satisfy the requirements in one General Education category.

IV. Humanities and Fine Arts .................................................................................................... 9 s.h.

Students must take at least three courses in the Humanities and Fine Arts. One course must come from Area 1: Humanities, and one course must come from Area 2: Fine Arts. Students are then free to choose either a Humanities or Fine Arts Course to fulfill the required nine hours in Humanities/Fine Arts. Students may take no more than two courses from any one grouping below.
AREA 1: HUMANITIES

African American Studies
* AAS 281—Literature of the Black World (3)
* AAS 283—African American Folklore (3)

Broadcasting and Journalism
BC&J/ENG 290—Introduction to Film (3)

Communication
COMM 130—Introduction to Human Communication (3)
COMM 254—Great Speeches (3)

English
ENG 195—Introduction to Literature (3)
ENG 200—Introduction to Poetry (3)
ENG 201—Introduction to Fiction (3)
ENG 202—Introduction to Drama (3)
ENG 205—Introduction to Shakespeare (3)
ENG 206—Issues in U.S. Literature (3)
ENG 281—Writing and Social Action (3)
ENG 285—Introduction to Creative Writing (3)
ENG/BC&J 290—Introduction to Film (3)
ENG 300—Short Story (3)

Foreign Languages and Literatures
FL 101—Introductory Seminar in World Languages and Cultures (3)

SPAN 121—Elementary Spanish I (4)
SPAN 122—Elementary Spanish II (4)
SPAN 223—Intermediate Spanish I (3)
SPAN 224—Intermediate Spanish II (3)

General Honors
GH 101—Freshman Humanities Tutorial (2–3)
GH 201—Sophomore Humanities Tutorial (2–3)
GH 301—Advanced Humanities Seminar (2–3)

History
HIST 105—American History to 1877 (3)
HIST 106—American History since 1877 (3)
* HIST 115—World History to 1500 (3)
* HIST 116—World History since 1500 (3)
HIST 211—Technology and Science in World History (3)
* HIST 245—History of Asia (3)

Philosophy
PHIL 100—Introduction to Philosophy (3)
PHIL 120—Contemporary Moral Problems (3)
PHIL 140—Logic and Reasoning (3)
PHIL 205—Philosophy, Law and Society (3)
Religious Studies
REL 101—Religion and Popular Culture (3)
REL 107—The Bible (3)
* REL 110—Introduction to Eastern Religions (3)
* REL 111—Introduction to Western Religions (3)

Women’s Studies
WS 265—Women and Creativity (3)
WS 270—Hispanic Women (3)
WS 280—Lesbianism and Gender Identity (3)

AREA 2: FINE ARTS

African American Studies
* AAS 282—African American Theatre (3)

Art
ARTH 180—An Introduction to Art (3)
ARTH 282—History of Art: Ancient through Medieval (3)
ARTH 283—History of Art: Renaissance to 1900 (3)
* ARTH 284—History of Non-Western Art (3)
ARTS 181—Introduction to Studio Art (3)

Music
MUS 190—What to Listen for in Music (3)
* MUS 195—American Popular Music (3)

Theatre
THEA 101—Play Analysis (3)
THEA 110—Introduction to the Theatre (3)
THEA 172—Acting I (3)
* Dual-category course. Students may only count a dual-category course to satisfy the requirements in one General Education category.

V. Multicultural Studies ........................................................................................................................................... 3 s.h.

Students must select 3 s.h. from the courses listed below:

African American Studies
AAS 100—Introduction to African American Studies (3)
AAS 145—Famous People of African Descent (3)
* AAS 281—Literature of the Black World (3)
* AAS 282—African American Theatre (3)
* AAS 283—African American Folklore (3)
AAS/HIST 314—African American History (3)
AAS/HIST 349—Africa since 1800 (3)

Agriculture
INAG 310—International Agriculture in Developing Countries (3)

Anthropology
* ANTH 110—Introduction to Cultural Anthropology (3)
ANTH 249—Native North American Cultures (3)
ANTH/REL 225—Myth and Ritual (3)

University
UNIV 100—Personal Growth and Well-Being in Higher Education (1)
Western Illinois University has developed a program designed to help students complete their undergraduate degree in four years or less. The University is committed to helping students graduate in a timely fashion and has developed GradTrac to enable them to achieve this goal. GradTrac utilizes WIU’s automated degree audit so students and advisors keep current on degree progress. GradTrac is not a graduation requirement or an academic regulation. Regularly admitted freshmen may choose to participate in the GradTrac program. Participation in GradTrac requires significant initiative during a student’s years at WIU.

Specifically, a student must:

- Enter the University as a regularly admitted student with appropriate academic preparation to begin GradTrac;
- Enroll in GradTrac and declare an interest in a major that qualifies for the program;
- Take responsibility for meeting the deadlines and requirements of GradTrac and regularly monitor his/her progress toward graduation. Such monitoring includes timely meetings with an academic advisor at least once each semester prior to each registration;
- Take responsibility for making and keeping required appointments and advisement sessions;
- Consult with an advisor before dropping or adding a class;
- Accept any available class section that fits his/her schedule and register for classes at his/her assigned registration time. The following encumbrances can prevent a student from registering on time: financial, immunization, administrative, housing, judicial, and athletic. Be sure these encumbrances are taken care of prior to pre-registration;
- Meet all the academic requirements of his/her major, minor (when applicable), college, and the University;
- Accept responsibility for timely annual application for all necessary financial assistance; and
- Complete the applicable credits for his/her degree program each year as set out in his/her GradTrac degree plan (approximately 30 semester credit hours each year).

If a student changes majors and can still complete all remaining requirements within the time specified by the GradTrac agreement, the agreement remains valid. Appropriate signatures must be secured from the advisor and chair of the new major.

Students may enroll in an additional major or minor or in programs leading to additional licensing and certification, if he/she can complete all of these requirements within the time specified by the GradTrac agreement. A student must consult with his/her academic advisor in a timely manner in order to accomplish these changes or additions.

Transfer and Summer credits may count toward GradTrac requirements, but the academic terms in which these credits are earned will not be counted as part of the GradTrac agreement.

If, after working with an academic advisor, it appears that graduation may be delayed due to the unavailability of a course, a student must obtain the requisite form from the advisor and file it with that advisor no later than two working days after the end of the published pre-registration period. The form will be forwarded to the department chair and college dean.

If a student meets all the conditions of the degree plan but is unable to graduate due to the unavailability of a course, the University will offer one of the following options:

- Allow the student to graduate in the prescribed number of semesters by substituting a different course or an appropriate independent study assignment, as determined by the department and the college offering the major.
- Allow the student to graduate in the prescribed number of semesters by waiving the requirement to be met by the unavailable course, as determined by the department and college offering the major.
- If the college or department is unable to effect a waiver or substitution that will allow the student to graduate in the prescribed number of semesters, the University will waive the tuition for the course or courses still needed, if taken at Western Illinois University.

### Majors Participating in GradTrac*

| Accountancy | Health Services Management |
| Agriculture | History |
| Anthropology | Human Resource Management |
| Art | Information Systems |
| Biology | Law Enforcement and Justice Administration |
| Broadcasting and Journalism | Liberal Arts and Sciences |
| Business Analytics | Management |
| Chemistry—General | Marketing |
| Chemistry—Biochemistry | Mathematics |
| Clinical Laboratory Science | Meteorology |
| Communication | Music—Applied Music |
| Computer Science | Nursing |
| Cyber Security | Nutrition and Dietetics |
| Economics—Bachelor of Arts | Nutrition and Foodservice Management |
| Economics—Bachelor of Business | Physics—Standard |
| Educational Studies | Political Science |
| Emergency Management | Public Health |
| English | Recreation, Park and Tourism Administration |
| Finance | Social Work |
| Fire Protection Services | Sociology |
| Foreign Languages and Cultures | Speech Pathology and Audiology |
| Geographic Information Science | Supply Chain Management |
| Geology | Theatre |

* Due to additional course requirements, some Teacher Education programs are not included in GradTrac. Students should consult with their academic advisor.
College of Arts and Sciences ......................................................... 82-89
College of Business and Technology ................................................. 90-93
College of Education and Human Services ......................................... 94-96
College of Fine Arts and Communication ........................................... 97-99
Centennial Honors College ............................................................. 100-102
The College of Arts and Sciences occupies a central position in the University. This college houses the departments concerned with human cumulative culture and knowledge, usually referred to under the broad categories of the Natural Sciences and Mathematics, the Social Sciences, and the Humanities. Dedicated to the concept of excellent teaching, the college provides General Education Curriculum courses for all students in the University. Dedicated to the concept of impartial inquiry, the college encourages research that expands the frontiers of knowledge and applies that knowledge to the betterment of humanity.

With some exceptions, the programs in the College of Arts and Sciences are not primarily vocational in their orientation. In addition to making available a liberal education, these programs provide the theoretical basis for specialized work in graduate and professional schools. The college also educates future teachers in the basic secondary school disciplines. There is a continuing and growing demand for broadly educated young men and women who have the skills and knowledge essential to compete in a diverse and constantly changing landscape of careers and occupations.

Departments and Programs

Students in the College of Arts and Sciences may pursue studies in the following departments/schools and programs:

**Department of Accounting, Finance, Economics and Decision Sciences**
B.A. in Economics

**Department of Biological Sciences**
B.S. in Biology with options in:
- Botany
- Environmental Biology
- Medical Sciences
- Microbiology
- Science/Biology Teacher Education
- Zoology
B.S. in Clinical Laboratory Science

**Department of Chemistry**
B.S. in Chemistry with additional options in:
- Biochemistry
- Pharmacy
- Science/Chemistry Teacher Education
B.S. in Forensic Chemistry

**Department of Earth, Atmospheric, and Geographic Information Sciences**
B.S. in Geographic Information Science with options in:
- Geoenvironment and Planning
- Geospatial Science
B.S. in Geology with additional options in:
- Environmental Geology
- Paleontology
B.S. in Meteorology with options in:
- Applied Meteorology
- Operational Meteorology
Department of English  
B.A. in English with options in:  
   Literature and Language  
   Teacher Education  

Department of Foreign Languages and Literatures  
B.A. in Foreign Languages and Cultures with options in:  
   French  
   French Teacher Education  
   Spanish  
   Spanish Teacher Education  

Department of History  
B.A. in History with additional options in:  
   Pre-Law  
   Teacher Education  

Department of Liberal Arts and Sciences  
Bachelor of Liberal Arts and Sciences (B.L.A.S.)  

Department of Mathematics and Philosophy  
B.S. in Mathematics with additional options in:  
   Actuarial Science  
   Data Science and Statistics  
   Teacher Education  

School of Nursing  
Bachelor of Science in Nursing (B.S.N.)  

Department of Physics  
B.S. in Physics with additional options in:  
   Engineering Physics  
   Science/Physics Teacher Education  

Department of Political Science  
B.A. in Political Science with additional options in:  
   American Government  
   International Relations/Comparative Politics  
   Pre-Law  
   Public Administration/Public Policy  

Department of Psychology  
B.S. in Psychology with an additional option in:  
   Forensic Psychology  

Department of Sociology and Anthropology  
B.A. in Anthropology  
B.A. in Sociology  

The College of Arts and Sciences offers minor programs in the same fields as the major programs listed above (except in Clinical Laboratory Science, Liberal Arts and Sciences, Meteorology, and Nursing). In addition, the college offers the following minor programs that have no corresponding majors: African American Studies, Aging Studies, Applied Mathematics, Cannabis and Culture, Creative Writing, Environmental Studies, Film, Forensic Science, Geographic Information Systems, Global Politics, International Studies, Law and Society, Mental Health, Middle Level Mathematics Teaching, Middle Level Science Teaching,
Middle Level Social Studies Teaching, Neuroscience, Philosophy, Professional Writing, Public Administration and Public Service, Queer Studies, Religious Studies, Weather and Climate, and Women’s Studies.

The College of Arts and Sciences provides dual programs in Clinical Laboratory Science, Engineering, and Law, whereby a student can complete requirements for a bachelor’s degree in the College of Arts and Sciences while working toward a professional degree or certificate. In addition, the college provides advising for pre-professional programs in Engineering and Law.

**College Graduation Requirements**

In addition to meeting University graduation requirements, students in the College of Arts and Sciences must:

1. Satisfy the University and other general requirements.
2. Complete a minimum of 120 s.h. of credit in approved courses, of which at least 42 s.h. are in courses numbered 300 or above.
3. Achieve and maintain a minimum scholastic average of 2.00 in the major, minor, and total program.
4. Satisfy the University General Education and College of Arts and Sciences Curriculum requirements for the degree sought. A minimum of 16 s.h. should be taken to meet these requirements during the freshman year and a minimum of 16 s.h. during the sophomore year.
5. Complete an approved major of a minimum of 32 s.h. At least 15 s.h. of the 32 s.h. of a major must be in courses numbered 300 or above.
6. Complete a recognized minor with a minimum of 16 s.h. The minor may not be in the same department as the major, unless the minor does not have a corresponding recognized major, except by written permission of the dean.
7. Complete courses required in related departments as listed with course requirements for the major in the individual departments.

**Licensure to Teach**

Students enrolled in the College of Arts and Sciences who wish to obtain a teaching license must meet all criteria for admission to the Teacher Education Program, complete the Teacher Education curriculum, and complete the major or minor requirements for Teacher Education students as described under the various department offerings in Arts and Sciences. See Teacher Education (p. 346) for additional information and specific requirements.

**Bachelor of Science in Nursing (B.S.N.)**

A Bachelor of Science in Nursing degree in the College of Arts and Sciences is granted to students who fulfill the general University requirements as to total number of hours, scholarship standards, the University General Education requirements, the graduation requirements, and the Nursing major requirements.

Bachelor of Science in Nursing students complete the University General Education Curriculum listed on page 70. The approved University General Education Curriculum courses are listed on pages 71–78.
Bachelor of Arts (B.A.)
Bachelor of Science (B.S.)
Bachelor of Liberal Arts and Sciences (B.L.A.S.)

A Bachelor of Arts, Bachelor of Science, or Bachelor of Liberal Arts and Sciences degree in the College of Arts and Sciences is granted to students who fulfill the general University requirements as to total number of hours, scholarship standards, the University General Education requirements, the College of Arts and Sciences Curriculum requirements, the graduation requirements, and a major and minor.

UNIVERSITY GENERAL EDUCATION AND COLLEGE OF ARTS AND SCIENCES CURRICULUM REQUIREMENTS (for B.A., B.S., B.L.A.S.)

Courses taken to satisfy the University General Education and Arts and Sciences Curriculum requirements may apply to the major or minor if approved by the academic advisor, unless otherwise restricted. Proficiency exams, where applicable, may be taken in place of these required courses. If successfully completed, they are graded Pass (P). Course credit is given. No other requirements are then imposed in lieu of the courses so completed.

Note: Students enrolled in the College of Arts and Sciences who wish to obtain a teaching license complete the University General Education Curriculum requirements instead of the Arts and Sciences Curriculum requirements.

The following restrictions apply:

1. No courses numbered 275, 298, 450, 475, and 498 are acceptable for credit in the General Education Curriculum.

2. Students may not use any one course to satisfy two General Education distribution requirements.

3. Students may not count more than two courses from the discipline in which they major toward satisfaction of the General Education requirements.

4. No courses under the Pass/Fail option may apply to the General Education requirements.

Bachelor of Arts (B.A.) Degree
University General Education and College Curriculum Requirements................. 60 s.h.

I. Communication Skills (9 s.h.)

   ENG 180 and ENG 280; COMM 241 or COMM 242

   See University General Education Curriculum for additional information (p. 70).

II. Natural Sciences and Mathematics (12 s.h.)

   PART A—Competency

   All students enrolled in the University must demonstrate their ability to use general baccalaureate-level skills in Mathematics by one of the following means:

   (1) Receive University credit for MATH 100, Core Competency in Mathematics;

   (2) Receive a satisfactory score on an assessment instrument designated by the Department of Mathematics and Philosophy; or

   (3) Receive University credit for a Mathematics course which lists MATH 100 as a prerequisite.

   See University General Education Curriculum for additional information (p. 70).

   PART B—General Education

   Students must complete 12 s.h. from the Natural Sciences and Mathematics section (I) of the list on pages 88–89. At least one laboratory course must be included. Courses from at least two departments must be included. Students may take no more than two courses from any one grouping. At least 10 s.h. of this requirement must be satisfied from courses not listed in boldface type.
III. Social Sciences (15 s.h.)

Students must complete 15 s.h. from the Social Sciences section (II) of the list on pages 88–89. Courses from at least three departments must be included. Students may take no more than two courses from any one grouping. At least 9 s.h. of this requirement must be satisfied from courses not listed in **boldface** type.

IV. Humanities and Fine Arts (18 s.h.)

Students must complete 18 s.h. from the Humanities and Fine Arts section (III) of the list on pages 88–89. At least one course must come from Area 1: Humanities, and at least one course must come from Area 2: Fine Arts. Students are then free to choose either Humanities or Fine Arts courses to fulfill the required 18 hours in Humanities/Fine Arts. Courses from at least three departments must be included. Students may take no more than two courses from any one grouping. At least 9 s.h. of this requirement must be satisfied from courses not listed in **boldface** type.

V. Multicultural Studies (3 s.h.)

Students must select at least 3 s.h. from the Multicultural Studies section (IV) of the list on pages 88–89.

VI. Human Well Being (3 s.h.)

Students may select any combination of courses from at least two of the groupings in the Human Well Being section (V) of the list on pages 88–89.

**Bachelor of Science (B.S.) Degree**

**University General Education and College Curriculum Requirements**

I. Communication Skills (9 s.h.)

ENG 180 and ENG 280; COMM 241 or COMM 242
See University General Education Curriculum for additional information (p. 70).

II. Natural Sciences and Mathematics (16 s.h.)

**PART A—Competency**

All students enrolled in the University must demonstrate their ability to use general baccalaureate-level skills in Mathematics by one of the following means:

1. Receive University credit for MATH 100, Core Competency in Mathematics;
2. Receive a satisfactory score on an assessment instrument designated by the Department of Mathematics and Philosophy; or
3. Receive University credit for a Mathematics course which lists MATH 100 as a prerequisite.

See University General Education Curriculum for additional information (p. 70).

**PART B—General Education**

Students must complete 16 s.h. from the Natural Sciences and Mathematics section (I) of the list on pages 88–89. At least one laboratory course must be included. Courses from at least two departments must be selected. A one-year sequence outside the major must be included. Students may take no more than two courses from any one grouping. At least 10 s.h. of this requirement must be satisfied from courses not listed in **boldface** type.

III. Social Sciences (12 s.h.)

Students must complete 12 s.h. from the Social Sciences section (II) of the list on pages 88–89. Courses from at least two departments must be included. Students may take no more than two courses from any one grouping. At least 9 s.h. of this requirement must be satisfied from courses not listed in **boldface** type.
IV. Humanities and Fine Arts (12 s.h.)

Students must complete 12 s.h. from the Humanities and Fine Arts section (III) of the list on pages 88–89. At least one course must come from Area 1: Humanities, and at least one course must come from Area 2: Fine Arts. Students are then free to choose either Humanities or Fine Arts courses to fulfill the required 12 hours in Humanities/Fine Arts. Courses from at least two departments must be included. Students may take no more than two courses from any one grouping. At least 9 s.h. of this requirement must be satisfied from courses not listed in **boldface** type.

V. Multicultural Studies (3 s.h.)

Students must select at least 3 s.h. from the Multicultural Studies section (IV) of the list on pages 88–89.

VI. Human Well Being (3 s.h.)

Students may select any combination of courses from at least two of the groupings in the Human Well Being section (V) of the list on pages 88–89.

**Bachelor of Liberal Arts and Sciences (B.L.A.S.) Degree**

**University General Education and College Curriculum Requirements** ............... 57 s.h.

I. Communication Skills (9 s.h.)

ENG 180 and ENG 280; COMM 241 or COMM 242
See University General Education Curriculum for additional information (p. 70).

II. Natural Sciences and Mathematics (12–15 s.h.*)

**PART A—Competency**

All students enrolled in the University must demonstrate their ability to use general baccalaureate-level skills in Mathematics by one of the following means:

(1) Receive University credit for MATH 100, Core Competency in Mathematics;

(2) Receive a satisfactory score on an assessment instrument designated by the Department of Mathematics and Philosophy; or

(3) Receive University credit for a Mathematics course which lists MATH 100 as a prerequisite.

See University General Education Curriculum for additional information (p. 70).

**PART B—General Education**

Students must complete 12–15 s.h.* from the Natural Sciences and Mathematics section (I) of the list on pages 88–89. At least one laboratory course must be included. Courses from at least two departments must be selected. Students may take no more than two courses from any one grouping. At least 10 s.h. of this requirement must be satisfied from courses not listed in **boldface** type.

III. Social Sciences (12–15 s.h.*)

Students must complete 12–15 s.h.* from the Social Sciences section (II) of the list on pages 88–89. Courses from at least two departments must be included. Students may take no more than two courses from any one grouping. At least 9 s.h. of this requirement must be satisfied from courses not listed in **boldface** type.

IV. Humanities and Fine Arts (12–15 s.h.*)

Students must complete 12–15 s.h.* from the Humanities and Fine Arts section (III) of the list on pages 88–89. At least one course must come from Area 1: Humanities, and at least one course must come from Area 2: Fine Arts. Students are then free to choose either Humanities or Fine Arts courses to fulfill the required 12–15 hours in Humanities/Fine Arts. Courses from at least two departments must be included.
Students may take no more than two courses from any one grouping. At least 9 s.h. of this requirement must be satisfied from courses not listed in boldface type.

V. Multicultural Studies (3 s.h.)

Students must select at least 3 s.h. from the Multicultural Studies section (IV) of the list on pages 88–89.

VI. Human Well Being (3 s.h.)

Students may select any combination of courses from at least two of the groupings in the Human Well Being section (V) of the list on pages 88–89.

*Must take 15 s.h. in two of these three categories and 12 s.h. in the third category: Natural Sciences/Mathematics, Social Sciences, and Humanities.

UNIVERSITY GENERAL EDUCATION/COLLEGE CURRICULUM COURSE LISTING
(for B.A., B.S., B.L.A.S.)

The courses below may be used to fulfill the University General Education/College of Arts and Sciences Curriculum requirements for the Bachelor of Arts, Bachelor of Science, and Bachelor of Liberal Arts and Sciences degrees within the College of Arts and Sciences. Students enrolled in the Bachelor of Science in Nursing (B.S.N.) program must complete the University General Education Curriculum listed on page 70.

I. Natural Sciences and Mathematics

Biology: BIOL 100, 101, 181, 204
Botany: BOT 200
Chemistry: CHEM 101, 102, 114, 150, 201, 202

Program Offerings and Locations:

- Minor in Business: Macomb, Quad Cities
- Minor in Pre-MBA: Macomb, Quad Cities

The College of Business and Technology at Western Illinois University provides a focus for educational excellence that promotes the intellectual and personal growth of participants and enhances their contributions to individuals and organizations to thrive, contribute, and lead in a global society. The activities and operations of the college are not regionally restricted, as the western part of Illinois is an integral part of a unified social and economic infrastructure that extends across the United States to the world.

Several programs within the College of Business and Technology are accredited:

- The Business and Accountancy programs (undergraduate and graduate) are fully accredited by AACSB International.
- The Engineering and Mechanical Engineering programs are accredited by ABET.

The essence of educational excellence involves a qualified and scholarly faculty, a diverse student body, small class sizes, the use of current technology, the best aspects of a small college atmosphere, and a positive learning environment. Intellectual and personal growth includes cultivating scholarly virtues, promoting the concept of life-long learning, encouraging faculty development, and generating and sharing information and knowledge. Participants are students, faculty, graduates, and all others involved in the educational process. Every individual is an active leaner and teacher through shared responsibility, collaboration, and mutual respect. The college contributes to the success of future and current leaders, managers, and professionals in the global community. Faculty are engaged in teaching, research, and service; students are prepared for meaningful positions and for life; and employers recognize the value of an education from the college.

Annually, a wide variety of lectures, symposia, and discussions designed to augment classroom work are presented. While many of these professional programs appeal primarily to business people and business and technology students, increasing emphasis is being placed on the broad social spectrum of business endeavors. The goal of these varied programs is to engage students in the concepts of social responsibility and ethical business practices while encouraging the use of quantitative, technical, and theoretical approaches necessary for problem solving in the complex milieu of today’s global business environment.

Beta Gamma Sigma

Beta Gamma Sigma is the national scholastic honor society in the field of business. Election to membership is available to both undergraduate and graduate students in business. Selection is based upon outstanding scholastic achievement.

Departments and Programs

Students in the College of Business and Technology may pursue studies in the following departments/schools and programs:

School of Accounting, Finance, Economics and Decision Sciences
   B.B. in Accountancy
   B.B. in Business Analytics
B.A. in Economics
B.B. in Economics
B.B. in Finance

School of Agriculture
B.S. in Agriculture with options in:
Agricultural Business
Agricultural Science
Teacher Education

School of Computer Sciences
B.S. in Computer Science
B.S. in Cyber Security
B.S. in Information Systems

School of Engineering
B.S. in Civil Engineering
B.S. in Electrical Engineering
B.S. in Engineering
B.S. in Mechanical Engineering

Department of Engineering Technology
B.S. in Construction and Facilities Management
B.S. in Engineering Technology

School of Management and Marketing
B.B. in Human Resource Management
B.B. in Management
B.B. in Marketing with options in:
Enterprise Marketing
Marketing Technology
Omni-Channel Marketing
B.B. in Supply Chain Management

The College of Business and Technology offers minor programs in the same fields as the major programs listed above (except Civil Engineering, Construction and Facilities Management, Electrical Engineering, Engineering, Engineering Technology, and Mechanical Engineering). In addition, the college offers the following minor programs that have no corresponding majors: Agricultural Economics, Agricultural Technology Management, Agronomy, Algorithms and Data Management, Animal Science, App Development, Business, Cannabis Production, Computer Science Education, Construction and Facilities Technology, Horticulture, Industrial Technology, Information Technology, International Business, Manufacturing Technology, Natural Resources Conservation, Network Technologies, Operations Management, Plant Breeding, Pre-MBA, and Precision Agriculture. The requirements for the minor in Business are listed below. Requirements for all other minors are listed under the appropriate department sections.

The College of Business and Technology also provides advising for pre-professional programs in Forestry, Pre-MBA, and Veterinary Medicine.

Minor in Business

24 s.h.

1. ACCT 201, 202; ECON 231, 232; STAT 171 ......................................................... 15 s.h.
2. Select three of the following courses: ................................................................. 9 s.h.
   FIN 331, IS 340, MGT 349, MGT 481, MGT/OM 352, MKTG 327

Pre-MBA Minor (21–27 s.h.)

See Pre-Professional Programs (p. 321).
Limit on Business Credits

Students who are not declared as Bachelor of Business majors may enroll/count a maximum of 29 total hours of coursework with the following prefixes: ACCT, BAT, BL, DS, FIN, HRM, MGT, MKTG, OM, and SCM. Business courses in excess of 29 hours will not be counted toward degree or graduation requirements for non-business majors. Exceptions to this rule require the permission of the Dean of the College of Business and Technology.

Major in Business

Acceptance as a declared business major requires the completion of at least 60 s.h. and, except as provided below, at least 12 s.h. completed at WIU with a cumulative grade point average of at least 2.50 at WIU. The student must have also completed ACCT 201 and 202, ECON 231 and 232, MATH 137, and STAT 171. Students not eligible to declare may enroll in a Pre-Business Program. Enrollment in these programs does not guarantee acceptance into one of the major areas as a candidate for the Bachelor of Business degree.

Transfer students who have earned 60 hours prior to matriculation at WIU, with a cumulative grade point average of 2.50, and who have completed ACCT 201 and 202, ECON 231 and 232, MATH 137, and STAT 171 will enter as declared majors.

All students must have attained junior standing in order to enroll in 300- and 400-level business courses with the exception of courses in Economics.

Pre-Business students who have earned 60 hours, but are otherwise ineligible to declare a business major, will be limited to a maximum of 29 hours of business courses (see Limit on Business Credits above) and may be removed from business courses.

Students are expected to complete a minimum of 24 s.h. in the major area as defined by the appropriate department. In special cases, the chairperson of the major department, the Dean of the College of Business and Technology, and the Council on Admission, Graduation, and Academic Standards (CAGAS) may approve a course outside the college as a substitute for a major area requirement.

After satisfying the University General Education Curriculum, the Business Core, and the major area courses, the remaining courses may be taken as open electives.

Advising Centers

Students majoring in Agriculture, Engineering, or Engineering Technology receive academic advising services in the Agriculture and Engineering Technology Advising Office, located in Knoblauch Hall 110, telephone (309) 298-2100.

Students majoring in Business disciplines or Computer Sciences receive academic advising services in the Business and Computer Sciences Advising Center, located in Stipes Hall 133, telephone (309) 298-1619.

Students majoring in business disciplines or Information Systems who are primarily enrolled at the WIU—Quad Cities campus receive advising services from the WIU—Quad Cities advising office, telephone (309) 762-9481.

College Graduation Requirements

In addition to meeting University graduation requirements, students in the College of Business and Technology must:

1. Complete 120–126 s.h. of credit in approved courses, of which a minimum of 42 s.h. must be in courses numbered 300 and above.

2. Complete the requirements for the Bachelor of Business, Bachelor of Arts, or Bachelor of Science degree as outlined for specific majors.
BACHELOR OF BUSINESS MAJORS
1. Complete the business major core courses.
2. Complete the last 30 s.h. in residence.
3. Complete at least 50 percent of the required business credit hours in residence.

BACHELOR OF ARTS AND BACHELOR OF SCIENCE MAJORS
1. Satisfy the University residence and other general requirements including the University General Education Curriculum and minimum scholastic standards.
2. Complete an appropriate minor or comprehensive major in lieu of a major-minor combination.

Licensure to Teach Agriculture
Students enrolled in the School of Agriculture who wish to obtain a teaching license must meet all criteria for admission to the Teacher Education Program, complete the Teacher Education curriculum, and complete the major or minor requirements for Teacher Education students. See School of Agriculture (p. 115) and Teacher Education (p. 346) for additional information and specific requirements.

Bachelor of Business Degree
In addition to the University General Education Curriculum, all candidates for the Bachelor of Business degree must complete the following requirements:

Business Core
Accounting (ACCT 201 and 202) ......................................................................................................................6 s.h.
Business Communications (BCOM 320†) ........................................................................................................3 s.h.
Business Law (BL 230/BL 431 for Accountancy majors) ..............................................................................3 s.h.
Business Statistics (DS 303) .........................................................................................................................3 s.h.
Finance (FIN 331) .........................................................................................................................................3 s.h.
Global Studies (ECON 170 or MGT 125/MGT 481 for Accountancy majors) ..............................................3 s.h.
Information Systems (IS 340) .......................................................................................................................3 s.h.
Management (MGT 349 and 490) ................................................................................................................6 s.h.
Marketing (MKTG 327) ...................................................................................................................................3 s.h.
Business and Technology (BAT 490) .............................................................................................................0 s.h.
Total .............................................................................................................................................................33 s.h.

†Writing Instruction in the Disciplines (WID) course.

Students who transfer an equivalent course with less than the hours shown may seek approval from the Dean of the College of Business and Technology to complete the core requirements with fewer than 33 s.h.
The College of Education and Human Services houses a number of diverse programs that are designed to provide a challenging and supportive learning environment that is widely recognized as meeting the humanistic and technological demands of a global society. These programs lead to careers in education (teaching, administration, counseling); public health and health services management; exercise science and physical education; law enforcement and justice administration; fire science; emergency management; leisure, recreation, and tourism; social work; and dietetics and hospitality. The graduates of these programs enter careers in business, education, nonprofit organizations, and government. Long recognized for its outstanding Teacher Education programs, the College of Education and Human Services has maintained its excellence in the traditional aspects of teacher preparation while undergoing expansion and development to meet the changing needs of society. Education majors enter a field experience program in which partnerships exist with cooperating private and public schools. Field programs provide extensive pre-student teaching field experiences in addition to senior student teaching in regular classroom settings in small and large schools, minority group settings, rural and urban schools, with migrant populations, in daycare centers, and other arranged sites. Student teaching assignments are available in designated centers in Illinois.

The academic programs in the Department of Kinesiology are enhanced by many special facilities such as aquatic areas, court facilities, indoor track, outdoor campus, weight rooms, dance studios, a fitness room, a biomechanics laboratory, and a human performance laboratory. Students in the School of Law Enforcement and Justice Administration learn hands-on training in the McCamey Crime Lab. Students in the Department of Recreation, Park and Tourism Administration have opportunities to learn in the Knoblauch Executive Kitchen and Dining Room and the Horn Field Campus outdoor education facility. A special emergency medical training laboratory is available for students in Health Sciences. Internships are offered for academic credit during the junior and senior years.

The Social Work program prepares graduates to provide services within social welfare institutions.

The programs in the School of Law Enforcement and Justice Administration and Department of Recreation, Park and Tourism Administration emphasize a close relationship with business and government in a wide array of experiences, the most comprehensive being a full-time internship during the senior year. This provides the graduates of these programs with preparation that eases the transition into the career path and enables the students to assess which direction may be best to follow within the program options.

The Military Science program enables the student enrolled to seek a commission in the U.S. Army and major in any recognized discipline within the University. The Military Science program provides instruction and practical experience in leadership and management that will help students succeed in any desired career, civilian or military.

Departments and Programs

Students in the College of Education and Human Services may pursue studies in the following departments/schools and programs:
Department of Counselor Education and College Student Personnel
Undergraduate Coursework in College Student Personnel
Undergraduate Coursework in Counselor Education

School of Education
B.S.Ed. in Bilingual/English as a Second Language Education
B.S.Ed. in Educational Studies
B.S.Ed. in Elementary Education with an additional option in:
  Early Childhood Education
B.S.Ed. in Middle Level Education
B.S.Ed. in Special Education
Professional Education Coursework

Department of Health Sciences and Social Work
B.S. in Health Services Management
B.S. in Public Health
Bachelor of Social Work (B.S.W.)

Department of Kinesiology
B.S. in Exercise Science
B.S. in Nutrition and Dietetics
B.S. in Nutrition and Foodservice Management
B.S. in Physical Education

School of Law Enforcement and Justice Administration
B.S. in Emergency Management
B.S. in Fire Protection Services with options in:
  Fire Administration
  Fire Science
B.S. in Law Enforcement and Justice Administration

Department of Military Science
Two-year and four-year programs leading to a commission as a Second Lieutenant in
the United States Army

Department of Recreation, Park and Tourism Administration
B.S. in Recreation, Park and Tourism Administration with additional options in:
  Adapted Recreation and Inclusion
  Community Organizations
  Outdoor Recreation
  Tourism, Hospitality and Event Management

The College of Education and Human Services offers minor programs in the same fields
as the major programs listed above (except Bilingual/English as a Second Language
Education, Early Childhood Education, Elementary Education, Exercise Science, Fire
Protection Services, Health Services Management, Middle Level Education, Nutrition and
Foodservice Management, Physical Education, Public Health, Social Work, and Special
Education). In addition, the college offers the following minor programs that have
no corresponding majors: Coaching, Corrections, Criminalistics, Event Planning and
Management, Homeland Security, Horticulture, Hospitality Management, Legal Studies,
Middle Level Literacy Teaching, Military Science, Nonprofit Administration, Occupational
Safety, Outdoor Leadership, Scuba Diving, Security Administration, Sports Health and
Wellness, Teaching English to Speakers of Other Languages (TESOL), Therapeutic
Recreation, and Youth Leadership.
College of Education and Human Services

College Graduation Requirements

In addition to meeting University graduation requirements, students in the College of Education and Human Services must:

1. Achieve and maintain the minimum scholastic standards in the comprehensive major or a major and minor program.

2. Complete a comprehensive major or a major and minor appropriate to the department and curriculum in which the student is enrolled.

Academic Advisors

Students enrolled in the College of Education and Human Services will be provided with academic advising in the College of Education and Human Services Advising Center and the Office of Teacher Education. Advising is an integral part of any academic program. Advising assists students with registration, academic planning, and meeting graduation requirements. Students must meet with their academic advisor each semester prior to pre-registration.

Licensure to Teach

Students enrolled in the College of Education and Human Services who wish to obtain a teaching license must meet all criteria for admission to the Teacher Education Program, complete the Teacher Education curriculum, and complete the major requirements for Teacher Education students as described under the various department offerings in the college. See Teacher Education Program (p. 346) for additional information and specific requirements.
Dean: Mr. William T. “Billy” Clow
Associate Dean: Dr. William G. Hoon

The College of Fine Arts and Communication provides high quality educational programs to a diverse student population. The primary focus is to prepare artists, professionals, and scholars of the 21st century. Students will comprehend the complexity of visual and performing arts, communicative arts and sciences, and media through the study of their aesthetics, creativity, history, theories, and applications.

From the time of entry to graduation, students are continually made aware of their progress through assessment strategies. Internships are available in some of the programs. The college believes that a quality education denotes its graduates will achieve the ability to think clearly and logically, draw meaningful conclusions from various languages, symbols, and texts, make informed decisions, develop self-discipline, acquire a thirst to achieve a high standard of scholarly and technical artistry or knowledge in their subject field, and critically examine the process of thinking intelligently so they can nourish the mind, foster integrity, refine character, and stimulate imaginative sensibilities.

Departments and Programs

Students in the College of Fine Arts and Communication may pursue studies in the following departments/schools and programs:

Department of Art and Design
B.A. in Art with options in:
  - Art Studio
  - Graphic Design
B.F.A. in Art with options in:
  - Art Studio
  - Graphic Design
  - Teacher Education

Department of Broadcasting and Journalism
B.A. in Broadcasting and Journalism with additional options in:
  - Advertising and Public Relations
  - Broadcast Production
  - Multimedia Journalism
  - Sports Broadcasting

Department of Communication
B.A. in Communication with options in:
  - Communication Studies
  - Interpersonal Communication and Processes
  - Organizational Communication
  - Social Influence

School of Music
Bachelor of Music (B.M.) with options in:
  - Applied Music (Composition, Instrumental, Jazz, Piano, Vocal)
  - Music Business
  - Music Therapy
  - Teacher Education
Department of Speech Pathology and Audiology  
B.S. in Speech Pathology and Audiology

Department of Theatre and Dance  
B.A. in Theatre with options in:  
Performance  
Production/Design  
B.F.A. in Musical Theatre

The College of Fine Arts and Communication offers minor programs in the same fields as the major programs listed above (except Musical Theatre and Speech Pathology and Audiology). In addition, the college offers the following minor programs that have no corresponding majors: American Sign Language, Art History, Computer-Mediated Communication, Dance, Jazz Studies, and Stage Combat.

Majors and Minors

Course requirements for Fine Arts and Communication majors and minors are given under the department headings. The departments of the College of Fine Arts and Communication are authorized to grant a baccalaureate degree to students completing the following groups of courses:

1. University General Education Curriculum.
2. A department core of courses.
3. One of the options offered by the student's major department. Art and Theatre majors must meet specific grade point average requirements in the departmental core to enroll in the comprehensive program. Admission to all programs in Music and the B.F.A. Musical Theatre program in the Department of Theatre and Dance are contingent upon satisfactory performance in audition. Major programs with a conventional minor continue to be available.

Academic Advising

Each academic program in the College of Fine Arts and Communication has its own approach to advising, and students should acquaint themselves with the advising in their major. Advising is an important and integral part of an academic program. Advisors help students with registration, academic planning, and meeting graduation requirements.

The advisor can succeed in this task only if the student maintains contact. The advisor should be consulted regarding all courses taken and dropped in order to ensure that the requirements of the program are being followed and will be properly fulfilled.

Communication students who are pursuing the major at the WIU—Quad Cities campus may contact the Communication Advisor at the Western Illinois University—Quad Cities campus.

College Graduation Requirements

In addition to fulfilling University graduation requirements, students in the College of Fine Arts and Communication must:

1. Complete the appropriate total of semester hours needed for graduation in the specific curriculum pursued, including the major, the minor if needed, and electives. At least 42 s.h. must be in courses numbered 300 or above.
2. Complete at least 12 s.h. in courses numbered 300 or above in the major.
Licensure to Teach

Students enrolled in the College of Fine Arts and Communication who wish to obtain a teaching license must meet all criteria for admission to the Teacher Education Program, complete the Teacher Education curriculum, and complete the major or minor requirements for Teacher Education students as described under the various department offerings in Fine Arts. See Teacher Education (p. 346) for additional information and specific requirements.

Bureau of Cultural Affairs

The college advises the Bureau of Cultural Affairs (BCA), an arts presenting student organization comprised of WIU students, faculty, staff, and community members. Affordable and diverse performances each year include national Broadway tours, theatre, dance, symphonies, headline musical artists, chamber music, young artists, comedy, and youth programming. BCA performances are free to WIU students.

Tri States Public Radio

The college operates WIUM 91.3 FM/WIUW 89.5 FM/WVKC 90.7 FM/K292GR 106.3 FM, a 24-hour-a-day National Public Radio member station, offering in-depth news, public affairs, and cultural programming, including classical, jazz, and folk music. The stations also offer two reading services to assist blind and print-disabled persons in the region, the Audio Information Service and the Personal Reader Service, which operate free of charge to clients.
Centennial Honors College

Interim Dean: Dr. Lorette S. Oden
Director: Dr. Paul A. Schlag
Office: Leslie F. Malpass Library, 2nd Floor
Telephone: (309) 298-2228
E-mail: Honors@wiu.edu
Website: wiu.edu/Honors

Program Offers and Locations:
- Minor in Pre-Law Honors: Macomb

The Centennial Honors College provides academically talented and motivated students an enriched academic curriculum and opportunities for leadership, professional growth, and service learning. At the University level, its curriculum of special General Honors tutorials, colloquia, and seminars is an integral part of the University's General Education. Within departments or areas of study, the honors curriculum is an integral part of the major with offerings of in-course honors, seminars, recitals, and internship opportunities. General Honors courses, taught by a select faculty, foster opportunities for discussion and debate and promote critical reasoning, cross-disciplinary thinking, and communication skills. Honors work within departments and areas provides opportunities for in-depth study, research, and professional development.

Eligibility

Only students who are enrolled in the Centennial Honors College may register for honors courses. To qualify for the Centennial Honors College, entering freshmen must fall into two of the following three categories:

1. Have an SAT score of 1160 or higher (or ACT composite of 24 or higher)
2. Be in the top 15 percent of graduating class in high school
3. Have a GPA of 3.4 or higher (based on a 4.0 scale)

Transfer and current Western students who wish to join the Honors College must have a 3.4 grade point average on a 4.0 scale based on 12 or more semester hours. Honors credit may be given for honors coursework completed at other accredited institutions.

International students are encouraged to apply and may contact the director.

Honors College Requirements for Graduation

Students may complete an honors curriculum in University Honors, Honors in the Major, or General Honors. All honors students must complete the one-hour honors colloquium (G H 299).

University Honors includes two General Honors seminars, an honors section of the First Year Experience (a General Honors seminar may be substituted in some cases), G H 299, and the appropriate discipline-specific honors requirements in the major. Transfer students are eligible for University Honors if they have completed an appropriate number of honors courses at a college or university before enrolling at Western Illinois University.

Honors in the Major includes the appropriate discipline-specific requirements in the major and G H 299.

General Honors includes two General Honors seminars, an honors section of the First Year Experience (a General Honors seminar may be substituted in some cases), and G H 299.

Pre-Law Honors Minor

The Pre-Law Honors minor is a unique interdisciplinary minor for students who are enrolled in the Centennial Honors College and who plan careers in law. The curriculum for this minor is designed to provide students with skills and knowledge important as a foundation for the study of law. Emphasis is given to the development of effective written
and oral communication, analytical and critical reasoning, and an understanding of institutions, social processes, and human values important to legal studies. Students from all majors are eligible for this honors option, and upon completion of the requirements will graduate as Honors Scholars.

- A minimum overall and honors coursework GPA of 3.40
- 21 s.h. from Categories A and B below
- 18 s.h. as honors hours with the option of 6 honors hours in General Honors
- A minimum of 12 honors hours from Categories A and B
- 18 s.h. outside of the major (one course may count toward the major and this minor)

**Category A (complete all with or without honors credit)**

**ACCT 200 or 201; COMM 247; PHIL 120, 140**

**Category B (complete 9 s.h. with or without honors credit)**

**BC&J 400; BL 230; ECON 232; HIST 303; LEJA 212, 312; PHIL 420, 440; POLS 319, 402, 410, 411, 448; SOC 355, 463**

**Course Descriptions**

**GENERAL HONORS (G H)**

101 Freshman Humanities Tutorial. (2–3, repeatable only if second tutorial is taught by a different department) (General Education/Humanities) Reading, writing, and discussion on topics in the humanities to be announced in advance. Designed primarily for freshmen. Prerequisites: Students must be enrolled in the Centennial Honors College. Other special requirements to be announced. Students may be eligible to receive WIU advanced placement credit for ENG 180 or ENG 280 but not for both ENG 180 and 280. G H 101 may be repeated only if taken in a different department; however, AP credit may be earned only once.

102 Freshman Social Sciences Tutorial. (2–3, repeatable for different topics) (General Education/Social Sciences) Reading, writing, and discussion on social science topics to be announced in advance. Designed primarily for freshmen. Prerequisites: Students must be enrolled in the Centennial Honors College. Other special requirements to be announced.

103 Freshman Science and Mathematics Tutorial. (2–4, repeatable for different topics) (General Education/Natural Sciences and Mathematics) Reading, writing, and discussion on scientific and mathematical topics to be announced in advance. Designed primarily for freshmen. Prerequisites: Students must be enrolled in the Centennial Honors College. Other special requirements to be announced.

104 Freshman Science and Mathematics Tutorial with Lab. (3–4, repeatable for different topics) (General Education/Natural Sciences and Mathematics) Laboratory analysis, reading, writing, and discussion of scientific and mathematical topics to be announced in advance. Designed primarily for freshmen. Prerequisites: Students must be enrolled in the Centennial Honors College. Other special requirements may be announced.

201 Sophomore Humanities Tutorial. (2–3, repeatable for different topics) (General Education/Humanities) Reading, writing, and discussion on topics in the humanities to be announced in advance. Designed primarily for sophomores. Prerequisites: Students must be enrolled in the Centennial Honors College. Other special requirements to be announced.

202 Sophomore Social Sciences Tutorial. (2–3, repeatable for different topics) (General Education/Social Sciences) Reading, writing, and discussion on social science topics to be announced in advance. Designed primarily for sophomores. Prerequisites: Students must be enrolled in the Centennial Honors College. Other special requirements to be announced.

203 Sophomore Science and Mathematics Tutorial. (2–4, repeatable for different topics) (General Education/Natural Sciences and Mathematics) Reading, writing, and discussion on scientific and mathematical topics to be announced in advance. Designed primarily for sophomores. Prerequisites: Students must be enrolled in the Centennial Honors College. Other special requirements may be announced.

204 Sophomore Science and Mathematics Tutorial with Lab. (3–4, repeatable for different topics) (General Education/Natural Sciences and Mathematics) Laboratory analysis, reading, writing, and discussion of scientific and mathematical topics to be announced in advance. Designed primarily for sophomores. Prerequisites: Students must be enrolled in the Centennial Honors College. Other special requirements may be announced.

207 Sophomore Multicultural Tutorial. (2–3, repeatable for different topics) (General Education/Multicultural Studies) Reading, writing, and discussion on topics concerning multicultural issues to be announced in advance. Designed primarily for sophomores. Prerequisites: Students must be enrolled in the Centennial Honors College. Other special requirements to be announced.

299 Honors Colloquium. (1, repeatable for different topics) Exploration of topics focused on significant scientific and cultural achievements. Lectures, discussion, and field trips. Field trips.

301 Advanced Humanities Seminar. (2–3, repeatable for different topics) (General Education/Humanities) Reading, writing, and discussion on topics in the humanities to be announced in advance. Designed primarily for juniors. Normally a term paper and seminar presentation will be required. Prerequisites: Students must be enrolled in the Centennial Honors College. Other special requirements to be announced.

302 Advanced Social Sciences Seminar. (2–3, repeatable for different topics) (General Education/Social Sciences) Reading, writing, and discussion on social science topics to be announced in advance. Designed primarily for juniors. Normally a term paper and seminar presentation will be required. Prerequisites: Students must be enrolled in the Centennial Honors College. Other special requirements to be announced.

303 Advanced Science and Mathematics Seminar. (2–4, repeatable for different topics) (General Education/Natural Sciences and Mathematics) Reading, writing, and discussion on scientific and mathematical topics to be announced in advance. Designed primarily for juniors. Normally a term paper and presentation will be required. Prerequisites:
Students must be enrolled in the Centennial Honors College. Other special requirements to be announced.

333 Independent Study. (1–3, repeatable with no maximum) Intensive study and writing on interdisciplinary topics to be approved by the Honors coordinator and faculty supervisors. Prerequisites: Students must be enrolled in the Centennial Honors College and must have upper-division status.

401 Senior Humanities Seminar. (2–3, repeatable for different topics) Reading, writing, and discussion on topics in the humanities to be announced in advance. Designed primarily for seniors. Normally a term paper and seminar presentation will be required. Prerequisites: Students must be enrolled in the Centennial Honors College. Other special requirements to be announced.

402 Senior Social Sciences Seminar. (2–3, repeatable for different topics) Reading, writing, and discussion on social science topics to be announced in advance. Designed primarily for seniors. Normally a term paper and seminar presentation will be required. Prerequisites: Students must be enrolled in the Centennial Honors College. Other special requirements to be announced.

403 Senior Science and Mathematics Seminar. (2–4, repeatable for different topics) Reading, writing, and discussion on scientific and mathematical topics to be announced in advance. Designed primarily for seniors. Normally a term paper and presentation will be required. Prerequisites: Students must be enrolled in the Centennial Honors College. Other special requirements to be announced.

444 Independent Senior Research. (3–6, repeatable to 6) Intensive research and preparation of an interdisciplinary senior honors thesis or project report. Topics to be approved by the Honors coordinator and a faculty supervisor. Prerequisite: Open only to seniors who are enrolled in the Centennial Honors College.

499 Interdisciplinary Colloquium. (1–3, repeatable with no maximum) Reading, writing, and discussion on interdisciplinary topics to be announced in advance. Designed primarily for upper-division honors students. Normally a term paper and seminar presentation will be required. Prerequisites: Students must be enrolled in the Centennial Honors College. Other special requirements to be announced.

Program Offerings and Locations:

- Bachelor of Business in Accountancy: Macomb, Quad Cities, Online
- Bachelor of Business in Business Analytics: Macomb
- Bachelor of Arts in Economics: Macomb, Online
- Bachelor of Business in Economics: Macomb, Online
- Bachelor of Business in Finance: Macomb
- Minor in Accountancy: Macomb, Quad Cities, Online
- Minor in Business Analytics: Macomb
- Minor in Economics: Macomb, Quad Cities, Online
- Minor in Finance: Macomb, Quad Cities, Online

For student learning outcomes, please see wiu.edu/provost/learningoutcomes.

The School of Accounting, Finance, Economics and Decision Sciences offers a Bachelor of Business in Accountancy, a Bachelor of Business in Business Analytics, a Bachelor of Arts in Economics, a Bachelor of Business in Economics, and a Bachelor of Business in Finance. Please refer to the Graduate Studies catalog for information about graduate programs.

The B.B. in Accountancy will prepare students for the new challenges and greater opportunities that the accounting profession offers today. The degree program provides students with the accounting and communication skills they will need to succeed. Working with advanced computer software, writing reports and papers, and presenting individual and team projects are all included in the program of study.

Students enrolled in the Accountancy program who plan to take the CMA, CFE, CPA, or Enrolled Agent examinations will have the opportunity to select from the following programs:

- The Bachelor of Business (120 s.h.) with an emphasis in Management Accounting in preparation for the Certified Management Accountant (CMA) exam and the Certified Fraud Examiner (CFE) exam, or an emphasis in Taxation in preparation for the Enrolled Agent (EA) exam.
- The Master of Accountancy (150 s.h.) with an emphasis in Public Accounting and preparation for the Certified Public Accountant (CPA) exam.

The State of Illinois requires candidates for the Certified Public Accountant (CPA) examination to have completed a bachelor's degree and 150 semester hours of education. To enable students to sit for the CPA examination, the Accountancy programs at WIU provide an opportunity to obtain an additional 30 hours beyond the Bachelor of Business in Accountancy through the Master of Accountancy degree program or Integrated Baccalaureate and Master's Degree Program.

The B.B. in Business Analytics brings together the technical skills of data mining, forecasting, and computer programming for solving the analytical problems of the contemporary business world. The program is designed for undergraduate students interested in combining business training with data analytics. This program is the only STEM recognized Bachelor of Business degree program at Western Illinois University.
The **B.B. in Economics**, available in the College of Business and Technology and reviewed and accredited by AACSB International, is a comprehensive program to prepare students for the business world. A minor is optional.

The **B.A. in Economics** is a general Economics degree offered in the College of Arts and Sciences. Students majoring in the Bachelor of Arts in Economics can minor in Decision Sciences, Finance, History, Political Science, or other suitable areas. Students have access to the same Economics classes in both programs. Economics is a flexible degree program with many career options available to majors. Each degree program includes courses both in Economics and from other disciplines to enhance preparation for a particular career objective.

Economics holds a unique position in the academic curriculum. It is a quantitative social science offering a unique insight into the solution of many social problems. At the same time, Economics is essential to an understanding of the business world and has many practical applications in management and financial decision-making. Students find Economics a versatile discipline that uses social science methodologies to solve interesting social and business problems.

The **B.B. in Finance** develops the skills and knowledge necessary for the management of money. Finance is concerned with the process, institutions, markets, and instruments involved in the transfer of money among and between individuals, businesses, and government. This all takes place in a world that is changing in a variety of directions, and the Finance major will learn how to make sound decisions in this constantly shifting environment. In addition to class lectures, students will learn from techniques such as computer simulation, case studies, and field trips. Students will also have the opportunity to learn from representatives of corporations and government agencies who visit as guest speakers. Required study areas for the Finance major include financial institutions, financial management, investment policy, insurance/risk management, and real estate. Additional studies may be taken in such courses as bank management, advanced financial management, security and portfolio analysis, personal and commercial lines of insurance, and real estate financing. Finance majors have excellent prospects for employment in financial institutions, brokerage or investment operations, and corporations or government agencies.

**GradTrac** is available to Accountancy, Business Analytics, Economics (B.A. and B.B.), and Finance majors. See page 79 for information about GradTrac.

**Honors Curriculum**—Academically qualified students in this School are encouraged to complete an honors curriculum in University Honors, Honors in the Major, or General Honors. All Honors students must complete the one-hour honors colloquium (G H 299). General Honors includes General Honors coursework. Honors in the Major includes honors work in the major. University Honors combines Honors in the Major and General Honors. For more information about honors curricula, see page 100 or visit the Centennial Honors College website at [wiu.edu/Honors](http://wiu.edu/Honors).

**Integrated Baccalaureate and Master's Degree Program**—Two integrated baccalaureate and master's degree programs are available for the Bachelor of Business in Accountancy: Master of Accountancy and Master of Business Administration. An integrated baccalaureate and master's degree program is available for the Bachelor of Business in Business Analytics: Master of Science in Applied Statistics and Decision Analytics. An integrated baccalaureate and master's degree program is available for the Bachelor of Arts in Economics: Master of Science in Quantitative Economics. Two integrated baccalaureate and master's degree programs are available for the Bachelor of Business in Economics: Master of Science in Quantitative Economics and Master of Business Administration. An integrated baccalaureate and master's degree program is available for the Bachelor of Business in Finance: Master of Business Administration. An integrated degree program provides the opportunity for outstanding undergraduates to earn both degrees in five years. Please refer to the Graduate Studies catalog for details about the integrated program.
Degree Programs

Bachelor of Business—Accountancy

All students seeking the Bachelor of Business in Accountancy must complete I, II, III, IV.A or IV.B, V, VI, and VII below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

Pre-Accountancy students who have earned 60 hours, but are ineligible to declare a business major will be limited to a maximum of 29 hours of business courses (see Limit on Business Credits, page 92) and may be removed from business courses.

I. University General Education Curriculum (p. 70) .................................................43 s.h.

II. Business Core Courses† (p. 93) ...........................................................................33 s.h.

III. Department Core Courses ..................................................................................27 s.h.

ACCT 341, 342, 343, 351, 371, 372, 451, 480, 499; CS 302

IV. Select one of the following emphases: .................................................................6 s.h.

A. Management Accounting

ACCT 352, 455 ............................................................................................6 s.h.

B. Taxation

ACCT 453, 471 ............................................................................................6 s.h.

V. Directed Electives .................................................................................................6 s.h.

Select additional 6 s.h. of upper-level, elective, ACCT courses, or other department approved courses

VI. Open Electives .....................................................................................................5 s.h.

VII. Other..................................................................................................................15 s.h.*

Natural Sciences/Mathematics: MATH 137 and STAT 171

Social Sciences: ECON 231 and 232 and either PSY 100 or SOC 100

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; or 3) ACCT 343.

† BCOM 320 (Business Core) fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.

* 15 s.h. may count towards the University General Education requirement.

Other Requirements

Transfer students must complete at least 50% of their accounting courses at WIU to graduate as Accountancy majors.

Bachelor of Business—Business Analytics

All students seeking the Bachelor of Business in Business Analytics must complete I, II, III, IV.A or IV.B or IV.C or IV.D, V, and VI below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

I. University General Education Curriculum (p. 70) .................................................43 s.h.

(To include ECON 231, 232; MATH 137; STAT 171; and either PSY 100 or SOC 100)

II. Business Core Courses† (p. 93) ...........................................................................33 s.h.

III. Core Courses ......................................................................................................30 s.h.

DS 197, 200, 321, 423, 435, 480, 485, 490, 497; ECON 332, 381, 487

IV. Emphases of Study (select A, B, C, or D) ..........................................................9 s.h.

A. Applied Statistics

Select 9 s.h. from the following courses:

DS 494; MATH 383; STAT 276, 471, 474, 478
 Accounting, Finance, Economics and Decision Sciences

B. Business
Select 9 s.h. from the following courses:
ACCT 351; DS 490, 494; ECON 315, 425, 445, 470, 496; FIN 496; MKTG 329

C. Information Systems
Select 9 s.h. from the following courses:
DS 494; IS 341, 342, 343, 405

D. Supply Chain Management
Select 9 s.h. from the following courses:
DS 494; SCM 211, 340, 411, 453, 465, 470

V. Open Electives ..................................................................................................................2 s.h.

IV. Other..................................................................................................................................3 s.h.
CS 114 or 214

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) any major’s discipline-specific global issues course; or 4) an approved study abroad program.
† BCOM 320 (Business Core, see p. 93) fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.

Bachelor of Arts—Economics

All students seeking the Bachelor of Arts in Economics must complete I, II, III, and IV below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

I. University General Education and College of Arts and Sciences Curriculum
Requirements (p. 85) ........................................................................................................60 s.h.
(To include STAT 171 and any General Education Mathematics course or equivalent)

II. Core Courses ..................................................................................................................24 s.h.
ECON 197, 231*, 232*, 325, 330, 331, 381, 445, 470, 497

III. Directed Electives ............................................................................................................9 s.h.
A. Select 6 s.h. of upper-division Economics (ECON) or Decision Science (DS) electives, or electives from other departments as approved by department chair ........................................6 s.h.
B. Capstone Experience ........................................................................................................3 s.h.
Select one course from ECON 487, 488, 494

IV. Other Requirements .......................................................................................................33 s.h.
A. ECON 350† ..........................................................................................................................3 s.h.
B. Any Minor .........................................................................................................................16 s.h.
C. Open Electives ..................................................................................................................14 s.h.

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) any major’s discipline-specific global issues course; or 4) an approved study abroad program.
* 6 s.h. may count toward the University General Education requirement.
† BCOM 320 or ECON 350 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.

Bachelor of Business—Economics

All students seeking the Bachelor of Business in Economics must complete I, II, III, IV, V, and VI below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.
Pre-Economics students who have earned 60 hours, but are ineligible to declare a business major will be limited to a maximum of 29 hours of business courses (see Limit on Business Credits, page 92) and may be removed from business courses.

I. University General Education Curriculum (p. 70) ................................................................. 43 s.h.
   (To include ECON 231, 232; MATH 137; STAT 171; and either PSY 100 or SOC 100)

II. Business Core Courses† (p. 93) ................................................................................... 33 s.h.

III. Department Core Courses ............................................................................................. 21 s.h.
   ECON 197, 325, 330, 331, 350, 381, 445, 470, 497

IV. Directed Electives .............................................................................................................. 9 s.h.
   A. Select 6 s.h. of upper-division Economics (ECON) or Decision Science (DS) electives, or electives from other departments as approved by department chair ........................................ 6 s.h.
   B. Capstone Experience ..................................................................................................... 3 s.h.
      Select one course from ECON 487, 488, 494

V. Open Electives .................................................................................................................. 14 s.h.

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) any major's discipline-specific global issues course; or 4) an approved Study Abroad program.

† BCOM 320 (Business Core, see p. 93) fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.

Bachelor of Business—Finance

All students seeking the Bachelor of Business in Finance must complete I, II, III, IV, and V below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

Pre-Finance students who have earned 60 hours, but are ineligible to declare a business major will be limited to a maximum of 29 hours of business courses (see Limit on Business Credits, page 92) and may be removed from business courses.

I. University General Education Curriculum (p. 70) ................................................................. 43 s.h.

II. Business Core Courses† (p. 93) ................................................................................... 33 s.h.

III. Department Core Courses ............................................................................................. 15 s.h.
   CS 302; FIN 321, 341, 351, 371, 499

IV. Electives
   A. Departmental ................................................................................................................ 12 s.h.
      12 s.h. of 400-level Finance courses excluding FIN 460 and 461
   B. Directed ........................................................................................................................... 3 s.h.
      One of the following courses:
      ACCT 341, 351, 371
      AGEC 447
      ECON 332, 425, 432, 451
      MKTG 335
      Any 400-level Finance course (including 460, 461)
   C. Open ................................................................................................................................ 14 s.h.

V. Other.................................................................................................................................... 15 s.h.*
   Natural Sciences/Mathematics: MATH 137 and STAT 171
   Social Sciences: ECON 231 and 232 and either PSY 100 or SOC 100

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global
issues course; 3) any major’s discipline-specific global issues course; or 4) an approved Study Abroad program.
† BCOM 320 (Business Core) fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.
* 15 s.h. may count toward the University General Education requirement.

Minors

Minor in Accountancy ........................................................................................................................................ 18 s.h.
1. ACCT 201*, 202*, 341, 351 ......................................................... 12 s.h.
2. Two of the following: ACCT 342, 343, 352, 371, 372, 420
   (up to 3 s.h), 445, 451, 455, 457, 471, 480 .................................. 6 s.h.
*Business majors should consult with their academic advisor.

Minor in Business Analytics .......................................................................................................................... 18 s.h.
1. DS 200, 303, 435, and 490 (3 s.h.) ............................................ 12 s.h.
2. Select remaining hours from CS 114, 214; DS 321, 423, 480, 485;
   ECON 332, 487, 496; FIN 496; MGT/OM 352; MKTG 329;
   SOC 323, 324; PSY 223, 323; or other courses approved by
   department .................................................................................. 6 s.h.

Minor in Economics ........................................................................................................................................ 18 s.h.
1. ECON 231, 232 .............................................................................. 6 s.h.
2. Economics Electives: 9 s.h. of upper division coursework is
   required ....................................................................................... 12 s.h.

Minor in Finance ........................................................................................................................................... 16 s.h.
1. FIN 311 or FIN 331 ........................................................................ 3 s.h.
2. Finance Electives .......................................................................... 9 s.h.
3. Business Electives ........................................................................ 4 s.h.

Course Descriptions

ACCOUNTING (ACCT)

200 Introduction to Accounting. (3) An introduction to financial and managerial accounting for non-business majors. The course will focus on the use of accounting information by managers. Not open to business majors or to students who have received credit for ACCT 201.

201 Principles of Financial Accounting. (3) The role of financial accounting concepts and practices in the development of information for business decisions. Prerequisite: sophomore standing or department approval. IAI: BUS 903.

202 Principles of Managerial Accounting. (3) The role of managerial accounting concepts and practices in the development of information for business decisions. Prerequisite: ACCT 201.
IAI: BUS 904.

307 (Cross-listed with ENGR 307) Accounting for Managers and Engineers. (3) Covers basic financial and cost accounting concepts and techniques. Emphasis is on the use of accounting information by managers and engineers for planning, controlling, and operating decisions. Not open to those who have received credit for ACCT 201 or 202. Cannot be applied towards meeting the requirements for Accountancy major or minor or Engineering major without prior approval of the Department Chair or School Director. Not open to students with credit for ENGR 307. Prerequisite: junior standing.

341 Intermediate Accounting I. (3) Theoretical concepts and technical procedures underlying the preparation of external financial reports for corporate business organizations. Includes a one-hour lab that focuses on skills development for success in the accounting profession. Prerequisites: ACCT 201 and 202 with grades of C or better.

342 Intermediate Accounting II. (3) Theoretical concepts and technical procedures underlying the preparation of external financial reports for corporate business organizations. Prerequisites: ACCT 341 with a grade of C or better.

343 Intermediate Accounting III. (3) (Global Issues) Theoretical concepts and technical procedures underlying the preparation of external financial reports for corporate business organizations, including international financial reporting standards (IFRS). Prerequisites: ACCT 341 with a grade of C or better.

351 Management Accounting. (3) A detailed study of cost allocation methods, cost accounting systems, and the complexities involved in costing products, jobs, and services. Prerequisite: ACCT 202 with a grade of C or better.

352 Management Accounting II. (3) A study of how accounting data is compiled and used to make profit-maximizing decisions. Prerequisite: ACCT 202 with a grade of C or better.

371 Tax I. (3) A study of federal income taxation with emphasis given to researching and communicating tax topics relevant to individuals, which includes sole
Accounting, Finance, Economics and Decision Sciences

372 Tax II. (3) A study of income taxation with emphasis given to researching and communicating tax topics relevant to corporate entities and partnerships. Prerequisite: ACCT 371 with a grade of C or better.

420 Internship in Accountancy. (3–12, repeatable to 12) One hour of credit is available for every 40 hours (120 hours minimum) of approved experience. Student is responsible for locating acceptable employment. A maximum of 3 s.h. may be used in the major. Prerequisite: Accountancy major or minor; prior approval of department chairperson or internship coordinator; completion of ACCT 341. Graded S/U only.

421 Independent Study in Accountancy. (1–3, not repeatable) Independent research on selected topics in Accountancy. Prerequisite: approval of department chairperson.

441 Advanced Accounting I. (3) (Global Issues) Study of advanced accounting topics including consolidations, international accounting, and international financial reporting standards (IFRS). Prerequisite: ACCT 342 with a grade of C or better.

442 Advanced Accounting II. (3) Study of advanced accounting topics including segment reporting, partnerships, SEC reporting, and state and local government accounting. Prerequisite: ACCT 342 with a grade of C or better.

445 (Cross-listed with FIN 445) Financial Modeling and Statement Analysis. (3) Students will identify problems, analyze results, and make decisions regarding the impact on financial statements through development of models in electronic spreadsheets. Financial statements, capital budgets, risk, capital structures, takeovers, and other financial topics will be analyzed. Not open to students with credit for FIN 445. Prerequisite: ACCT 441 or FIN 331 or permission of instructor.

451 Accounting Systems and Control. (3) Introduction to the concepts and current practices in analyzing and developing organizational accounting and control systems. Prerequisites: ACCT 341 with grade of C or better and CS 302.

453 (Cross-listed with FIN 453) Estate Planning and Taxation. (3) This course covers various estate planning techniques to mitigate the financial risks associated with the transfer of wealth during lifetime and at death. Wills and trusts are discussed. Techniques for reducing, freezing, or eliminating gift and estate taxes are explained. Tax planning techniques will be analyzed. Not open to students with credit for FIN 453. Prerequisite: ACCT 371 or FIN 351 or permission of instructor.

455 Advanced Management Accounting. (3) Advanced topics in cost/management accounting with an emphasis on tools and techniques for decision making. Prerequisite: ACCT 351 with a grade of C or better.

457 Fraud Examination. (3) An examination of the principles and practices for investigating allegations of fraud and financial misconduct. Topics include the elements of fraud, red flags, document examination, interviewing techniques, and report writing. Prerequisites: Senior standing and ACCT 200 or 201 or permission of instructor.

471 Tax Research. (3) Tax research tools and methods are used to investigate advanced tax planning and compliance topics. Prerequisite: ACCT 371 with a grade of C or better.

480 Introduction to Auditing. (3) The role and function of the auditor in the audit process and an introduction to audit standards, procedures, and principles. Prerequisite: ACCT 342 and 451 with grades of C or better.

499 Accounting Knowledge Assessment. (0) All Accountancy majors are required to complete the knowledge assessment course prior to graduation. Prerequisites: senior standing, Accountancy major. Graded S/U only.

DECISSION SCIENCES (DS)

197 (Cross-listed with ECON 197) Skill and Portfolio Development. (0) An introduction to the Business Analytics and the Economics majors that reviews important professional development skills and career explorations specific to those industries. Students will also begin developing their professional portfolios. Not open to students with credit in ECON 197. Graded S/U only.

200 Introduction to Business Analytics. (3) An introduction to the basic methods and techniques essential to the field of Business Analytics. Topics include models for summarizing and visualizing data, use of predictive analytics methods and techniques, and visualization of financial risks. Prerequisite: ACCT 351 with a grade of C or better.

303 Applied Business Forecasting and Regression Analysis. (3) A survey of the basic methods and techniques that are available for business forecasting including moving average and exponential smoothing techniques; classical decomposition; and simple, multiple, and time series regression techniques. Prerequisite: STAT 171.

321 Data Visualization for Decision Making. (3) This course provides an introduction to the process and methods of visualizing information for the purpose of communicating actionable findings in a decision-making context. Hands-on experience with software for sourcing, organizing, analyzing, comprehending, reducing, and visualizing data. Prerequisites: DS 200 and STAT 171 or equivalent; or consent of instructor.

423 Management Science Techniques and Business Analytics. (3) An introduction to management science/operations research techniques. Students are introduced to theory and applications of linear, integer, goal, and dynamic programming models; transportation, assignment, network and inventory models; PERT/CPM, capital budgeting, and decision theory. Prerequisite: STATIC 171 or equivalent.

435 Applied Data Mining for Business Decision-Making. (3) This course provides an introduction to data mining methods for business applications. Students will learn the basics of data selection, preparation, statistical modeling, and analysis aimed at the identification of knowledge fulfilling organizational objectives. Prerequisite: DS 303 or STAT 276 or consent of instructor.

460 Independent Study in Decision Sciences. (1–3, repeatable to 3) Independent research on topics in Decision Sciences mutually selected by student and instructor. Prerequisites: DS 303 and senior standing, with written consent of department chairperson.

480 Predictive Analytics. (3) A survey of topics in predictive analytics methods and techniques essential for business analysts. Topics include time series regression, logistic regression, neural networks, decision trees, ensemble models, and simulation models for understanding the effect of uncertainty. Prerequisites: DS 303 or STAT 276 or equivalent; or consent of instructor.

485 Big Data for Business Decision Making. (3) This course provides an introduction to big data analytics tools and methods for business applications. Topics include exploration, classification, dimension reduction, and structured and unstructured data. Statistical software will be used to analyze business data. Prerequisites: STAT 171, DS 200, and DS 303 or equivalent; or consent of instructor.
489 Seminar in Contextual Business Analytics. (3) An industry, case study, focused course that explores topics relevant to applying business analytics models and theories to current corporate projects. Exact topics will change based on instructor expertise and market trends. Prerequisite: 9 s.h. of prior DS coursework, or permission of instructor.

490 Statistical Software for Data Management and Decision Making. (3, repeatable to 6 for different titles) This course provides students with the basic concepts of statistical computing. Students will gain experience with statistical software packages, such as SAS, R, or SPSS, and their applications. Methods of data preparation and validation, analysis, and reporting will be covered. Prerequisites: STAT 171 or equivalent, or PSY 223, or SOC 324, or POLS 284, or consent of department chairperson.

494 Internship in Business Analytics. (1–12, repeatable to 12) Supervised employment experience with an approved employer/sponsor in business analytics. Only 3 hours per semester can be included in the major or minor. For internships that are two semesters or more in length, and with approval of the department chair, a maximum of 6 hours may be included. Prerequisites: senior standing or junior status in Business Analytics major or minor, DS 200, minimum 9 additional s.h. in DS or ECON courses, and consent of department chairperson. Graded S/U only.

497 Senior Analytics Seminar. (0) Preparation for post-academic success in analytics careers including job market readiness activities and developing the senior portfolio of analytics work. All Business Analytics majors are required to complete the skills assessment exam. Prerequisites: senior standing. Business Analytics major. Graded S/U only.

499 Individual Research in Business Analytics. (1–3, repeatable to 3) An independent research or study course on Business Analytics problems for selected students. Prerequisites: junior or senior standing and consent of the department chairperson. Graded S/U only.

ECONOMICS (ECON)

100 Introduction to Economics. (3) (General Education/Social Sciences) Introduction to Economics with emphasis on application to contemporary social issues. Core concepts include price theories, money and banking, national income accounts, economic fluctuations and growth, and international economics, with special applications in criminal activity, health care, and environmental quality. Not open to students who have already completed both ECON 231 and 232. IAI: S3 901.

170 The Global Economic Environment. (3) An introduction to exchange rates, balance of payments, trade barriers, trade agreements and economic unions, relevant international institutions, ethical considerations in international dealings, and related topics. Impacts on U.S. consumers and firms will be emphasized.

197 (Cross-listed with DS 197) Skill and Portfolio Development. (0) An introduction to the Business Analytics and the Economics majors that reviews important professional development skills and career explorations specific to those industries. Students will also begin developing their professional portfolios. Not open to students with credit in DS 197. Graded S/U only.

231 Principles of Macroeconomics. (3) (General Education/Social Sciences) An introduction to aggregate economics—monetary and banking institutions, national income theory, business cycles, government finance and taxation, and the international trade. IAI: S3 901.

232 Principles of Microeconomics. (3) (General Education/Social Sciences) This course focuses on industrial and labor organizations, supply and demand, profit maximization under varying conditions of competition, and factor pricing. IAI: S3 902.

310 Economics and Law. (3) An introduction into the economic analysis of the basic areas of law including property, contracts, torts, criminal law, and civil law. The purpose of the course is to examine legal rules using economic concepts and methods. Prerequisite: one of the following courses—ECON 100, 231, 232, or consent of instructor.

312 (Cross-listed with AGEC 312) Economics of Cannabis. (3) A detailed survey of the cannabis industry including market analysis, regulation options, the potential impacts on the U.S. economy, and a comparison of other regulated substances such as opioids, alcohol, tobacco, and pharmaceuticals. Not open to students with credit in AGEC 312. Prerequisite: ECON 100, 231, or 232, or permission of instructor.

315 Economics of Sport. (3) The application of professional tools and concepts to the business of sport. Emphasis on economic incentives as they apply to professional sports teams and leagues as well as public policy issues impacting professional and college athletics. Prerequisite: ECON 100 or 231 or 232.

325 Money, Banking and Credit. (3) An introduction to the monetary aspects of society, with stress on the role of commercial banks and the Federal Reserve System in our economy. Prerequisite: ECON 231.

330 Intermediate Microeconomic Theory. (3) Theory of producer and consumer choice; theory of prices and output determination under varying degrees of competition; theory of factor pricing and income distribution. Prerequisite: ECON 232, ECON 381 or MATH 137, or consent of instructor.

331 Intermediate Macroeconomics. (3) An analysis of the determinants of inflation rates, unemployment, interest rates, and international trade. Theories of cycles of recession and recovery and policies to achieve the society’s goals are examined with particular emphasis on stabilizing the economy. Prerequisite: ECON 231; ECON 381 or MATH 137, or consent of instructor.

332 Managerial Economics. (3) Economic theory and analysis designed for business administration students. Economics majors interested in careers in business are encouraged to take this course. Prerequisites: ECON 231 and 232.

350 Economics of Poverty and Discrimination. (3) (General Education/Multicultural Studies) Application of economic tools and concepts to the nature and causes of poverty with an emphasis on discrimination. Analyzes both economic characteristics of the poor and the public policies intended to alleviate poverty and discrimination. Writing Instruction in the Disciplines (WID) course. Prerequisites: ECON 100 or 231 or 232; ENG 180 and 280.

351 Global Economic Poverty Issues. (3) (General Education/Multicultural Studies) (Global Issues) Economic principles will be utilized to define, examine, and analyze the scope and breadth of underlying poverty-related policy issues in both developing and developing and developed countries. BGS online writing course. Prerequisites: junior standing or 3 s.h. of ECON credit.

381 Economic Problem Solving. (3) An overview of problem-solving methods utilized in many upper-division Economics courses. Students review the techniques and general approaches to solving both microeconomic and macroeconomic problems. Prerequisites: ECON 231 and 232; any MATH course which satisfies the University General Education requirement.

408 Economics for Decision-Makers. (3) This course develops the macro- and microeconomic concepts most useful to decision-makers. Topics covered include measures of aggregate economic activity,
unemployment, inflation, business cycles, monetary policy, fiscal policy, international trade, market demand and supply, and alternate market structures. (Not open to students who have taken ECON 231 or 232. Cannot be used to meet the requirements for the B.A. or B.B. in Economics.) Prerequisite: ECON 231 or ECON 232; or permission of the instructor. This course is designed for the Pre-MBA minor.) Prerequisite: junior standing and STAT 171 with a C or better.

410 Economics of Crime and Punishment. (3) Uses economic principles and statistical methods to analyze trends in crime, the economic approach to modeling crime, the economic impacts from criminal behavior, as well as to evaluate various policies in criminal justice. Prerequisite: ECON 232 and STAT 171, or permission of instructor.

420 Economic Development. (3) A study of less developed countries; problems such as population growth, urbanization, agricultural transformation, unemployment, inflation, and water and air pollution are discussed. Solutions to these problems are examined and evaluated based on feasibility and practicality. A multi-disciplinary approach is used. Prerequisite: ECON 231, 232; ECON 381 or MATH 137; or consent of instructor.

425 Money Markets, Capital Markets, and Monetary Theory. (3) An institutional and theoretical study of money and capital markets in conjunction with monetary policy. Prerequisite: ECON 231, 232; ECON 381 or MATH 137; or consent of instructor.

428 (Formerly ECON 328) American Economic History. (3) A study of the development of various economic institutions in the United States with special emphasis on the changing structure and performance of the economy from the colonial period to the present. Prerequisites: ECON 231, 232; ECON 381 or MATH 137; or consent of instructor.

430 (Cross-listed with AGEC 430) Environmental Economics. (3) This interdisciplinary course examines economic issues involving the interactions between humans and the environment. The course addresses conflicts in land, air, and water use and the role of assigned property rights and public policies in resolving environmental problems. Not open to students with credit in AGEC 430. Prerequisite: ECON 232 or AGRI 220.

432 Public Expenditures and Taxation. (3) Studies the role of government in promoting a system of effective markets. Includes analyses of the causes and impact of government market interventions, such as property and social insurance, and the criteria used for public investment decisions. Prerequisites: ECON 231, 232; ECON 381 or MATH 137; or consent of instructor.

433 Honors Readings in Economics. (1–3, repeatable to 3) Prerequisite: consent of instructor. Graded S/U only.

440 Labor Theory. (3) Understanding labor market dynamics using theory and empirical methods. Topics of focus include labor supply and demand, labor force composition and trends, human capital, wage differentials, migration, minimum wage, trade unions, and occupational licensure. Prerequisite: ECON 231, 232; ECON 381 or MATH 137; or consent of instructor.

445 Game Theory and Economic Behavior. (3) Modeling strategic interactions and solving non-cooperative games across information environments with a focus on economic behavior. Applications include pricing strategies, choosing optimal locations, auctions, bargaining, and market entry. Prerequisites: ECON 231, 232; ECON 381 or MATH 137; or consent of instructor.

451 History of Economic Thought. (3) A study of the origins and development of economic thought to mid-twentieth century. Includes the mercantilist, physiocratic, classical, historical, and marginalist schools. Prerequisite: ECON 232.

465 Economics of Energy. (3) A study of primary and secondary sources of energy as they affect the levels of production and consumption in the economy. A general survey of the economic and regulatory problems of coal, petroleum, natural gas, and nuclear industries (including those of utilities) and brief discussion of the problems and prospects of alternative sources of energy in the context of national energy policies and individual decision-making. Prerequisite: ECON 231, 232; ECON 381 or MATH 137; or consent of instructor.

470 International Trade. (3) (Global Issues) A study of the theoretical and institutional aspects of international trade; effect of trade and factor movements on economic welfare; problems of international disequilibrium, and the search for economic stability and growth through international cooperation. Prerequisite: ECON 231, 232; ECON 381 or MATH 137; or consent of instructor.

471 International Monetary Economics. (3) A study of exchange rate determination, monetary and fiscal policy in an open economy; balance of payments crises; the choice of exchange rate systems; international debt and global financial imbalances. Prerequisites: ECON 231, 232; ECON 381 or MATH 137; or consent of instructor.

479 Microfinance in Action. (3) (Global Issues) An in-depth study on the role of microfinance in rural economies around the world. The course specifically examines the benefits generated by microfinance institutions with regard to countries’ education, health, employment, tourism, agribusiness, finance, enterprise, and community development. Prerequisites: ECON 231 and 232; or permission of instructor.

481 Mathematical Economics. (3) Introduction to the mathematics most frequently used by economists: basic set theory, linear algebra, differentiation, comparative statics, optimization, constrained optimization, and linear programming. Prerequisite: ECON 381 (C grade or better), or passing department placement exam.

487 Econometrics. (3) Extensions of the single equation regression model, estimation, and testing; multicollinearity, heteroskedasticity, and errors in variables; maximum likelihood estimation and binary response models; simultaneous equation models and estimation. Interpretation and application of econometric models and methods is emphasized. Prerequisites: DS 303; ECON 231, 232; ECON 381 or MATH 137; or consent of instructor.

488 Experimental Economics. (3) Overview of scientific methodology relevant to studying economic decision-making. Best practices in collecting, managing, and presenting quantitative economic data and an introduction to the traditions of experimental economic design. Applied focus on software tools and project management. Prerequisites: STAT 171 and ECON 381, or permission of instructor.

490 (Formerly ECON 390) Introduction to Health Economics. (3) Application of basic Economics to the health care industry. Issues surrounding the economic relationships among providers, insurers, and consumers of health care are examined in terms of market structure, economic motives, financial costs, and social costs and benefits. Prerequisites: ECON 232 and STAT 171; or permission of instructor.

494 Internship. (1–12, repeatable to 12) Supervised employment experience with an approved employer/ sponsoring agency. Only 3 hours per semester can be included in the major. For internships that are two semesters or more in length, and with approval of the department chair, a maximum of 6 hours may be included in the major. Prerequisites: ECON 231, 232; one intermediate theory course, and consent of the department chairperson. Graded S/U only.
FINANCE (FIN)

101 Financial Health. (2) (General Education/Human Well-Being) Develops strategies for achieving and maintaining well-being through personal finance skills. Topics include well-being as it relates to cash management, credit management, sources of income, funding, rental agreements, basic investments, taxes, insurance, financial math, and career planning. Cannot be applied towards meeting the requirements for the Finance major or minor.

301 Personal Financial Planning. (3) An introductory personal money management course. Topics studied will include managing cash income, home ownership, investments, insurance, income and estate tax planning, and retirement planning.

311 Introduction to Finance. (3) Introductory course in the study of money and its management for non-business majors. The course is divided into three sections that encompass the major areas of Finance: financial institutions and markets, investments, and business finance. Not available to students who are currently enrolled in or have completed FIN 331. Prerequisite: MATH 100 or higher.

321 Principles of Real Estate. (3) The study of real estate with an emphasis on a broad coverage of all areas including but not limited to markets, legal concepts, financing, brokerage, appraising, and governmental influence.

331 Financial Management I. (3) Financial organization and the principles and practices of decision-making involving financial analysis, valuation, capital allocation, and budgeting. Cases and readings are utilized to study problems and techniques of financial analysis. Prerequisite: ACCT 201.

341 Financial Institutions. (3) A study of the major financial institutions including commercial banks, savings institutions, credit unions, mutual funds, insurance companies, securities firms, finance companies, and pension funds. Prerequisite: MATH 100 or higher.

351 Risk Management and Insurance. (3) The primary focus of this course is evaluating various loss exposures and analyzing the methods for managing these risks including personal lines of insurance such as auto, homeowners, life, annuity, retirement plans, and related items. Prerequisite: MATH 100 or higher.

371 Investments. (3) Presents a foundation in investments examining various types of financial instruments, the issuance and trade of securities, mutual funds, theory of risk and return, modern portfolio theory, capital asset pricing model, bond prices and yields, bond portfolios, and equity analysis. Prerequisite: MATH 100 or higher.

400 Finance Internship. (1–12, repeatable to 12) Students apply finance theories in actual business practice. All internships are academically and professionally supervised. A maximum of 3 s.h. may be used to satisfy the Finance major or minor requirements. Prerequisite: Finance major or minor, minimum junior standing. 2.75 GPA, 9 s.h. of Finance coursework, and written approval of the department chairperson. Graded S/U only.

421 Real Estate Finance and Investment. (3) The study of instruments, techniques, and institutions of real estate finance. This course analyzes mortgage and property investment, the mortgage market, and the financial arrangements used in the financing of residential, industrial, and commercial properties, including commercial leasing. Prerequisite: FIN 321 or permission of instructor.

431 Financial Management II. (3) Theories and practices applicable to the financial administration of the firm including the cost of capital, cash management, dividend policy, long- and short-term financing, reorganization, and international aspects. Cases and readings are utilized to study problems and techniques of financial analysis. Prerequisite: FIN 311 or 331.

441 Bank Management. (3) A study of the functions, operations, policies, organization, management, and supervision of commercial banks. Case analysis is used to predict the financial health of operational individual banks. Prerequisite: FIN 341.

445 (Cross-listed with ACCT 445) Financial Modeling and Statement Analysis. (3) Students will identify problems, analyze results, and make decisions regarding the impact on financial statements through development of models in electronic spreadsheets. Financial statements, capital budgets, risk, capital structures, takeovers, and other financial topics will be analyzed. Not open to students with credit for ACCT 445. Prerequisite: ACCT 441 or FIN 331 or permission of instructor.

452 Commercial Property and Liability Insurance. (3) The study of risk management techniques and concepts as they relate to commercial lines. Insurance and noninsurance techniques (such as fidelity and surety bonding) as they are used to deal with business risks are examined. Prerequisite: FIN 351 or permission of instructor.

453 (Formerly FIN 451) (Cross-listed with ACCT 453) Estate Planning and Taxation. (3) This course covers various estate planning techniques to mitigate the financial risks associated with the transfer of wealth during lifetime and at death. Wills and trusts are discussed. Techniques for reducing, freezing, or eliminating gift and estate taxes are explained. Not open to students with credit for ACCT 453. Prerequisite: ACCT 371 or FIN 351 or permission of instructor.

460, 461 Independent Study in Finance I, II. (1–3 each, not repeatable) Prerequisite: Finance major or minor, 2.75 GPA or higher, 12 s.h. of Finance coursework, and written permission of instructor and chairperson.

471 Investment Security Analysis. (3) A foundation in security analysis focusing on common stock valuation. The topics include basics of portfolio theory, framework of stock investing, financial statement analysis, return concepts, absolute valuation models, and relative valuation techniques. Prerequisite: FIN 331 or FIN 371.

Seminars in Finance. (3) Each offering in this series is designed to provide students with an opportunity for intensive study in current theory and unresolved problems in the selected area. Open to Finance majors or minors in their senior year.

493 Seminar in Banking. (3) This bank course integrates a risk/reward framework based on theory with an intensive study of current issues. Unresolved
problems are discussed as they relate to the financial industry both domestically and abroad, the regulatory environment, and the economy. Open to Finance majors or minors in their senior year. Prerequisite: FIN 341.

**495 Seminar in Real Estate. (3)** Open to Finance majors or minors in their senior year. Prerequisite: FIN 321 or permission of instructor.

**496 Futures and Options Markets. (3)** The course presents a foundation in futures and options contracts examining the types of contracts, structure of the markets, pricing of contracts, and applications in risk management. Prerequisite: FIN 311 or 331 or equivalent.

**497 International Financial Management. (3) (Global Issues)** This course presents the globalization factors, tools, and techniques encountered/employed by a corporation’s financial management team. Content examples include differing country-specific economic strengths, political risks, tax systems, exchange rate risks, and methods to reduce these risks. Prerequisite: FIN 311 or 331.

**499 Finance Knowledge Assessment. (0)** All Finance majors are required to satisfactorily complete the knowledge assessment examination prior to graduation. Prerequisites: senior standing, Finance major. Graded S/U only.
Program Offerings and Locations:

- Bachelor of Science in Agriculture: Macomb
- Minor in Agricultural Economics: Macomb
- Minor in Agricultural Technology Management: Macomb
- Minor in Agriculture: Macomb
- Minor in Agronomy: Macomb
- Minor in Animal Science: Macomb
- Minor in Cannabis Production: Macomb
- Minor in Horticulture: Macomb
- Minor in Natural Resources Conservation: Macomb
- Minor in Plant Breeding: Macomb
- Minor in Precision Agriculture: Macomb

For student learning outcomes, please see [wiu.edu/provost/learningoutcomes](http://wiu.edu/provost/learningoutcomes).

Faculty: Andrango, Atherton, Bacon, Baker, Bernards, Blome, Franken, Gruver, Henning, Hoge, Knupp, Phippen, Trennepohl.

Students majoring in Agriculture are provided with a broad education including the physical, biological, and social sciences as well as technical agriculture. Graduates generally enter four diverse areas: (1) business and industry, (2) agricultural production, (3) research, teaching, and graduate studies, and (4) government work.

Learning how to feed the world is the central theme of the three major program options and the pre-professional programs that Agriculture students may choose to study. Students may choose to study Agricultural Business, Agricultural Education, or Agricultural Science. Agricultural minors are available in Agriculture, Agricultural Economics, Agricultural Technology Management, Agronomy, Animal Science, Horticulture, Natural Resources Conservation, Plant Breeding, and Precision Agriculture. Pre-professional programs in Forestry and Veterinary Medicine are also available. The pre-professional programs are designed to prepare students for professional study at other universities at the graduate level.

Career opportunities are available in the following occupational clusters:

- Agricultural Business
- Agricultural Education
- Agricultural Finance/Management
- Agricultural Marketing
- Agricultural Technology Management
- Agronomy
- Animal Science
- Farm Operations
- Horticulture/Landscape Management
- Natural Resource Conservation
- Precision Agriculture
- Urban Forestry

GradTrac is available to Agricultural Business and Agricultural Science majors. See page 79 for information about GradTrac.

Honors Curriculum—Academically qualified students in this School are encouraged to complete an honors curriculum in University Honors, Honors in the Major, or General Honors. All Honors students must complete the one-hour honors colloquium (G H 299).
General Honors includes General Honors coursework. Honors in the Major includes honors work in the major. University Honors combines Honors in the Major and General Honors. For more information about honors curricula, see page 100 or visit the Centennial Honors College website at wiu.edu/Honors.

**Integrated Baccalaureate and Master’s Degree Program**—An integrated baccalaureate and master's degree program is available for the Bachelor of Science in Agriculture: Master of Business Administration. An integrated degree program provides the opportunity for outstanding undergraduates to earn both degrees in five years. Please refer to the Graduate Studies catalog for details about the integrated program.

**Degree Program**

**Bachelor of Science—Agriculture**

All students seeking the Bachelor of Science in Agriculture must complete I, II, and III.A, III.B, or III.C below, and the foreign language/global issues requirement for the major*.

Students majoring in Agriculture may choose one of three options—Agricultural Business, Agricultural Science, or Agriculture—Teacher Education. Within each option, a student may choose an area of technical competency or specialization. The minimum semester hour requirement for the baccalaureate degree is 120 s.h. A maximum of 6 s.h. of unstructured classes (AGRI 200, 301, 400, 481, 499) may be counted in the major. A minimum of 24 s.h. of Agriculture classes must be taken at WIU or other four-year institutions. A maximum of 29 s.h. may be taken in coursework which would be considered part of a major or minor in traditional business disciplines (Accountancy, Business Law, Business and Technology, Decision Sciences, Finance, Human Resource Management, Management, Marketing, Operations Management, and Supply Chain Management).

In accordance with the Illinois State Board of Education licensure rule, all candidates seeking a Professional Education License or endorsement are required by Western Illinois University to obtain a grade of “C-” or better in all directed general education courses, all core courses, and all courses in the option. This rule does not supersede course prerequisite requirements in the catalog that specify a letter grade.

Please see the Teacher Education section of this catalog (p. 346) for more information about WIU’s Teacher Education Program.

| I. University General Education Curriculum (p. 70) | 43 s.h. |
| II. Core Courses | 9 s.h. |
| AGRI 120, 220, 320, 340†, 420 |  |
| III. Options of Study (select A, B, or C) |  |
| A. Agricultural Business |  |
| 1. Special Courses: AGEC 333, 342, and 349 | 10 s.h. |
| 2. Agriculture Electives |  |
| a. Select one course from three of the following five groups: | 9–11 s.h. |
| 1) AGTM 207 or 250 |  |
| 2) AGRN 176 or HORT 180 |  |
| 3) AGRN 278 |  |
| 4) ANSC 112 or ANSC 310 |  |
| 5) FOR 200 or FOR 208 |  |
| b. Additional courses from the School of Agriculture to be selected in consultation with the student’s academic advisor | 20–22 s.h. |
| 3. Other Requirements** |  |
| a. ACCT 201, 202 | 6 s.h. |
| b. AGEC 443, FIN 301, FIN 311, or FIN 331 | 3 s.h. |
| c. ECON 231 and 232 | 6 s.h. |
| d. MATH 123 or higher level | 3 s.h. |
| e. MATH 137 or STAT 171 | 3 s.h. |
| f. Select 6 s.h. from the following | 6 s.h. |
CHIN/FR/GER/JPN/SPAN 121, 122, 223, 224; COMM 130; PHIL 100, 120, 140, 205

11. Select one course from the following: 3 s.h.
   COMM 235; GEOG 100; POLS 101, 122, 200, 228, 267; PSY 100;
   SOC 100

12. Select one course from the following: 4 s.h.
   BOT 200; CHEM 101, 201; GEOG 121; GEOL 110; GIS 108;
   METR 120; MICR 200; PHYS 114, 115, 211; ZOOL 200

4. Open Electives ........................................................................................................16–18 s.h.

B. Agricultural Science

1. Agriculture Electives
   a. Select one course from four of the following six groups: 12–16 s.h.
      1) AGTM 207 or 250
      2) AGRN 176 or HORT 180
      3) AGRN 278
      4) ANSC 112 or ANSC 310
      5) AGEC 333 or AGEC 349
      6) FOR 200 or FOR 208
   b. Additional courses from the School of Agriculture to be selected
      in consultation with the student's academic advisor 25–26 s.h.

   Note: Student must have 49 s.h. in major.

2. Other Requirements*
   a. CS 101 ........................................................................................................3 s.h.
   b. MATH 102, 123, or higher level, or STAT 171 ........................................3 s.h.
   c. Select three courses from the following group
      (must include one course in Biology and one in Chemistry): 12 s.h.
      BOT 200; CHEM 101, 102, 201, 202; GEOG 121; GEOL 110; GIS 108;
      METR 120; MICR 200; PHYS 114, 115, 211; ZOOL 200

3. Open Electives ..................................................................................................20 s.h.

C. Agriculture—Teacher Education

The minimum semester hour requirement for the baccalaureate degree is 120 s.h.
Teacher Education will require additional hours beyond the 120 s.h. minimum.

1. Special Courses: AGED 131, 330, and 331 .................................................7 s.h.

2. Agriculture Electives
   a. Select one course from three of the following four groups: 9 s.h.
      1) AGTM 250
      2) AGRN 176 or HORT 180
      3) AGRN 278
      4) ANSC 112 or ANSC 310
   b. AGEC 333 or 349; AGTM 360 or 368; AGRN 373, 377, or 378;
      ANSC 310, 319, or 322 ................................................................................13–16 s.h.
   c. Additional courses from the School of Agriculture to be selected
      in consultation with the student's academic advisor 5–10 s.h.

   Note: Student must have 48 s.h. in major.

3. Other Requirements***
   a. BOT 200 or ZOOL 200 ............................................................................4 s.h.
   b. CHEM 101 or 201 ......................................................................................4 s.h.
   c. HIST 105 or 106 .........................................................................................3 s.h.
   d. MATH 102, 123, or higher level, or STAT 171 ........................................3 s.h.
   e. POLS 122 ....................................................................................................3 s.h.
   f. Select one additional course from the following: 4 s.h.
      BOT 200; CHEM 102, 202; GEOG 121; GEOL 110; GIS 108; METR 120;
      MICR 200; PHYS 114, 115, 211; ZOOL 200

4. Professional Education
   a. EDUC 439 ..................................................................................................3 s.h.
   b. EDS 202, 301, 305, 401 .........................................................................10 s.h.
Agriculture

c. SPED 210 and 390 .......................................................... 4 s.h.
d. ENG 366 or RDG 387 ....................................................... 2 s.h.
e. STCH 480 ...................................................................... 12 s.h.

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) any major’s discipline-specific global issues course; or 4) an approved Study Abroad program.
† AGRI 340 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.
* 10 s.h. may count toward the University General Education requirement.
** 25 s.h. may count toward the University General Education requirement.
*** 16 s.h. may count toward the University General Education requirement.

Minors

Minor in Agriculture .......................................................... 18 s.h.
1. Select at least three courses from the following: .................. 9–11 s.h.
   AGRN 176, 278; ANSC 112; AGTM 207, 250; FOR 200; HORT 180
2. Select additional hours from the School of Agriculture** ................ 7–9 s.h.
   **6 s.h. must be upper division at WIU.

Minor in Agricultural Economics ........................................... 16 s.h.
Electives chosen from:
Courses in Agricultural Economics (AGEC prefix)*
   AGRI 220
   AGRI 390
*At least 6 s.h. of upper-division coursework in Agricultural Economics (AGEC) and/or AGRI 390 must be completed at WIU.

Minor in Agricultural Technology Management ........................ 16 s.h.
Electives in Agricultural Technology Management.*
*At least 6 s.h. of upper-division coursework in Agricultural Technology Management (AGTM) required at WIU.

Minor in Agronomy .............................................................. 18 s.h.
1. AGRN 176, 278 ............................................................. 8 s.h.
2. Select at least one of the following courses: ...................... 3–4 s.h.
   AGRN 376; AGRN 373, 377, 470, 472, 476, 479; AGRN/HORT 374
3. Select at least one of the following courses: ....................... 3 s.h.
   AGRN 378, 473, 478
4. Select at least one more course listed in #2 or #3 above, or from CONS ................................................................. 3–4 s.h.

Minor in Animal Science ...................................................... 18–20 s.h.
1. ANSC 112 ..................................................................... 3 s.h.
2. Electives in Animal Science ............................................... 9 s.h.
3. Select one of the following courses:
   ANSC 322, 314, 424 ......................................................... 3–4 s.h.
4. Select one of the following courses:
   AGRI 376; CHEM 100, 101, 201 .......................................... 3–4 s.h.

Minor in Cannabis Production ................................................. 18–19 s.h.
1. BOT/HORT 357 ................................................................ 3 s.h.
2. HORT 493 ....................................................................... 2–3 s.h.
3. Select one of the following:
   AGRN 176, BOT 200, or HORT 180 ................................. 4 s.h.
Agriculture

Course Descriptions

AGRICULTURE (AGRI)

120 Agriculture in Today’s Society. (1) General orientation to modern agriculture. A study of career opportunities in industry, business, production agriculture, teaching, resource management, and environment control. 1 hr. lect.

200 Special Topics in Agriculture. (1–3, repeatable for different topics to 3) Selection of a current issue in agriculture. Review of literature, discussions, and preparation of a term paper. Prerequisite: approval of department chairperson. Arranged.

220 Introduction to Agribusiness Concepts. (3) A survey and introduction to agricultural management concepts and general knowledge base needed to operate a small profit-oriented agribusiness in today’s competitive environment. Not available to students that have completed AGEC 230. 3 hrs. lect.

IAF: AG 901.

301 Agricultural Internship. (4–12, repeatable to 12) Student will work with an approved agricultural industry and obtain experience in a number of business-related activities such as management, sales, research, and public relations. Prerequisites: 54 s.h. of academic credit and approval of instructor. A cumulative and major GPA of 2.25 required at time of application (semester prior to internship). Arranged.

320 Success Strategies in Agriculture. (2) Topics in applied life sciences—strategies for success. Topics will include problem solving, communication, interpersonal relations, resume preparation, and interviewing. Student participation will be emphasized. Prerequisite: AGRI 220 and junior standing. 2 hrs. lect.

340 Communicating Agricultural Issues. (2) Development of written and oral communication skills to address current issues in agriculture. Writing Instruction in the Disciplines (WID) course. Prerequisites: AGRI 220 and ENG 280.

376 Applied Genetics in Agriculture. (3) A basic understanding of heredity and genetic analysis with an emphasis on agricultural plant and animal systems. Social implications of manipulating genetics in agriculture will be addressed. Prerequisites: AGRN 176 or BIOL 180 or BOT 200 or ZOOL 200. 2 hrs. lect.; 2 hrs. lab.

390 Agricultural Sales. (3) Professional agri-selling and sales process. Topics include methods of selling, steps and techniques in the selling process, customer service, sales ethics, consumer behavior concepts, and sales management in agriculture. Prerequisites: AGRI 220 or ECON 232, and AGEC 333 or MKTG 327.

400 Special Topics in Agriculture. (1–3, repeatable for different topics to 3) Review of literature, lectures, and preparation of a term paper. Prerequisite: approval of department chairperson. Arranged.

Pre-Professional Programs

Pre-professional programs in Forestry and Veterinary Medicine are available. See Pre-Professional Programs (pp. 319, 321) for a detailed description of the requirements.

Minor in Horticulture ........................................................................................................... 18 s.h.

See Interdisciplinary Minors (p. 236).

Minor in Natural Resources Conservation ................................................................. 16 s.h.

1. AGRN 278................................................................. 4 s.h.
2. One of the following: CONS 405 or GEOG 426................................. 3–4 s.h.
3. Remaining electives to be selected by the student and minor advisor.............................................. 8–9 s.h.

Select three of the following courses: AGTM 461; BOT 452; CONS 305; FOR 200, 208, 406, 407; GEOL 110; HORT 485; MICR 200; RPTA 376, 487, 488, 489; ZOOL 451

Minor in Plant Breeding ......................................................................................... 18–22 s.h.

1. AGRN 176 or HORT 180 or BOT 200........................................... 3–4 s.h.
2. AGRN 376 or BIOL 340......................................................... 3–4 s.h.
3. AGRN 472 and 476............................................................... 6 s.h.
4. Select two courses from the following: AGRN 373, 378, 470; AGRN/HORT 374; BIOL 330; BOT 320, 329, 430, 481; CHEM 421; HORT 480; STAT 171........................................... 6–8 s.h.

Minor in Precision Agriculture ........................................................................ 18 s.h.

1. AGTM 207, 471, 472; GIS 201.................................................. 12 s.h.
2. Select at least two of the following courses: AGRN 373, 377, 378, 473, 479; AGRN/HORT 374; AGTM 350, 464; CONS 305, 405; CSTM 236.............................................................................. 6 s.h.

Minor in Plant Breeding
420 Personal Development and Leadership in Agriculture. (1) Personal leadership skills will be developed as students explore historical and current views of social, cultural, and technological issues and the associated social changes in agriculture. Styles and roles of leadership in agricultural organizations including group dynamics, conflict resolution, ethical considerations, and communications will be covered. Prerequisite: AGRI 340. 1 br. lect.

481 Special Problems. (1–3, repeatable for different topics to 3) Laboratory work involving experiments in student's major interest. Prerequisites: at least junior standing and approval of department chairperson. Arranged.

499 Research. (1–6, repeatable for different topics to 8) Original independent research on specific problems in agriculture. Prerequisite: approval of department chairperson.

AGRICULTURAL ECONOMICS (AGEC)

312 (Cross-listed with ECON 312) Economics of Cannabis. (3) A detailed survey of the cannabis industry including market analysis, regulation options, the potential impacts on the U.S. economy, and a comparison to other regulated substances such as opioids, alcohol, tobacco, and pharmaceuticals. Not open to students with credit in ECON 312. Prerequisite: ECON 100, 231, or 232, or permission of instructor.

333 Agricultural Marketing. (3) Principles of marketing agricultural products. Prerequisite: AGRI 220 or ECON 232. 3 hrs. lect.

357 US Agricultural Trade. (3) Overview of U.S. agricultural trade; examination of issues that impact international agricultural trade, including trade agreements, country-of-origin labeling, food safety, and risk assessments; examination of changes in world agricultural production and trade patterns over time. Prerequisites: AGRI 220 or ECON 231.

342 Agricultural Law. (3) Law as it applies to the agricultural operation. Partnership, corporation, agribusiness contracts, leases, leasing practices, environmental, tort and liability law are covered. Prerequisite: AGRI 220. 3 hrs. lect.

349 Agribusiness Management. (4) A study of intermediate level agricultural management tools to create a conceptual framework for successfully operating a profit-based agribusiness. Prerequisite: AGRI 220; or ECON 231 and 232. 4 hrs. lect.

340 (Cross-listed with ECON 430) Environmental Economics. (3) This interdisciplinary course examines economic issues involving the interactions between humans and the environment. The course addresses conflicts in land, air, and water use and the role of assigned property rights and public policies in resolving environmental problems. Not open to students with credit in ECON 430. Prerequisite: AGRI 220 or ECON 232.

442 Marketing Grain and Livestock Products. (3) Economic principles of marketing grain and livestock, with an emphasis on the marketing activities of producers and distributors of grain, livestock, and their products. Risk and quality management issues are included. Prerequisite: AGEC 333. 3 hrs. lect.

443 Agricultural Finance. (3) Financing problems and opportunities in agriculture. Sources of finance, financing costs, analysis of investment opportunities, and financial management and estate planning. Prerequisite: AGRI 220 or ECON 232. 3 hrs. lect.

447 Commodities Markets and Futures Trading. (3) Futures trading institutions, technical analysis, multiple hedging, and speculation. Prerequisite: AGEC 333 or ECON 330 or ECON 332 or FIN 311 or FIN 331. 3 hrs. lect.

457 Market Profile®. (3) Use of the Chicago Board of Trade Market Profile® and Liquidity Data Bank® for hedging and speculation. Not available to students who have completed AGEC 459. Prerequisite: AGEC 447. 3 hrs. lect.

460 US Agricultural Policy. (3) Examination of U.S. agricultural policies, with an emphasis on current farm legislation and regulation. Includes analysis of the impact of contemporary agricultural policies on farming operations. Prerequisite: AGRI 220 or ECON 231 or ECON 232.

AGRICULTURAL TECHNOLOGY MANAGEMENT (AGTM)

207 Introduction to Precision Agriculture. (3) Course introduces fundamental components of precision agriculture. Topics include: the global positioning system (GPS), geographic information systems (GIS), remote sensing, yield monitoring, variable rate application (VRA), and analysis and decision making for agriculture. 3 hrs. lect.

250 Introduction to Agricultural Technology Management. (3) Introduction to electrification, surveying, internal combustion engines, metallurgy, and concrete and wood construction used in agriculture. 2 hrs. lect.; 2 hrs. lab. IAE: AG 906.

350 Agricultural Machinery. (3) Principles of owning, operating, and adjusting equipment for tillage, planting, harvesting, and chemical application. Principles of application, and repair of agricultural hydraulic systems. Prerequisite: AGTM 250 or consent of instructor. 2 hrs. lect.; 2 hrs. lab.

360 Electrical Power and Equipment in Agriculture. (3) Principles of electricity and its application to wiring buildings, electric motors, automatic controls, and solid-state equipment used in agriculture. Prerequisite: AGTM 250 or consent of instructor. 2 hrs. lect.; 2 hrs. lab.

365 Agricultural Tractors and Engines. (3) Operating principles of gasoline and diesel engines, power trains, and fuel and electrical systems. Overhaul of both gasoline and diesel engines. Prerequisite: AGTM 250 or consent of instructor. 2 hrs. lect.; 2 hrs. lab.

368 Agricultural Shop Skills. (4) Principles and skills in metal and welding fabrication, wood working, plumbing, and repairs related to agriculture. Prerequisite: AGTM 250. 2 hrs. lect.; 4 hrs. lab.

461 Surveying and Soil and Water Conservation Engineering. (4) Development of surveying skills using a self-level, transit, total station, GPS receiver, and related software. Study of principles of water and wind erosion. Design of grass waterways, terraces, and other erosion control structures. Not open to students with credit in CSTM 236. Prerequisite: AGTM 250 or consent of instructor. 3 hrs. lect.; 2 hrs. lab.

464 Grain Drying, Handling, and Storage Systems. (3) Application of engineering principles pertaining to drying, storing, and handling of agricultural products. Prerequisite: junior standing. 3 hrs. lect.

471 Agricultural Remote Sensing. (3) Course addresses concepts of remote sensing for precision agriculture. Some topics include: global positioning system (GPS) accuracy and differential GPS, vegetative spectral reflectance signatures, multispectral and hyperspectral imagery, indices, and various analysis techniques for agricultural datasets. Prerequisites: AGTM 207 or GIS 201, or consent of instructor. 2 hrs. lect.; 2 hrs. lab.

472 Agricultural Analysis and Decision Making. (3) Course presents methods for analysis of agricultural data to facilitate data-driven decision making for precision agriculture. Some topics include: map scale and

120
Agriculture

projection, coordinate systems, soil nutrient maps, yield maps, interpolation and analysis methods, and creation of prescription maps. **Prerequisites:** AGTM 207 or GIS 201, or consent of instructor. 2 hrs. lect.; 2 hrs. lab.

**AGRICULTURAL EDUCATION (AGED)**

131 Introduction to Agriculture Education. (2) Introduction to principles of vocational education, nature of agriculture teaching, teacher responsibilities, and agricultural education as a career. 2 hrs. lect.

IAI: AG 911.

330 Summer Experience in Agriculture Education. (2) Supervised experiences in a summer program in agriculture education. C- grade or above required to receive credit for the course to fulfill part of the observation hour requirement. **Prerequisite:** consent of instructor.

331 Program Organization in Agriculture Education. (3) Program organization and development of learning activities in agriculture education including program planning, supervised agriculture experiences, FFA, federal, state and local program structure. 3 hrs. lect.

439 Special Methods in Agriculture. (3) Analysis of objectives, selection, development, and organization of teaching units; development of procedural techniques, program implementation, and evaluation. Includes clinical experience. Grade of C- required in this class. **Prerequisite:** consent of instructor. 3 hrs. lect.

480 Student Teaching. (12) See STCH 480.

**AGRONOMY (AGRN)**

(Crops)

176 Principles of Crop Science. (4) Introduction to science-based principles underlying plant production, including: classification and use of major world crops; plant growth and development in response to environment and management; plant pests and pest protection; plant breeding and genetic improvement. Not open to students with credit for HORT 180. 3 hrs. lect.; 2 hrs. lab.

IAI: AG 903.

370 No-Tillage Farming. (2) An exploration of environmental benefits from no-tillage crop production, the agronomic factors affecting the success of crop plants in no-tillage fields, and management tactics to increase the productivity and environmental benefits of no-tillage farming. **Prerequisite:** AGRN 176 and 278. 2 hrs. lect.

372 Crop Science Judging. (1) Preparation for regional and national crop judging contests. Identifying crops and crop pests; troubleshooting crop problems; and calculating agronomy, pest control, and fertility scenarios. **Prerequisite:** AGRN 176 or 278, or consent of instructor. 2 hrs. lab.

373 Integrated Pest Management. (4) Identification and biology of economically-important weeds, insects, diseases, and vertebrate pests affecting plants. Selection and use of effective biological, cultural, chemical, and mechanical pest control methods. Safe handling and application of pesticides. **Prerequisite:** AGRN 176. 3 hrs. lect.; 2 hrs. lab.

374 (Cross-listed with HORT 374) Diseases of Economic Plants. (3) Identification of agricultural plant diseases; biology of common plant pathogens; pathogen-plant interactions; fungicide classification and use; management of plant diseases through chemical, cultural, biological, and mechanical control methods. Not open to students with credit in HORT 374. **Prerequisite:** AGRN 176 or FOR 200 or HORT 180. 2 hrs. lect.; 2 hrs. lab.

377 Crop Ecology and Management. (4) Grain and forage crops response to climate and management of soil and water resources. Crop management practices that maximize productivity and minimize environmental impact. **Prerequisite:** AGRN 176. 4 hrs. lect.

470 Applied Entomology. (3) Life cycles, recognition of economic damage, and integrated control of insects affecting crop and livestock production. **Prerequisite:** AGRN 176. 2 hrs. lect.; 2 hrs. lab.

472 Principles of Plant Breeding. (3) Traditional plant breeding course covering basic inheritance of qualitative and quantitative traits, tools for dealing with variations in ploidy levels and mutations, germplasm resources, breeding methods for self and cross pollinated species, hybrid production, vegetatively propagated crops, and seed production. **Prerequisite:** AGR 376 or BIOL 340. 2 hrs. lect.; 2 hrs. lab.

476 Crop Biotechnology. (3) Biotechnology methods used for the genetic improvement and production of agronomic and ornamental crops. Government regulations, public concerns, and legal protection of genetically modified crops will be covered. **Prerequisite:** AGR 376 or BIOL 340. 2 hrs. lect.; 2 hrs. lab.

477 Weed Science Competition. (1) Students will prepare for a regional weed science contest by learning to identify weeds and herbicide symptoms, troubleshoot crop problems, calibrate sprayers, and calculate arrogany application problems. **Prerequisite:** AGRN 176 or 278, or consent of instructor. 2 hrs. lab.

479 Weed Science. (3) Identification, biology, and distribution of weeds; weed interference of desirable plant growth; herbicide classification, use, and environmental fate; appropriate application of chemical, cultural, biological, and mechanical weed control methods. **Prerequisite:** AGRN 373. 2 hrs. lect.; 2 hrs. lab.

(Soils)

278 Fundamentals of Soil Science. (4) Introduction to principles of soil science. Fundamentals of physical, chemical, biological, and agricultural properties of soils. 3 hrs. lect.; 2 hrs. lab.

IAI: AG 904.

378 Soil Fertility and Plant Nutrition. (3) Fundamental chemicals needed for plant growth. Chemical forms of elements in the soil, reactions of fertilizers in soils, determination of fertilizer needs, soil test methods. **Prerequisite:** AGRN 278. 3 hrs. lect.

473 Nutrient Management. (3) Properties of plant food materials used in world agriculture; manufacturing methods, marketing systems, government policy, field application, economics of management and use. **Prerequisites:** AGRN 378 and CHEM 101 or 201. 3 hrs. lect.

478 Properties of Soil. (3) A study of the physical and chemical properties of soil and their relationship to plant growth and land use. **Prerequisite:** AGRN 278. 2 hrs. lect.; 2 hrs. lab.

**ANIMAL SCIENCE (ANSC)**

112 Fundamentals of Animal Science. (3) Application of fundamental biological principles as related to the nutrition, reproduction, and management of livestock. 2 hrs. lect.; 2 hrs. lab.

IAI: AG 902.

310 Man and Animal Interaction. (3) Interaction of man with companion, domestic, and wild animals. Consideration of wide ranging societal concerns including food production, companionship benefits, impact of large animals in urban and rural settings, animal and human disease risks, and animal welfare and rights issues. 3 hrs. lect.
Agriculture

312 Techniques in Livestock Evaluation and Selection. (3) Evaluation and selection of breeding and market animals utilizing new selection tools and techniques and visual appraisal. Prerequisite: ANSC 112. 2 hrs. lect.; 2 hrs. lab.

314 Animal Breeding. (3) The principles of heredity and their application to the problems of animal improvement. Prerequisites: AGRI 376, ANSC 112, BOT 200 or ZOOL 200, and MATH 102 or 123 or STAT 171. 3 hrs. lect.

319 Applied Meat Science. (4) Evaluation, grading, and marketing of meat animals and meat products including swine, beef, lamb, and poultry. Factors affecting meat palatability. Qualifies student for federal, state, and local internships. Prerequisite: at least junior standing. 3 hrs. lect.; 2 hrs. lab.

322 Applied Livestock Nutrition and Feeding. (4) Composition of feed/nutrients and their functions, formulating/balancing of rations, and the basic chemical and physiological principles of ruminant and non-ruminant nutrition. Consideration of common nutrition problems, feed additives, and growth stimulants. Prerequisites: ANSC 112 and CHEM 100 or higher. 3 hrs. lect.; 2 hrs. lab.

323 Livestock Management. (3) A study of management practices necessary for efficient and economical livestock production. Not open to students specializing in Animal Science. Prerequisite: ANSC 112. 3 hrs. lect.

335 Livestock Merchandising. (3) Methods of livestock promotion and merchandising. Preparation of livestock for sale. Scheduling and management of livestock sales. Prerequisites: ANSC 112 and junior standing. 2 hrs. lect.; 2 hrs. lab.

413 Livestock Judging. (3) Evaluation, grading, selection, and pricing of market and breeding livestock. Some enrollees will compete in intercollegiate contests. Prerequisite: ANSC 312. 2 hrs. lect.; 2 hrs. lab.

415 Beef Production and Management. (4) Consideration of commercial cow-calf, purebred, stocker, and finishing beef production systems. Integration of genetics, nutrition, and reproduction. Record keeping and business aspects. Prerequisites: ANSC 314 and 322, or consent of the instructor. 3 hrs. lect.; 2 hrs. lab.

416 Swine Science. (3) A study of selection principles, nutrition, breeding, reproduction, disease prevention, and management practices applied to swine production. Prerequisites: ANSC 314 and 322, or consent of the instructor. 2 hrs. lect.; 2 hrs. lab.

419 Sheep Science. (3) Breeds, feeding, and selection as applied to management of the farm flock. Prerequisites: ANSC 314 and 322, or consent of the instructor. 2 hrs. lect.; 2 hrs. lab.

424 Physiology of Reproduction and Lactation. (3) Principles of physiology and functioning of the endocrine system in relationship to reproduction, infertility, and lactation in farm animals. Prerequisite: ANSC 112 or BOT 200 or ZOOL 200. 2 hrs. lect.; 2 hrs. lab.

CONSERVATION (CONS)

305 Sustainable Agriculture. (3) An investigation of current and historical efforts to increase agricultural sustainability through government programs, research and technological development, organic agriculture, grassroots activism, and the greening of industry. Prerequisite: AGRN 278 or permission of the instructor.

405 Soil and Water Conservation. (4) The study of the maintenance of a quality environment through the conservation of soil and water resources. 4 hrs. lect.

FORESTRY (FOR)

200 Introduction to Forestry. (3) Professional orientation and survey of forests and forestry. Introduction to basic forestry concepts and techniques. 2 hrs. lect.; 2 hrs. lab.

208 Dendrology. (4) Identification, distribution, economic importance, and elementary silviculture of the important hardwoods and conifers of the U.S. and Canada. 2 hrs. lect.; 4 hrs. lab.

209 Basic Tree Worker Skills. (2) Provide practical experience for forestry students in the proper and safe use of arboriculture-related equipment and climbing techniques associated with tree care. 1 hr. lect.; 2 hrs. lab.

406 Arboriculture. (4) Detailed study of woody plants with emphasis on growth and development, planting, pruning, fertilization, maintenance, valuation, hazard assessment, pest management, diagnostics, and site vegetation management. Prerequisite: FOR 200 or 208. 2 hrs. lect.; 4 hrs. lab.

407 Urban Forest Management. (3) Management principles for urban vegetation with emphasis on plant selection and usage, tree inventories, tree ordinances, specifications manuals. Arbor Day tree programs, and tree laws. Prerequisite: FOR 200 or 208. 2 hrs. lect.; 2 hrs. lab.

HORTICULTURE (HORT)

180 Principles of Horticultural Science. (4) Introduction to science-based principles underlying plant production, including: classification and use of food and ornamental plants; plant growth and development in response to environment and management; plant pests and pest protection; plant breeding and genetic improvement. Not open to students with credit for AGRN 176. 3 hrs. lect.; 2 hrs. lab. IAI: AG 905.

357 (Cross-listed with BOT 357) Cannabis Biology and Production. (3) Lecture/lab/field course on the biology and agricultural use of Cannabis sativa (industrial hemp) including cannabis anatomy, physiology, breeding, propagation methods, management techniques, reintroduction into farming crop rotation, commercial production strategies, post-harvest processing, and product applications. Not open to students with credit in BOT 357. Prerequisite: AGRN 176, BOT 200, or HORT 180, BOT 329, or permission of instructor. 2 hrs. lect.; 2 hrs. lab.

370 Plants in the Human Context. (3) The objective of this course is to expose the students to the pervasiveness and essentiality of plants in the human experience. Major topics include ecosystem services, GMOs, pest and weed resistance, and plant management issues in the 21st century. 3 hrs. lect.

374 (Cross-listed with AGRN 374) Diseases of Economic Plants. (3) Identification of agricultural plant diseases; biology of common plant pathogens; pathogen-plant interactions; fungicide classification and use; management of plant diseases through chemical, cultural, biological, and mechanical control methods. Not open to students with credit in AGRN 374. Prerequisite: AGRN 176 or FOR 200 or HORT 180. 2 hrs. lect.; 2 hrs. lab.

380 Landscape Plants I. (3) Identification, adaptability, and evaluation of ornamental deciduous and evergreen trees and shrubs used in landscape plantings. 2 hrs. lect.; 2 hrs. lab.

381 Landscape Plants II. (3) Identification, adaptability, and evaluation of herbaceous annuals, perennials, ornamental grasses, vines, and ground cover plants used in landscape planting. 2 hrs. lect.; 2 hrs. lab.
384 Sustainable Landscape Construction and Management. (3) Principles and practices of sustainable landscape construction and management including: site grading and drainage, landscape construction bidding, hardscape and water feature installation, plant establishment, Integrated Pest Management (IPM), pruning, and urban soil and fertility management. Prerequisite: HORT 180. 2 hrs. lect.; 2 hrs. lab.

385 Landscape Design. (3) Principles of landscape design and review of sustainable landscape technologies. Study of drawing and design skills, drawing tools, plan view, elevation view, drawing to scale, site analysis, and plant usage in the landscape. Prerequisite: HORT 380 or 381. 2 hrs. lect.; 2 hrs. lab.

386 Sustainable Landscape Construction. (3) Standards, processes, and computations for site grading, drainage, construction details, and bidding for landscape construction. Project scheduling, contracts, and hardscape install practices for small retaining walls, patios, walkways, and water features. Exploration of sustainable hardscape materials. Prerequisite: junior standing.

389 Home Horticulture. (3) Principles of plant growth and maintenance as related to the selection and care of landscape plants, lawns, tree fruits, small fruits, flowers, vegetables, and house plants.

393 Greenhouse and Nursery Management. (3) Principles and practices of ornamental crop production of floricultural, interior, and wood ornamental plants; greenhouse and nursery techniques and facilities; soil and soilless media, plant growth regulators, pests and diseases and their control, irrigation and fertilization. Prerequisite: HORT 180. 2 hrs. lect.; 2 hrs. lab.

480 Plant Propagation. (3) Principles and practices of sexual and asexual plant propagation. Prerequisite: HORT 180. 2 hrs. lect.; 2 hrs. lab.

483 Hydroponic Plant Production. (3) An exploration of hydroponic plant production; the influence of fertilizer, light, substrate, water quality, and environment on the success of crop plants in soilless culture; management tactics to increase crop productivity while minimizing environmental impact of hydroponic plant production. Prerequisite: AGRN 176 or BOT 200 or FOR 200 or HORT 180 or instructor's permission.

484 Sustainable Landscape Technology. (3) Review of current best management practices (BMPs) for sustainable landscape technologies. These include CSAs, local foods movement, living walls, green roofs, stormwater management, natural swimming pools, habitat restoration, native plants in landscapes, and a review of the Sustainable Sites Initiative. Prerequisite: HORT 180 or AGRN 176 or FOR 200 or BOT 200 or ENVR 201, or consent of instructor.

485 Turf Management. (3) Establishment and maintenance of turf grass for lawns, golf courses, and recreational areas, including athletic fields. Prerequisite: AGRN 176 or HORT 180. 2 hrs. lect.; 2 hrs. lab.

493 Practicum in Horticultural Science. (1–3, repeatable to 3) Practical experience, preferably in an on-the-job situation, in some aspect of horticulture. Prerequisites: HORT 180, and HORT 380 or FOR 208.

INTERNATIONAL AGRICULTURE (INAG)

310 International Agriculture in Developing Countries. (3) (General Education/Multicultural Studies) (Global Issues) A study of international agriculture development. Special emphasis given to world hunger and world food needs, use of limited natural resources, population growth, trade policies, and appropriate technology used in developing countries. 3 hrs. lect.

361 International Agriculture Travel Study in the Western Hemisphere. (3, repeatable to 6 with different location) (Global Issues) The study of the history and culture of a region, integrated with agricultural production, processing, development, and trade through classroom instruction and international travel. A maximum of six credits of INAG 361 and INAG 362 can be used toward departmental electives. Prerequisite: junior standing or consent of instructor. Arranged.

362 International Agriculture Travel Study in the Eastern Hemisphere. (3, repeatable to 6 with different location) (Global Issues) The study of the history and culture of a region, integrated with agricultural production, processing, development, and trade through classroom instruction and international travel. A maximum of six credits of INAG 361 and INAG 362 can be used toward departmental electives. Prerequisite: junior standing or consent of instructor. Arranged.
Program Offerings and Locations:

- Bachelor of Arts in Art: Macomb
- Bachelor of Fine Arts in Art: Macomb
- Minor in Art History: Macomb
- Minor in Art Studio: Macomb
- Minor in Graphic Design: Macomb

For student learning outcomes, please see wiu.edu/provost/learningoutcomes.

Faculty: Clough, Czechowski, Holz, Howard, Knavel, Ku, Lindquist, McArthur, Myers, Oursler, Shelly, Waldrop, Walters.

The Department of Art and Design offers two baccalaureate degrees: 1) Bachelor of Fine Arts (B.F.A.) with options in Art Studio, Graphic Design, and Teacher Education; 2) Bachelor of Arts (B.A.) with options in general Art Studio and Graphic Design. Minors are also offered in Art History, Art Studio, and Graphic Design. Western Illinois University is an accredited institutional member of the National Association of Schools of Art and Design (NASAD). Students must complete at least 50% of their art courses at WIU to graduate as Art majors.

The **Bachelor of Fine Arts** degree is a comprehensive professional undergraduate degree that stresses high standards of performance. The **Art Studio option** provides students with opportunities to broaden their knowledge of art and to develop technical proficiency in chosen studio areas such as ceramics, drawing, metals/jewelry, painting, printmaking, or sculpture. The **Graphic Design option** focuses on developing creative problem-solving skills and a critical visual aesthetic that students need to succeed in the current design industry. The **Teacher Education option** provides students with an essential combination of coursework including art studio courses, art history courses, courses from the College of Education and Human Services, and courses in Art Education methods, theories, practices, and research. Students in the Teacher Education option will develop the pedagogical and artistic skills and the competencies needed to qualify them for employment in art programs teaching kindergarten through high school levels. The concentrated curricular structure of the B.F.A. allows students to integrate knowledge, experience, and technical skill as it prepares them for the intellectual and cultural world of art/design, for graduate study, or for careers in art education.

The **Bachelor of Arts** degree is a broad, well-rounded liberal arts degree. The **Art Studio option** allows the student to tailor the program to his/her individual needs by offering a variety of intensive studio tracks including ceramics, drawing, metals/jewelry, painting, printmaking, and sculpture. The **Graphic Design option** focuses on the development of the necessary design skills and aesthetics and also allows students the opportunity to explore other areas of interest.

**GradTrac** is available to Art majors. See page 79 for information about GradTrac.

**Honors Curriculum**—Academically qualified students in this department are encouraged to complete an honors curriculum in University Honors, Honors in the Major, or General Honors. All Honors students must complete the one-hour honors colloquium (G H 299). General Honors includes General Honors coursework. Honors in the Major includes honors work in the major. University Honors combines Honors in the Major and General Honors. For more information about honors curricula, see page 100 or visit the Centennial Honors College website at wiu.edu/Honors.
Integrated Baccalaureate and Master’s Degree Program—An integrated baccalaureate and master’s degree program is available for the Bachelor of Arts in Art: Master of Arts in Museum Studies. An integrated baccalaureate and master’s degree program is available for the Bachelor of Fine Arts in Art: Master of Arts in Museum Studies. An integrated degree program provides the opportunity for outstanding undergraduates to earn both degrees in five years. Please refer to the Graduate Studies catalog for details about the integrated program.

Degree Programs

Bachelor of Fine Arts—Art

Admission: To enter the Bachelor of Fine Arts degree program in the Art Studio or Graphic Design option, students are required to pass an Entry Portfolio Review (ARTS 210). Students are eligible to submit their portfolio after completing the four studio foundation courses in the Art core (ARTS 101, 102, 140, 240). The Entry Portfolio Review is recommended for students who have earned 30 s.h. of credit. A grade point average of at least 2.50 in Art and a positive Entry Portfolio Review are required for admittance into the B.F.A. program.

All students seeking the Bachelor of Fine Arts in Art must complete I, II, III, and IV.A, IV.B, or IV.C below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

In accordance with the Illinois State Board of Education licensure rule, all candidates seeking a Professional Education License or endorsement are required by Western Illinois University to obtain a grade of “C-” or better in all directed general education courses, all core courses, and all courses in the option. This rule does not supersede course prerequisite requirements in the catalog that specify a letter grade.

Please see the Teacher Education section of this catalog (p. 346) for more information about WIU’s Teacher Education Program.

I. University General Education Curriculum (p. 70) ................................................................. 43 s.h.
   Option C, Teacher Education, to include ARTH 284 and a General Education mathematics course

II. Core Courses: ARTH 282*, 283*; ARTS 101, 102, 140, 240, 241 ........................................... 21 s.h.

III. Special Course: Choose one of ARTH 392†, 394†, or 397† ......................................................... 3 s.h.

IV. Options of Study (select A, B, or C)

A. Art Studio
   1. Option Courses: ARTS 115, 210, 310, 410, 495 ............................................................... 7 s.h.
   2. Directed Electives .............................................................................................................. 51 s.h.
      a. Primary Studio Electives ............................................................................................. 30 s.h.
      b. Departmental Studio Electives: Studio 2-D and 3-D† ................................. 15 s.h.
      c. Art History Electives* .......................................................................................... 6 s.h.

B. Graphic Design
   1. Option Courses: ARTS 115, 210, 310, 416 ................................................................. 6 s.h.
   2. Directed Electives ............................................................................................................ 52 s.h.
      a. Primary Studio Electives: Select 21 s.h. from the following courses:
      b. Secondary Studio Area ......................................................................................... 15 s.h.
      c. Departmental Studio Electives: Studio 2-D and 3-D† ..................................... 10 s.h.
      d. Art History Electives* .......................................................................................... 6 s.h.

C. Art—Teacher Education
   1. Option Courses ................................................................................................................ 18 s.h.
      ARTE 360, 361, 411, 457; ARTS 115, 246
   2. Directed Electives ............................................................................................................ 20 s.h.
      a. Departmental Studio Electives† .................................................................... 17 s.h.
      b. Art History Elective* ......................................................................................... 3 s.h.
3. Other .................................................................................................................. 31 s.h.
   a. EDUC 439 ..................................................................................................... 3 s.h.
   b. EDS 202, 301, 305, 401 .............................................................................. 10 s.h.
   c. ENG 366 or RDG 387 .................................................................................. 2 s.h.
   d. SPED 210, 390 ............................................................................................. 4 s.h.
   e. STCH 480, 482 ............................................................................................. 12 s.h.

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) any major’s discipline-specific global issues course; or 4) an approved Study Abroad program.

* May count toward the University General Education requirement
† ARTH 392, 394, or 397 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.
1 At least 6 s.h. must be taken in Studio 3-D.
2 Must be 300- or 400-level ARTH course(s)

## Bachelor of Arts—Art

All students seeking the Bachelor of Arts in Art must complete I, II, III, and IV.A or IV.B below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

**I. University General Education Curriculum (p. 70) ....................................................... 43 s.h.**

**II. Core Courses: ARTH 282*, 283*; ARTS 101, 102, 140, 240 ........................................ 18 s.h.**

**III. Special Course: Choose one of ARTH 392†, 394†, or 397† ......................................... 3 s.h.**

**IV. Options of Study (select A or B)**

**A. Art Studio**

1. Option Courses: ARTS 115, 495 .............................................................................. 6 s.h.
2. Directed Electives .................................................................................................. 27 s.h.
   a. Departmental Studio Electives: Studio 2-D and 3-D† .................................. 24 s.h.
   b. Art History Elective† ...................................................................................... 3 s.h.
3. Open Electives ........................................................................................................ 29 s.h.

**B. Graphic Design**

1. Option Courses ....................................................................................................... 24 s.h.
   a. ARTS 115, 416 .............................................................................................. 6 s.h.
   b. Select 18 s.h. from the following courses: ARTS 215, 246, 314, 315, 316, 317, 318, 414, 415 ................................................ 18 s.h.
2. Directed Electives .................................................................................................. 9 s.h.
   a. Departmental Studio Electives: Studio 3-D† ............................................. 6 s.h.
   b. Art History Elective† ...................................................................................... 3 s.h.
3. Open Electives ........................................................................................................ 29 s.h.

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) any major’s discipline-specific global issues course; or 4) an approved Study Abroad program.

* May count toward the University General Education requirement.
† ARTH 392, 394, or 397 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.
1 At least 6 s.h. must be taken in Studio 3-D.
2 Must be 300- or 400-level ARTH course(s)
Minors

Minor in Art History .............................................................................................................. 18 s.h.
1. ARTH 282, 283, 394 ........................................................................................................ 9 s.h.
2. Select 300 and 400 level Art History courses................................................................. 9 s.h.

Minor in Art Studio ............................................................................................................... 18 s.h.
1. ARTS 101, 102, 140; ARTH 180...................................................................................... 12 s.h.
2. Art Electives (Studio only) ............................................................................................. 6 s.h.

Minor in Graphic Design ..................................................................................................... 21 s.h.
1. ARTS 101, 140, 215......................................................................................................... 9 s.h.
2. Select four courses from: ARTS 246, 314, 315, 316, 415 ........................................ 12 s.h.

Course Descriptions

FOUNDATION (ARTS)

101 Two-Dimensional Design. (3) A foundation in the organization of two-dimensional visual concepts through design experiences with basic elements and principles of visual structure. A variety of materials are used. Materials charge for course.

102 Three-Dimensional Design. (3) Introductory lab course in three-dimensional design. Study includes experimentation with plastic relationships existing between design elements, materials, and the expression of ideas in three-dimensional form. Materials charge for course.

115 Digital Design. (3) An introduction to the use of digital technology as a tool in the creation of art. Students will develop, improve, and apply fundamental visual design skills and conceptual thinking to artworks through the use of digital equipment and applications. Materials charge for course.

140 Drawing I. (3) Fundamental concepts of drawing, including study of line, form, space, value, and composition in a variety of media. Materials charge for course.

240 Drawing II. (3, repeatable to 6) Opportunities given for continued development of a personal direction in a variety of drawing media. Prerequisite: ARTS 140. Materials charge for course.

PORTFOLIO REVIEW (ARTS)

210 BFA Entry Portfolio Review. (0) An assessment standard required of all students entering the BFA degree program. Prerequisites: ARTS 101, 102, 140, 240, declared BFA Art Major, and minimum 2.50 grade point average in Art. Graded S/U only.

310 BFA Junior Portfolio Review. (0, repeatable) An assessment standard required of all students pursuing the BFA degree. Prerequisites: S grade in ARTS 210 and a minimum 2.50 grade point average in Art. Graded S/U only. Students may re-enroll until “S” grade is attained.

410 BFA Senior Exhibition. (1) Development and exhibition of a quality body of art works representing the student’s achievements in the major and minor studio areas. Prerequisite: S grade in ARTS 310 and minimum 2.50 grade point average in Art.

495 Professional Practices in the Arts. (3) A seminar capstone course devoted to the development of professional practices in preparation for entry into the contemporary art world. Prerequisite: Senior standing or permission of the instructor.

ART EDUCATION (ARTE)

360 Methods in Elementary Art. (3) Experiments with art materials to gain insight into the values, curricula, and processes of art activities in the age levels from pre-school into the junior high.

361 Introduction to Art Education. (3) An early orientation to the philosophies and theories of the profession of art education, museum/gallery experience, adult education, etc. Prerequisite: ARTS 101.

411 Arts and Institutions. (3) This course provides students with the opportunity to study the roles of visual arts and arts educational programs in various types of institutions, organizations, and agencies and to explore professional and vocational opportunities within the art world. Prerequisite: ARTE 361 or permission of instructor.

437 Media, Methods, and Materials in Art Education. (3) An overview of media, processes, materials, techniques, and methods appropriate for elementary and secondary school classrooms. Content integrates studio courses with art historical and multicultural uses of traditional/non-traditional media, methods, and materials for producing works of visual art. Prerequisite: ARTE 360.

(ART Education——STCH)

480 Student Teaching—Secondary. (1–16) Student teaching in grades 7–12.

482 Student Teaching. (1–16) (Grades K–6).

(ART Education——EDUC)

439 High School Art Methods. (3) Students are involved in selecting those learning objectives and situations which emanate from a meaningful art curriculum for the secondary school student. Prerequisites: ARTS 101, 102; ARTE 360 or 361.

ART HISTORY (ARTH)

180 An Introduction to Art. (3) (General Education/Fine Arts) Designed to help students understand our cultural background and the role art plays in contemporary life. The functions, styles, structure of art, and the interaction of medium and meaning. Contact with art forms, visual aids, and readings are utilized to stimulate student responses to aesthetic qualities in the visual arts. Does not count for Art majors. IAI: F2 900.

282 History of Art: Ancient through Medieval. (3) (General Education/Fine Arts) A survey of art in the Western world from Prehistory through the Middle Ages. IAI: F2 901.

283 History of Art: Renaissance to 1900. (3) (General Education/Fine Arts) A survey of art in the Western world from the Renaissance to the end of the nineteenth century. IAI: F2 902.

284 History of Non-Western Art. (3) (General Education/Fine Arts or Multicultural Studies) A survey of art and visual culture in the non-Western world.
This course examines art and architecture created in medieval Europe (c. 800–1500). These works will be evaluated for their formal and stylistic characteristics, and interpreted with respect to their historical context as a way to understand evolving visual cultures (before ca. 1500 C.E.). Aesthetically significant objects are studied in relation to premodern visual cultures (before ca. 1500 C.E.). Aesthetically significant objects are studied in relation to premodern visual cultures (before ca. 1500 C.E.).

491 Renaissance Art. (3) This course examines art and architecture in the context of 14th–16th century Europe, including the status of the artist, Classical revival, religious reformations, new genres and media, and art as a point of contact between cultures. Prerequisites: ENG 180; sophomore standing or permission of the instructor.

496 History of Contemporary Art. (3) (Global Issues) A survey of post-WWII developments in the visual arts. The primary focus is upon Western art, but attention is also paid to stylistic developments in Asian, African, and Latin American countries. The central interpretative ideas and concerns for the course will be drawn from contemporary art theory and criticism. Prerequisites: ENG 180; sophomore standing or permission of the instructor.

GRAPHIC DESIGN (ARTS)

122 (Cross-listed with BC&J/GCOM/IDT 122) Introduction to Emerging Design Technologies. (3) Introduction to concepts and issues related to emerging design technologies. Topics include ethical considerations, production design process, design decision-making process, and design principles. Course will conclude with an overview of career options and introduction to portfolio preparation. Not open to students with credit for BC&J/GCOM/IDT 122.

215 Introduction to Graphic Design and Typography. (3) Introduction to the visual communication of graphic design. Typography and symbolic graphics stressed. Prerequisite: Sophomore standing or permission of instructor. Materials charge for course.

314 Artistic Digital Imaging. (3) The course emphasizes utilizing the principles of design to effectively communicate ideas visually. Imaging editing software will be used for creative problem-solving projects. Prerequisite: ARTS 215. Materials charge for course.

315 Layout and Design. (3) The course focuses on incorporating type and digital imagery in page layouts. Projects emphasize creativity and the principles of visual composition, as well as encouraging awareness of contemporary design trends and their historical precedents. Prerequisite: ARTS 215. Materials charge for course.

316 Artistic Website Design. (3, repeatable to 6) This course centers on the aesthetic development of well-designed websites and mobile device interfaces. Students will use advanced graphics software to design the layout of individual webpages and the overall site development. Prerequisite: ARTS 315. Materials charge for course.

317 Artistic Digital Illustration. (3) This course focuses on digital painting and drawing with a digitizing tablet and stylus in conjunction with digital imaging software. Assignments will range from developing conceptual drawing skills to creating finished illustrations. Prerequisite: ARTS 215. Materials charge for course.

318 Motion Graphics and Animation. (3) Artistic analysis of 2D animation techniques and building animations using traditional methods and contemporary compositing techniques to produce hand drawn, typographic, and stop motion animations. Prerequisite: ARTS 215. Materials charge for course.

414 Internship in Graphic Design. (1–12, repeatable to 12) Supervised work experience in a graphic design related field with an approved employer. Regularly scheduled meetings with the faculty mentor are required throughout internship. Prerequisites: Art–Graphic Design major; junior/senior standing; ARTS 215; 9 s.b. of graphic design courses; a minimum 2.00 overall GPA; a minimum 2.50 major GPA; and departmental approval. Graded S/U only.

415 Advanced Graphic Design Concepts. (3, repeatable to 6) Concept and design skills are applied to the development of various projects. Emphasis is on critical thinking, concept development as a process, and research. Focus is on the refinement of the design process and further development of typographic skills. Prerequisite: ARTS 316. Materials charge for course.

416 Graphic Design Senior Portfolio. (3) Development of professional presentation. Development of new work for a graphic design portfolio, job hunting
skills, dealing with clients, and building a personal portfolio website. Prerequisites: ARTS 215. Materials charge for course.

422 (Cross-listed with BC&J/GCOM/IDT 422) Applied Emerging Design Technologies. (3) The course allows students to focus on personal portfolio development using emerging technologies. Students will also have the opportunity to work collaboratively on real-world projects that apply principles in emerging technologies. Not open to students with credit for BC&J/GCOM/IDT 422.

STUDIO ART (ARTS)

181 Introduction to Studio Art. (3) (General Education/Fine Arts) A general introduction to understanding art and its vocabulary including hands-on experience utilizing a variety of the media used in the creation of art. Materials charge for course.

400 Studio Problems. (3, repeatable to 9) Individual study of design experimentation bridging several art areas, including gallery/museum experience. Not open to freshmen or sophomores. Prerequisites: Basic courses in areas of concern; written permission of instructor.

450 Travel Workshop. (1–3, repeatable to 6) An opportunity for students to participate in conferences,meetings, and workshops designed to provide professional educational sessions, gain networking experience, and present their artwork. Prerequisites: Permission of instructor. Laborator charge for course and field trip required. Graded S/U only.

(Ceramics—3D Area)

330 Ceramics I. (3) Introduction to clay as a medium for art expression. Instruction given in fundamentals of aesthetic form, techniques of hand forming, glaze design, and kiln firing. Prerequisite: Sophomore standing or permission of instructor. Materials charge for course.

331 Ceramics II & III. (3, repeatable to 6) Pottery as aesthetic expression in clay. Emphasis is placed upon use of the potter’s wheel with related hand-building techniques as well as glaze design and kiln firing practices. Prerequisite: ARTS 330. Materials charge for course.

430 Studio Problems in Ceramics. (3, repeatable to 9) Experimental studio projects reflecting a high level of technical, intuitive, and conceptual approaches. Prerequisite: ARTS 331 or permission of instructor. Materials charge for course.

(Digital Photography—2D Area)

246 Digital Art Photography I. (3) An introduction to digital photography as an artistic process. Topics include camera operation, composition, computer photo manipulation, creative expression, and output of digital images. Upon completion, students should be able to successfully expose, digitally manipulate, and print well-conceived artistic compositions. Materials charge for course.

346 Digital Art Photography II. (3) Students will extend and refine digital skills obtained in Digital Art Photography I, learn how to streamline and personalize image workflow, compare image management options, and explore advanced image editing techniques to fine-tune a portfolio of compelling photographs. Prerequisite: ARTS 246. Materials charge for course.

446 Advanced Digital Art Photography. (3) Intensive investigation of digital photography as an art form. Emphasis is placed on concept and technique, as well as guided research and individual practice. Prerequisites: ARTS 246 and 346. Materials charge for course.

(Drawing—2D Area)

140 Drawing I. (3) See Foundation courses listed on page 127. Materials charge for course.

240 Drawing II. (3, repeatable to 6) See Foundation courses listed on page 127. Materials charge for course.

241 Life Drawing I. (3) Studio work in drawing the human figure with attention given to color and composition. Prerequisites: ARTS 101 and 110. Materials charge for course.

341 Advanced Life Drawing. (3, repeatable to 9) Further study rendering the human figure with attention given to color and composition. Prerequisite: ARTS 241. Materials charge for course.

440 Studio Problems in Drawing. (3, repeatable to 9) Individual problems in drawing selected with the instructor at registration. Prerequisite: ARTS 240 or permission of instructor.

(Metals/Jewelry—3D Area)

335 Art Metal and Jewelry I. (3) Studio experiences involving design and fabrication of 3-D forms in fine metals for jewelry and small sculpture. Students will be introduced to basic metal working techniques as applied to non-ferrous metals including sawing, riveting, shaping, and soldering. Prerequisite: Sophomore standing or permission of instructor. Materials charge for course.

336 Art Metal and Jewelry II & III. (3, repeatable to 6) Opportunities given for continued development of a personal direction in metal and jewelry processes. Prerequisite: ARTS 335. Materials charge for course.

435 Studio Problems in Art Metal and Jewelry. (3, repeatable to 9) Individual problems in art metal and jewelry selected with the instructor. Prerequisites: ARTS 336 or permission of instructor. Materials charge for course.

(Painting—General)

250 Introduction to Painting. (3) Introduction to the fundamentals of painting with an emphasis on color, composition, subject matter, and technique. Materials charge for course.

(Painting—Oil—2D Area)

350 Painting I. (3) Studio work exploring the possibilities and techniques of fine painting. Assignments given with an emphasis on an understanding of materials including paint, brushes, solvents, mediums, and the construction and preparation of support structures. Prerequisite: Sophomore standing or permission of instructor. Materials charge for course.

451 Painting II & III. (3, repeatable to 6) This course builds upon the skills learned in Painting I with continuing emphasis on materials, techniques, and formal problems. Assignments may expand beyond representational/objective painting and lead into more problem solving/critical thinking. Prerequisite: ARTS 350. Materials charge for course.

452 Studio Problems in Painting. (3, repeatable to 9) Assignments will be given individually based on previous efforts and will be directed toward the expansion of an idea and the content/subject matter. The course continues to investigate materials and techniques. Prerequisite: ARTS 451 or permission of instructor. Materials charge for course.

(Painting—Watercolor—2D Area)

370 Watercolor I. (3) Techniques of transparent and opaque water soluble paints are explored. Prerequisites: Sophomore standing or permission of instructor. Materials charge for course.
371 Watercolor II & III. (3, repeatable to 6)
Opportunities given for continued development of a personal direction in water soluble media. Prerequisite: ARTS 370. Materials charge for course.

470 Studio Problems in Watercolor. (3, repeatable to 9)
Selective experimentation with transparent and opaque water media. Prerequisite: ARTS 371 or permission of instructor. Materials charge for course.

(Printmaking—General)
265 Introduction to Printmaking. (3) Introduction to printmaking as a medium for artistic expression. A variety of printmaking methods and approaches to making visual work will be explored. Students will create original art prints and be prepared for further study in printmaking. Materials charge for course.

(Printmaking—Intaglio—2D Area)
355 Intaglio I. (3) Studio work in the intaglio processes: engraving, drypoint, and etching on copper and zinc plates. Prerequisite: Sophomore standing or permission of instructor. Materials charge for course.

356 Intaglio II & III. (3, repeatable to 6)
Opportunities given for continued development of a personal direction in intaglio processes. Prerequisite: ARTS 355. Materials charge for course.

455 Studio Problems in Intaglio. (3, repeatable to 9)
Individual problems in a specific print-making medium selected with the instructor at registration. Prerequisites: ARTS 356 or permission of instructor. Materials charge for course.

(Printmaking—Lithography—2D Area)
365 Lithography I. (3) Studio work involving technical methods and aesthetic approaches to lithography as applied to stone work and plate work. Students will explore both traditional and digital methods of creating lithographic prints. Prerequisite: Sophomore standing or permission of instructor. Materials charge for course.

366 Lithography II & III. (3, repeatable to 6)
Introduction to color printing and related problems. The use of transfer paper and the study of image reversal are other subjects covered. Prerequisite: ARTS 365. Materials charge for course.

465 Studio Problems in Lithography. (3, repeatable to 9) Individual projects selected by the student in conference with the instructor. Prerequisites: ARTS 366 or permission of instructor. Materials charge for course.

(Printmaking—Silkscreen—2D Area)
368 Silkscreen I. (3) Studio work involving silkscreen as a fine art print medium including basic photo-emulsion, drawing fluid and block-out techniques, computer-generated and hand-drawn processes. Students use non-toxic acrylic inks to produce a portfolio of editioned prints. Prerequisite: Sophomore standing or permission of instructor. Materials charge for course.

369 Silkscreen II & III. (3, repeatable to 6)
Intermediate level silkscreen; students explore their own artistic voice through resolution of concept and imagery using hand-drawings and advanced digitigraphic processes. Students use non-toxic acrylic inks to produce a portfolio of editioned prints. Prerequisite: ARTS 368. Materials charge for course.

468 Studio Problems in Silkscreen. (3, repeatable to 9) Designed for intensive study in silkscreen. Emphasis is on individual research, self-guidance, thematic development, and personal aesthetic expression. Students use non-toxic acrylic inks to produce a portfolio of editioned prints. Prerequisites: ARTS 369 or permission of instructor. Materials charge for course.

(Sculpture—3D Area)
320 Sculpture I. (3) Studio work in various sculptural processes. Large scale projects may include ceramic sculpture, bronze casting, wood carving, and other media. Prerequisite: Sophomore standing or permission of instructor. Materials charge for course.

321 Sculpture II & III. (3, repeatable to 6)
Opportunities given for continued development of a personal direction in sculptural processes. Prerequisite: ARTS 320. Materials charge for course.

421 Studio Problems in Sculpture. (3, repeatable to 9) Individual problems in sculpture selected with the instructor at registration. Prerequisites: ARTS 321 or permission of instructor. Materials charge for course.
Program Offerings and Locations:

- Bachelor of Science in Biology: Macomb
- Bachelor of Science in Clinical Laboratory Science: Macomb
- Minor in Botany: Macomb
- Minor in Horticulture: Macomb
- Minor in Microbiology: Macomb
- Minor in Middle Level Science Teaching: Macomb
- Minor in Zoology: Macomb

For student learning outcomes, please see wiu.edu/provost/learningoutcomes.

Faculty: Aanenson, Afithile, Barden-Gabbei, Cooper, Engel, Holt, Hum-Musser, Jacques, Jenkins, Livingston, Meagher, Musser, Peer, Porras-Alfarro, Viadero.

Adjunct Professors: Carlson, Wallace.

Kibbe Site Manager: Gillespie.

Advisors: Sandrik-Rubio, Schultz.

Biology is one of the most basic fields of science with direct application to humans. Our continued existence on planet Earth depends in large part on how we resolve problems of a biological nature. Biology is a broadly based discipline encompassing a variety of subjects ranging from medicine to ecology. The Biology program at WIU is designed to provide students with a broad exposure to the various areas of Biology.

Majors are offered in Biology (with options in Botany, Environmental Biology, Microbiology, Zoology, Medical Sciences, and Science/Biology Teacher Education) and Clinical Laboratory Science leading to a Bachelor of Science degree. Minors are offered in Botany, Horticulture, Microbiology, Middle Level Science Teaching, and Zoology.

Training in Biology prepares one for a broad spectrum of job opportunities, including teaching, governmental or industrial laboratories, conservation agencies, or business. In addition, students become qualified to pursue graduate studies in any of several areas of study within the Biological Sciences and the health professions.

Students planning to major in the Biological Sciences should have three years of Mathematics and one year each of Biology, Physics, and Chemistry in high school. Current WIU students must be in good standing (2.0 GPA or higher) to declare a major in the Botany, Environmental Biology, Microbiology, and Zoology options. The Medical Sciences option has a minimum standard GPA of 2.75 for enrollment into the option. Any student can be admitted into the major as an incoming freshman, but to maintain enrollment in the Medical Sciences option, a student must maintain a minimum major GPA of 2.75. A probationary period of two semesters is given for any student who falls below the minimum in major GPA. This allows for students to truly understand the necessity of good grades in science courses to do well in the medical field. A student could be admitted to any of the other options if the GPA falls below a 2.75. The four year degree in Medical Sciences is designed with the pre-professional student in mind (see page 319); thus, the standards have been set closer to that of the post-graduate institutions.

GradTrac is available to Botany, Clinical Laboratory Science, Environmental Biology, Medical Sciences, Microbiology, and Zoology majors. See page 79 for information about GradTrac.

Honors Curriculum—Academically qualified students in this department are encouraged to complete an honors curriculum in University Honors, Honors in the Major, or General
Biological Sciences

Honors. All Honors students must complete the one-hour honors colloquium (G H 299). General Honors includes General Honors coursework. Honors in the Major includes honors work in the major. University Honors combines Honors in the Major and General Honors. For more information about honors curricula, see page 100 or visit the Centennial Honors College website at wiu.edu/Honors.

Degree Programs

Bachelor of Science—Biology

All students seeking the Bachelor of Science in Biology must complete I, II, and III.A, III.B, III.C, III.D, or III.E below, and the foreign language/global issues requirement for the major#. A grade of C (2.0) or better is required in introductory core courses (BOT 200, MICR 200, and ZOOL 200) before enrolling in courses for which they are prerequisites. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

In accordance with the Illinois State Board of Education licensure rule, all candidates seeking a Professional Education License or endorsement are required by Western Illinois University to obtain a grade of “C-” or better in all directed general education courses, all core courses, and all courses in the option. This rule does not supersede course prerequisite requirements in the catalog that specify a letter grade.

Please see the Teacher Education section of this catalog (p. 346) for more information about WIU’s Teacher Education Program.

I. University General Education and College of Arts and Sciences
Curriculum Requirements (p. 86) .................................................................................................................. 55 s.h.
Except Teacher Education students must complete the University General Education Curriculum Requirements—43 s.h. (p. 70)

II. Core Courses........................................................................................................................................ 24 s.h.
BIOL 330, 340†, 350, 499; BOT 200; MICR 200; ZOOL 200

III. Options of Study (select A, B, C, D, E, or F)
A. Botany
   1. Special Courses: BOT 320, 410, 430†.................................................................................................. 9 s.h.
   2. Directed Electives: Select 6 s.h. from any Botany course not previously taken; BOT 312, 425, 466, 470, 477, 478, 479, 495 .................................................................................................. 6 s.h.
   3. Any Minor ...................................................................................................................................... 16–20 s.h.
   4. Open Electives .............................................................................................................................. 0–3 s.h.
   5. Other
      a. Chemistry including organic or biochemistry ............................................................................. 12–13 s.h.
         CHEM 101, 102, 221 or CHEM 201, 202, 330 or 331
      b. MATH 128 or equivalent (see advisor)* and one of:
         MATH 133 or STAT 171 or equivalent (see advisor) ................................................................. 4–7 s.h.
      c. Choose one of the following: .................................................................................................. 6–10 s.h.
         1) GEOG 121 and METR 120
         2) GIS 202 and 405
         3) Any two of GEOL 110, 112, 113, 115
         4) One of the following sequences: PHYS 114, 115; PHYS 124, 125;
            PHYS 211, 213; PHYS 212, 214
      * Completion of MATH 133 satisfies the Mathematics requirement for this option.
   B. Microbiology
   1. Special Courses
      a. Diversity: Select one from MICR 400, 401, 423 ........................................................................ 3 s.h.
      b. Applied: Select one from BIOL 466; MICR 451, 465 ................................................................. 3 s.h.
      c. Medical: Select one from MICR 405, 434, 460, 463, 464 ................................................................ 3 s.h.
   2. Directed Electives: Select 6 s.h. from any Microbiology course not previously taken, BIOL 477, or BIOL 495 ........................................................................................................ 6 s.h.
   3. Any Minor ...................................................................................................................................... 16–20 s.h.
4. Open Electives ........................................................................................................... 0–3 s.h.
5. Other
   a. Chemistry including organic or biochemistry ............................................. 12–13 s.h.
      CHEM 101, 102, 221 or CHEM 201, 202, 330 or 331
   b. MATH 128 or equivalent (see advisor)* and one of:
      MATH 133 or STAT 171 or equivalent (see advisor) .............................. 4–7 s.h.
   c. Choose one of the following: ..................................................................... 6–10 s.h.
      1) GEOG 121 and METR 120
      2) GIS 202 and 405
      3) Any two of GEOL 110, 112, 113, 115
      4) One of the following sequences: PHYS 114, 115; PHYS 124, 125;
         PHYS 211, 213; PHYS 212, 214
   * Completion of MATH 133 satisfies the Mathematics requirement for this option.

C. Zoology
1. Special Courses: ZOOL 411 or 415 or 460, ZOOL 320 or 321, ZOOL 430†.....9 s.h.
2. Directed Electives: Select 6 s.h. from any Zoology course not previously taken; BIOL 312, 425, 444, 451, 452, 459, 466, 470, 477, 478, 480, 495.............6 s.h.
3. Any Minor.............................................................................................................. 16–20 s.h.
4. Open Electives ....................................................................................................... 0–3 s.h.
5. Other
   a. Chemistry including organic or biochemistry ............................................. 12–13 s.h.
      CHEM 101, 102, 221 or CHEM 201, 202, 330 or 331
   b. MATH 128 or equivalent (see advisor)* and one of:
      MATH 133 or STAT 171 or equivalent (see advisor) .............................. 4–7 s.h.
   c. Choose one of the following: ..................................................................... 6–10 s.h.
      1) GEOG 121 and METR 120
      2) GIS 202 and 405
      3) Any two of GEOL 110, 112, 113, 115
      4) One of the following sequences: PHYS 114, 115; PHYS 124, 125;
         PHYS 211, 213; PHYS 212, 214
   * Completion of MATH 133 satisfies the Mathematics requirement for this option.

D. Medical Sciences (Pre-Health Professionals)
1. Special Courses: BIOL 170; ZOOL 330 and 331, or ZOOL 321 and 430.....7–9 s.h.
2. Directed Electives
   a. Choose from: MICR 400, 405, 434, 460, 463, 464, 465............................... 3 s.h.
   b. Choose from: BIOL 477, 495; MICR 400, 405, 434, 460, 463, 464, 465;
      ZOOL 330, 331, 320, 321, 420, 430, 432, 460, 461................................. 6 s.h.
3. Minor in Chemistry or Psychology ............................................................... 18–21 s.h.
4. Open Electives ....................................................................................................... 0–3 s.h.
5. Other
   a. CHEM 201, 202, and 330 or 331 .............................................................. 13 s.h.
   b. MATH 133.................................................................................................. 4 s.h.
   c. STAT 171................................................................................................... 3 s.h.
   d. PHYS 124 and 125.................................................................................... 10 s.h.

E. Science/Biology—Teacher Education
1. Special Courses
   a. BIOL 281, 481, 482†; BOT 430† or ZOOL 430†................................. 10 s.h.
   b. BIOL/GEOL 181; PHYS/GEOG 182......................................................... 8 s.h.
   c. CHEM 201, 202 .................................................................................... 8 s.h.
   d. PHYS 114.............................................................................................. 4 s.h.
   e. GEOL 110.............................................................................................. 4 s.h.
2. Department Electives......................................................................................... 3 s.h.
   Select 3 s.h. from any upper-division BIOL, BOT, MICR, or ZOOL course
   not previously taken
Biological Sciences

3. Science Electives.........................................................................................0 s.h.
Additional courses in Biology (BIOL, BOT, MICR, ZOOL), Chemistry,
Geography, Geology, or Physics

4. Other
a. EDUC 239, 339, 439, 469 .................................................................3 s.h.
b. EDS 202, 301, 303 (2 s.h.), 304 (1), 305, 401 .............................13 s.h.
c. MATH 128 or higher .................................................................3 s.h.
   Not to include MATH 362, 364, or 367
d. STAT 171 or equivalent (see advisor) ........................................3 s.h.
e. ENG 366 .........................................................................................2 s.h.
f. SPED 210, 390 ...........................................................................4 s.h.
g. STCH 480 ..................................................................................12 s.h.

F. Environmental Biology
1. Department Electives...............................................................................15 s.h.
Choose 15 s.h. from any of the following courses in Ecology and Evolution,
or Biodiversity (specifically, at least one from Ecology and Evolution, and at
least one from Biodiversity; and at least one from Field; and at least one BOT
course and one ZOOL course)
a. Ecology and Evolution
   BIOL 312, 425, 426, 451, 452, 456, 458, 459, 477, 479, 495;
   MICR 451; ZOOL 325, 451
b. Biodiversity
   BOT 410, 423, 452; MICR 401, 423, 460; ZOOL 408, 410, 411, 412,
   413, 414, 415, 416, 452, 460
c. Field
   BIOL 451, 456, 480; BOT 423, 452; MICR 423; ZOOL 408, 410,
   411, 452; other field-based courses per approval of department
   chairperson
2. Minor .................................................................................................16–22 s.h.
Select one of the following minors: Agriculture; Botany; Environmental
Studies; Geographic Information Systems; Geology; Horticulture;
Microbiology; Natural Resources Conservation; Recreation, Park and
Tourism Administration; Zoology
3. Open Electives .......................................................................................0–4 s.h.
4. Other.................................................................................................22–37 s.h.
a. Chemistry .........................................................................................12–13 s.h.
   Including Organic Chemistry or Biochemistry:
   CHEM 101, 102, 221 or CHEM 201, 202, 330 or 331
b. Mathematics/Statistics .....................................................................4–6 s.h.
   MATH 128 or equivalent (see advisor) and STAT 171;
   or MATH 133
c. Choose one of the following: .........................................................6–10 s.h.
   1) GEOG 121 and METR 120
   2) GIS 202 and 405
   3) Any two of GEOL 110, 112, 113, 115
   4) One of the following sequences: PHYS 114, 115;
      PHYS 124, 125; PHYS 211, 213; PHYS 212, 214

# The foreign language/global issues graduation requirement may be fulfilled by
   successfully completing one of the following: 1) a designated foreign language requirement
   [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global
   issues course; 3) any major's discipline-specific global issues course; or 4) an approved
   Study Abroad program.
† BIOL 340 and BOT 430 fulfill the Writing Instruction in the Disciplines (WID) graduation
   requirement for the Botany option. BIOL 340 fulfills the WID graduation requirement for
   the Environmental Biology, Medical Sciences, and Microbiology options. BIOL 340 and
   ZOOL 430 fulfill the WID graduation requirement for the Zoology option. BIOL 340, BIOL
482, and BOT 430 or ZOOL 430 fulfill the WID graduation requirement for the Science/Biology—Teacher Education option.

**Bachelor of Science—Clinical Laboratory Science**

All students seeking the Bachelor of Science in Clinical Laboratory Science must complete I, II, III, IV, and V below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

**Criteria for majors to advance beyond introductory core courses:** Majors must earn a grade of C (2.0) or better in BOT 200, MICR 200, and ZOOL 200, before enrolling in courses for which they are prerequisites.

I. University General Education and College of Arts and Sciences
   
   Curriculum Requirements (p. 86).................................................................................................................... 55 s.h.

II. Core Courses .............................................................................................................................................. 18 s.h.
   
   BIOL 499; BOT 200; MICR 200, 434; ZOOL 200, 430†

III. Directed Electives
   
   From the following courses ......................................................................................................................... 6–8 s.h.
   
   BIOL 330, 340; MICR 400, 460, 463, 464; HS 250

IV. Complete Internship at an Affiliated School of Medical Technology (p. 141)........... 30 s.h.

V. Other
   
   A. CHEM 201, 202, 330, 421 or CHEM 201, 202, 331, 332...................................................................... 17 s.h.
   
   B. Choose one of the following sequences: ............................................................................................ 8–10 s.h.
      
      1. PHYS 114, 115................................................................................................................................. 8 s.h.
      2. PHYS 124, 125............................................................................................................................... 10 s.h.
      3. PHYS 211, 213............................................................................................................................... 8 s.h.
      4. PHYS 212, 214............................................................................................................................... 8 s.h.
   
   C. MATH 128 or equivalent (see advisor) ............................................................................................... 3 s.h.

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) any major’s discipline-specific global issues course; or 4) an approved Study Abroad program.

† ZOOL 430 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.

**Minors**

**Minor in Botany................................................................................................................................. 17 s.h.**

1. BOT 200.................................................................................................................................................. 4 s.h.

2. MICR 200 or ZOOL 200....................................................................................................................... 4 s.h.

3. Select one from BOT 320, 430, 410.................................................................................................... 3 s.h.

4. Select 6 s.h. from BIOL 458, 470; BOT 210, 329, 423, 452, 462, 481..... 6 s.h.

**Minor in Horticulture ............................................................................................................................ 18 s.h.**

See Interdisciplinary Minors (p. 236).

**Minor in Microbiology.......................................................................................................................... 17 s.h.**

1. MICR 200 ................................................................................................................................................ 4 s.h.

2. BOT 200 or ZOOL 200.......................................................................................................................... 4 s.h.

3. Select one from MICR 400, 401, 423................................................................................................. 3 s.h.

4. Select one from BIOL 466; MICR 451, 465.................................................................................... 3 s.h.

5. Select one from MICR 405, 434, 460, 463, 464.............................................................................. 3 s.h.
Minor in Middle Level Science Teaching .............................................................. 24 s.h.
1. BIOL 101; CHEM 101; GEOL 110; PHYS 114; SCED 465 .......................... 19 s.h.
2. Take 5 additional semester hours from one or more of the following areas; at least one course must be a lab course: ........................................... 5 s.h.
   a. Biology (excluding BIOL 100 and 170), Botany, Microbiology, and/or Zoology
   b. Chemistry (excluding CHEM 100 and 150)
   c. Geography (excluding GEOG 100, 110, 251, 341, 352, 443, 445, 448, 450, and 466)
   d. Geology (excluding GEOL 112)
   e. Physics (excluding PHYS 100, 101, and 124; also, students may not count both PHYS 115 and 125)

   **Note:** This minor is offered in conjunction with the major in Middle Level Education. By itself, this minor will not be sufficient for education endorsement purposes.

Minor in Zoology ........................................................................................................ 17 s.h.
1. ZOOL 200 ........................................................................................................ 4 s.h.
2. BOT 200 or MICR 200 .................................................................................. 4 s.h.
3. Select one from ZOOL 320, 321, 411, 415, 430, 460 ................................. 3 s.h.

Honors in Biology

Students who complete the requirements for Honors in Biology will receive recognition on their official transcripts. To qualify for Honors in Biology, students must be accepted into the Centennial Honors College, complete all the requirements for a Biology major with an option in Botany, Microbiology, Zoology, Medical Sciences, or Environmental Biology, satisfy requirements in the cognate areas, and complete the following requirements:

1. 2 s.h. of research-oriented Honors Seminars (BIOL 470H) taken as a junior;
2. 3 s.h. of Honors Research (BIOL 477H) under the supervision of a faculty advisor during the senior year;
3. 3 s.h. of Honors Thesis (BIOL 478), which involves writing a thesis under the direction of a research advisor based on research completed while enrolled in 477H. Satisfactory defense of the thesis before the advisor and departmental Honors Committee is required for credit;
4. 6 s.h. of General Honors courses and 1 s.h. in G H 299 Honors Colloquium;
5. An overall 3.50 cumulative grade point average as well as a 3.50 average in all honors courses at the time of graduation.

Proficiency Examinations

Students may take proficiency examinations for credit in BIOL 100, 101; BOT 200; and ZOOL 200. These examinations are prepared by the faculty of the department, and are generally administered during the first week of the semester. Students must register to take exams beforehand with the Biological Sciences secretary [Waggoner Hall 372, telephone (309) 298-1546.] The department will also grant credit for Biology proficiency examinations administered by The College Board; AP (Advanced Placement) score ≥ 3, credit = BOT 200 & ZOOL 200; CLEP (College-Level Examination Program) score ≥ 50, credit = BIOL 100; CLEP score ≥ 60, credit = BOT 200 & ZOOL 200. Credit is given for the general Biology course(s) for which a satisfactory examination score has been achieved, and the student may enroll in courses for which the course in question is a prerequisite.
Alice L. Kibbe Life Science Station

The Department of Biological Sciences manages a field station for scientific and instructional use located 45 miles west of Macomb on the Mississippi River. The field station consists of three units, 415 acres owned by the University, 697 acres owned by The Nature Conservancy which serves as a wintering roosting area for Bald Eagles, and 587 acres owned by the Illinois Department of Natural Resources which is primarily river floodplain habitat and a designated nature preserve area. The field station facilities include the resident manager's house, two large storage buildings for boats and maintenance equipment, and a teaching/resident facility. From three to five field-oriented courses are offered each summer at the field station. For more information, contact Dr. Sean E. Jenkins, Field Station Director, Department of Biological Sciences, Waggoner Hall 215, telephone (309) 298-2045.

Course Descriptions

BIOLOGY (BIOL)

Laboratories are required in most courses in the department. Students must participate in all required course activities including field trips as specified by the instructor.

100 Biological Concepts. (4) (General Education/Natural Sciences) A laboratory course recommended for nonscience majors, relating reproduction, heredity, evolution, ecology, and behavior to human life and the problems of society. This General Education curriculum course does not count toward a major or minor in Biology. IAI: L1 900L.

101 Biological World. (4) (General Education/Natural Sciences) A laboratory course recommended for nonscience majors, dealing with the structure and function of the human body and with selected aspects of microbes, plants, and animals and how they affect humans. This General Education curriculum course does not count toward a major or minor in Biology.

170 Introduction to Health Careers. (1) Career opportunities in the health professions will be discussed. Vertical and lateral mobilities and education requirements will be stressed.

181 (Cross-listed with GEOL 181) Integrated Science I. (4) (General Education/Natural Sciences) A laboratory course in interdisciplinary science with an emphasis on the nature and evolution of life and Earth. Topics include ecology, natural resources, formation of Earth materials, Earth processes, nutrient cycling, cell biology, genetics, and evolution. (Integrated Science II is PHYS/GEOL 182) Not open to students with credit in GEOL 181. Prerequisite: MATH 099N.

190 Introduction to Biology Research. (1–3, repeatable to 6) Introduction to biological research, which may include introduction to experimental design, basic data collection techniques, scientific writing, and ethics of biological research. Arrange research project with faculty member and department chair before registration. Course recommended for freshmen and sophomores. Maximum of 3 s.h. may be applied to major or minor. Prerequisite: permission of faculty member and department chairperson.

204 Human Biology. (4) (General Education/Natural Sciences) An introduction to basic human biology including human development, reproduction, aging, genetics, evolution, and ecology. Laboratory experiments include online simulations and/or purchased kits for homework. This course will not count toward a Biology major.

281 Introduction to Science Teaching. (1) Designed for students interested in teaching science. Through this course, students will gain experience with lab safety, with lesson planning, and in field observations. Prerequisite: at least one introductory level science course with a grade of B or higher OR permission of the instructor.

312 Evolution. (3) A detailed study of the mechanisms of evolution. Prerequisites: BOT 200 (C grade or better) and ZOOL 200 (C grade or better).

330 Cell and Molecular Biology. (4) Morphological and functional aspects of the cell. Lecture and lab will emphasize cell structure and how this relates to physiological, biochemical, and molecular processes. Prerequisites: BOT 200 (C grade or better), MICR 200 (C grade or better), and ZOOL 200 (C grade or better).

340 Genetics and Evolutionary Biology. (4) Lecture and lab emphasizing transmission genetics, genetic mapping, and the genetic processes underlying evolutionary processes. Writing Instruction in the Disciplines (WID) course. Prerequisites: BOT 200 (C grade or better), MICR 200 (C grade or better), and ZOOL 200 (C grade or better).

350 General Ecology. (4) This course examines the causes of patterns in the abundance and distribution of organisms at the population, community, ecosystem, landscape, and global levels. The relationships of ecological principles to environmental issues will be examined. Prerequisites: Two of the following—BOT 200 (C grade or better), MICR 200 (C grade or better), ZOOL 200 (C grade or better).

418 (Cross-listed with CHEM/GEOL/PHYS 418) Introduction to Scanning Electron Microscopy. (4) The course focuses on capabilities and operation of scanning electron microscopes with emphasis on beam-material interactions, sample preparation, image acquisition and analysis, and X-ray measurements with applications in Biology, Chemistry, Geology, and Physics. Not open to students with credit in CHEM/GEOL/PHYS 418. Prerequisites: BOT 200 (C grade or better), or CHEM 202, or MICR 200 (C grade or better), or PHYS 125, or PHYS 212, or ZOOL 200 (C grade or better), or consent of instructor. 3 hrs. lect.; 2 hrs. lab.

425 Conservation Biology. (3) Biology of small, endangered populations. Genetic and ecological consequences of small population size, reserve design, and intervention to reduce extinction risk. Prerequisites: BOT 200 (C grade or better), MICR 200 (C grade or better), and ZOOL 200 (C grade or better); BIOL 340 or 350, or permission of the instructor.

426 (Cross-listed with GEOG 426) Conservation and Management of Natural Resources. (3) Problems in the conservation and management of natural resources including soil, water, rangeland, forest, wildlife, air, and energy resources. Special attention to resource problems of the United States. Not open to students with credit in GEOG 426. Prerequisites: GEOG 121 and METR 120, or consent of instructor.
435 Radiation Biology. (3) Topics vary and may include: molecular genetics, regulation of protein synthesis, mutagenesis, gametogenesis, and genetic control of differentiation and morphogenesis. Prerequisites: BIOL 340, one year of Chemistry and Physics.

451 Ecological Techniques. (3) Techniques and analytical methods used to examine terrestrial and aquatic communities are studied, including data analysis specific to those techniques. Includes field experience. Prerequisites: BOT 200 (C grade or better) and ZOOL 200 (C grade or better) or permission of the instructor.

452 Biological Applications of GIS. (3) This course deals with biological problems examined using data acquired through analytical and geographical information systems (GIS) and global positioning systems (GPS). Prerequisites: One Biology course and either GIS 201 or 202.

456 Fire/Disurbance Ecology. (3) This course examines the role of fire and other disturbances on the distribution and ecology of plants, animals, and microbes in their natural environments. Opportunity for students to work with the Nature Conservancy's prescribed burn and Federal basic wildland firefighter's certifications will be available. Prerequisites: BOT 200 (C grade or better) and ZOOL 200 (C grade or better), or permission of the instructor.

458 Plant-Animal Interactions. (3) Explores the co-evolutionary relationships of plants and animals. Lecture topics will include herbivory, pollination biology, and dispersal. Lab emphasis will be placed on research experiments that utilize chemical, behavioral, and molecular techniques, and review of the scientific literature. Prerequisite: BIOL 350, BOT 200 (C grade or better), ZOOL 200 (C grade or better), or permission of instructor.

459 (Cross-listed with GEOG 459) Biogeography. (3) Study of the geographical distributions of organisms, the evolutionary and ecological processes underlying the patterns of distribution, and the role of biogeography in biological conservation. Not open to students with credit in GEOG 459. Prerequisites: BOT 200 (C grade or better) and ZOOL 200 (C grade or better), or consent of instructor.

466 Biotechnology. (3) Issues covering the genetic and cellular manipulation of organisms to produce natural products and processes that are of major economic, environmental, and social importance will be examined. Laboratory projects involve DNA manipulation, reproduction of bacteria, Prerequisite: MICR 200 (C grade or better), and one of the following: BIOL 330 or BIOL 340, or permission of the instructor.

470 Seminar. (1, repeatable to 2) Seminar for senior Biology majors.

476 Special Topics. (3, repeatable for different topics to 9 s.h.) This course explores a topic in biology of current interest. See course schedule for description. Only 6 s.h. may count toward a major. Prerequisites: BOT 200 (C grade or better), MICR 200 (C grade or better), and ZOOL 200 (C grade or better).

477 Research Experience in Biology. (1–12, repeatable to 12) Research experience with a Biological Sciences faculty member. A final report and/or seminar may be required. Maximum of 3 s.h. may be applied to major or minor. Prerequisites: sophomore standing, BOT 200 (C grade or better), MICR 200 (C grade or better), and ZOOL 200 (C grade or better). Arrange research project with faculty member and department chair before registration.

478 Honors Thesis in Biological Sciences. (3) A thesis prepared under the direction of one or more faculty members. Satisfactory oral defense of the thesis required before credit is given for course. Prerequisites: Honors major in Biology with senior standing; completion of BOT/ZOOL/MICR 477H.

479 Tropical Ecology. (3) Introduction to tropical ecology. This course may include travel to a tropical site. Students will be responsible for trip expenses. Prerequisite: BOT 200 (C grade or better), ZOOL 200 (C grade or better), and permission of instructor.

480 Field Natural History. (3) A course designed to introduce students to local ecosystems and the species that exist within them. The course will emphasize species identification, natural history, and interpretation. Prerequisite: C or better in one of the following: BIOL 100, BOT 200, RPTA 111, ZOOL 200; or permission of instructor.

482 (Cross-listed with CHEM 482 and PHYS 482) Science in Context. (3) Interdisciplinary course for science majors in which students explore science through inquiry, the unifying principles of science, and the role of social contexts and ethics in science. Writing Instruction in the Disciplines (WID) course. Not open to students with credit in CHEM 482 or PHYS 482. Prerequisites: senior standing in one of the following science majors—Biology, Chemistry, Physics, Geology, or Meteorology, ENG 280; or permission of instructor.

495 Internship in Biology. (1–12, repeatable to 12) Practical experience in the Biological Sciences with an approved employer. 40 contact hours per credit hour and a written report are required. Maximum of 3 s.h. may be applied to major or minor. Prerequisites: 60 s.h. and permission of the department chair. Graded S/U only.

499 Assessment of Biological Knowledge. (0) Students pursuing a bachelor's degree through the Biological Sciences Department are required to take this course in their last semester. Students will complete an assessment on their knowledge of biological concepts. Prerequisites: BOT 200, MICR 200, and ZOOL 200; senior standing in the Department; permission of the instructor. Graded S/U only.

**BIOLOGICAL SCIENCES EDUCATION**

239 Pre-Teacher Education Program Admittance. (0, repeatable with no maximum) Students pursuing teacher licensure are required to take this course in the semester they plan to be fully accepted in the Teacher Education Program (TEP). Students must meet established departmental criteria for admittance to TEP. Graded S/U.

339 Pre-Student Teaching Clearance. (0) Students pursuing teacher licensure are required to take this course prior to their student teaching semester. Students must meet established criteria for departmental clearance to student teach. Prerequisites: Full admittance to the Teacher Education Program (TEP). Graded S/U.

439 Methods of Teaching Middle and High School Science. (3) Study of secondary teaching methods (Grades 6–12) from the standpoints of theory and practice, curriculum objectives and standard implementation, materials, and evaluation and assessment. Included are demonstrations, discussions, lectures, classroom participation, and field observations. Prerequisites: BIOG/Educ 181 or GEOG/PHYS 182, BIOL 281, and EDS 301 (all with C- grade or better). Corequisite: EDS 303.

469 Pre-Licensure Clearance. (0) Students pursuing teacher licensure are required to take this course in the semester they student teach. Students must meet criteria established by the department in order to be recommended for licensure. Prerequisite: departmental clearance to student teach. Corequisite: Student Teaching (STCH). Graded S/U.

480 Student Teaching. See STCH 480.

481 Techniques and Issues in Science Teaching. (3) An interdisciplinary course wherein preservice middle and high school science teachers develop techniques
and resources appropriate for their instructional program, deepen understanding of scientific concepts, and examine lab safety. Requires involvement in several professional development activities outside of class time. Prerequisites: EDUC 439 and ENG 280 or equivalent. Corequisite: BIOL 482.

**BOTANY (BOT)**

200 Introduction to Plant Biology. (4) (General Education/Natural Sciences) A lecture and laboratory course recommended for science majors and minors, emphasizing basic principles in plant biology including scientific inquiry, cell biology, genetics, ecology, evolution, and diversity in plant anatomy and physiology.

210 Local Flora. (3) Identification, ecology, and distribution of common trees, shrubs, flowers, and other plants of Illinois.

320 Plant Anatomy. (3) Structure and development of vascular plant organs. Prerequisites: BOT 200 (C grade or better) and ZOOL 200 (C grade or better).

329 Plant Structure & Function. (3) A study of plant structure and function including photosynthesis, photoperiodism, tropisms, water and mineral uptake and transport, and an understanding of the angiosperm life cycle. Closed to students who have taken BOT 320 or BOT 430. Prerequisite: BIOL 100 or HORT 180 or ZOOL 200 (C grade or better) or consent of instructor.

357 (Cross-listed with HORT 357) Cannabis Biology and Production. (3) Lecture/lab/field course on the biology and agricultural use of Cannabis sativa (industrial hemp) including cannabis anatomy, physiology, breeding, propagation methods, management techniques, reintroduction into farming crop rotation, commercial production strategies, post-harvest processing, and product applications. Not open to students with credit in HORT 357. Prerequisite: AGRN 176, BOT 200, or HORT 180; BOT 329 or permission of instructor. 2 hrs. lect.; 2 hrs. lab.

410 Plant Systematics. (3) The basic systems, principles, and methods of plant systematics; the identification and classification of Illinois vascular plants. Prerequisites: BOT 200 (C grade or better) and ZOOL 200 (C grade or better).

423 Phycology. (3) Morphology, taxonomy, physiology, genetics, and ecology of the algae, particularly freshwater forms. May not be taken by students who have completed MICR 423; Prerequisites: BOT 200 (C grade or better) and ZOOL 200 (C grade or better).

430 Plant Physiology. (3) Physiological processes of plants as an interaction of structure, chemistry, physical characteristics, and environment. Writing Instruction in the Disciplines (WID) course. Prerequisites: BOT 200 (C grade or better); ZOOL 200 (C grade or better); one year of Chemistry, ENG 280.

452 Freshwater Biology. (3) Common freshwater organisms and some of their relationships to one another, to their environment, and to people. May not be taken by students who have completed ZOOL 452. Prerequisites: BOT 200 (C grade or better) and ZOOL 200 (C grade or better).

463 (Cross-listed with ANTH 463) Ethnobotany. (4) (Global Issues) A survey of how indigenous people use and classify plants in comparison to modern, scientific principles of botany and plant chemistry, and the use of traditional knowledge by modern science. May require field work travel at student expense. Not open to students with credit in ANTH 463. Prerequisites: BIOL 100, 101; BOT 200 (C grade or better); ZOOL 200 (C grade or better); ANTH 110 or SOC 100; or permission of instructor.

476 Special Topics. (3–9, repeatable for different topics to 9) This course explores a topic in botany of current interest. See course schedule for description. Only 6 s.h. may count toward major. Prerequisites: BOT 200 (C grade or better) and ZOOL 200 (C grade or better).

**481 Experimental Plant Biology.** (3) A laboratory oriented course providing experience in designing, implementing, analyzing, and reporting botanically-oriented experiments. Field experiments, greenhouse experiments, and laboratory experiments will be conducted, spanning a range of investigations from plant physiology to community ecology. Prerequisites: BOT 200 (C grade or better) and ZOOL 200 (C grade or better).

**MICROBIOLOGY (MICR)**

200 Introductory Microbiology. (4) (General Education/Natural Sciences) A lecture and laboratory course recommended for science majors and minors, providing an introduction to microorganisms with emphasis on the biology, methodology, and applied aspect of viruses, bacteria, fungi, algae, protozoa, and slime molds.

400 Bacteriology. (3) Cultural, morphologic, and metabolic properties and methods of isolation of bacteria as related to home and community life, industry, medicine, and agriculture. Prerequisites: one year of Chemistry; BOT 200 (C grade or better), MICR 200 (C grade or better), and ZOOL 200 (C grade or better).

401 Mycology. (3) An introduction to the biology of the fungi emphasizing their morphology, ecology, physiology, and applied aspects, as well as laboratory techniques used in isolation, culture, and identification. Prerequisites: BOT 200 (C grade or better), MICR 200 (C grade or better), and ZOOL 200 (C grade or better), or permission of instructor.

405 Virology. (3) A study of the biological characteristics of animal, plant, and bacterial viruses and the viruses which cause disease. Prerequisites: BOT 200 (C grade or better), MICR 200 (C grade or better), and ZOOL 200 (C grade or better).

423 Phycology. (3) Morphology, taxonomy, physiology, genetics, and ecology of the algae, particularly freshwater forms. May not be taken by students who have completed MICR 423; Prerequisites: BOT 200 (C grade or better) and ZOOL 200 (C grade or better).

434 Immunology. (3) A study of antigens and antibodies, the immune response and immunity, immunologic testing, allergy and hypersensitivity, transplantation, autoimmune diseases, and cancer immunology. Laboratory includes selected immunologic techniques. Prerequisites: BOT 200 (C grade or better), MICR 200 (C grade or better), ZOOL 200 (C grade or better); one year of Chemistry.

451 Environmental Microbiology. (3) An exploration of how microorganisms interact in the environment and how this knowledge of microbiology can be used to address environmental issues such as ecosystem health, pollution bioremediation, pathogen transport, sustainable agriculture, water quality, and wastewater treatment. Writing Instruction in the Disciplines (WID) course. Prerequisites: BOT 200 (C grade or better), MICR 200 (C grade or better), ZOOL 200 (C grade or better), and ENG 280; or permission of instructor.

460 Parasitology. (3) Ecology and evolutionary relationships of parasitic eukaryotes. Emphasis on parasites of humans. May not be taken by students who have completed ZOOL 460. Prerequisites: BOT 200 (C grade or better) and ZOOL 200 (C grade or better).

463 Pathogenic Bacteriology. (3) The study of bacteria, rickettsia, mycoplasma, and chlamydia which cause disease in humans. Prerequisites: BOT 200 (C grade or better), MICR 200 (C grade or better), and ZOOL 200 (C grade or better).
Prerequisites: BOT 200 (C grade or better) and ZOOL 200 (C grade or better).

465 Industrial and Fermentation Microbiology. (3) Examines the commercial use and large-scale cultivation of microorganisms to produce natural products and processes of major economic, environmental, and social importance. Laboratory exercises in microbial fermentation processes. Prerequisites: BOT 200 (C grade or better), MICR 200 (C grade or better), and ZOOL 200 (C grade or better).

476 Special Topics. (3, repeatable for different topics to 9 s.h.) This course explores a topic in microbiology of current interest. See course schedule for description. Only 6 s.h. may count toward a major. Prerequisites: BOT 200 (C grade or better), MICR 200 (C grade or better), and ZOOL 200 (C grade or better).

ZOOL (ZOOLOGY)

200 Introduction to Animal Biology. (4) (General Education/Natural Sciences) A lecture and laboratory course recommended for science majors and minors, emphasizing basic principles in animal biology, including scientific inquiry, cell biology, genetics, ecology, evolution, and diversity in animal anatomy and physiology.

320 Vertebrate Embryology. (3) Development of the vertebrate body and its organs. Provides a basis for understanding adult anatomy. Both lecture and laboratory are descriptive. Prerequisites: BOT 200 (C grade or better) and ZOOL 200 (C grade or better).

321 Comparative Anatomy. (3) Anatomy of the vertebrates studied from the viewpoint of their evolutionary history. Prerequisites: BOT 200 (C grade or better) and ZOOL 200 (C grade or better); junior standing or consent of the instructor.

325 Vertebrate Evolution. (3) The evolutionary history of the vertebrates, emphasizing macroevolutionary trends in vertebrate diversity and skeletal functional morphology. Prerequisites: BOT 200 (C grade or better) and ZOOL 200 (C grade or better) or GEO 112 or ANTH 111.

330 Human Anatomy and Physiology I. (4) An integrated study of the organ systems of the normal human body. Subjects covered include cells, tissues, skeletal, muscular, nervous, endocrine, reproductive, and excretory systems. Laboratory includes cat dissection and appropriate physiological experiments. Prerequisite: BIOL 101 (C grade or better) or ZOOL 200 (C grade or better) or MICR 200 (C grade or better), or permission of the instructor.

331 Human Anatomy and Physiology II. (4) A continuation of ZOOL 330. The topics included are the endocrine, respiratory, cardiovascular, digestive, metabolic, urinary, and reproductive systems. Prerequisite: ZOOL 330.

408 Field Ornithology. (3) A course devoted to the study of birds, emphasizing study techniques used in natural environments. Topics covered will include reproductive behavior, ecology, communication, systematics, and conservation. Prerequisites: BOT 200 (C grade or better) and ZOOL 200 (C grade or better).

410 Ornithology. (3) Identification, biology, ecology, and life histories of birds. Prerequisites: BOT 200 (C grade or better) and ZOOL 200 (C grade or better). Frequent field trips.

411 Entomology. (3) Principles of entomology, including classification, general biology, and morphology. Prerequisites: BOT 200 (C grade or better) and ZOOL 200 (C grade or better).

412 Mammalogy. (3) Identification, classification, distribution, and life histories of mammals. Prerequisites: BOT 200 (C grade or better) and ZOOL 200 (C grade or better).

413 Herpetology. (3) Identification, classification, distribution, and biology of reptiles and amphibians. Prerequisites: BOT 200 (C grade or better) and ZOOL 200 (C grade or better).

414 Ichthyology. (3) Identification, classification, distribution, and life histories of fishes. Prerequisites: BOT 200 (C grade or better) and ZOOL 200 (C grade or better). Estimate of field trip costs: $10.00. Outside field trips required.

415 Invertebrate Zoology. (3) A study of invertebrate form and function as it relates to taxonomy, evolution, ecology, behavior, and physiology. Laboratory will involve comparative experimental and observational approaches. Prerequisite: ZOOL 200 (C grade or better).

416 Marine Mammalogy. (3) Survey of marine mammals with emphasis on taxonomy, anatomy, physiology, behavior, ecology, and conservation. Laboratory involves working with small marine mammals at the Shedd Aquarium in Chicago. Prerequisites: BOT 200 (C grade or better) and ZOOL 200 (C grade or better); senior standing in Biology or a related major.

420 Biology of Aging. (3) Introduction to the nature and theories of aging. A study of the processes involved at the molecular, cellular, organ, and organismal levels of development and the changes that occur with time. Relationships between aging and immunity, neoplasia, and systems integration are explored. Emphasis on humans. Prerequisites: BIOL 100 and 101 or BOT 200 (C grade or better) and ZOOL 200 (C grade or better); one year of Chemistry; ENG 280.

430 Animal Physiology. (3) Systemic physiology, concerning the functions of nervous, muscular, respiratory, digestive, excretory, reproductive, and endocrine systems. Writing Instruction in the Disciplines (WID) course. Prerequisites: BOT 200 (C grade or better); ZOOL 200 (C grade or better); one year of Chemistry; ENG 280.

432 Neurobiology. (3) Provides a quantitative understanding of neurophysiology in the context of neural systems that underlie all behavior. Laboratory uses animal preparations and computer models. Prerequisites: MATH 123 (or higher) with a grade of C or better, and either BIOL 100 (or higher) or PSY 343 with a grade of C or better; and minimum of junior standing; or permission of instructor.

451 Advanced Topics in Animal Ecology. (3) Relationships of animals to their environment. Writing Instruction in the Disciplines (WID) course. Prerequisites: BIOL 350, ZOOL 200 (C grade or better), and ENG 280.

452 Freshwater Biology. (3) Common freshwater organisms and some of their relationships to one another, to their environment, and to man. May not be taken by students who have completed BOT 452. Prerequisites: BOT 200 (C grade or better) and ZOOL 200 (C grade or better).

455 Fisheries Techniques. (3) A field course in professional fisheries techniques, including native fish collection and identification, data collection, analysis, and presentation. Prerequisites: BIOL 350 (C grade or better), BOT 200 (C grade or better), and ZOOL 200 (C grade or better); or permission of the instructor.

460 Parasitology. (3) Ecology and evolutionary relationships of parasitic eukaryotes. Emphasis on parasites of humans. May not be taken by students who have completed MICR 460. Prerequisites: BOT 200 (C grade or better) and ZOOL 200 (C grade or better).

461 (Cross-listed with NURS 461) Pathophysiology. (4) Alteration in physiology, pathogenesis of structure and function of the human body leading to disease, and manifestations of disease states are discussed.
In addition, body system interaction is analyzed in maintaining physiological homeostasis during disease/ altered states. Not open to students with credit in NURS 461. Prerequisites: MICR 200 (C grade or better), ZOOL 330 and ZOOL 331; or consent of instructor.

476 Special Topics. (3–9, repeatable for different topics to 9) This course explores a topic in zoology of current interest. See course schedule for description. Only 6 s.h may count toward major. Prerequisites: BOT 200 (C grade or better) and ZOOL 200 (C grade or better).

Clinical Laboratory Science (CLS): Clinical Topics in Clinical Laboratory Science
Hospital-based lecture and clinical laboratory courses in an accredited and affiliated school of medical technology. Students will register for 15 s.h. for Fall semester and 15 s.h. for Spring semester. Total hours approximately 30–32 s.h.

490 Clinical Chemistry I. (1–6, repeatable to maximum) Theory and practice of analytical biochemistry as applied to pathologic states, methodology, and instrumentation. Statistics as applied to reagent preparation, result determination, and quality control. Prerequisite: acceptance for clinical education into an affiliated school of medical technology.

491 Clinical Chemistry II. (1–6, repeatable to maximum) Theory and practice of analytical biochemistry as applied to specialized tests for drugs, endocrine function, and urine and body fluid analysis. Prerequisite: acceptance for clinical education into an affiliated school of medical technology.

492 Clinical Microbiology I. (1–6, repeatable to maximum) Theory and practice of the isolation and identification of pathogenic bacteria in clinical specimens through cultures, morphology, biochemical, and serological reactions and their drug susceptibility. Prerequisite: acceptance for clinical education into an affiliated school of medical technology.

493 Clinical Microbiology II. (1–6, repeatable to maximum) Theory and practice of the isolation and identification of fungi, parasites, and viruses utilizing morphological, cultural, biochemical, and serological methods. Prerequisite: acceptance for clinical education into an affiliated school of medical technology.

494 Clinical Immunology. (1–5, repeatable to maximum) The study of principles of the protective and adverse aspects of cellular and humoral responses. Performance of test procedures based on antigen-antibody reactions. Prerequisite: acceptance for clinical education into an affiliated school of medical technology.

495 Clinical Homeostasis. (1–4, repeatable to maximum) The study of platelets, vascular, coagulation, and fibrinolytic systems related to the disease state and therapeutic monitoring. Prerequisite: acceptance for clinical education into an affiliated school of medical technology.

496 Clinical Hematology. (1–6, repeatable to maximum) The study of the formed elements of the blood and basic morphological changes due to diseases. Prerequisite: acceptance for clinical education into an affiliated school of medical technology.

497 Clinical Immunohematology. (1–5, repeatable to maximum) Theory and practice of immunohematology, including blood groups, blood transfusion, and component preparation. Prerequisite: acceptance for clinical education into an affiliated school of medical technology.

499 Selected Topics. (1–4, repeatable to maximum) Selected topics of professional significance which may include management, pathology, medico-legal aspects, and basic teaching principles. Prerequisite: acceptance for clinical education into an affiliated school of medical technology.

Biological Sciences
Interim Chairperson: Ms. Tammy L. Killian  
Office: Sallee Hall 306  
Telephone: (309) 298-2888  
E-mail: TL-Killian@wiu.edu  
Website: wiu.edu/bcj

Program Offerings and Locations:
- Bachelor of Arts in Broadcasting and Journalism: Macomb
- Minor in Advertising and Public Relations: Macomb
- Minor in Broadcasting and Journalism: Macomb
- Minor in Sports Broadcasting: Macomb

For student learning outcomes, please see wiu.edu/provost/learningoutcomes.

Faculty: Go, Hoon, Parker, Simmons, Tang.

GradTrac is available to Broadcasting and Journalism majors. See page 79 for information about GradTrac.

Honors Curriculum—Academically qualified students in this department are encouraged to complete an honors curriculum in University Honors, Honors in the Major, or General Honors. All Honors students must complete the one-hour honors colloquium (G H 299). General Honors includes General Honors coursework. Honors in the Major includes honors work in the major. University Honors combines Honors in the Major and General Honors. For more information about honors curricula, see page 100 or visit the Centennial Honors College website at wiu.edu/Honors.

Integrated Baccalaureate and Master’s Degree Program—An integrated baccalaureate and master’s degree program is available for the Bachelor of Arts in Broadcasting and Journalism (Sports Broadcasting option): Master of Science in Sport Management. An integrated degree program provides the opportunity for outstanding undergraduates to earn both degrees in five years. Please refer to the Graduate Studies catalog for details about the integrated program.

Degree Programs

Bachelor of Arts—Broadcasting and Journalism

All students seeking the Bachelor of Arts in Broadcasting and Journalism must complete I, II, III, IV, and V below, and the foreign language/global issues requirement for the major#.

The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

I. University General Education Curriculum (p. 70) ....................................................43 s.h.

II. Core Courses ................................................................................................................15 s.h.
    BC&J 100, 101, 200†, 201, 400†

III. Options of Study (Select A, B, C, or D) ...............................................................24 s.h.
    A. Advertising and Public Relations
        1. Option Courses .........................................................................................12 s.h.
            BC&J 340, 341; MKTG 327, 331
        2. Directed Electives
            a. One of the following sequences: .........................................................9 s.h.
                i. Advertising: BC&J 342, 343, 344†
                ii. Public Relations: BC&J 345, 346†, 456
            b. Any BC&J 300- or 400-level elective course ...............................3 s.h.

    B. Broadcast Production
        1. Option Courses ..........................................................................................21 s.h.
            BC&J 112, 212, 311, 312, 331, 410, 450

Note: Students enrolled in this option may not minor in Advertising and Public Relations

---

142
2. Directed Elective ................................................................................. 3 s.h.
   Any BC&J 300- or 400-level elective course
C. Multimedia Journalism
   1. Option Courses ........................................................................... 21 s.h.
      BC&J 230, 330†, 331, 332, 430, 431, 432
   2. Directed Elective ........................................................................... 3 s.h.
      Any BC&J 300- or 400-level elective course
D. Sports Broadcasting
   1. Option Courses ........................................................................... 21 s.h.
      BC&J 120, 212, 220, 221, 320, 321, 420
   2. Directed Elective ........................................................................... 3 s.h.
      Any BC&J 300- or 400-level elective course

IV. Any Approved Minor ........................................................................... 16–21 s.h.
V. Open Electives ................................................................................... 17–22 s.h.

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) a Broadcasting and Journalism (BC&J) global issues course; or 4) an approved Study Abroad program.
† BC&J 200 and 400 and either BC&J 344 or 346 fulfill the Writing Instruction in the Disciplines (WID) graduation requirement for the Advertising and Public Relations option. BC&J 200 and 400 fulfill the Writing Instruction in the Disciplines (WID) graduation requirement for the Broadcast Production and Sports Broadcasting options. BC&J 200 and 330 and 400 fulfill the Writing Instruction in the Disciplines (WID) graduation requirement for the Multimedia Journalism option

Minors

Minor in Advertising and Public Relations ........................................... 18 s.h.
   2. Select three of the following courses:
      BC&J 342, 343, 344, 345, 346, 451, 456 ........................................ 9 s.h.
   Note: Students minoring in Advertising and Public Relations may enroll in BC&J 451 for 3 s.h. only.
   Note: This minor is not open to students who are enrolled in the Advertising and Public Relations option of the Broadcasting and Journalism major.

Minor in Broadcasting and Journalism ............................................... 18 s.h.
   1. Core Courses: BC&J 100, 101 .................................................... 6 s.h.
   2. Directed Electives ................................................................. 12 s.h.
      a. Select either BC&J 200 or 201
      b. BC&J Electives, two of which must be at the 300-400 level

Minor in Sports Broadcasting .......................................................... 18 s.h.
   BC&J 120, 220, 221, 320, 321, 420 .................................................. 18 s.h.
   Note: This minor is not open to students who are enrolled in the Sports Broadcasting option of the Broadcasting and Journalism major.

Course Descriptions

BROADCASTING AND JOURNALISM (BC&J)

Applied Studies (Practica). (1 s.h./semester, repeatable to a maximum of 10 semesters)
Instruction in and practical application of sports broadcasting announcing, production, or reporting techniques for various sports. Prerequisites: Written consent of instructor. Enrollment in upper division courses (300 level) requires a grade of C or better in the lower division prerequisite course (200 level) having the same title.

260/360 (Formerly BC 201/301) Football Announcing
261/361 (Formerly BC 203/303) Basketball Announcing
262/362 (Formerly BC 204/304) Soccer Announcing
263/363 (Formerly BC 205/305) Volleyball Announcing
264/364 (Formerly BC 206/306) Baseball Announcing
Broadcasting and Journalism

265/365 (Formerly BC 207/307) Softball Announcing
266/366 (Formerly BC 208/308) Radio Sports Talk
267/367 (Formerly BC 209/309) Board Operations for Sports
268/368 (Formerly BC 211/311) Football Production
269/369 (Formerly BC 213/313) Basketball Production
270/370 (Formerly BC 214/314) Soccer Production
271/371 (Formerly BC 216/316) Volleyball Production
272/372 (Formerly BC 217/317) Baseball Production
273/373 (Formerly BC 218/318) Softball Production
274/374 (Formerly BC 219/319) Interactive Media

276/376 (Formerly BC 220/320) Sports Reporting
100 (Formerly BC 100) Introduction to Mass Communication. (3) Introduction to the historical, programming, physical, legal, social, and economic aspects of the mass media.

101 (Formerly BC 142) Digital Media Production I. (3) Introduction to digital media production including electronic field production (EFP) and studio camera theory and operation, and editing with an industry-relevant nonlinear digital editing platform. Not open to students who have completed BC 261.

112 (Formerly BC 141) Audio Production I. (3) Introduction to audio production techniques, from simple voice and field recording to multitrack mixdown procedures. Content produced will be suitable for broadcast and internet distribution. Not open to students who have completed BC 250.

120 (Formerly BC 136) Sports, Media and Society. (3) A critical analysis of issues in sports media and the history of sports broadcasting in American culture. Examines the ethics, literature, racial and gender issues, and the business of sports broadcasting.

122 (Formerly BC 122) (Cross-listed with ARTS/GCOM/IDT 122) Introduction to Emerging Design Technologies. (3) Introduction to concepts and issues related to emerging design technologies. Topics include ethical considerations, production design process, decision-making process, and design principles. Course will conclude with an overview of career options and introduction to portfolio preparation. Not open to students with credit for ARTS/GCOM/IDT 122.

200 (Formerly JOUR 231) Introduction to AP Writing and Reporting. (3) Foundation course in gathering and writing news according to Associated Press style guidelines. Exercises in the assessment of newsworthiness in the coverage of local and regional events. Writing Instruction in the Disciplines (WID) course.

201 (Formerly BC 200) Introduction to Broadcast Writing and Reporting. (3) Foundation course in the gathering, writing, and presentation of news for the traditional broadcast and modern electronic media.

212 (Formerly BC 247) Introduction to Studio Production. (3) Introduction to studio-based, live and live-to-tape television production. Students acquire creative and technical skills and learn how to work as a production team. Course will prepare students for internships and careers in studio production.

221 (Formerly BC 256) Interactive Web Sportscasting. (3) Examination of and instruction in new media technologies to deliver sports media content. Emphasis on the interactive nature of the online experience as it changes traditional notions of presentation and distribution.

230 (Formerly BC 222) Multimedia Performance. (3) Development of basic audio and video announcing and performance skills. Prerequisite: BC&J 100.

285 (Formerly BC 285) Broadcasting Practicum. (1, repeatable to 4) Opportunity for freshmen and sophomores to participate in live multimedia coverage of sporting events, and to work at student radio station WIUS-FM, and to assist with Broadcasting Department video productions and other production and operation activities.

290 (Formerly BC 290) (Cross-listed with ENG 290) Introduction to Film. (3) General Education/ Humanities Screening and discussion of films from around the world, introducing students to selected traditions, questions of social justice, and methods of interpretation (with laboratory). Not open to students with credit in ENG 290. IAI: FZ 908.

302 (Formerly BC 302) Broadcast Research and Writing I. (3) Examination of story structure, dialogue writing, and character development techniques for broadcast content. Exploration of non-scripted and scripted broadcast writing methods. Prerequisites: BC&J 201; BC&J 101 and 112 with grades of C or better.

311 (Formerly BC 361) Digital Media Production II. (3) Selected topics of interest in digital media production such as, but not limited to, corporate video, animation, documentary, and interactive media content production. Prerequisites: BC&J 101 and 112 with grades of C or better.

312 (Formerly BC 350) Audio Production II. (3) Selected topics of interest in audio production such as, but not limited to, radio/talk production, music program production, internet radio, and other emerging audio technologies. Prerequisites: BC&J 101 and 112 with grades of C or better.

320 (Formerly BC 326) Sports Production I. (3, repeatable to 6) Theory and practice of remote radio and television sports production for volleyball, soccer, and baseball. Prerequisites: ENG 180 and 280.

321 (Formerly BC 312) Broadcast Sports Performance. (3) Students receive instruction on play-by-play announcing and on the preparation and extemporaneous discussion of player and team statistics and other appropriate sports-related information. Prerequisite: junior standing.

322 (Formerly JOUR 332) Sports Writing. (3) Development of reporting skills needed to cover traditional and new sports; development of critical thinking to clarify rules, regulations, and problems in sports. Prerequisites: BC&J 100 and 200, or consent of instructor.

330 (Formerly JOUR 330) Magazine and Feature Writing. (3) Practice in writing and placing fact-based articles for general-interest and specialized magazines, and for newspapers. Writing Instruction in the Disciplines (WID) course. Prerequisites: BC&J 100 and 200, or consent of instructor.

331 (Formerly BC 315) Multimedia News Reporting. (3) Production of self-contained news stories for the BC&J department's newscasts and on the department website and student radio station. Students are responsible for all aspects of production, from identification of the story and reporting performance to final editing. Prerequisites: junior standing; BC&J 101 with a grade of C or better; BC&J 201.

332 (Formerly JOUR 328) Multimedia News Editing. (3) Techniques of news editing for various media, including evaluation and processing of news, practice in copy editing, headline and lead writing, picture editing,
and editing for online audio/video streaming and reading. Prerequisites: BCGJ 100 and 200, or consent of instructor.

335 (Formerly BC 333) The Hollywood Studio System: Structure & Process. (3) Analysis of the American film industry, with an emphasis on the structure of the studio system. Comparison of the historical period with the current corporate structure of the industry. Prerequisite: ENG/BCGJ 290.

340 (Formerly JOUR 329) Fundamentals of Public Relations. (3) Principles, methods, and activities used by individuals, corporations, governmental bodies, and organizations to promote a favorable relationship with their publics. Open to non-majors.

341 (Formerly JOUR 331) Advertising Principles and Practice. (3) Advertising fundamentals; economic and social issues; research needs; and creative and production practices of advertising agencies. Open to non-majors.

342 (Formerly JOUR 342) Creative Strategy in Advertising. (3) Techniques and strategies used to create advertising including those related to design, graphics, makeup, and production. Prerequisites: BCGJ 100 and 341, or consent of instructor.

343 (Formerly JOUR 344) Advertising Media Planning. (3) Analysis of the various advertising media in terms of markets served, client needs, media interactions, and message factors considered in the planning and selection of media. Prerequisites: BCGJ 100 and 341, or consent of instructor.

344 (Formerly JOUR 348) Advertising Copy and Layout. (3) Principles and practice of writing advertising copy for mass media; using technology to prepare layouts; portfolio development. Writing Instruction in the Disciplines (WID) course. Prerequisites: BCGJ 100 and 341, or consent of instructor.

345 (Formerly JOUR 336) Public Relations Strategy and Campaigns. (3) Analysis of public relations problems and procedures; practice in applying social science principles and research techniques to solve public relations problems; preparing public relations materials. Prerequisites: BCGJ 100 and 340, or consent of instructor.

346 (Formerly JOUR 340) Public Relations Writing: Techniques and Style. (3) Techniques of public relations writing for print and broadcast media, and for special audiences; public relations research; legal considerations. Writing Instruction in the Disciplines (WID) course. Prerequisites: BCGJ 100 or consent of instructor.

350 (Formerly BC 322) Broadcasting and Society. (3) Traces the development of broadcasting as a major cultural form in the twentieth and twenty-first centuries through a critical review of historic and contemporary literature. BGS online writing course.

351 (Formerly BC 325) Comparative Broadcasting Systems. (3) Comparative study of national and international broadcasting systems. The role of media in developing nations, and social issues; research needs; and creative and production practices of advertising agencies. Open to non-majors.

352 (Formerly BC 328) Mass Media and Minorities. (3) General Education/Multicultural Studies Examination of relationships between minority groups and mass media. Reviews the portrayals of minorities in the electronic media and discusses effects on our society. BGS online writing course.

353 (Formerly JOUR 410) International Communication and the Foreign Press. (3) Comparative study of journalism practices and of the mass media in representative countries; factors that determine the international flow of news. Open to non-majors. Prerequisite: junior or senior standing.

354 (Formerly JOUR 427) History of Mass Communications. (3) History of journalism and the mass media in the context of political, social, and economic change with an emphasis on press freedom and responsibility. Open to non-majors. Prerequisite: junior or senior standing.

355 (Formerly JOUR 335) Photojournalism. (3) Digital photojournalism: the production of news and feature page photographs as singles, spreads, stories, and essays. Prerequisite: BCGJ 200 or consent of instructor.

356 (Formerly JOUR 305) Reviewing and Criticism. (3) Practice in reviewing books, plays, films, concerts, radio-television programs, and exhibits. Prerequisites: BCGJ 100 and 200, or consent of instructor.

357 (Formerly JOUR 306) Editorials. (3) Practice in writing editorials and columns with an emphasis on calling for action, taking a position, analyzing events, and supporting assertions with research. Prerequisites: BCGJ 100 and 200, or consent of instructor.

385 (Formerly BC 385) Production Practicum I. (1) Guided practicum in audio or video production. Student must apply for and be accepted into a specific practicum experience related to the operation of broadcast services or production of broadcast content. Prerequisites: BCGJ 101 and 112 with grades of C or better, or permission of instructor.

386 (Formerly BC 386) Production Practicum II. (1) Guided practicum in audio or video production. Student must apply for and be accepted into a specific practicum experience related to the operation of broadcast services or production of broadcast content. Prerequisites: BCGJ 101 and 112 with grades of C or better, or permission of instructor.

390 (Formerly BC 390) (Cross-listed with ENG 390) Film History. (3) This course is an historical survey that covers the international history of cinema from its origins to the present. It considers issues including the development of national film industries, national and international film movements, and the social history of film (with laboratory). Not open to students with credit in ENG 390. Prerequisite: ENG/BCGJ 290 or consent of instructor.

394 (Formerly BC 394) (Cross-listed with ENG 394) Documentary Film and Video. (3) History of documentary film and video with focus on the documentary as a medium of communication, information, and interpretation (with laboratory). Not open to students with credit in ENG 394.

400 (Formerly BC 425) Mass Communication Law and Ethics. (3) Legal rights and constraints on the mass media. Topics include prior restraint, source protection, libel, privacy invasion, indecency and the safe harbor, and other legal and ethical issues. Includes print, broadcast, satellite/cable, and web-based mass media. Not open to students with credit in BC 425 or JOUR 417. Writing Instruction in the Disciplines (WID) course. Prerequisite: Upper division standing or permission of instructor.

402 (Formerly BC 402) Advanced Broadcast Writing. (3) Students will write longer and more complex scripts and stories. Students will work through ideas from concept to completed scripts. Regular critiques of student writing. Prerequisite: BCGJ 302 with a grade of C or better.

410 (Formerly BC 420) Digital Media Graphics. (3) Students design computer graphics and animation. Projects include news anchor boxes, graphic backgrounds, and animated feature introductions. Prerequisites: BCGJ 101 and 112 with grades of C or better, or permission of instructor; ENG 180 and 280.
Broadcasting and Journalism

420 (Formerly BC 426) Sports Production II. (3, repeatable to 6) Theory and practice of remote radio and television sports production for football, basketball, softball, and baseball. Students produce and direct coverage of sporting events. Prerequisite: BC&J 320.

422 (Formerly BC 422) (Cross-listed with ARTS/GCOM/IDT 422) Applied Emerging Design Technologies. (1) Students will have the opportunity to work collaboratively on real-world projects that apply principles in emerging technologies. Not open to students with credit for ARTS/GCOM/IDT 422.

430 (Formerly JOUR 440) Digital Media Skills for Journalism Practitioners and Media Consumers. (3) The course will enhance digital media skills such as social media tools, multimedia storytelling, and data visualization so students know how to generate and deliver news stories to web-based audiences. Prerequisite: BC&J 200 or consent of instructor.

431 (Formerly JOUR 412) Problems in Contemporary Mass Communication. (3) Research into current social, economic, political, and professional problems affecting the mass media. Open to non-majors. Prerequisite: junior or senior standing.

432 (Formerly BC 415) Multimedia News Producing. (3, repeatable to 6) Students produce and direct the BC&J department's newscasts and make content for the department website and student radio station. Students act as assignment editors, photographers, and reporters and polish skills learned in earlier classes. Prerequisites: BC&J 101 with a grade of C or better and BC&J 201 with a grade of C or better.

450 (Formerly BC 490) Senior Workshop in Production. (3) Capstone course in which Production emphasis majors create their own audio or video production. Students will focus on journalistic, art, and entertainment programs using journalistic, art, and entertainment emphases majors create their own audio or video production. Students will focus on journalistic, art, and entertainment programs using journalistic, art, and entertainment.

452 (Formerly BC 418) Independent Research in Communication. (1–6, repeatable to 6) Individual reading or research under supervision of the faculty. Open to juniors and seniors who have demonstrated competence in broadcasting, communication, rhetoric, public address, or the speech-language-hearing sciences. Prerequisites: ENG 180 and 280; consent of instructor and department chairperson.

453 (Formerly BC 400) Senior Honors Thesis Research. (3) Bibliographic and other preliminary work in preparation for senior honors theses. Prerequisite: BC&J 454. Students will produce a final, graded project for this course. This course may not be taken concurrently with BC&J 454. Prerequisites: ENG 180 and 280; must be in good standing in the Centennial Honors College and must be second-semester seniors or first-semester seniors major in Broadcasting.

454 (Formerly BC 401) Honors Thesis. (3) Students will write a senior honors thesis. This course may not be taken concurrently with BC&J 453. Prerequisites: BC&J 453; ENG 180 and 280; must be in good standing in the Centennial Honors College and must be seniors major in Broadcasting.

455 (Formerly BC 429) Broadcast Internship. (3) Students will work at a selected professional broadcast production center for a semester. In addition to a prescribed work schedule, the intern must submit regular station activity reports. Prerequisites: BC&J 312, 320, or 331; ENG 180 and 280; permission of internship coordinator; 2.50 GPA. Graded S/U only.

456 (Formerly JOUR 436) International Public Relations. (3) (Global Issues) Comparative study of the nature, scope, and practice of international public relations for businesses, trade associations, nonprofit organizations, and educational and governmental institutions. Global and intercultural aspects of public relations will be emphasized. Open to non-majors. Prerequisite: BC&J 340 or consent of instructor.

457 (Formerly BC 480) Special Topics in Media Communications. (3, repeatable for different subtitles to 6) This course deals with selected topics of interest in broadcasting and mass communication such as but not limited to radio, television, and film criticism, broadcast history, mass communication theory and effects, and popular culture. Prerequisites: BC&J 100; BC&J 101 and 112 with grades of C or better; ENG 180 and 280.

458 (Formerly JOUR 415) Mass Communications Research Methods. (3) Introduction to questionnaire construction, sampling, research design, and statistical methods used in mass communications research including those in advertising and public relations. Open to non-majors. Prerequisite: junior or senior standing.

459 (Formerly JOUR 425) Directed Study. (1–6, repeatable to 6) Opportunity for promising students of Journalism to pursue Journalism and mass communications material in depth. By arrangement. See department chair or Journalism coordinator. Prerequisite: junior or senior standing.

460 (Formerly JOUR 400) Topics in Journalism. (3, repeatable for different topics) Discussion, research, and creation of content about special topics related to gathering, packaging, and presenting nonfiction material to an audience in various media, and how audiences receive and respond to the communication. Prerequisites: BC&J 100 and 200.

485 (Formerly BC 485) Production Practicum III. (1) Guided practicum in audio or video production. Student must apply for and be accepted into a specific practicum experience related to the operation of broadcast services or production of broadcast content. Prerequisites: BC&J 101 and 112 with grades of C or better; or permission of instructor.

486 (Formerly BC 486) Production Practicum IV. (1) Guided practicum in audio or video production. Student must apply for and be accepted into a specific practicum experience related to the operation of broadcast services for production of broadcast content. Prerequisites: BC&J 101 and 112 with grades of C or better; or permission of instructor.

494 (Formerly BC 494) (Cross-listed with ENG 494 and WS 494) Women and Film/Television. (3) An overview of women in film and television that considers the on-screen images of women as well as the positions of women working behind the scenes (with laboratory). Not open to students with credit for ENG 494 or WS 494. Prerequisites: ENG 180 and 280.

496 (Formerly BC 496) Topics in Film. (3) Study of major subjects and themes in film. Topics vary but may include intensive study of directors such as Alfred Hitchcock and Federico Fellini, or artisic movements such as Italian Neorealism, French New-Wave, Contemporary Spanish Cinema, or Russian Formalism. Not open to students with credit in ENG 496. Prerequisites: ENG/BC&J 290, ENG/BC&J 390, and 6 s.b. in approved film minor electives, or permission of instructor.

499 (Formerly BC 499) Field Work in Broadcasting. (3) Supervised applied experience in a sports organization or news broadcasting organization. Prerequisites: BC&J 312, 331, or 420; ENG 180 and 280; or permission of instructor.
Chemistry

Chairperson: Dr. Rose M. McConnell
Office: Currens Hall 214
Telephone: (309) 298-1538; Fax: (309) 298-2180

Program Offerings and Locations:

- Bachelor of Science in Chemistry: Macomb
- Bachelor of Science in Forensic Chemistry: Macomb
- Minor in Chemistry: Macomb
- Minor in Forensic Chemistry: Macomb
- Minor in Forensic Science: Macomb

For student learning outcomes, please see wiu.edu/provost/learningoutcomes.

Emeritus Faculty: Klopfenstein, Made Gowda, Terry, Venugopalan, Wen.

Chemistry is the science of the composition, structure, properties, and reactions of matter, especially of atomic and molecular systems. It is the basis of the technology of the large-scale production of chemicals and chemical materials that are useful to modern society. The study of Chemistry helps people understand the physical world and its workings.

The Bachelor of Science in Chemistry degree program provides graduates a wide range of career opportunities. Graduates of the B.S. in Chemistry who complete either the general Chemistry, Biochemistry, or Pharmacy options find employment in industry, government agencies, and non-profit organizations. Types of work include basic research, applied research, analytical services, product development, marketing and sales, and manufacturing. Persons who wish to become professional chemists should select the Chemistry option or the Chemistry option certified by the American Chemical Society. Persons desiring to become practicing biochemists should select the Biochemistry option or the Biochemistry option certified by the American Chemical Society. Both are recommended for students wishing to enter graduate school or seek employment in the chemical industry immediately upon graduation. The Pharmacy option targets those students who seek a career as a pharmacist (Pharm.D.) or pharmacologist (Ph.D.) but would also benefit students who wish to work in the pharmaceutical or biotech industries at the B.S. or M.S. level. The Pharmacy option is also useful to those students who are seeking careers in forensic pharmacology, pharmaceutical sales, or as certified pharmacy technicians, pharmacy assistants, and other healthcare professionals. The Science/Chemistry—Teacher Education option is designed to prepare students to become licensed to teach high school science with a specialization in Chemistry.

The Bachelor of Science in Forensic Chemistry prepares graduates with a strong Chemistry background and a specialization in forensic chemistry which will prepare them to work in modern laboratories at the local, regional, state, and federal levels. Graduates of the Forensic Chemistry program will be prepared for careers in modern crime laboratories and other law enforcement agencies as well as private chemical and pharmaceutical industries.

The department also offers minors in Chemistry, Forensic Chemistry, and Forensic Science.

GradTrac is available to Chemistry and Biochemistry majors. See page 79 for information about GradTrac.

Honors Curriculum—Academically qualified students in this department are encouraged to complete an honors curriculum in University Honors, Honors in the Major, or General Honors. All Honors students must complete the one-hour honors colloquium (G H 299). General Honors includes General Honors coursework. Honors in the Major includes honors work in the major. University Honors combines Honors in the Major and General Honors.
Integrated Baccalaureate and Master’s Degree Program—An integrated baccalaureate and master’s degree program is available for the Bachelor of Science in Chemistry or Forensic Chemistry: Master of Science in Chemistry. An integrated degree program provides the opportunity for outstanding undergraduates to earn both degrees in five years. Please refer to the Graduate Studies catalog for details about the integrated program.

Degree Programs

Bachelor of Science—Chemistry

All students seeking the Bachelor of Science in Chemistry must complete I, II, and III.A, III.B, III.C, or III.D below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 121 s.h.

In accordance with the Illinois State Board of Education licensure rule, all candidates seeking a Professional Education License or endorsement are required by Western Illinois University to obtain a grade of “C-” or better in all directed general education courses, all core courses, and all courses in the option. This rule does not supersede course prerequisite requirements in the catalog that specify a letter grade.

Please see the Teacher Education section of this catalog (p. 346) for more information about WIU’s Teacher Education Program.

I. University General Education and College of Arts and Sciences Curriculum Requirements (p. 86) ..........................................................................................................................55 s.h.

Except Teacher Education students must complete the University General Education Curriculum Requirements—43 s.h. (p. 70)

II. Core Courses ..................................................................................................................22 s.h.

CHEM 201*, 202*, 241, 331, 332, 341

III. Options of Study (select A, B, C, or D)

A. Chemistry
1. Special Courses: CHEM 374, 375, 401†, 416, 442, 492.................................18 s.h.
2. Departmental Electives .....................................................................................3 s.h.
3. Other
   a. CS 114 or higher .......................................................................................3 s.h.
   b. MATH 133*, 134*, 231 ..............................................................................12 s.h.
   c. PHYS 211*, 212 or 124, 125 ..............................................................8–10 s.h.
4. Any minor ........................................................................................................16 s.h.

B. Biochemistry
1. Special Courses: CHEM 263, 264, 370 or 374, 416, 421, 422†, 425, 492.................................18 s.h.
2. Departmental Electives .....................................................................................4 s.h.
3. Other
   a. MATH 133*, 134* ...................................................................................8 s.h.
   b. PHYS 211*, 212 or 124, 125 ..............................................................8–10 s.h.
   c. CS 114 or higher .......................................................................................3 s.h.
4. Biology minor (Botany, Microbiology, or Zoology) .............................................17 s.h.
5. Open Electives .................................................................................................0–2 s.h.

C. Pharmacy
1. Special Courses: CHEM 263, 264, 370, 416, 421, 421, 422†, 452, 492.................................24 s.h.
2. Other
   a. MATH 133; STAT 171 or 276 ...............................................................7 s.h.
   b. PHYS 211*, 212 or 124, 125 ..............................................................10 s.h.
   c. ZOOL 330 and 331 ................................................................................8 s.h.
3. Select one of the following minors: Microbiology, Neuroscience, or Zoology ..................................................................................................................17 s.h.
D. Science/Chemistry—Teacher Education

1. Special Courses .................................................................................................. 43 s.h.
   a. CHEM 370 or 374 or 375; 342#; 401; 482† ........................................ 15 s.h.
   b. BIOL 101*, 281, 481 ................................................................................ 8 s.h.
   c. GEOL 110* ............................................................................................. 4 s.h.
   d. PHYS 211*, 213 ...................................................................................... 8 s.h.
   e. BIOL/GEOL 181; PHYS/GEOG 182 ....................................................... 8 s.h.

2. Science Electives ............................................................................................... 0 s.h.
   Additional courses in Biology (BIOL, BOT, MICR, ZOOL), Chemistry,
   Geology, Geography, or Physics

3. Other .............................................................................................................. 42 s.h.
   a. MATH 133*, 134* ................................................................................... 8 s.h.
   b. EDUC 239, 339, 439, 469 ................................................................. 3 s.h.
   c. EDS 202, 301, 303 (2 s.h.), 304 (1), 305, 401 ...................................... 13 s.h.
   d. ENG 366 .................................................................................................. 2 s.h.
   e. SPED 210 and 390 ................................................................................. 4 s.h.
   f. STCH 480 ............................................................................................... 12 s.h.

# The foreign language/global issues graduation requirement may be fulfilled by
   successfully completing one of the following: 1) a designated foreign language requirement
   [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global
   issues course; 3) any major’s discipline-specific global issues course (including CHEM 342);
   or 4) an approved Study Abroad program.
* University General Education course. 10–16 s.h. may count toward the Natural Sciences/
   Mathematics requirement.
† CHEM 401 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement
   for the Chemistry non-teaching option. CHEM 422 fulfills the Writing Instruction in the
   Disciplines (WID) graduation requirement for the Biochemistry and Pharmacy options.
   CHEM 482 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement
   for the Science/Chemistry—Teacher Education option.

Bachelor of Science—Forensic Chemistry

All students seeking the Bachelor of Science in Forensic Chemistry must complete I, II,
III, and IV below, and the foreign language/global issues requirement for the major#. The
minimum semester hour requirement for the baccalaureate degree is 124 s.h.

I. University General Education and College of Arts and Sciences Curriculum
   Requirements (p. 86) ................................................................................... 55 s.h.

II. Core Courses ................................................................................................... 25 s.h.
    CHEM 201*, 202*, 241, 251, 331, 332, 341

III. Specialty Courses ............................................................................................ 28 s.h.
    CHEM 370 or 374 ...................................................................................... 4 s.h.
    CHEM 485 or 490 ...................................................................................... 3 s.h.
    CHEM 551, 416, 421, 452, 453, 455†, 492 ................................................. 21 s.h.

IV. Other Requirements ......................................................................................... 32–35 s.h.
    A. MATH 133*, MATH 134*, STAT 171* ............................................... 11 s.h.
    B. PHYS 211*, 212 or 124, 125 ................................................................ 8–10 s.h.
    C. LEJA 101, and 255 or 303 ................................................................. 6 s.h.
    D. BOT 200* or ZOOL 200 ....................................................................... 4 s.h.
    E. Choose one of the following: ............................................................... 3–4 s.h.
       ANTH 405, BIOL 330, CS 305, GEOL 110*, MICR 200*

# The foreign language/global issues graduation requirement may be fulfilled by
   successfully completing one of the following: 1) a designated foreign language requirement
   [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global
issues course; 3) any major’s discipline-specific global issues course (including CHEM 342); or 4) an approved Study Abroad program.
* University General Education course. 16 s.h. may count toward the Natural Science/Mathematics requirement.
† CHEM 455 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.

Minors

Minor in Chemistry ................................................................. 19–21 s.h.
1. Core Courses: CHEM 201, 202, and 330 or 331 ......................... 13 s.h.
2. Any two courses from:
   CHEM 332, 341, 342, 370/374, 375, 421, 425, 433 .......................... 6–8 s.h.

Minor in Forensic Chemistry .................................................. 20–21 s.h.
1. Core Courses: CHEM 201, 202, 330, 440 .................................. 17 s.h.
2. Select one of the following: ................................................... 3–4 s.h.
   a. CHEM 485—internship at a state laboratory with placement
      approval by minor advisor.
   b. One course selected from: ANTH 405; BIOL 330; CHEM 342,
      351, 421; MICR 200, 434; ZOOL 430

Note: This minor is not open to students majoring in Chemistry.

Minor in Forensic Science ....................................................... 19–20 s.h.
1. Core Courses: CHEM 101, 102, 221, 440 .................................. 16 s.h.
2. Select one of the following options: ..................................... 3–4 s.h.
   a. CHEM 485—internship at a state laboratory with placement
      approval by minor advisor.
   b. One course selected from: ANTH 405, BIOL 330, CHEM 342,
      MICR 200, MICR 434, ZOOL 430

Note: This minor is not open to students majoring in Chemistry.

Certification by the American Chemical Society

Western Illinois University is approved by the American Chemical Society for
undergraduate professional training in Chemistry and Biochemistry. Students who are
pursuing the B.S.in Chemistry may qualify for certification by completing the following
coursework:

Certification in Chemistry
1. CHEM 201, 202, 331, 332, 333, 341, 374, 375, 401, 416, 421, and 442
2. CHEM 342, 409, 418, or 422
3. Elect one course from CHEM 485, 490, or 491
4. PHYS 211 and 212

Certification in Biochemistry
1. CHEM 201, 202, 331, 332, 333, 341, 374, 375, 401, 416, 421, 422, 425, 442, 485/490/491
2. PHYS 211 and 212

Recommended High School Subjects for Students Planning to Major in Chemistry
1. English: four years
2. Mathematics: four years
3. Chemistry: one year
4. Physics: one year
The First-Year Course in Chemistry

1. Students requiring two or more years of Chemistry should take CHEM 201 and 202.
2. Students requiring only one year of Chemistry or Forensic Science minor should take CHEM 101 and 102.
3. Students without one year of Chemistry in high school are required to take CHEM 100 before taking CHEM 101 or 201.

Course Descriptions

CHEMISTRY (CHEM)

Ilinois law requires that safety goggles must be worn in all laboratory classes (Senate Bill 1190). Students enrolled in Chemistry laboratory courses are required to purchase safety goggles. A $35 lab use charge applies to all Chemistry laboratory courses.

100 Introduction to Chemistry. (3) For those students who have completed less than the equivalent of one year of high school Chemistry. Introduces the fundamental concepts of Chemistry including matter, atomic structure and periodicity, stoichiometry, some descriptive Chemistry. Prerequisite: one year high school algebra or MATH 099N. 3 hrs. lect.

101 Principles of Chemistry I. (4) General Education/Natural Sciences A survey for students who do not plan to take Chemistry beyond the 100 level. Application of the general principles of inorganic and organic chemistry to biological, environmental, and applied sciences. Prerequisites: one year of high school algebra or MATH 099N, and either one year of high school Chemistry or CHEM 100. 3 hrs. lect.; 2 hrs. lab. IAI: P1 902L.

102 Principles of Chemistry II. (4) General Education/Natural Sciences A continuation of CHEM 101. Prerequisite: CHEM 101. 3 hrs. lect.; 3 hrs. lab.

114 Chemistry of Health. (3) General Education/Natural Sciences A fundamental chemistry course focusing on applications to human health. Does not count toward majors in Biology, Medical Sciences option, or Chemistry. Pharmacy option. Prerequisite: MATH 099 or Mathematics placement above MATH 099. 3 hrs. lect.

150 Contemporary Chemistry. (4) General Education/Natural Sciences A course intended to inform the student of the role of science in modern society. Lectures treat the fundamentals of chemical composition, the impact of industrial products on the environment, energy, and drugs; and the importance of consumer information. 3 hrs. lect.; 2 hrs. lab. IAI: P1 902L.

190 Introduction to Chemistry Research. (1–4, repeatable to 4) Introduction to chemistry research, which may include introduction to laboratory experimental design, scientific writing, and ethical issues of chemical research and reporting. Prerequisite: special permission from the department.

201 General Chemistry I. (4) General Education/Natural Sciences Designed for science and pre-engineering majors. Fundamental physicalchemical principles and quantitative relationships including the mole concept, periodic properties of the elements, atomic structure, chemical bonding, and thermochemistry. Laboratory emphasizes quantitative analysis. Prerequisites: MATH 100 and either one year of high school Chemistry or CHEM 100. Corequisite: either MATH 101, 102, 123, or 128, or math course requiring one of these as a prerequisite. 3 hrs. lect.; 3 hrs. lab. IAI: CHM 91I.

202 General Chemistry II. (4) General Education/Natural Sciences A continuation of CHEM 201. Includes a study of solutions, acids and bases, equilibria, electrochemistry, and chemistry of the main group elements and the transition elements. Laboratory emphasizes qualitative analysis, quantitative measurements, and syntheses. Prerequisite: CHEM 201. 3 hrs. lect.; 3 hrs. lab. IAI: CHM 912.

221 Elementary Biochemistry. (4) An elementary course intended to teach the structure, properties, function, and metabolism of biological molecules with emphasis on macromolecules. Intended for Biology and Family and Consumer Sciences majors. Prerequisite: CHEM 102. 3 hrs. lect.; 3 hrs. lab.

241 Chemical Calculations. (2) Designed primarily for Chemistry majors and minors. Emphasis is given to methods of presenting data and performing detailed chemical calculations typically required in biochemical and pharmaceutical analysis. Prerequisite: CHEM 201. Prerequisite or Corequisite: CHEM 202. 2 hrs. lect.

251 Introduction to Forensic Applications. (3) Designed primarily for Forensic Chemistry majors and minors. Introduction to forensic chemistry with emphasis placed on the forensic applications of chemical techniques. Lab demonstrates the applications of forensic chemical analysis. Does not count toward the Chemistry minor. Prerequisite: CHEM 201. Prerequisite or Corequisite: CHEM 202.

263 Introduction to Pharmacology. (3) This course introduces the students to the basic concepts of pharmacology and the major categories of pharmaceutical agents, and explores the myths and facts about vitamins, nutritional supplements, and common herbal medicines. Prerequisites: either BIOL 101 or ZOOL 200 or ZOOL 330; and either CHEM 102 or CHEM 330.

264 Pharmacy Methods. (3) This course is designed as an aid for students who plan a career in Pharmacy. The course describes methods used in Pharmacy, including receiving and processing prescriptions, drug calculations, dosage and formulations, Pharmacy law, and inventory control. Prerequisite: CHEM 263 or permission of the instructor.

330 Elements of Organic Chemistry. (5) A one-semester introduction to organic chemistry. Coverage includes nomenclature of compounds, study of selected reactions and mechanisms, spectroscopy and study of biologically relevant molecules such as carbohydrates, amino acids, and proteins. Does not count toward Chemistry major. Prerequisite: CHEM 202 (C grade or better). 4 hrs. lect.; 3 hrs. lab.

331 Organic Chemistry I. (5) A study of nomenclature, preparations, reactions, and reaction mechanisms of the functional groups of aliphatic and aromatic compounds. Prerequisite: CHEM 202 (C grade or better). 4 hrs. lect.; 3 hrs. lab. IAI: CHM 913.

332 Organic Chemistry II. (4) Further study of organic chemistry including spectroscopic methods. Laboratory includes synthetic methods, mechanistic studies, chromatography, and an introduction to qualitative analysis. Prerequisite: CHEM 331 or CHEM 330 (C grade or better). 3 hrs. lect.; 3 hrs. lab. IAI: CHM 914.

333 Advanced Organic Laboratory. (1) Designed to supplement the laboratory portion of CHEM 332.
Chemistry

Prerequisite: concurrent registration or credit in CHEM 332, 3 hrs. lab.

341 Quantitative Analysis. (3) An extension of the fundamental techniques used in CHEM 201 and 202 with emphasis on the analytical process, methods of separation, and methods of measurement. Prerequisite: CHEM 202 (C grade or better); CHEM 241 or permission of instructor. 2 hrs. lect.; 3 hrs. lab.

342 Fundamentals of Environmental Chemistry. (4) General introduction of the chemistry of the geosphere, hydrosphere, and atmosphere with emphasis on the interactions between them and the impact of technology upon the natural environment. Prerequisite: CHEM 102 or 202. 3 hrs. lect.; 3 hrs. lab.

351 (Formerly CHEM 451) Applications of Forensic Chemistry. (4) Applications of physico-chemical principles to analysis of physical evidence from criminal investigations, including seized drugs, explosive residues, arson debris, hairs, fibers, glass, paint, papers, inks, and soil. Cannot be applied toward the Chemistry minor. Prerequisites: CHEM 251, 332, 341, or consent of instructor. 3 hrs. lect.; 3 hrs. lab.

570 Elementary Physical Chemistry. (4) Designed primarily for students who wish an introduction to physical chemistry and its biological applications. Prerequisite: CHEM 202, 3 hrs. lect.; 3 hrs. lab.

374 Physical Chemistry – Thermodynamics and Kinetics. (4) A rigorous treatment of physical chemistry useful for chemists, biologists, engineers, Earth scientists, and medical scientists. The topics include thermodynamics and kinetics. Prerequisite: CHEM 202, one year of Physics, and one year of calculus. 3 hrs. lect.; 3 hrs. lab.

375 Physical Chemistry – Quantum Mechanics and Spectroscopy. (4) A rigorous treatment of physical chemistry useful for chemists, biologists, engineers, Earth scientists, and medical scientists. The topics include quantum mechanics and spectroscopy. Prerequisite: CHEM 202, one year of Physics, and one year of calculus. 3 hrs. lect.; 3 hrs. lab.

390 Junior Project Laboratory. (1–2, repeatable for different projects to 2) Enrollment only with permission of department.

401 Inorganic Chemistry. (4) Chemistry of transition elements and nontransition elements and their compounds; nomenclature, stereochemistry, symmetry, bonding, solids, and acid-base theories. Laboratory involves synthesis and physicochemical measurements of selected compounds. Winter quarter in the Disciplines (WID) course. Prerequisites: CHEM 332 and CHEM 370 or 374. 3 hrs. lect.; 3 hrs. lab.

409 Current Inorganic Chemistry Topics. (2) Selected topics in inorganic chemistry which include current chemical bonding models, acid-base and redox approaches to inorganic chemistry, materials chemistry, and special topics related to current research are discussed. Cannot be applied toward the Chemistry minor. Prerequisite: CHEM 202 or permission of instructor. 2 hrs. lect.

416 Chemical Literature. (1) An introduction to searching chemical research literature. Prerequisite: 18 s.b. of Chemistry. 1 hr. lect.

418 (Cross-listed with BIOL/GEOL/PHYS 418) Introduction to Scanning Electron Microscopy. (4) The course focuses on capabilities and operation of scanning electron microscopes with emphasis on beam-material interactions, sample preparation, image acquisition and analysis, and X-ray measurements with applications in Biology, Chemistry, Geology, and Physics. Not open to students with credit in BIOL/GEOL/PHYS 418. Prerequisites: BIOT 200 (C grade or better); or CHEM 202, or MICRO 200 (C grade or better), or PHYS 125, or PHYS 212, or ZOOL 200 (C grade or better); or consent of instructor. 3 hrs. lect.; 2 hrs. lab.

421 Biochemistry. (4) The chemistry of major cellular constituents and their metabolism. Prerequisite: CHEM 330 or 332; CHEM 241 or BIOL 330 or permission of instructor. 3 hrs. lect.; 3 hrs. lab.

422 Advanced Biochemistry. (4) A continuation of CHEM 421 emphasizing the regulation of biosynthetic pathways and gene expression. Laboratory includes analysis of biological molecules by GC, HPLC, UV, spectroscopy, and electrophoresis. Writing Instruction in the Disciplines (WID) course. Prerequisites: BIOL 330 and CHEM 421. 3 hrs. lect.; 3 hrs. lab.

425 Biochemistry of Human Disease. (4) Biochemical aspects of human diseases with emphasis on cancer and genetic disorders. The course focuses on biochemical principles of disease, cancer, and contemporary biochemistry and molecular biology, methods and approaches for drug development and cancer treatments. Prerequisites: BIOL 330 and CHEM 421. 3 hrs. lect.; 3 hrs. lab.

430 Polymer Chemistry. (5) An introductory course in polymer chemistry, including synthesis, mechanisms of polymerization, physical and chemical characterizations, and industrial applications. Biopolymers will also be discussed. Prerequisites: CHEM 330 with a grade of C or better, or CHEM 332 with a grade of C or better. 3 hrs. lect.

435 Macromolecular Chemistry Topics. (2) Selected topics in organic chemistry which include current topics and applications of macromolecules. Cannot be applied toward the Chemistry minor. Prerequisite: CHEM 330 or 331, or permission of instructor. 2 hrs. lect.

440 Elementary Forensic Techniques. (4) Applications of chemical principles to analysis of crime scene physical evidence including serology, drugs, explosive residues, arson debris, papers and inks, paint, and DNA fingerprinting. State-of-the-art techniques and instrumentation will be used. Prerequisite: BIOL 241 or CHEM 330 or 331, or permission of instructor. 2 hrs. lect.; 3 hrs. lab.

442 Instrumental Analysis. (4) Theory and practice of analytical chemistry with emphasis on selected instrumental techniques. Prerequisite: CHEM 341 and one semester of Physical Chemistry. 3 hrs. lect.; 6 hrs. lab.

449 Analytical Chemistry Topics. (2) Selected topics in analytical chemistry which include current topics and applications of pharmaceutical or forensic analysis. Cannot be applied toward the Chemistry minor. Prerequisite: CHEM 341 or permission of instructor. 2 hrs. lect.

452 Forensic Toxicology. (4) Designed primarily for Forensic Chemistry majors. Applications of pharmacological, toxicological, and instrumental methods used in forensic investigations of death, poisoning, and drug use. Cannot be applied toward the Chemistry minor. Prerequisite: CHEM 341 or permission of instructor. 2 hrs. lect.

453 Forensic Mass Spectrometry. (3) Designed primarily for Forensic Chemistry majors. The course focuses on mass spectrometry for identification of forensically significant compounds, such as fire accelerants, explosives, illicit drugs, and all the poisons ranging from small organic molecules to biological macromolecules. Prerequisite: CHEM 332 and 341. 2 hrs. lect.; 3 hrs. lab.

455 Forensic Serology and DNA Analysis. (4) Applications of biochemical principles to analysis of human tissues, body fluids, and other biological forensic evidence. Topics will include serology, blood splatter evidence, screening methods, and DNA analysis and interpretation. Writing Instruction in the Disciplines (WID) course. Does not count toward the Chemistry minor. Prerequisite: CHEM 421.

479 Physical Chemistry Topics. (2) Selected topics in physical chemistry which include modern applications, such as computational chemistry, molecular modeling,
thermodynamics, kinetics, and/or surface chemistry. Cannot be applied toward the Chemistry minor.
Prerequisite: CHEM 370 or 375, or permission of instructor. 2 hrs. lect.

482 (Cross-listed with BIOL 482 and PHYS 482) Science in Context. (3) Interdisciplinary course for science majors in which students explore science through inquiry, the unifying principles of science, and the role of social contexts and ethics in science. Writing Instruction in the Disciplines (WID) course. Not open to students with credit in BIOL 482 or PHYS 482. Prerequisites: senior standing in one of the following science majors—Biology, Chemistry, Physics, Geology, or Meteorology; ENG 280; or permission of instructor.

485 Internship in Chemistry. (3–8, repeatable to maximum of 8) An on-the-job experience in a government or industrial laboratory. To familiarize students with working environments—laboratory procedures and instrumentation they will encounter in a job situation. A formal written report is required. Prerequisites: CHEM 332, 370 or 375, 442, junior or senior standing in Chemistry, or permission of department chairperson. Graded S/U only.

490 Senior Project Laboratory. (1–4, repeatable to 4) Laboratory research under the direction of a Chemistry faculty member. The work will include the use of the chemical literature in independent research programs. A formal written report of the investigation undertaken is required. Corequisite or Prerequisite: CHEM 492. Prerequisite: one semester of Physical Chemistry or permission of the department.

491 Honors Thesis in Chemistry. (1–2, repeatable to 2) A thesis prepared under the direction of one or more faculty members.

492 Safety Practices in Chemistry Research. (1) The course is designed to train students in safety techniques and practices commonly used in laboratory research. A combination of lecture and demonstrations are used to describe MSDS, PPE, federal regulations, safe handling of hazardous reagents, and isotopes. Prerequisite: CHEM 101 or 201 or permission of instructor.

(Education)

239 Pre-Teacher Education Program Admittance. (0, repeatable with no maximum) Students pursuing teacher licensure are required to take this course in the semester they plan to be fully accepted in the Teacher Education Program (TEP). Students must meet established departmental criteria for admittance to TEP. Graded S/U.

339 Pre-Student Teaching Clearance. (0) Students pursuing teacher licensure are required to take this course prior to their student teaching semester. Students must meet established criteria for departmental clearance to student teach. Prerequisites: Full admittance to the Teacher Education Program (TEP). Graded S/U.

439 Methods of Teaching Middle and High School Science. (3) Study of secondary teaching methods (Grades 6–12) from the standpoints of theory and practice, curriculum objectives and standard implementation, materials, and evaluation and assessment. Included are demonstrations, discussions, lectures, classroom participation, and field observations. Prerequisites: BIOL/GEOL 181 or GEOG/PHYS 182, BIOL 281, and EDS 301 (all with C- grade or better). Corequisite: EDS 303.

469 Pre-Licensure Clearance. (0) Students pursuing teacher licensure are required to take this course in the semester they student teach. Students must meet criteria established by the department in order to be recommended for licensure. Prerequisite: departmental clearance to student teach. Corequisite: Student Teaching (STCH). Graded S/U.

480 Student Teaching. See STCH 480.
Chairperson: Dr. Peter F. Jorgensen  
Office: Memorial Hall 302  
Telephone: (309) 298-1507  
E-mail: PF-Jorgensen@wiu.edu  
Website: wiu.edu/comm

Program Offerings and Locations:

- Bachelor of Arts in Communication: Macomb, Quad Cities (Communication Studies option only), Online (Communication Studies option only)
- Minor in Communication: Macomb, Quad Cities
- Minor in Computer-Mediated Communication: Macomb, Quad Cities, Online

For student learning outcomes, please see wiu.edu/provost/learningoutcomes.

Faculty: Averbeck, Carpenter, Hill, Jorgensen, Lauer, Little, Macchi, Menken, L. Miczo, N. Miczo, Miller, Young, Zanolla.

Academic Advisor: Grimm (Macomb and Quad Cities).

Communication is a dynamic and varied discipline, offering majors a broad range of career opportunities and pursuits. The major focuses on the primary areas of organizational communication, persuasive communication, interpersonal communication, and rhetorical communication to ground students in theoretical and applied knowledge of the key role that communication plays in all aspects of human interaction. The discipline routinely prepares students to enter any number of diverse professions from event planner to sales, college recruiter to business management, training and development to politics. Students of Communication receive fundamental training in and exposure to the infinite number of contexts in which humans interact with and influence one another. This knowledge base then provides them with an understanding of message processes that will serve them on an ongoing basis, both professionally and personally.

The Department of Communication offers a Bachelor of Arts degree in Communication. In addition to completing required core courses, majors will choose to focus on one of four options: Communication Studies, Interpersonal Communication and Processes, Social Influence, or Organizational Communication. (At this time, only the Communication Studies option is available to online majors and majors at the Quad Cities campus.) Communication majors are able to select minors that complement their major areas of study and their career goals. Minors in Communication and Computer-Mediated Communication are also available. A full-time academic advisor assists students in planning their programs of study.

GradTrac is available to Communication majors. See page 79 for information about GradTrac.

Honors Curriculum—Academically qualified students in this department are encouraged to complete an honors curriculum in University Honors, Honors in the Major, or General Honors. All Honors students must complete the one-hour honors colloquium (G H 299). General Honors includes General Honors coursework. Honors in the Major includes honors work in the major. University Honors combines Honors in the Major and General Honors. For more information about honors curricula, see page 100 or visit the Centennial Honors College website at wiu.edu/Honors.

Integrated Baccalaureate and Master's Degree Program—An integrated baccalaureate and master’s degree program is available for the Bachelor of Arts in Communication: Master of Arts in Communication. An integrated degree program provides the opportunity for outstanding undergraduates to earn both degrees in five years. Please refer to the Graduate Studies catalog for details about the integrated program.
# Degree Program

## Bachelor of Arts—Communication

All students seeking the Bachelor of Arts in Communication must complete I, II, III, IV, V, and VI below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h. Current WIU students must be in good standing (2.0 GPA or higher) to declare a major in Communication.

I. University General Education Curriculum (p. 70).........................................................43 s.h.

II. Core Courses ....................................................................................................................15 s.h.
   COMM 130, 247†, 309, 310†, 311

III. Options of Study (Select A, B, C or D) ........................................................................27 s.h.
   A. Communication Studies
      1. Comprehensive Electives.................................................................9 s.h.
         Choose three of the following courses: COMM 312, 343, 344, 356
      2. Advanced Theory Elective...............................................................3 s.h.
         Choose one of the following courses: COMM 410, 413, 441, 457
      3. Communication Electives ...............................................................6 s.h.
         Choose two additional COMM courses
      4. Applied Communication Electives ..................................................9 s.h.
         Choose three of the following courses: COMM 235, 305, 314, 341, 409, 413, 425, 430, 456, 496
   B. Interpersonal Communication and Processes
      1. Interpersonal Sequence: COMM 344, 377, 410 ..................................9 s.h.
      2. Directed Electives ...........................................................................9 s.h.
         Choose three of the following courses: COMM 235, 315, 330, 345, 356, 409, 425, 428
      3. Communication Electives ...............................................................9 s.h.
         Choose three additional COMM courses
   C. Social Influence
      1. Social Influence Sequence: COMM 356, 456, 457.........................9 s.h.
      2. Directed Electives ...........................................................................9 s.h.
         Choose three of the following courses: COMM 312, 314, 344, 377, 409, 425, 441
      3. Communication Electives ...............................................................9 s.h.
         Choose three additional COMM courses
   D. Organizational Communication
      1. Organizational Communication Sequence: ....................................9 s.h.
         COMM 343, 413, 430
      2. Directed Electives ...........................................................................9 s.h.
         Choose three of the following courses: COMM 235, 305, 314, 344, 381, 409, 496
      3. Communication Electives ...............................................................9 s.h.
         Choose three additional COMM courses

IV. Any Approved Minor ....................................................................................................16–20 s.h.

V. Open Electives .............................................................................................................15–19 s.h.

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) a Communication (COMM) global issues course; or 4) an approved Study Abroad program.

† COMM 247 and 310 fulfill the Writing Instruction in the Disciplines (WID) graduation requirement.
Minors

Minor in Communication ...................................................... 18 s.h.
1. COMM 130 and 247 ......................................................... 6 s.h.
2. Select three of the following: COMM 312, 343, 344, 356 .............. 9 s.h.
3. COMM Electives from courses numbered 300 or higher............... 3 s.h.

Minor in Computer-Mediated Communication ...................................... 18 s.h.
1. COMM 130, 345, 445 ...................................................... 9 s.h.
2. Choose one of the following: CS 101, GCOM 218 ......................... 3 s.h.
3. Choose two of the following: CS 315, 320, 483; IS 324, 325; GCOM 318, 419; IDT 480; ENG 480 ...... 6 s.h.

Course Descriptions

COMMUNICATION (COMM)

130 Introduction to Human Communication. (3) (General Education/Humanities) Introduction to the various approaches and sub-fields which comprise speech communication, with a focus on the theoretical foundations of contemporary human communication theory.

235 Communicating in Small Groups. (3) (General Education/Social Sciences) Broad examination of the functioning of communication in small groups, including practical advice for becoming a more effective group member.

241 Introduction to Public Speaking. (3) (General Education/Communication Skills) Preparation and delivery of informative and persuasive speeches. Students apply concepts of critical listening, audience adaptation, organization/support of ideas, appropriate style, and effective delivery. Not open to students with credit for COMM 242. Accelerated section available.

IAI: C2 900

242 Fundamentals of Public Speaking. (3) (General Education/Communication Skills) Preparation and delivery of informative and persuasive speeches. Students apply concepts of critical listening, audience adaptation, organization/support of ideas, appropriate style, and effective delivery completed in an online format. Not open to students with credit for COMM 241.

247 Argumentation. (3) A theoretical and practical course investigating source, structure, and nature of argument, reasoning, critical thinking, and validation of evidence. Writing Instruction in the Disciplines (WID) course. Prerequisite: COMM 241 or consent of instructor.

254 Great Speeches. (3) (General Education/Humanities) An analysis of representative speeches that have significantly influenced the course of human events.

305 Interviewing. (3) Theory of interviewing and its purposes in various communication settings. Practical applications of the principles of interviewing.

309 Communication Theory. (3) A survey of communication theories. This course will also address the process of theory building and the role of communication theory across major paradigms guiding communication research. Prerequisite: COMM 130 with a grade of C or higher.

310 Qualitative Research Methods in Communication. (3) A survey of the qualitative research methods used in communication studies. Qualitative research design, data collection, analysis, and interpretation are addressed. Writing Instruction in the Disciplines (WID) course. Prerequisite: COMM 130 with a grade of C or higher; ENG 180 and 280.

311 Quantitative Research Methods in Communication. (3) An introduction to designing and evaluating communication research. Prerequisites: COMM 130 with a grade of C or higher; ENG 180 and 280.

312 Rhetorical Criticism. (3) This course introduces students to theories and methods of rhetorical criticism that enable them to function as effective consumers of public discourse. Case studies of significant rhetorical acts from political speeches, movies, advertisements, visuals, and music are used to introduce important concepts. Students will develop an understanding of how rhetoric functions to influence attitudes, values, and behaviors in our public culture. Prerequisite: COMM 130.

314 Professional Presentations. (3) Preparation and delivery of speeches and presentations in professional settings utilizing advanced rhetorical principles and advanced communication technologies. Prerequisites: ENG 180 and 280; COMM 241.

315 (Cross-listed with WS 316) Gender and Communication. (3) This course examines gender and gender-role differences and similarities in verbal and nonverbal communication and surveys several contexts in which sex differences in human communication occur. Not open to students with credit in WS 316. Prerequisite: COMM 130.

330 Language and Communication. (3) This survey course explores the historical and contemporary functions of language in communication. The course will examine theories of language, meaning, and communication, with emphasis on contemporary language research and controversies surrounding language and meaning in society. Prerequisite: COMM 130.

333 Risk and Crisis Communication. (3) Course is intended to provide students with an understanding of key elements of risk and crisis communication in organizational and health communication settings—pre-crisis, crisis, and post-crisis. Course focuses on understanding and developing effective messaging in such situations. Prerequisite: COMM 130 and ENG 180.

341 Small Group Communication. (3) Examination of significant factors which affect the behavior and effectiveness of social and task groups. Study of group behavior research.

343 Organizational Communication. (3) Survey of the major communication functions in organizations and their relationship to personnel, administrative, technological, and social factors. Prerequisites: COMM 130; ENG 180 and 280.

344 Interpersonal Personal Communication. (3) Theory and concepts relevant to face-to-face interaction. Focus on the content of communication in relationships and the role of communication in creating and defining relationships. Prerequisites: COMM 130; ENG 180 and 280.

345 Computer-Mediated Communication. (3) Exploration of communication technology. Focus on and examination of competent communication...
technology use in a variety of contexts. Analysis of problematic issues of CMC including accuracy, trust, privacy, and identity. Prerequisite: COMM 130.

356 Persuasion. (3) Examination of the elements affecting people's opinions and decisions. Focuses on three general categories of variables: source, message, and audience characteristics. Prerequisite: COMM 130.

377 Nonverbal Communication. (3) Introduces basic codes, properties, and principles of nonverbal communication. Multidisciplinary content approached from scientific perspective rather than intuitive and experiential judgments. Designed to improve the communication effectiveness and understanding of the communication process. Prerequisite: COMM 130.

381 Intercultural Communication. (3) (Global Issues) An introduction to the study of intercultural communication, with an emphasis on the application of communication approaches that increase intercultural understanding. Topics include interpersonal/intercultural theory and applications, globalization, cultural differences, and contemporary issues in language across cultures. Prerequisite: COMM 130.

400 Senior Honors Thesis Research. (3) Bibliographic and other preliminary work in preparation for a senior honors thesis (see COMM 401). Students will produce a final, graded project for this course. This course may not be taken concurrently with COMM 401. Prerequisites: ENG 180 and 280; COMM 310 or 311; students must be in good standing in the Centennial Honors College and must be juniors or first-semester seniors majoring in Communication.

401 Honors Thesis. (3) Students will write a senior honors thesis. This course may not be taken concurrently with COMM 400. Prerequisites: COMM 400; ENG 180 and 280; students must be in good standing in the Centennial Honors College and must be seniors majoring in Communication.

410 Advanced Interpersonal Communication. (3) Study of theory, concepts, and methodology relevant to communication in close relationships. Examination of the dynamics and management of interaction within these contexts. Prerequisites: COMM 130 with a grade of C or higher; COMM 311 with a grade of C or higher; COMM 344; ENG 180 and 280.

413 Advanced Organizational Communication. (3) Study of communication in small groups and organizational settings. Examination of field, survey, and experimental studies contributing to the understanding and improvement of group and organization communication. Prerequisites: COMM 130 with a grade of C or higher; COMM 311 with a grade of C or higher; COMM 343; ENG 180 and 280.

418 Independent Research in Communication. (1–6, repeatable to 6) Individual reading or research under supervision of the faculty. Open to juniors and seniors who have demonstrated competence in broadcasting, communication, rhetoric, public address, or the speech-language-hearing sciences. Prerequisites: ENG 180 and 280; consent of instructor and department chairperson.

425 Health Communication. (3) This course will survey a number of topics relevant to both the institutional settings of medicine (e.g., doctor-patient interaction, media campaigns) as well as the interpersonal ramifications of illness (e.g., social support). Prerequisite: COMM 130 or permission of instructor.

428 Family Communication. (3) This course will investigate communication processes in the context of the family environment. Specifically, it will examine communication's role in and its influence on family relational processes. Prerequisite: COMM 130 or permission of instructor.

430 Communication Training and Development. (3) This course explores the knowledge and skills necessary to engage in effective communication training and development in organizations and/or consulting in the field of communication. Prerequisite: COMM 311.

441 Rhetoric and Public Culture. (3) The study of rhetoric's power to shape and sustain public culture. Students learn how rhetoric influences civic and cultural life and execute an independent project examining the rhetorical strategies, argumentative approaches, and cultural significance of an influential rhetorical text. Prerequisites: COMM 312; ENG 180 and 280.

445 Advanced Computer-Mediated Communication. (3) Study of message and relational processes in computer-mediated communication. Examination of theory and research exploring how individuals share, send, and receive messages via communication technologies. Prerequisite: COMM 345.

456 Persuasive Campaigns. (3) Study of the design and execution of persuasive campaigns. Prerequisites: COMM 130 with a grade of C or higher; COMM 311 with a grade of C or higher; COMM 356; ENG 180 and 280.

457 Social Influence. (3) Study of theories, methodology, and concepts of compliance gaining, message design, persuasion, and resistance to persuasion. Prerequisites: COMM 130 with a grade of C or higher; COMM 311 with a grade of C or higher; COMM 356; ENG 180 and 280.

480 Special Topics in Communication. (1–3, repeatable to 6, for different topics, with permission of department chair) This course deals with selected topics of interest in communication such as nonverbal communication, intercultural communication, and family communication. Prerequisites: ENG 180 and 280; completion of at least 12 s.b. in Communication.

496 Communication Internship. (1–12, repeatable to 12) Directed work assignments in private or public sectors in communication areas. Students may count up to 3 s.h. of COMM 496 toward the Communication major. Prerequisites: Junior standing; 12 s.b. of Communication courses completed; ENG 180 and 280; permission of internship coordinator and department chairperson; a GPA of 2.50 in major courses taken as well as an overall GPA of 2.25. Graded S/U only.
Program Offerings and Locations:

- Bachelor of Science in Computer Science: Macomb
- Bachelor of Science in Cyber Security: Macomb
- Bachelor of Science in Information Systems: Macomb, Quad Cities (Information Systems emphasis)
- Minor in Algorithms and Data Management: Macomb
- Minor in App Development: Macomb
- Minor in Computer Science: Macomb, Online
- Minor in Computer Science Education: Macomb, Quad Cities
- Minor in Cyber Security: Macomb
- Minor in Information Systems: Macomb, Quad Cities
- Minor in Information Technology: Macomb
- Minor in Network Technologies: Macomb

For student learning outcomes, please see wiu.edu/provost/learningoutcomes.

Faculty: Baramidze, Bui, Calkins, Clayton, Covert, Deng, DeVolder, George, Kim, LaFlam, B. Lee, I. Lee, Leff, Mangalaraj, Maskarinec, J.M. McQuillan, Sen, Woolley, Zhao.

Since its commercial introduction in the 1940s, the computer has wrought major changes in business, industry, government, and science, and with the possible exception of television, no other recent invention has so completely altered society as a whole. The student choosing to major in Computer Science, Cyber Security, or Information Systems is entering a dynamic career area filled with challenge and unlimited opportunities for individual growth.

The School of Computer Sciences offers a comprehensive curriculum. All students are expected to complete a core sequence in which they acquire the fundamental skills in computing or information systems and mathematics. Students may select advanced courses from a wide variety of specialized areas within Computer Science, Cyber Security, or Information Systems. Current offerings permit the student to become involved with a broad spectrum of business and scientific applications, software, and database design, or the more theoretical basis of computing. The undergraduate degree programs offer course sequences leading to the Bachelor of Science in Computer Science, Bachelor of Science in Cyber Security, and Bachelor of Science in Information Systems.

GradTrac is available to Computer Science, Cyber Security, and Information Systems majors. See page 79 for information about GradTrac.

Honors Curriculum—Academically qualified students in this School are encouraged to complete an honors curriculum in University Honors, Honors in the Major, or General Honors. All Honors students must complete the one-hour honors colloquium (G H 299). General Honors includes General Honors coursework. Honors in the Major includes honors work in the major. University Honors combines Honors in the Major and General Honors. For more information about honors curricula, see page 100 or visit the Centennial Honors College website at wiu.edu/Honors.

Integrated Baccalaureate and Master's Degree Program—Two integrated baccalaureate and master's degree programs are available for the Bachelor of Science in Computer Science: Master of Science in Computer Science and Master of Business Administration. An integrated degree program provides the opportunity for outstanding undergraduates to earn both degrees in five years. Please refer to the Graduate Studies catalog for details about the integrated program.
Degree Programs

Bachelor of Science—Computer Science

The program for the bachelor’s degree shall contain the required departmental core of 21 s.h., a depth component of 12 s.h., UNIX, and Departmental Electives chosen in consultation with the departmental advisor.

The School of Computer Sciences offers three emphases of courses designed to meet the career paths of its students; each student will choose an emphasis after consultation with the advisor and with the approval of the School.

The Computer Science major requires a minor from one of the other disciplines on campus. Students may choose any minor (except as outlined below) or an approved cognate minor.

All students seeking the Bachelor of Science in Computer Science must complete I, II, and III.A, III.B, or III.C below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

I. University General Education Curriculum (p. 70) .......................................................
   (To include MATH 133 for Computer Science or Cyber Security emphasis; to include MATH 133 or 137 for Big Data Technologies emphasis)

II. Core Courses ..................................................................................................................

   CS 214, 250, 310, 351, 355, 491†, 492†

III. Select one of the following emphases:

A. Computer Science .................................................................................................................56 s.h.
   1. Depth Courses .................................................................................................................. 12 s.h.
      Choose four of the following: CS 400, 410, 420, 460, 465, 470
   2. CS/CSEC 371 .................................................................................................................... 3 s.h.
   3. Departmental Electives ................................................................................................. 9 s.h.
      Choose from CSEC 375 or any CS course except CS 101, 102, 225, 302, 315, 455, 483, 484, and 488.
   4. Other
      MATH 255, 311, and STAT 276 ..................................................................................... 9 s.h.
   5. Minor ............................................................................................................................ 16 s.h.
   6. Open Electives ................................................................................................................. 7 s.h.

B. Cyber Security ......................................................................................................................56 s.h.
   1. Depth Courses .................................................................................................................. 6 s.h.
      Choose two of the following: CS 305, 306, 400, 410, 425, 470;
      IS 355; or any 300- or 400-level CSEC course
   2. CS/CSEC 371, 395, 398; CSEC 321, 322, 436; IS 315 .................................................... 21 s.h.
   3. Other
      MATH 255 and STAT 276 ............................................................................................. 6 s.h.
   4. Minor ............................................................................................................................ 16 s.h.
   5. Open Electives ................................................................................................................. 7 s.h.

Note: Students enrolled in the Cyber Security emphasis may not
minor in Cyber Security.

C. Big Data Technologies .......................................................................................................56 s.h.
   1. Depth Courses .................................................................................................................. 12 s.h.
      CS 460, 470, 472; and either 425 or 478
   2. CS 210 and CS/CSEC 371 ........................................................................................... 6 s.h.
   3. Departmental Electives ................................................................................................. 6 s.h.
      Choose two of the following: CS 465, 486; IS 340, 341, 405
   4. Other
      MATH 255 and STAT 276 ............................................................................................. 6 s.h.
   5. Minor ............................................................................................................................ 18–20 s.h.
      Choose the minor in Applied Mathematics, the minor in Business Analytics, or a minor approved by the School of Computer Sciences
   6. Open Electives ................................................................................................................. 6–8 s.h.
# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) any major’s discipline-specific global issues course; or 4) a Study Abroad program preapproved by the School.

† CS 491 and CS 492 fulfill the Writing Instruction in the Disciplines (WID) graduation requirement.

A minimum cumulative grade point average of 2.00, both in Computer Science courses and overall, should be achieved by the junior year. These grade point averages must be maintained for graduation as a Computer Science major.

Bachelor of Science—Cyber Security

The Cyber Security major is a comprehensive major.

All students seeking the Bachelor of Science in Cyber Security must complete I, II, III, IV, and V below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

I. University General Education Curriculum (p. 70) .......................................................... 43 s.h.
   (To include CS 214, STAT 171 [if STAT 276 is not chosen in IV.D.] either MATH 133 or MATH 137, and either POLS 101 or POLS 122)

II. Core Courses .................................................................................................................. 54 s.h.
   CS 210, 250, 305, 310, 320, 351, 410; CS/CSEC 371, 395, 398; CSEC 321, 322, 375, 436, 482, 489; IS 315, 355

III. Departmental Electives ................................................................................................. 3 s.h.
    Choose 1 course from the following list:
    CS 306, 355, 470; CSEC 323, 330, 345, 494; IS 340, 345

IV. Other .................................................................................................................................... 18 s.h.
   A. BCOM 320† or LEJA 443† .......................................................................................... 3 s.h.
   B. MATH 255 .................................................................................................................... 3 s.h.
   C. ACCT 200 or 201; ACCT 457 ..................................................................................... 6 s.h.
   D. Choose any two courses from the following list: ......................................................... 6 s.h.
      CHEM 251; CSEC 497; DS 303, 423, 435; LEJA 208, 415;
      POLS 300 or 302; STAT 276

V. Open Electives .................................................................................................................. 2 s.h.

Bachelor of Science—Information Systems

All students seeking the Bachelor of Science in Information Systems must complete I, II, III.A or III.B, IV, V, and VI below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

I. University General Education Curriculum (p. 70) .......................................................... 43 s.h.
   (To include MATH 133 or 137, STAT 171, and IS 325)

II. Core Courses .................................................................................................................. 21 s.h.
   CS 214, 250; IS 340, 341, 342, 462, 467
III. Select one of the following emphases ................................................................. 24 s.h.
   A. Information Systems
      1. Directed IS Electives
         a. CS 484 or IS 324 ................................................................. 3 s.h.
         b. Choose 3 courses from IS 343, 355, 405, 410, 415......................... 9 s.h.
      2. Departmental Electives ................................................................. 12 s.h.
         Choose 4 courses from CS 114 or any 300-level course or above in
         Computer Science (CS), Cyber Security (CSEC), or Information
         Systems (IS) (except CS 302, 315, 420, 470, 483, 484; IS 324, 325)
   B. Cyber Security
      1. CS 305; IS 315, (344 or 345), 355; CS/CSEC 395; CSEC 321, 322...... 21 s.h.
      2. Directed Electives ............................................................................. 3 s.h.
         Choose 1 course from CS 306; CS/CSEC 398; CSEC 323, 330,
         345, 375, 422, 436, 482, 489; IS 410, 415

IV. Other .................................................................................................................. 6 s.h.
   BCOM 320†, DS 303

V. Minor .................................................................................................................. 16 s.h.
   Select any business minor
   
   Note: Students enrolled in the Cyber Security emphasis may not minor in Cyber Security.

VI. Open Electives .................................................................................................. 10 s.h.

# The foreign language/global issues graduation requirement may be fulfilled by
   successfully completing one of the following: 1) a designated foreign language requirement
   [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global
   issues course; 3) any major's discipline-specific global issues course; or 4) a Study Abroad
   program preapproved by the School.

† BCOM 320 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.

Minors

Minor in Algorithms and Data Management .......................................................... 18 s.h.
   1. CS 210, 214, 250, 351, 470................................................................. 15 s.h.
   2. Select one course from the following:
      CS 114, 460, 472, 486; DS 435, 490; MATH 255, 341 ............................... 3 s.h.
   
   Note: Not open to students whose major is in the School of Computer Sciences.
   
   Note: If you wish to take CS 114 as part of this minor, please note that it must be taken
   before taking CS 214, as credit cannot be given for CS 114 after or in the same semester
   as credit is given for CS 214.

Minor in App Development .................................................................................... 18 s.h.
   1. CS 214, 250............................................................................................ 6 s.h.
   2. (CSEC 321 and CSEC 422) or (IS 340 and IS 415).................................... 6 s.h.
   3. Select two courses from the following: ................................................. 6 s.h.
      CS 425, 486; CSEC 345; IS 341
   
   Note: Not open to students whose major is in the School of Computer Sciences.

Minor in Computer Science .................................................................................... 18 s.h.
   Traditional
   1. CS 114, 214, 250..................................................................................... 9 s.h.
   2. Computer Science Electives ...................................................................... 9 s.h.
   
   Note: A total of 6 s.h. must be at the 300 level or above.
   
   Computer Applications
   1. CS 101, (CS 114 or CS 220 or CS 488), (CS 301 or CS 302),
      and (CS 315 or IS 340)........................................................................... 12 s.h.
   2. Computer Science Electives ...................................................................... 6 s.h.
   
   Note: All 6 s.h. must be at the 300 level or above.
Minor in Computer Science Education ................................................. 18 s.h.
1. CS 214, 250, 315, 320, 439 .......................................................... 15 s.h.
2. Select one course from the following:
   CS 114 (if taken prior to CS 214), 210, 343 ................................. 3 s.h.

Note: This minor is not sufficient for an Illinois Professional Educator License.
Note: Not open to students enrolled in the Computer Science major.

Minor in Cyber Security ................................................................. 18 s.h.
1. CSEC 321; IS 315 ........................................................................ 6 s.h.
2. Choose one course from each of the following categories:
   a. CS 114 or CS 214 ............................................................... 3 s.h.
   b. CS/CSEC 395 or CS 455 .................................................. 3 s.h.
3. Choose two courses from the following:
   CS 305, 306, 320; IS 355; or any 300- or 400-level CSEC course ....... 6 s.h.

Note: Not open to students enrolled in the Cyber Security major, the Cyber Security emphasis within the Computer Science major, or the Cyber Security emphasis within the Information Systems major.

Minor in Information Systems ......................................................... 18 s.h.
1. CS 214; IS 340, 341, 342 .......................................................... 12 s.h.
2. Select remaining hours from CS 114 or upper division IS courses ...... 6 s.h.

Minor in Information Technology .................................................. 18 s.h.
1. CS 114 or 214; IS 340; CSEC 321 .............................................. 9 s.h.
2. Choose one course from each of the following categories: ............. 9 s.h.
   a. Computer Science: CS 305, 315, 320, 455, 483
   b. Information Systems: IS 315, 325, 341, 355, 415
   c. Cyber Security: CSEC 322; CS/CSEC 395, 398

Minor in Network Technologies ..................................................... 18 s.h.
1. CS 114, 214; CSEC 321, 322 .................................................... 12 s.h.
2. Choose any two from: CSEC 323, 375, 422, 436; CS 320;
   CS/CSEC 395 ....................................................................... 6 s.h.

Course Descriptions

COMPUTER SCIENCE (CS)

101 Computer Literacy I. (3) Covers computer hardware and computing concepts; introduction to word processing, spreadsheets, database, electronic communications, and presentation software. Cannot be applied to the Computer Science major. Credit cannot be given for more than one of CS 101 or 203.
IAI: BUS 902

102 Computer Literacy II. (3) Covers advanced word processing, presentation graphics, database software, integration of software, and software needs analysis. Will contain a team project. Cannot be applied to the Computer Science major. Prerequisite: CS 101 or equivalent.

114 Introduction to Computer Science. (3) (General Education/Natural Sciences and Mathematics)
Introduction to computer algorithms, problem specification, correctness, computer structure, sets, truth tables, functions, and iteration. Presentation of basic principles of a current programming language. Credit cannot be given for CS 114 after or in the same semester as credit is given for CS 214. Credit cannot be given for CS 114 and CS 211 or CS 212 or CS 201.

210 Python for Data Exploration. (3) Programming data-intensive and computational applications in Python. The emphasis is on using Python’s various technical libraries and tools geared toward data manipulation, visualization, and analysis, as well as scientific computing. Relevant case studies are used to hone these skills. Prerequisites: CS 114 or CS 214 and (MATH 128 or STAT 171).

214 Principles of Computer Science. (3) (General Education/Natural Sciences and Mathematics)
Introduction to computer program design, testing, documentation, simple data structures, references, sorting, searching, and algorithm development. Credit cannot be given for both CS 214 and CS 202. Prerequisite: MATH 100. Corequisite: MATH 128. 3 hrs. lect.; 1 hr. lab.
IAI: CS 911

220 Introduction to COBOL. (3) Structured programming methods in COBOL. Introduction to file concepts and file processing.

225 Programming for Engineering and Science. (3) Fundamental principles, concepts, and methods of computing, with emphasis on applications in the physical sciences and engineering. Basic problem solving and programming techniques; fundamental algorithms and data structures; use of computers in solving engineering and scientific problems. Cannot be used towards a major in Computer Science. Prerequisite: MATH 133.

230 External Files. (3) To introduce concepts and techniques to create and maintain sequential, indexed, and relative files using Virtual Storage Access Methods
(VSAM) and Access Method Service utilities (IDCAMS). Prerequisite: CS 220 or equivalent.

250 Data Structures I. (3) Review of basic structures; object-oriented techniques; analysis, comparison, and design of algorithms for data structure processing; binary trees, recursion; sorting, searching methods. Prerequisites: CS 214 with a grade of C- or better and MATH 128 or equivalent. IAI: CS 912.

301 Spreadsheet Applications. (3) This course covers advanced spreadsheet techniques including microprogramming. Also covered are on-line information systems, package installation, and other advanced application techniques. Credit cannot be given for both CS 301 and CS 302. Prerequisite: CS 101 or 203.

302 Spreadsheet and Database Applications. (3) Covers both spreadsheet and database applications from a business perspective. Emphasis will be placed on working with formulas, formatting, charting, query construction, form generation, report generation, and the integration of these applications. Cannot be applied towards the Computer Science major. Credit cannot be given for both CS 483 and CS 302. Prerequisite: CS 101 or equivalent.

305 Introduction to Computer Forensics. (3) An introduction to computer forensics. The course will cover a range of computer hardware and forensics software tools on current and past operating systems. Prerequisite: CS 101 or CS 114 or CS 214 or equivalent.

306 Advanced Computer Forensics. (3) Computer forensic software will be used for data acquisition and analysis. Topics include forensic issues common to file systems, evidence collection, and case building tasks regularly used in the analysis of electronic evidence. Prerequisite: CS 305.

310 Computer Organization I. (3) Numeric representation, logic gates, latches, adder design, architectural components: ALU, bus, IO devices; memory organization; instruction set design and tradeoffs, addressing techniques. Prerequisites: CS 214.

315 E-Commerce Technology. (3) Concepts, design, and applications related to electronic commerce. Course is designed for nonmajors, especially those who will manage or operate an E-Commerce system in a business environment. Cannot be applied toward the Computer Sciences major. Credit cannot be given for both CS 101 or CS 114 or an introductory programming class.

320 Ethical, Social and Legal Issues in the Digital World. (3) (Global Issues) Study of challenges and implications of computer technology for users and IT professionals. Topics include global perspectives on ethical, social, and legal issues in software quality, freedom of expression, privacy, intellectual property, hacking, and computer crime. BGS online writing course. Prerequisite: junior standing.

343 Physical Computing. (3) Building interactive physical systems using software and hardware to sense and control the physical world. Topics include software development with sensors, electro-mechanical devices, microcontrollers, and peripheral devices. Prerequisite: grade of C- or better in one of the following: CS 114, 214, 225, 488.

351 Data Structures II. (3) Advanced data structures with emphasis on non-linear data structures. Strategies for constructing algorithmic problem solutions. Analyzing the time and space efficiency of algorithm implementations. Prerequisites: CS 250 with a grade of C- or better and (MATH 255 or MATH 341).

355 Automata and Computability Theory. (3) An introduction to the modern theory of computing: automata theory, formal languages, and effective computability. Topics covered include finite automata and regular languages; pushdown automata and context-free languages; Turing machines and general computability; undecidability and the halting problem. Prerequisites: junior standing and (MATH 255 or MATH 341).

371 (Cross-listed with CSEC 371) UNIX. (3) An introduction to the UNIX environment. Includes shell commands, scripting, regular expressions, SED, process manipulation, forks, threads, process synchronization, introduction to system programming. Not open to students with credit in CSEC 371. Prerequisite: CS 250 or Corequisite: CS 250.

398 (Cross-listed with CSEC 398) Cyber Security Principles. (3) Basics of security design principles, security mechanisms, security policies, and network defense. Topics: security design, threats, risk assessment, access control models, network defense, firewalls, secure coding, design and implementation, materials, computer learning systems analysis and design, interconnection structures, and technologies related to electronic commerce system development will be covered. Emphasis will be placed on developing the infrastructure and exploring the emerging technical issues in support of E-Commerce. Prerequisite: CS 250.

400 Computer Organization II. (3) Computer systems analysis and design, interconnection structures, memory, input/output processors, machine instructions sets, microprogramming, CPU structures, control units, parallel processing, computer architectures and systems. Prerequisites: CS 214 and 310.

410 Operating Systems. (3) Overview of the concepts/theory of operating systems with emphasis on process management, memory management, file management, scheduling, device management, and synchronization. Credit cannot be given for both CS 410 and CS 510. Prerequisites: CS 310 and (CS 250 or CS 500*). *(If taking CS 410G.)

415 E-Commerce Systems Development. (3) Tools and technologies related to electronic commerce system development will be covered. Emphasis will be placed on developing the infrastructure and exploring the emerging technical issues in support of E-Commerce. Prerequisite: CS 250.

420 Computer Communication and Networks. (3) Survey of the operational features of telecommunications systems, computer networks, and distributed-processing systems. Considerations for the design of real-time systems. Credit cannot be given for both CS 420 and CS 581. Prerequisites: CS 310 and (CS 250 or CS 500*). *(If taking CS 420G.)

425 Server-Side Web Development. (3) Significant development of server-side web applications using server-side architecture and a current scripting language. Prerequisite: CS 351 or (CS 250 and IS 415) or (CS 250 and CSEC 422).

439 Methods of Teaching Middle and High School Computer Science. (3) Designed to aid the middle and high school computer science teacher in developing curriculum objectives, learning standards implementation, materials, computer learning environments, and evaluation and assessment. Includes reading, analyzing, and debugging code through exercises, demonstrations, discussions, lectures, and classroom participation. Prerequisite: CS 250.

455 Computer System Security. (3) Survey of major system security: vulnerabilities, system security, and focus on detection and prevention. Hardware and software discussed. Cannot be applied to the Computer Science major. Prerequisite: CS 101 or CS 114 or equivalent.

460 Artificial Intelligence Methods. (3) An introduction to the main principles and methods of artificial intelligence. Solving problems by searching,
knowledge, and reasoning; machine learning; current AI applications. Programming paradigms relevant to AI will be explored. Credit cannot be given for both CS 460 and CS 547. Prerequisite: CS 351 or CS 500*. (*If taking CS 460G.)

465 Computer Graphics. (3) Introduction to computer-generation of graphs and pictures, using both character and pixel graphics, in two and three dimensions. Animation techniques, CAD methods. Computer lab projects. Credit cannot be given for both CS 465 and CS 565. Prerequisite: CS 351 or CS 500*. (*If taking CS 465G.)

470 Database Systems. (3) Survey of data models with emphasis on the relational model. Data normalization. Query languages and query optimization. Design, implementation, and security considerations. Exposure to commercial database management systems. Credit cannot be given for both CS 470 and CS 483 or CS 521 or IS 342. Prerequisite: (CS 250 and CS/CSEC 395 or CS 351 or CS/CSEC 390 or CSEC 432) or CS 500*. (*If taking CS 470G.)

472 Introduction to Big Data. (3) This course focuses on the big data technologies that facilitate the preparation, storage, and processing of big data. Specific state-of-the-art big data technologies such as distributed file systems, parallel programming models, and high performance databases are covered. Prerequisites: CS 310 and (CS/CSEC 371 or CSEC 375).

478 GPU Programming. (3) Graphics Processing Unit (GPU) programming. Parallel algorithms and programming techniques for GPUs. Sorting algorithms, matrix manipulation algorithms, sparse matrices. Prerequisites: CS 351 and CS/CSEC 371.

483 Elementary Database Applications. (3) Covers command language, programming logic, and applications of database systems for the non-Computer Science major. Cannot be applied to the Computer Science major. Credit cannot be given for both CS 483 and (CS 302 or CS 470 or IS 342). Prerequisite: CS 101 or 114.

484 Network and Data Communications Concepts. (3) Concepts and design of commercial computer and telecommunications networks. Course is designed for nonmajors, especially those who will manage or operate networks in a business environment. Cannot be applied toward the Computer Science major. Credit cannot be given for both CS 484 and (CS 324 or CS 420). Prerequisite: CS 101 or CS 114 or CS 214 or (CS 211 and CS 212).

486 Mobile Application Development. (3) Development of applications for mobile computing devices. Topics include mobile platforms and languages; application design for small screens; battery and resource management; debugging and testing techniques; and application distribution ecosystems. Prerequisite: CS 250 or permission of instructor.

488 Introduction to Programming with Visual Basic. (3) Introduction to the principles of programming for Windows in Visual Basic. Principles include event-driven programming, control structures, data types and structures, properties, events, methods of controls, and forms. Cannot be applied toward the Computer Science major. Prerequisite: CS 101 or ET 105, or equivalent.

491 Software Engineering I. (3) This course will focus on the design principles of large software systems. Topics include software life cycle models, agile methods, requirements engineering, object-oriented design and analysis, software architecture styles, prototyping, and team participation. Writing Instruction in the Disciplines (WID) course. Prerequisites: CS 351, 355; ENG 280; and at least 85 s.h.; or consent of School.

492 Software Engineering II. (3) This course covers project management, implementation, testing, and maintenance of a large software system following industrial standards. Topics include scheduling, estimation, source control, testing strategies, testing techniques, and teamwork. Writing Instruction in the Disciplines (WID) course. Prerequisite: CS 491.

495 Computer Science Internship. (1–12, repeatable to 12) Credit for work experience in a research, governmental, or business organization. Internship project report required. Only 3 s.h. can be used for the major. Prerequisites: Computer Science major, 15 s.h. of Computer Science courses, and written permission of the School director. Graded S/U only.

497 Senior Honors Project. (3–6, repeatable to 6) This course provides a project option within the departmental Honors Program. Project directed by a faculty member of the School of Computer Sciences. Prerequisite: approval of the Honors Program participant or consent of School.

499 Independent Study. (1–3, repeatable to 6, 6 per semester) Individual study or research in an area of Computer Science under the supervision of a Computer Science faculty member. Project report required. Prerequisite: approval of School of Computer Sciences.

CYBER SECURITY (CSEC)

101 Introduction to Cybersecurity. (3) Cybersecurity affects individuals, industry, and governments. A high-level overview on the importance of cybersecurity, system and infrastructure security, usable security, operational security, technological aspects of cybersecurity, and cyber defense, and legal/ethical issues.

321 (Formerly NET 321) Network Fundamentals. (3) Introduction to the diverse software and hardware components of a computer network. Topics include OSI and TCP/IP network architecture, overview of TCP/IP protocols, access networks, network topologies, circuit, packet and virtual circuit switching, switched LANs, and LAN Security. Prerequisites: CS 114 or 214.

322 (Formerly NET 322) Switching and Routing I. (3) An examination of network protocols for creating and managing a switched network. Topics will include Ethernet LANs, Virtual LANs, VLAN trunking, network and link layer addressing, subnetting, DHCP, access control lists, NAT and introduction to routing. Prerequisite: CSEC 321.

323 (Formerly NET 323) Switching and Routing II. (3) An examination of interior and exterior routing protocols. Topics will include intra-AS and inter-AS routing protocols, IPv4 and IPv6 routing configuration, load balancing routing, VPN tunnels, and managing network devices via SNMP. Prerequisite: CSEC 322.

330 Cyber-Physical Systems. (3) This course introduces the fundamentals and security challenges in emerging cyber-physical systems. Topics include system modeling, analysis, design and simulation, scheduling, and security. Prerequisites: CS 305 and CSEC 321.

345 Secure Coding and Design. (3) Secure software design. Identifying and fixing security flaws in code. String security flaws and resulting vulnerabilities, including buffer overflows, stack smashing, and code injection. Pointers, I/O, runtime protection strategies, and dynamic memory management. Prerequisite: CS 250 and CS/CSEC 371, or permission of the School.

371 (Formerly NET 371) (Cross-listed with CS 371) UNIX. (3) An introduction to the UNIX environment. Includes shell commands, scripting, regular expressions, SED, process manipulation, forks, threads, process synchronization, introduction to system programming. Not open to students with credit in CS 371. Prerequisite: CS 250 or Corequisite: CS 250.

375 (Formerly NET 375) Linux Systems Administration. (3) Administration of server systems, configuring users, groups, and devices, software management, backups, network services configuration,
server security and performance, scripts for server management. Prerequisite: CS/CSEC 371 or permission of School.

422 (Formerly NET 422) Web Technologies. (3) An examination of the Web and its current development technologies. Topics will include HTML, XML, scripting, Web databases, and Web services. Prerequisite: CSEC 321.

432 (Formerly NET 432) Network Performance Analysis. (3) Introduces the basic concepts of computer network performance evaluation, modeling of traffic flows, network queues, delay, and loss models. Topics will also include performance evaluation of multiple access methods, measurement, and simulations of network performance. Prerequisites: CSEC 322; (MATH 133 or 137); MATH 255; STAT 171.

434 (Formerly NET 434) Distributed Systems. (3) Covers the principles of distributed systems and their design. Topics will include the characteristics and constraints of distributed algorithms, security, and reliability issues of distributed systems. Prerequisite: CSEC 322; CS 250.

436 (Formerly NET 436) Advanced Network Security. (3) An examination of advanced network security and network defense. Topics include network defense, applied cryptography, security protocols, defense tools, security policies and implementation, and operational procedures. Prerequisites: CS/CSEC 395 and CSEC 322 and CS/CSEC 398, or permission of School.

489 Penetration Testing and Ethical Hacking. (3) Introduction to the techniques and tools for information gathering and vulnerability assessment of networked systems. Topics include target enumeration, network sniffing, client and remote exploitation, web and wireless hacking. Prerequisites: CSEC 322, CS/CSEC 395, and (CS/CSEC 371 or CSEC 375).

494 Topics in Cyber Security. (3) Examination of advanced and emerging topics in Cyber Security. Prerequisites: CS/CSEC 395 and junior standing.

495 (Formerly NET 495) Cyber Security Internship. (1–12, repeatable to 12) Work experience in a research, government, or business organization. Internship project report required. Only 3 s.h. can be used for the major. Prerequisites: Cyber Security major, 15 s.h. of Cyber Security courses, and written permission of School director. Graded S/U only.

497 (Formerly NET 497) Senior Honors Project. (3–6, repeatable to 6) Provides a project option within the Cyber Security Honors program. Project directed by a faculty member in the School of Computer Sciences. Prerequisite: Senior CSEC Honors Program participant or consent of the School of Computer Sciences.

499 (Formerly NET 499) Independent Study. (1–3, repeatable to 6, 3 per semester) Individual study or research in the area of Cyber Security under the supervision of a School faculty member. Project report required. Prerequisites: junior standing and consent of the School.

INFORMATION SYSTEMS (IS)

315 IT Systems Components. (3) An introduction to IT systems components in Information Systems. Topics covered relate to hardware, software, networks, and their role in system operation in an organizational context. Prerequisite: CS 114 or CS 214.

324 Enterprise Network and Data Communication Concepts. (3) This course provides an introduction to data communication networks. The course will focus on the services, capabilities, and limitations of communication networks in a business organizational context. Credit cannot be given for both IS 324 and (CS 484 or CS 420). Prerequisite: CS 101 or CS 114 or CS 214 or (CS 211 and CS 212).

325 Global Social Networks. (3) (General Education/Multicultural Studies) (Global Issues) This course on global social networks, including virtual communities, places emphasis on fundamental information technology, facilitation methods, and practical operations of virtual communities and social networks in a global and cross-cultural environment. Prerequisite: at least one course from either Category III and Category IV of the General Education Curriculum.

340 Introduction to Information Systems. (3) Develop a thorough understanding of what information systems are, their technical foundations, where they are used in organizations, and how they are developed.

342 Enterprise Database Management. (3) A study of the theory and application of database management systems including their design, development, and management. Credit cannot be given for both IS 342 and (CS 483 or CS 470). Prerequisites: IS 341.

343 Strategic Systems. (3) The role, implications, and relevance of Information Technology (IT) in managing businesses; management issues concerning IT strategy, planning, and competitive advantage; process innovation and re-engineering, and organizational transformation. Prerequisites: IS 340 or consent of director.

344 Telecommunications Planning Management. (3) An introduction to business management tools and techniques necessary to plan and manage a company's telecommunications and network functions. Topics include telecommunications management and network administration basics; telecommunications planning and project management; and operations and acquisition management. Prerequisites: CS 214 or permission of School director.

345 Foundations of Information Technology Service Management. (3) This course introduces concepts, models, and tools necessary to provide information technology services to users. Topics include frameworks of Information Technology Service Management (ITSM) and Information Technology Infrastructure Library (ITIL). Credit cannot be given for both IS 345 and IS 344. Prerequisites: CS 214.

355 Information Assurance. (3) This course examines implications and challenges of operational security in global IT organizations, and reviews legal, social, and ethical issues related to security management. Topics include IT security policy development, risk management, threat assessment, and business continuity planning. Prerequisites: (CS 114 or CS 214) and (CS 420 or CS 484 or CSEC 321 or IS 324), or consent of Director.
405 Business Intelligence. (3) This course focuses on the features, uses, and design strategies for IT-enabled business intelligence systems. Data-oriented techniques for managing data, warehousing, integration, and visualization for corporate decision making are emphasized. Prerequisite: IS 340 or permission of School director.

410 Enterprise Architecture. (3) This course explores the design, selection, implementation, and management of enterprise IT solutions. The focus is on IT applications and infrastructure and their fit within business organizations. Prerequisites: IS 342 or permission of School director.

415 Web IT Systems Development and Management. (3) This course will cover tools and technologies related to Web IT Systems development and management. Emphasis will be placed on developing the infrastructure and exploring the emerging technical and managerial issues in support of Web IT Systems. Prerequisites: CS 214.

460 Independent Study in Information Systems. (1–3, repeatable to 3) Independent study with written report on a problem mutually selected by student and instructor. For Information Systems majors only. Prerequisites: IS 341 and senior standing, with written permission of School director.

462 IS Project Management and Development. (3) Study of the issues and challenges in managing information systems' development projects. Students will also identify, develop, and implement a solution to an information systems' problem. Prerequisite: IS 341.

466 Topics in Healthcare Informatics. (3, repeatable to 6 for different titles) Topics include the study of healthcare information systems and their use in healthcare and clinical practice as well as in healthcare research and education. Prerequisite: IS 342.

467 Topics in Enterprise Systems. (3) This course is designed to provide an understanding of the theoretic and practical issues related to the application of Enterprise Systems within organizations with a focus in the integration of information and organizational forms and processes across functional areas using unified systems. Prerequisite: IS 341 or permission of School director.

470 Internship in Information Systems. (3–12, repeatable to 12) Work experience, on- or off-campus, in an organization involving computerized information systems. Intern will be supervised by a faculty coordinator and an executive in the business firm. Reports of work experience are submitted to the coordinator periodically. Final report required. Only 3 s.h. can be used for the major. Prerequisites: Information Systems major; IS 341, 342, junior or senior standing, and written permission of School director. Graded S/U only.

497 Senior Honors Project. (3–6, repeatable to 6) Provides a project option within the Information Systems Honors program. Project directed by a faculty member in the School of Computer Sciences. Prerequisite: Senior IS Honors Program participant or consent of the School of Computer Sciences.
The Department of Counselor Education and College Student Personnel offers graduate degree programs for students interested in pursuing careers in the counseling or college student personnel professions. Specializations offered include Clinical Mental Health Counseling, Professional School Counseling, Student Affairs and Higher Education Leadership.

Course Descriptions

**COLLEGE STUDENT PERSONNEL (CSP)**

**445 The University and the Student.** (2) Studies the mores, membership influence, commitment, expression, and governance of the college community, characteristics of a college student, and the relationship of these to personal, social, and intellectual development.

**450 Workshop in Residence Student Development.** (1) Examines factors affecting student growth and development in the university community, current problems facing students, and the use of group processes and leadership training in solving problems and facilitating community awareness.

**COUNSELOR EDUCATION (CN)**

**433 Special Problems in Counseling.** (1, repeatable for different titles) Designed to provide a group of students an opportunity for further professional growth and to apply problem solving approaches in dealing with specific issues. Prerequisite: junior or senior standing, or permission of department chair. Graded S/U only.
Earth, Atmospheric, and Geographic Information Sciences

Chairperson: Dr. Samuel K. Thompson
Office: Tillman Hall 312
Telephone: (309) 298-1648; Fax: (309) 298-3003
E-mail: eagis@wiu.edu
Website: wiu.edu/eagis

Program Offerings and Locations:

- Bachelor of Science in Geographic Information Science: Macomb, Online
- Bachelor of Science in Geology: Macomb
- Bachelor of Science in Meteorology: Macomb
- Minor in Geographic Information Systems: Macomb, Online
- Minor in Geography: Macomb, Online
- Minor in Geology: Macomb
- Minor in Weather and Climate: Macomb

*See note in Degree Programs section.

For student learning outcomes, please see wiu.edu/provost/learningoutcomes.

Faculty: Bennett, Buker, Choi, Deng, Greene, Hegna, Herman, Kang, Liang, Mayborn, Melim, Merrett, Sutton, Thompson.

Geographic Information Science (GIS)

Geographic Information Science (GIS) is the study of spatial data and computer techniques used to capture, analyze, and display geographic information. Every undergraduate student is expected to acquire GIS skills in order to model scientifically the geospatial world and its components using GIS in a space-time framework. Our students are exposed to three perspectives of GIS learning: theoretical understanding, skill development, and real-world problem solving. Through hands-on training and practical applications, the students develop proficiency in using GIS techniques to address real-world problems, project design, implementation, and reporting. Our students may pursue an option in either Geospatial Science (Geographic Information Systems, Remote Sensing, and GPS) or Geoenvironment and Planning (physical-environment, human, urban planning, and regional planning).

Career opportunities are found in both public and private sectors. Most notables include disaster response companies, transportation firms, land use planning agencies, GIS-related professions, historic preservation firms, construction companies, real estate firms, international business, location analysis firms, architectural firms, and wind energy/sustainable energy companies.

Geology

Geology is the study of theory and practice of scientific knowledge pertaining to the Earth: its morphology and environment, materials and processes, origin, and history; i.e., the complex physical, chemical, and biological interactions which have shaped the planet’s evolution. We stress undergraduate program breadth as a means of maximizing the opportunities for our undergraduates to select from a wide variety of postgraduate study or career options. Besides providing a broad theoretical knowledge base, we stress training in practical applications, independence of thought, and the development of problem-solving skills.

Career opportunities are found in both public and private sectors. Our graduates find industrial or governmental jobs in environment and engineering, oil, mining; many of them enroll in graduate programs at other universities.
Meteorology

Meteorology is the study of the physical characteristics of the lower atmosphere and the processes that are responsible for generating the weather. Students who complete the major are exposed to concepts, methodologies, and practical applications related to weather analysis and forecasting, as well as numerous environmental applications. Meteorology students use specialized equipment including instrumentation and computer applications associated with weather observations, weather radar, and remotely-sensed information.

Students who want to become professionals in meteorology-related fields should select the Applied Meteorology option. Students who want to pursue careers with the National Weather Service or want to go to graduate school should select the Operational Meteorology option.

Career opportunities are found in both public and private sectors, as well as in teaching. Among government agencies employing meteorologists are the Defense Mapping Agency, Environmental Protection Agency, Central Intelligence Agency, Bureau of the Census, National Weather Service, Army Corps of Engineers, and state, regional, and local planning agencies. Private employers include economic and environmental consulting firms, mapping and aerial survey companies, meteorological and climatological consulting firms, and environmental engineering firms.

GradTrac is available to Geographic Information Science majors, Geology majors, and Meteorology majors. See page 79 for information about GradTrac.

Honors Curriculum—Academically qualified students in this department are encouraged to complete an honors curriculum in University Honors, Honors in the Major, or General Honors. All Honors students must complete the one-hour honors colloquium (G H 299). General Honors includes General Honors coursework. Honors in the Major includes honors work in the major. University Honors combines Honors in the Major and General Honors. For more information about honors curricula, see page 100 or visit the Centennial Honors College website at wiu.edu/Honors.

Integrated Baccalaureate and Master's Degree Program—An integrated baccalaureate and master’s degree program is available for the Bachelor of Science in Geographic Information Science: Master of Science in GIScience and Geoenvironment. An integrated baccalaureate and master’s degree program is available for the Bachelor of Science in Meteorology: Master of Science in GIScience and Geoenvironment. An integrated degree program provides the opportunity for outstanding undergraduates to earn both degrees in five years. Please refer to the Graduate Studies catalog for details about the integrated program.

Degree Programs

Bachelor of Science—Geographic Information Science

All students seeking the Bachelor of Science in Geographic Information Science must complete I, II, III, and IV below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

I. University General Education and College of Arts and Sciences Curriculum Requirements (p. 86) ........................................................................................................ 55 s.h.

II. Core Courses .................................................................................................................. 15 s.h.
GEOG 301, 405†; GIS 202, 309, 405

III. Options of Study (select A or B): ................................................................................ 34 s.h.
A. Geospatial Science
1. GIS 108, 402, 403, 404, 410 ................................................................. 16 s.h.
2. GIS 407 or 408 ...................................................................................... 3 s.h.
3. Choose two from the following courses: ........................................... 6 s.h.
GEOG 426, 430, 440, 445, 497, 499

#The foreign language/global issues requirement for the major is 6 s.h.
Earth, Atmospheric, and Geographic Information Sciences

4. Choose two from the following courses: ........................................ 6 s.h.  
   CS 114, 214; GIS 201; GIS 407 or 408  
5. Open Electives ................................................................. 3 s.h.  

B. Geoenvironment and Planning  
1. Choose one of: GEOG 100 or 110 ....................................... 3 s.h.  
2. Choose one of: GEOG 121 or METR 120 ......................... 4 s.h.  
3. Choose seven courses (200 level and above) from the Human  
   Group and/or the Physical Group .................................... 21 s.h.  
4. Choose one course from the Geospatial group ..................... 3 s.h.  
5. Open Electives ................................................................. 3 s.h.  

IV. Any Minor ...................................................................... 16 s.h.  

Note: Students interested in Meteorology should see the Meteorology advisor about  
additional courses.

Δ This major is available online with the selection of designated courses. Please contact  
advisor for details.

# The foreign language/global issues graduation requirement may be fulfilled by  
successfully completing one of the following: 1) a designated foreign language requirement  
[see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global  
issues course; 3) any major’s discipline-specific global issues course; or 4) an approved  
Study Abroad program.

† GEOG 405 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.

Bachelor of Science—Geology

All students seeking the Bachelor of Science in Geology must complete I, II, and III.A  
or III.B below, and the foreign language/global issues requirement for the major#. The  
minimum semester hour requirement for the baccalaureate degree is 120 s.h.

I. University General Education and College of Arts and Sciences Curriculum  
Requirements (p. 86) ................................................................ 55 s.h.

II. Core Courses ...................................................................... 16 s.h.  
GEOL 110*, 112*, 200, 340†

III. Options of Study (select A, B, or C)

A. Geology  
1. Option Courses: .............................................................. 19 s.h.  
   GEOL 301, 310, 320†, 330, 361, 362  
2. Departmental Electives .................................................... 1–3 s.h.  
3. Any Minor ......................................................................... 16–20 s.h.  
4. Other
   a. CHEM 201* and 202* .................................................... 8 s.h.  
   b. MATH 133* and one of these choices:
      1) MATH 134*; or
      2) CS 114; or
      3) STAT 171* ............................................................... 7–8 s.h.  
   c. One of these choices:
      1) BOT 200* and ZOOL 200*; or
      2) PHYS 124 and 125; or
      3) PHYS 211* and 212 .................................................... 8–10 s.h.  
   d. Foreign language and computer programming are strongly recommended.  
For students interested in pursuing a career in the field of environmental/  
hydrogeology, the following elective course is strongly recommended: GEOL 380.  
Other recommended courses are: GEOL 375 and 421.

B. Paleontology  
1. Option Courses: .............................................................. 19 s.h.  
   GEOL 301, 310, 320†, 330, 361, 362
2. Directed Electives: BOT 200* or ZOOL 200* .................................4 s.h.
3. Minor in Botany or Zoology ............................................................17 s.h.
4. Open Electives .............................................................................0–2 s.h.
   Suggested courses: BIOL 312, 459; ZOOL 321, 325; ANTH 310;
   GEOL 420, 430
5. Other ............................................................................................23–26 s.h.
   a. MATH 133*
   b. STAT 171* or MATH 134*
   c. CHEM 201*
   d. CHEM 202*
   e. PHYS 124 or PHYS 211*
   f. PHYS 125 or PHYS 212

C. Environmental Geology
1. Option Courses: ..................................................................................19 s.h.
   AGRN 278; GEOL 310, 361, 362, 375, 380
2. Directed Electives: Choose two courses from GEOL 301, 320†, 330 .......7–8 s.h.
3. Minor in Botany, Environmental Studies, Geographic Information Systems, 
   Natural Resources Conservation, or Zoology ..........................................16–22 s.h.
4. Other................................................................................................15–16 s.h.
   a. CHEM 201* and 202*
   b. MATH 133*
   c. One of the following: CS 114*, MATH 134*, STAT 171*

# The foreign language/global issues graduation requirement may be fulfilled by 
   successfully completing one of the following: 1) a designated foreign language requirement 
   [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global 
   issues course; 3) any major’s discipline-specific global issues course; or 4) an approved 
   Study Abroad program.
* 10–19 s.h. may count toward the University General Education requirement for the 
   Geology option, 16 s.h. for the Paleontology option, and 8–16 s.h. for the Environmental 
   Geology option.
† GEOL 320 and GEOL 340 fulfill the Writing Instruction in the Disciplines (WID) 
   graduation requirement for the Geology and Paleontology options. GEOL 340 fulfills the 
   Writing Instruction in the Disciplines (WID) graduation requirement for the Environmental 
   Geology option.

Bachelor of Science—Meteorology

All students seeking the Bachelor of Science in Meteorology must complete I, II, III.A or 
III.B, and IV below, and the foreign language/global issues requirement for the major#. The 
minimum semester hour requirement for the baccalaureate degree is 120 s.h.

I. University General Education and College of Arts and Sciences Curriculum
   Requirements (p. 86) ..............................................................................55 s.h.
   (To include MATH 133, MATH 134, METR 120, and PHYS 211 for Operational 
   Meteorology option; to include MATH 133, METR 120, and either PHYS 124 or 
   PHYS 211 for Applied Meteorology option)

II. Core Courses .....................................................................................15 s.h.
    GEOG 301, 405†; METR 322, 327, 329

III. Options of Study (select A or B)
   A. Operational Meteorology ..............................................................34 s.h.
      1. Special Courses ......................................................................21 s.h.
         MATH 231, 333; METR 422, 429, 432; PHYS 212
      2. Directed Electives 
         a. Select one of the following courses: ..........................3 s.h.
            GIS 403; METR 300, 425
b. Select two of the following courses:.................................6–8 s.h.
   CHEM 201; CS 114; GEOG 430; GEOL 115, 380;
   GIS 403; METR 220, 300, 333, 337, 425; PHYS 354
3. Open Electives .....................................................................2–4 s.h.

B. Applied Meteorology..........................................................34 s.h.
1. Special Courses ....................................................................12 s.h.
   GEOG 430; METR 220, 337, 425
2. Directed Electives
   a. Select 3 s.h. from the following courses:.........................3 s.h.
      GEOG 497, 499
   b. Select 17 s.h. from the following courses:......................17 s.h.
      AGEC 447; BC&J 201, 340, 410, 430; CHEM 201;
      CS 114, 214; EM 251, 252, 276; FIN 311; GEOG 251;
      GEOL 115, 380; GIS 202, 405; HE 251; MATH 134, 231,
      333; METR 300, 333, 422, 429, 432; PHYS 212, 354;
      POLS 300, 302, 393
3. Open Electives ......................................................................2 s.h.

IV. Any Minor ............................................................................16 s.h.
# The foreign language/global issues graduation requirement may be fulfilled by
   successfully completing one of the following: 1) a designated foreign language requirement
   [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global
   issues course; 3) any major’s discipline-specific global issues course; or 4) an approved
   Study Abroad program.
† GEOG 405 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.

Minors

Minor in Geography.......................................................................18–21 s.h.
  1. Any three courses selected from:
     GEOG 100, 110, 121; GIS 108; METR 120..........................10–12 s.h.
  2. Upper division electives to be approved by the advisor..............8–9 s.h.
     Note: This minor is not open to students majoring in Geographic Information Science.

Minor in Geographic Information Systems ....................................19–20 s.h.
  1. GIS 202 and 405.................................................................7 s.h.
  2. GIS 407 or 408.....................................................................3 s.h.
  3. Choose 3 of the following courses:.................................9–10 s.h.
     GIS 108, 201, 309, 402, 403, 404, 407, 408, 410
     Note: This minor is not open to students majoring in Geographic Information Science.

Minor in Geology.........................................................................17–18 s.h.
  1. GEOL 110.................................................................4 s.h.
  2. Choose 1 of the following courses: GEOL 112, 113, 115.........3–4 s.h.
  3. Departmental Electives chosen from among:..........................10 s.h.
     GEOL 200, 301, 310, 320, 330, 340, 375, 380, 420, 421

Minor in Weather and Climate .....................................................16–17 s.h.
  1. METR 120, 220, 327, 337.................................................13 s.h.
  2. Choose one of the following:
     GEOG 301, 430; METR 300, 322, 329, 333, 432......................3–4 s.h.
Course Descriptions

GEOGRAPHY (GEOG)

(Physical)

121 Planet Earth: Surface Processes and Interactions. (4) (General Education/Natural Sciences) The interplay between landforms, soils, water, climate, and life forms (including humans) on Earth's surface, and how these interact to shape the surface of Planet Earth. It also covers the distribution of landforms in the U.S. and other countries. Laboratory, 3 hrs. lect.; 2 hrs. lab. IAI: P1 905L.

182 (Cross-listed with PHYS 182) Integrated Science II. (4) (General Education/Natural Sciences) A laboratory course in interdisciplinary science with an emphasis on the Earth's place in the physical universe. Topics address the nature of matter and energy and their impact on the Earth's weather and climate. (Integrated Science I is BIOL/GEOL 181) Not open to students with credit in PHYS 182. Prerequisite: MATH 100. 3 hrs. lect.; 2 hrs. lab.

421 Physiography. (3) Characteristics and distribution of landforms and underlying structures of the U.S. Prerequisites: GEOG 121 and METR 120, or GEOL 110 and 112.

423 River Water Resources. (3) An examination of river water resources at the global scale. Case studies of river basins from different countries will be used to understand past and present issues related to their management, ecological problems, and restoration initiatives. Prerequisites: Lower division natural science course with a lab, or consent of instructor.

426 (Cross-listed with BIOL 426) Conservation and Management of Natural Resources. (3) Problems in the conservation and management of natural resources including soil, water, rangeland, forest, wildlife, air, and energy resources. Special attention to resource problems of the United States. Not open to students with credit in BIOL 426. Prerequisites: GEOG 121 and METR 120, or consent of instructor.

430 Natural Hazards. (3) Examination of the causes, development, and impact of different natural hazards around the world. Hazards range from volcanoes and earthquakes to hurricanes, tornadoes, floods, and fires. Understanding community responses to particular disasters, including planning, first responses, and lessons learned.

450 (Cross-listed with BIOL 459) Biogeography. (3) Study of the geographical distributions of organisms, the evolutionary and ecological processes underlying the patterns of distribution, and the role of biogeography in biological conservation. Not open to students with credit in BIOL 459. Prerequisites: BOT 200 (C grade or better) and ZOOL 200 (C grade or better), or consent of instructor.

(Human)

100 Introduction to Human Geography. (3) (General Education/Social Sciences) (Global Issues) Analysis of the spatial patterns of population, population trends, human migrations, ecological processes, and the impact of people on the natural environment. IAI: S4 900N.

251 Principles of Urban and Regional Planning. (3) (General Education/Social Sciences) Examines contemporary planning processes with an emphasis upon utopian planning precedents, frameworks and mechanisms for planning, and comprehensive planning and implementation.

341 Economic Geography. (3) The production and distribution of the world's commodities and their regional aspects. The reproductive, extractive, and manufacturing industries and their natural and cultural relationships. Prerequisite: GEOG 100 or consent of instructor.

352 Planning Applications. (3) Introduces basic applications of urban and regional planning processes to understand land development, including the use of GIS analysis, zoning, form-based coding, and future land use planning. It involves research projects to understand these processes. Prerequisites: GEOG 251 or consent of instructor.

440 Connections: A Geography of Transportation. (3) Introduction to transport systems at various geographic scales in society, and the concepts, methods, and application areas of Transport Geography. Prerequisite: GEOG 301 and GIS 202; or consent of instructor.

443 Population Geography. (3) Description and spatial analysis of population data and of fertility, mortality, and migration of the human population. Some emphasis given to migration; some to the United States. Prerequisites: two courses in Geography or consent of instructor.

445 Urban Geography. (3) An analysis of the nature, distribution, and principal functions of urban settlements and supporting areas. Prerequisites: two courses in Geography or consent of instructor.

448 Introduction to Urban and Regional Planning. (3) An examination of contemporary planning processes. Emphasis upon utopian planning precedents, frameworks and mechanisms for planning, and comprehensive planning and implementation. Prerequisite: POLS 470, or its equivalent, or consent of instructor.

458 Planning Methods. (3) Introduces commonly used analytic techniques in the practice of urban and regional planning. Consideration is given to techniques and data sources to support urban development. Prerequisite: GEOG 251 or consent of instructor.

(Regional)

110 World Regional Geography. (3) (General Education/Social Sciences or Multicultural Studies) (Global Issues) A survey of the world's regions emphasizing the spatial arrangements of resources, population, institutions, economic activities, and cultural landscapes, and their significance for distinctive regional problems. IAI: S4 906.

466 (GEOG 466—Africa is cross-listed with AAS 466) World Regions. (3, repeatable for different regional subtitles to 9) (Global Issues) Analysis of the physical and cultural geography of a major world region chosen from the following: Latin America, Russia, Monsoon Asia, Europe, Africa, Middle America, South America, and Asia. Not open to students with credit for AAS 466. Prerequisite: two courses in Geography or consent of instructor.

(Theory, Methods and Research)

301 Introduction to Quantitative Geography. (3) An introduction to quantitative methods used by geographers to analyze and interpret geographic data and to solve geographic problems. Topics include hypothesis formulation and testing, sampling strategies, correlation, regression, and spatial patterns. Prerequisite: two courses in Geography, MATH 128 or high school algebra, or consent of instructor. 2 hrs. lect.; 2 hrs. lab.

405 Senior Thesis Capstone Course. (2) Writing Instruction in the Disciplines (WID) course. Prerequisites: ENG 280, Geography or Meteorology major, and senior status.

450 Geography Workshop. (1) General workshop of a variety of geographic topics. Discussions and creative
activities are emphasized in a supportive environment. Not open to students with credit in GEOG 322 or METR 322. Prerequisite: elementary algebra or equivalent. Graded S/U only.

495 Honors Thesis. (3) Prerequisite: consent of department chair.

497 Internship in Applied Geography. (1–3, repeatable to 5) Assignment as an undergraduate assistant in public, private, or university agencies engaged in planning, meteorology, environmental assessments, cartography, etc. Only 3 s.h. may be applied to minimum degree requirements. Prerequisite: consent of department chair. Graded S/U only.

498 Individualized Studies. (1–3) This course is available to students who are interested in the study of topics which are not currently a part of the curriculum. The students should consult their advisor or the department chair about the procedure which is to be followed. Prerequisite: consent of department chair.

499 Special Problems in Geography (Research). (1–6, repeatable to 6) Prerequisites: senior standing and consent of instructor.

GEOGRAPHIC INFORMATION SCIENCE (GIS)

108 (Formerly GEOG 108) Digital Earth. (4) (General Education/Natural Sciences) An introduction to various applications of mapping and navigational technology (Google Earth, photography, GIS, and GPS) used in daily life. This course involves student presentations and projects focused on basic principles and applications of this technology. 3 hrs. lect.; 2 hrs. lab.

201 (Formerly GEOG 209) GIS Data Acquisition. (3) This course covers principles of geospatial data concepts. These concepts include field and office data collection using applications of GPS and common GIS software, digitizing, and coordinate geometry (COGO). This course also includes internet download techniques and basic map making. 2 hrs. lect.; 2 hrs. lab.

202 (Formerly GEOG 202) Principles of GIS. (4) Introduction to the principles of Geographic Information Systems (GIS), including GIS representation of the real world; GIS concepts, data, methods, tools, and their integration for location-related decision making; and GIS procedure for representation, analysis, and presentation. 3 hrs. lect.; 2 hrs. lab.

302 GIS Software and Scripting. (3) Explores fundamental GIS scripting skills to create or customize tools in ArcGIS for GIS representation, analysis, and presentation. Prerequisites: CS 114 and GIS 202. 2 hrs. lect.; 2 hrs. lab.

309 (Formerly GEOG 309) GIS Data Integration. (3) This course covers core principles of geographic information, GIS data manipulation skills, common GIS data sets together with lab/project experiences, and GIS data evaluation. It strengthens the GIS “data” foundation for future GIS specialists. Prerequisite: GIS 202 or consent of instructor. 2 hrs. lect.; 2 hrs. lab.

402 (Formerly GEOG 402) Advanced Cartography. (3) Advanced map compilation; theory and practice of cartographic design emphasizing thematic mapping, geovisualization, and map communication using Geographic Information Systems (GIS). Prerequisite: GIS 202 or consent of instructor. 2 hrs. lect.; 2 hrs. lab.

403 (Formerly GEOG 403) Advanced Remote Sensing. (3) Digital image processing techniques for thematic information extraction from remotely-sensed data for environmental applications. Laboratory. Prerequisites: GIS 202 or consent of instructor. 2 hrs. lect.; 2 hrs. lab.

404 (Formerly GEOG 406) Advanced Quantitative Methods and Applications in GIS. (3) Students will learn, examine, and review how advanced GIS quantitative methods are used to measure spatial distribution patterns of geographical features, and analyze relationships between geographical phenomena. Prerequisites: GEOG 301 and GIS 202; or consent of instructor. 2 hrs. lect.; 2 hrs. lab.

405 (Formerly GEOG 409) Advanced GIS Spatial Analysis. (3) Thorough and systematic examination of GIS analytical/modeling methods. Students will be trained to translate real-world problems into GIS data, tools, maps, new findings, and reports. Laboratory. Prerequisites: GIS 309 or consent of instructor. 2 hrs. lect.; 2 hrs. lab.

407 (Formerly GEOG 407) Social Applications of GIS. (3) Examination of GIS concepts and skills in studying the geospatial characteristics of social phenomena, such as population geography, geographic segregation of neighborhoods, and spatial patterns of crimes. Practice of GIS applications in sociodemographic issues through lab exercises and course project. Prerequisite: GIS 202 or consent of instructor. 2 hrs. lect.; 2 hrs. lab.

408 (Formerly GEOG 408) Environmental Applications of GIS. (3) GIS modeling of the biophysical environment, including water flow simulation, mapping of soils and climates, habitat delineation, and soil erosion modeling. Review of GIS methods, literature, and practice of environmental analysis in labs and project. Prerequisites: GIS 202, and GIS 301 or STAT 171 or equivalent. 2 hrs. lect.; 2 hrs. lab.

410 (Formerly GEOG 410) Advanced GIScience. (3) Examination of real-world applications of GIS, remote sensing, and GPS, including issues in the associated literature and principles. Fostering ideas and practicing skills of designing and completing GIScience projects scientifically. Prerequisite: GIS 202 and 405; or consent of instructor. 2 hrs. lect.; 2 hrs. lab.

GEOLOGY (GEOL)

110 Our Changing Earth. (4) (General Education/Natural Sciences) The study of the earth, its composition, structure, landscape development, internal processes, origin, and evolution. Laboratory includes introduction to minerals, rocks, and maps. No prerequisites. 3 hrs. lect.; 2 hrs. lab. IAI: P1 907L.

112 History of the Earth. (4) (General Education/Natural Sciences) Physical and biological history of the earth (North America emphasis). Origin of continents, mountains, oceans, etc.; evolution of plants and animals. No prerequisites. 3 hrs. lect.; 2 hrs. lab. IAI: P1 907L.

113 Energy and Earth Resources. (3) (General Education/Natural Sciences) Introduction to energy, water, soil, and mineral resources and the impact of their use on the environment. Does not count toward major or minor in Geology. No prerequisite.

115 Oceanography. (3) (General Education/Natural Sciences) History of ocean exploration, origin and nature of ocean basins, composition and circulation of ocean water, modern developments in oceanography, man and the oceans. Does not count toward major or minor in Geology. No prerequisite.

181 (Cross-listed with BIOL 181) Integrated Science I. (4) (General Education/Natural Sciences) A laboratory course in interdisciplinary science with an emphasis on the nature and evolution of Life and Earth. Topics include ecology, natural resources, formation of Earth materials, Earth processes, nutrient cycling, cell biology, genetics, and evolution. (Integrated Science II is PHYS/GEOG 182). Not open to students with credit in BIOL 181. Prerequisite: MATH 099N.

200 Mineralogy. (4) Introduction to crystallography, origin, classification, identification, and occurrence of
common minerals. Prerequisite: GEOL 110 or GEOG 121. Student should have basic knowledge of high school or introductory college chemistry. 3 hrs. lect.; 2 hrs. lab.

301 Igneous and Metamorphic Petrology. (3) Origin, texture, mineralogy, mode of emplacement, and alteration of igneous and metamorphic rocks. Phase rule and phase diagrams. Prerequisite: GEOL 200. 2 hrs. lect.; 2 hrs. lab.

310 Geologic Field Methods. (2) Topographic and geologic mapping methods; measurement and description of stratigraphic sections; field identification of rocks and soils; use of Brunton compass, laser transit, GPS, and GIS software. Prerequisite: GEOL 110 or 112. 1 hr. lect.; 4 hrs. lab. First 10 weeks.

320 Structural Geology. (4) Physical properties of rocks, theories of flow and fracture, description of structural features, and origin of rock deformation. Geometric and stereographic diagrams. Interpretation of patterns. Writing Instruction in the Disciplines (WID) course. Prerequisites: GEOL 110 and high school or college trigonometry; ENG 280. Possible field trip. 3 hrs. lect.; 2 hrs. lab.

350 Paleontology. (4) Survey of major groups of fossil-forming organisms, emphasizing invertebrates, their preservation, morphology, taxonomy, and methods used in their study. Prerequisite: GEOL 112 or a course in basic Biology or consent of instructor. 3 hrs. lect.; 2 hrs. lab.

340 Stratigraphy and Sedimentology. (4) Origin and identification of sedimentary rocks, depositional environments, sedimentary processes, principles of stratigraphy. Writing Instruction in the Disciplines (WID) course. Prerequisites: GEOL 110, GEOL 112, and ENG 280, or consent of instructor. Required field trip. 3 hrs. lect.; 2 hrs. lab.

361, 362 Summer Field Camp. (3–6 each, not repeatable) Measurement of stratigraphic and structural sections, geological field mapping, and preparation of reports. Prerequisites: GEOL 200, 301, 310, 320, 340, or consent of instructor. At field station in South Dakota.

375 Environmental Geology. (3) Application of geology to environmental problems. Land resource planning, solid and liquid waste disposal, mining, foundations structures, geologic hazards, mineral and energy resources. Prerequisite: GEOL 110.

380 Hydrogeology. (4) Study of water's interaction with geologic materials; principles of groundwater flow; aquifer testing, groundwater flow modeling programs; water chemistry and pollutants. Many labs are conducted in the field. Prerequisite: GEOL 110 or GEOG 121. 3 hrs. lect.; 2 hrs. lab.

418 (Cross-listed with BIOL/CHEM/PHYS 418) Introduction to Scanning Electron Microscopy. (4) The course focuses on capabilities and operation of scanning electron microscopes with emphasis on beam-material interactions, sample preparation, image acquisition and analysis, and X-ray measurements with applications in Biology, Chemistry, Geology, and Physics. Not open to students with credit in BIOL/CHEM/PHYS 418. Prerequisites: BOT 200 (C grade or better), or CHEM 202, or MICR 200 (C grade or better), or PHYS 125, or PHYS 212, or ZOOL 200 (C grade or better); or consent of instructor. 3 hrs. lect.; 2 hrs. lab.

420 Geomorphology. (3) Advanced study of the landscape involving processes, geologic structure, and time. Map and air photo interpretation. Prerequisite: GEOL 110 or GEOG 121. Field trips. 2 hrs. lect.; 2 hrs. lab.

421 Glacial Geology. (3) Origin and classification of glacial sediments and land forms, periglacial features; Pleistocene soils; stratigraphy and sedimentology of Pleistocene deposits. Prerequisite: GEOL 110. Field trip. 2 hrs. lect.; 2 hrs. lab.

460 Special Problems in Geology and Geophysics. (1–5, repeatable to 5) Research problems. Does not count toward minor in Geology. Prerequisite: consent of instructor prior to registration.

461 Geologic Field Trips. (1–4, repeatable to 4) Field trips in geology or geophysics. Does not fulfill requirement for a minor in Geology. Prerequisite: GEOL 110, or GEOL 112, or concurrent registration in these courses and consent of instructor.

462 Honors Research Thesis. (2–3, repeatable to 3 to complete project) Research problems by agreement of student and advisory committee. Required: written proposal, final written report, and oral report. Prerequisites: GPA of 3.40 overall and 3.20 in Geology, completed first 26 s.h. in Geology, junior or senior standing, and approval of advisory committee.

495 Geology Internship. (1–6, repeatable to 6) Credit for geologic work experience in a business, governmental, or research organization. Internship project report required. Prerequisites: 20 s.h. of Geology courses, junior or senior standing in Geology, and approval of department chairperson. Graded S/U only.

METEOROLOGY (METR)

120 (Formerly GEOG 120) Introduction to Weather and Climate. (4) (General Education/Natural Sciences) Concepts and processes that govern weather and climate systems: solar energy distribution and seasons, wind and climate systems: solar energy distribution and seasons, wind and cloud processes, including hydrostatic equilibrium, water vapor flux and with the effects of climate on organisms, ecosystems, and human societies as well as changes in global environment. Emphasis on weather analysis through observational data and computer models. Prerequisite: METR 120 and MATH 133. 2 hrs. lect.; 2 hrs. lab.

322 (Formerly GEOG 322) Synoptic Meteorology I. (4) Study of large-scale (synoptic) atmospheric circulations and the relationship between upper air circulation, vertical motion, and surface development, particularly cyclogenesis. Emphasis on weather analysis through observational data and computer models. Prerequisite: METR 120 and MATH 133. 2 hrs. lect.; 4 hrs. lab.

327 (Formerly GEOG 327) Environmental Climatology. (3) This course deals with the mechanisms of heat flow, radiation exchange, and water vapor flux and with the effects of climate on organisms, ecosystems, and human societies as well as changes in global environment. Prerequisite: METR 120 or consent of instructor.

329 (Formerly GEOG 329) Dynamic Meteorology I. (3) Examination of atmospheric thermodynamics and cloud processes, including hydrostatic equilibrium, equation of state, atmospheric moisture, adiabatic processes, the use of thermodynamic charts, precipitation development, and lightning mechanisms. Prerequisites: METR 322 and MATH 134. 2 hrs. lect.; 2 hrs. lab.

333 (Formerly GEOG 333) Meteorological Data Analysis. (3) Various meteorological data analysis software packages will be used to enhance synoptic/dynamics concepts learned in concurrent courses.
These tools will be used to produce and present an analysis of a meteorological case study. Prerequisite or Corequisite: METR 322 or consent of instructor. 2 hrs. lect.; 2 hrs. lab.

337 (Formerly GEOG 337) Understanding Climate Change. (3) This course introduces basic physical principles underlying climate change, time scales of climate change, the nature and the role of technology and computer models in the context of climate change research, and social and political dimensions of climate change. Prerequisite: METR 120 or consent of instructor.

422 (Formerly GEOG 422) Synoptic Meteorology II. (4) Quantitative treatment of dynamical and thermodynamical processes involved in synoptic meteorology. Evolution of fronts and cyclones, isentropic analysis, vertical cross sections, interpretation of satellite imagery and numerical model data, all in the context of theory and case studies. Prerequisite: METR 322 and MATH 134. 2 hrs. lect.; 2 hrs. lab.

425 (Formerly GEOG 425) Satellite and Radar Meteorology. (3) The theoretical principles and application of satellites and radar in synoptic meteorology and climatology. Applications of satellite and radar imageries include clouds, wind, atmospheric water vapor, precipitation, and storm prediction. The course includes operational procedures fundamental to weather radar. Prerequisite: METR 322 or consent of instructor. 2 hrs. lect.; 2 hrs. lab.

429 (Formerly GEOG 429) Dynamic Meteorology II. (3) Examination of atmospheric fluid motion, including atmospheric kinematics, real and apparent forces, geostrophic and gradient winds, thermal winds, vorticity, quasi-geostrophy, and their application to numerical weather prediction. Prerequisites: GEOG 301; METR 322, 329; and MATH 231. 2 hrs. lect.; 2 hrs. lab.

432 (Formerly GEOG 432) Physical Meteorology. (3) Examination of atmospheric radiation and chemistry, including optical effects, acoustical phenomena, tropospheric and stratospheric chemical processes, and how these disciplines combine to determine Earth's radiative equilibrium. Prerequisite: METR 322 and MATH 133, or consent of instructor. 2 hrs. lect.; 2 hrs. lab.
Program Offerings and Locations:

- Bachelor of Science in Education in Bilingual/English as a Second Language Education: Macomb, Quad Cities
- Bachelor of Science in Education in Educational Studies: Macomb
- Bachelor of Science in Education in Elementary Education: Macomb, Quad Cities (Elementary Education option only)
- Bachelor of Science in Education in Middle Level Education: Macomb
- Bachelor of Science in Education in Special Education: Macomb
- Minor in Educational Studies: Macomb
- Minor in Middle Level Literacy Teaching: Macomb
- Minor in Teaching English to Speakers of Other Languages: Macomb, Quad Cities, Online

For student learning outcomes, please see [wiu.edu/provost/learningoutcomes](http://wiu.edu/provost/learningoutcomes).

Pre-Service Teacher Education

The School of Education offers the professional education sequence of coursework required of Teacher Education candidates. The sequence includes EDS 202 “Multicultural and Social Foundations of Education,” EDS 301 “Cognition, Development, and Motivation in Academic Settings,” EDS 305 “Measurement and Assessment of Learning in Academic Settings,” EDS 306 “Learning and Development in the Adolescent Grades” (middle level), and EDS 401 “Educational Law and Policy.” Preservice field experiences for most secondary education programs are also provided by the School. Basic graduate support courses in history and philosophy of education, educational research, literacy, special education, educational administration, educational assessment, sociology of education, classroom management, and educational psychology are offered for students seeking teacher licensure at the post-baccalaureate level.

Bilingual/English as a Second Language Major (Bilingual Education Track, ESL Track)

Qualified bilingual/ESL teachers are in high demand throughout the state and nation. The School of Education offers an undergraduate major in Bilingual/English as a Second Language Education. Students select one track (Bilingual or ESL) while also completing the requirements for the elementary education licensure. Students will be granted state approval for the Bilingual Education endorsement and/or ESL endorsement through the Illinois State Board of Education. To complete the Bilingual Education track and endorsement, students will also be required to pass the state target language proficiency exam (Spanish).

Central advising for bilingual/ESL/elementary majors is maintained in Horrabin Hall 40. Secondary majors should consult with the secondary education advisor in Horrabin Hall 40, as well. For further information, contact Dr. Gloria Delany-Barmann, program coordinator, in the School of Education.

The School of Education offers five degree programs: the Bachelor of Science in Education with a major in Bilingual/English as a Second Language Education, the Bachelor of Science in Education with a major in Educational Studies, the Bachelor of Science in Education with a major in Elementary Education (with options in Elementary Education and Early Childhood
Education), the Bachelor of Science in Education with a major in Middle Level Education, and the Bachelor of Science in Education with a major in Special Education. The primary purpose of the Elementary, Early Childhood, Middle Level Education, and Special Education programs is to prepare candidates to become educational practitioners who engage in informed action that is grounded in knowledge and reflection; who are deeply committed to the highest standards of professional practice; who are able to adapt to emerging social, economic, and cultural landscapes; who are skilled in the use of technological tools that promote teaching and learning; and who are committed to empowering all learners. The programs provide students with a foundation of general studies, a scope and sequence of carefully designed professional courses emphasizing exploratory, experiential, student-centered teaching and learning, and extensive experiences observing and working with children in a variety of classroom settings. Field experiences begin early in each program and gradually increase through the senior year, culminating in student teaching.

The Early Childhood Education option has two tracks from which a student can choose. One track leads to Professional Education Licensure to teach children; graduates are qualified to teach in birth to grade three programs and classrooms, preschool, and prekindergarten programs for children with special needs. The second track (non-licensure/ECH Gateway Credential) leads to the completion of Gateway credentials, rather than teaching licensure; graduates are qualified to teach children outside of a classroom, such as day care centers and pre-kindergarten programs.

The Educational Studies major is a non-licensure program designed for students who want to work in education-related fields but seek careers in non-school settings. These settings include corporate training programs, education-related businesses, government agencies, research organizations, adult learning programs, nonprofit organizations, prisons, libraries, museums, religious organizations, private recreational settings, international teaching programs, social and behavioral sciences, mental health facilities, residential centers for senior citizens or individuals with disabilities, and educational-related publishing houses. Upon graduation, students will have a versatile degree which positions them for a variety of education-focused career paths working with children, youth, and adults.

Students who successfully complete the Special Education major will qualify for licensure as a Learning Behavior Specialist I. Instructional time in the major typically begins in the freshman year and increases through the senior year. Students participate in the assessment and instruction of children with special needs in a variety of classroom settings in the local schools. Sixteen weeks of student teaching are required with the time distributed equally between the elementary and secondary levels. Upon graduation, students will qualify to teach exceptional children K–age 21 as LBS I teachers. All majors must be accepted into the Teacher Education Program (TEP) and must pass all TEP and departmental requirements to continue in the program. Students may complete a dual licensure program for Special Education and Elementary Education.

Honors Curriculum—Academically qualified students in this School are encouraged to complete an honors curriculum in University Honors, Honors in the Major, or General Honors. All Honors students must complete the one-hour honors colloquium (G H 299). General Honors includes General Honors coursework. Honors in the Major includes honors work in the major. University Honors combines Honors in the Major and General Honors. For more information about honors curricula, see page 100 or visit the Centennial Honors College website at wiu.edu/Honors.

Elementary Education and Early Childhood Selection/Retention Policy

There are two levels of students in the Elementary Education (ELED) and Early Childhood Education (ECH) programs: Pre-ELED/Pre-ECH students and ELED/ECH students.

Pre-ELED/Pre-ECH students: All students who have been accepted into the University and who wish to major in either the Elementary Education or Early Childhood Education program.
Pre-ELED/Pre-ECH students at WIU may become ELED/ECH students after full acceptance to the Teacher Education Program (TEP), and with a cumulative GPA of 2.75 and a 2.75 GPA in the major.

All students seeking an option in Elementary Education are required to successfully complete the following courses before becoming an ELED student: C&I 110, 170, 270; EDS 202; LLA 313; MATH 260; PETE 360; SPED 210.

All students seeking an option in Early Childhood Education are required to successfully complete the following courses before becoming an ECH student: C&I 110; ECH 271, 273; EDS 202; IDT 278; LLA 313; MATH 260; PETE 360; SPED 210, 250.

Pre-ELED/Pre-ECH students must establish and maintain a minimum 2.75 cumulative and major GPA to enroll in a freshman- or sophomore-level field experience.

The department Selection/Retention Committee will hear appeals from Pre-ELED/Pre-ECH students who are seeking enrollment in courses who have below a 2.75 GPA but not less than a 2.30 GPA.

Transfer Students: All grades on the transfer transcript will count in the calculation of the 2.75 GPA to determine eligibility to become an ELED/ECH/SPED major and enroll in upper-division courses and field experiences.

For additional information about Teacher Education requirements, see the Teacher Education section (p. 346).

Degree Programs

Bachelor of Science in Education—Bilingual/English as a Second Language Education

All students seeking the Bachelor of Science in Education with a major in Bilingual/English as a Second Language Education must complete I, II, and III.A or III.B below, and the foreign language/global issues requirement for the major#. All students will complete the requirements for the Elementary Education licensure in addition to completing the Bilingual and/or the ESL endorsement. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.* In addition to completing their Bilingual/ESL endorsement, students will also complete licensure requirements for Elementary Education.

In accordance with the Illinois State Board of Education licensure rule, all candidates seeking a Professional Education License or endorsement are required by Western Illinois University to obtain a grade of “C-” or better in all directed general education courses, all core courses, and all courses in the option. This rule does not supersede course prerequisite requirements in the catalog that specify a letter grade.

Please see the Teacher Education section of this catalog (p. 346) for more information about WIU’s Teacher Education Program.

I. University General Education Curriculum (p. 70) .........................................................................................46 s.h.
   (including ECON 100, 231, or 232; GEOG 110; HIST 105 or 106; POLS 122; STAT 171; an Art, Music, or Theatre course; an elective in Humanities and Fine Arts; and 10 s.h. of science which must include one Biological, one Physical, and one Earth and Space Science course, one of which must be a lab course)

II. Core Courses ................................................................................................................................................15 s.h.
    EDS 427, 435, 453, 457, 458

III. Tracks (Select A or B) ............................................................................................................................12–15 s.h.

   A. Bilingual Education Track
      1. EDS 430 ...........................................................................................................................................3 s.h.
      2. Required Study Abroad with minimum of 12 s.h. University credit EDS 361 or Study Abroad courses that substitute for coursework required for the major. These courses will depend upon university setting.

   Note: If the student can pass the Target Language Proficiency Exam while in junior-level standing, the student may opt out of the Study Abroad requirement.
3. Foreign Language (select a or b) ....................................................... 9 s.h.
   a. Spanish
      SPAN 325 or 326; SPAN 320, 327, or 401; SPAN 449
   b. Other State-Approved Language
      Select 9 s.h. in 300- or 400-level coursework in chosen language
B. English as a Second Language Track
   1. EDS 440, 447; ENG 471; F L/EDUC 439 .............................................. 12 s.h.
   2. Required Study Abroad (as outlined in Bilingual Education track, III.A.2) or SSED 495 .......................................................... 3 s.h.

IV. Additional Licensure Requirements
A. Additional Bilingual Field Experience: EDS 303 ........................................ 2 s.h.
B. Additional Elementary Education Licensure Requirements .......................... 35 s.h.
   C&I 470 (3); PETE 360; SPED 210, 390; MATH 260, 364; RDG 383†; 384†, 433;
   SCED 364, 464; SSED 365
C. Pre-Professional Education: EDS 301, 305, 401 ........................................ 7 s.h.
D. Student Teaching (16 weeks) ....................................................................... 12 s.h.

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) any major's discipline-specific global issues course; or 4) an approved Study Abroad program.
* Because the student will be qualifying for both a license and endorsement, and meeting the requirements of two state-approved programs, the total will exceed 120 s.h.
† RDG 383 and RDG 384 fulfill the Writing Instruction in the Disciplines (WID) graduation requirement.

Bachelor of Science in Education—Educational Studies
All students seeking the B.S.Ed. in Educational Studies must complete I, II, III, IV, and V below, and the foreign language/global issues requirement for the major. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.
I. University General Education Curriculum (p. 70) ...................................... 43 s.h.
II. Core Courses ........................................................................................................... 33 s.h.
   EDS 100, 201, 204, 310, 311, 405, 440, 490; ENG 381†
III. Directed Electives ................................................................................................. 15 s.h.
   Select 15 s.h. from the following courses:
   HS 400; MGT 349; MKTG 327; RPTA 235, 367, 370, 424; SPED 210
IV. Any Approved Minor ............................................................................................ 16 s.h.
V. Open Electives ...................................................................................................... 13 s.h.

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) any major's discipline-specific global issues course; or 4) an approved Study Abroad program.
† ENG 381 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.

Bachelor of Science in Education—Elementary Education Option or Early Childhood Education Option
All students seeking the Bachelor of Science in Education with an option in Elementary Education must complete I, II, and III.A below, and the foreign language/global issues requirement for the major#. All students seeking the Bachelor of Science in Education with an option in Early Childhood Education must complete I, II, and III.B below, and the foreign language/global issues requirement for the major#. Students are to meet the University General Education and state licensure requirements, and doing so requires close articulation
with their academic advisor. Students in the Licensure track of the Early Childhood Education option will complete student teaching; students in the Non-Licensure track will complete an internship instead of student teaching. The minimum semester hour requirement for the baccalaureate degree is 120 s.h. Teacher Education may require additional hours.

In accordance with the Illinois State Board of Education licensure rule, all candidates seeking a Professional Education License or endorsement are required by Western Illinois University to obtain a grade of “C-” or better in all directed general education courses, all core courses, and all courses in the option. This rule does not supersede course prerequisite requirements in the catalog that specify a letter grade.

Please see the Teacher Education section of this catalog (p. 346) for more information about WIU’s Teacher Education Program.

I. University General Education Curriculum (p. 70) ................................................................. 46 s.h. (including ECON 100 or 231 or 232; GEOG 110; HIST 105 or 106; POLS 122; STAT 171; choice of one of the Art, Music, or Theatre General Education courses; an elective in Humanities and Fine Arts; and 10 s.h. of science which must include one Biological, one Physical, and one Earth and Space Science course, one of which must be a lab course)

II. Core Courses .................................................................................................................................................................................. 14 s.h.
C&I 110; EDS 202; MATH 260; RDG 383†; SPED 210

III. Options of Study (select A or B)

A. Elementary Education
Additional Licensure/Accreditation Requirements .................................................................................................................. 60 s.h.
C&I 170 (1 s.h.), 270 (1 s.h.), 370 (1 s.h.), 371 (1 s.h.), 470 (4 s.h.); EDS 301, 305, 401, 428; ELED 410; LLA 313; MATH 364; PETE 360; RDG 384†; 433; SCED 364, 464; SPED 390; SSED 365, 495; Student Teaching (12 s.h.)

B. Early Childhood Education
1. Additional Licensure/Accreditation Requirements.................................................................................................................. 50 s.h.
ECH 271, 273, 276, 277, 354, 355, 356, 359, 381 (1 s.h.), 380 (1 s.h.), 381 (1 s.h.), 480; LLA 311; MATH 362; NUTR 203; RDG 382†; 432; SCED 352; SPED 250, 392; SSED 354
2. Select one of the following:
a. Licensure
ECH 410; STCH 459 (12) .................................................................................................................................................. 12 s.h.
b. Non-Licensure
ECH 481 .................................................................................................................................................. 10–12 s.h.

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; or 3) SSED 495.
† RDG 383 and RDG 384 fulfill the Writing Instruction in the Disciplines (WID) graduation requirement for the Elementary Education option. RDG 382 and RDG 383 fulfill the Writing Instruction in the Disciplines (WID) graduation requirement for the Early Childhood Education option.

Bachelor of Science in Education—Middle Level Education

All students seeking the Bachelor of Science in Education in Middle Level Education must complete I, II, and III below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

In accordance with the Illinois State Board of Education licensure rule, all candidates seeking a Professional Education License or endorsement are required by Western Illinois University to obtain a grade of “C-” or better in all directed general education courses, all core courses, and all courses in the option. This rule does not supersede course prerequisite requirements in the catalog that specify a letter grade.
Please see the Teacher Education section of this catalog (p. 346) for more information about WIU’s Teacher Education Program.

I. University General Education Curriculum (p. 70) ......................................................... 43 s.h.
   To include ECON 100*, 231*, or 232*; GEOG 110*; HIST 105* or 106*;
   POLS 122*; STAT 171*; and 10 s.h.* of science which must include one Biological,
   one Physical, and one Earth and Space Science course, one of which must be a lab
   course.)

II. Core Courses ............................................................................................................... 48 s.h.
   C&I 110, 170, 270, 370, 403, 470; EDS 202, 305, 306, 401, 428; RDG 384†, 388;
   SPED 210, 390; STCH 462

III. Emphases ................................................................................................................... 29 s.h.
   Choose one of the following emphases:
   A. Literacy Endorsement Emphasis
      1. Students may elect to take one of the following instead of
         GEOG 110 (no additional s.h.; see I. University General
         Education Curriculum): ENG/WS 301; ENG 348; ENG 358........ 0 s.h.
      2. One of the following: ENG 200, 201, 202, 206; BC&J/ENG 290.... 3 s.h.
      3. Minor in Middle Level Literacy Teaching ........................................ 24 s.h.
      4. Open Electives .................................................................................. 2 s.h.
   B. Mathematics Endorsement Emphasis
      1. Minor in Middle Level Mathematics Teaching............................... 24 s.h.
      2. Open Electives .................................................................................. 5 s.h.
   C. Science Endorsement Emphasis
      1. Directed General Education courses (see I. University General
         Education Curriculum)
         a. BIOL/GEOL 181*................................................................. 4 s.h.
         b. GEOG/PHYS 182*............................................................. 4 s.h.
      2. Minor in Middle Level Science Teaching ...................................... 24 s.h.
      3. Open Electives ................................................................................ 2 s.h.
   D. Social Studies Endorsement Emphasis
      1. ANTH 110*.................................................................................. 3 s.h.
      2. HIST 105* or 106*................................................................. 3 s.h.
         Note: Students must take the course not used to satisfy
         requirements in I. University General Education Curriculum
      3. Minor in Middle Level Social Studies Teaching ......................... 24 s.h.
      4. Open Electives ................................................................................ 2 s.h.

   # The foreign language/global issues graduation requirement may be fulfilled by
   successfully completing one of the following: 1) a designated foreign language requirement
   [see Foreign Language/GLOBAL Issues Requirement, p. 64]; 2) a General Education global
   issues course; 3) ENG 358 [Literacy Endorsement emphasis]; or 4) ANTH 110 [Social Studies
   Endorsement emphasis].
   * Course may count as part of the 43 semester hours of University General Education Curriculum.
   † RDG 384 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.

Bachelor of Science in Education—Special Education

All students seeking the Bachelor of Science in Education with a major in Special Education
must complete I, II, III, and IV below, and the foreign language/global issues requirement
for the major*. The minimum semester hour requirement for the baccalaureate degree is
120 s.h. Teacher Education will require additional hours.

In accordance with the Illinois State Board of Education licensure rule, all candidates
seeking a Professional Education License or endorsement are required by Western Illinois
University to obtain a grade of “C-” or better in all directed general education courses, all
core courses, and all courses in the option. This rule does not supersede course prerequisite
requirements in the catalog that specify a letter grade.
Please see the Teacher Education section of this catalog (p. 346) for more information about WIU’s Teacher Education Program.

I. University General Education Curriculum (p. 70) ..................................................................................................................... 43 s.h.
   (including a Biological and a Physical Science—one of which must be a lab, GEOG 110, HIST 105 or 106, POLS 122, STAT 171)
II. Core Courses ........................................................................................................................................................................... 37 s.h.
   SPED 200, 250, 280, 300, 320, 360, 370†, 400†, 405, 410, 415, 417, 420, 430, 460
III. Content Requirements ................................................................................................................................................................. 23 s.h.
   MATH 260, 364; RDG 383, 384, 433; SCED 364; SSED 365
IV. Professional Education .................................................................................................................................................................... 20 s.h.
   A. EDS 202, 301, 401........................................................................................................................................................................... 8 s.h.
   B. Student Teaching: STCH (K–6), (7–12) ............................................................................................................................................. 12 s.h.

† SPED 370 and SPED 400 fulfill the Writing Instruction in the Disciplines (WID) graduation requirement.

The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; or 3) SSED 495.

Students who wish to work toward licensure in both Special Education and Elementary Education may do so as a Special Education major. Dual licensure students take all required Special Education courses as well as additional elementary content classes.

Minors

Minor in Educational Studies ............................................................................................................................................................. 18 s.h.
   1. EDS 100, 201, 204, 310................................................................................................................................................................. 12 s.h.
   2. Directed Electives......................................................................................................................................................................... 6 s.h.
      a. Select 3 s.h. from the following courses:
         EDS 311, 405, 440
      b. Select 3 s.h. from the following courses:
         ENG 381; HS 400; MGT 349; MKTG 327; RPTA 235, 270, 367, 424; SPED 210

Minor in Middle Level Literacy Teaching ................................................................................................................................... 24 s.h.
   1. ENG 299, 433; RDG 433, 434; LLA 367.............................................................................................................................................. 15 s.h.
   2. Directed Electives......................................................................................................................................................................... 9 s.h.
      a. ENG 303 or RDG 467
      b. Six additional course hours (any combination) from English (ENG) in either Forms or Social Justice major categories, Bilingual/English as a Second Language Education, or Reading (RDG)

Note: This minor is offered in conjunction with the major in Middle Level Education. By itself, this minor will not be sufficient for education endorsement purposes.

Minor in Teaching English to Speakers of Other Languages (TESOL) ..................................................................................... 18 s.h.
   1. EDS 427, 435, 457, 458................................................................................................................................................................. 12 s.h.
   2. Select two courses from EDS 440, 447, 453................................................................................................................................. 6 s.h.

Course Descriptions

CURRICULUM AND INSTRUCTION (C&I)

110 Critical Skills for Professional Educators. (2) Examines characteristics and skills of effective educators, specifically those related to oral communication, human interaction, critical thinking, leadership, and effective use of technology. Includes the development of a personal philosophy of education. Required for Early Childhood Education and Elementary Education options.

170 Classroom Observation/Seminar in Education. (1, repeatable to 2) Observation of an elementary or middle level classroom with accompanying seminars focused on exploration of organization and delivery of classroom instruction. Prerequisite or Corequisite: C&I 110. Graded S/U only.

270 Education Field Work Seminar II. (1–2, repeatable to 4) Clinical experience in an elementary or middle level classroom with accompanying seminars focused on exploration of individual characteristics of learners and professional standards for teachers.
Transportation not furnished. Prerequisites or Corequisites: CGI 110 and 170. Graded S/U only.

370 Education Field Work Seminar I. (1–3, repeatable with no maximum) Supervised practicum of educational experiences in elementary school programs. Students explore and apply learning theories as they tutor one or more elementary or middle grade students. Transportation not furnished. Prerequisites: Fully accepted into Teacher Education Program (TEP) and departmental permission. Graded S/U only.

371 Education Field Work Seminar II. (1–3, repeatable to 6) Clinical experience in elementary/ middle level classrooms. Students explore and apply learning theories and practices as they observe and participate in daily classroom instruction. Transportation not furnished. Prerequisites: CGI 110, 170, 270, 370; departmental permission; fully accepted into Teacher Education Program (TEP). Graded S/U only.

403 Middle Level Education. (3) The middle school concept will be examined from multiple perspectives relative to the role of the teacher. Topics include advisory, thematic instruction across core content areas, exploratories, and instructional considerations for social, cognitive, and psychosocial development of adolescent students. A minimum grade of C- is required of Teacher Education majors. Prerequisites: EDS 301 or 306; fully accepted into Teacher Education Program (TEP); restricted departmental permission.

445 (Formerly ELED 445) Honors Seminar, (2, not repeatable) Reading, research, writing, and discussion on educational topics to be announced in advance. Normally, a service learning project and a seminar presentation will be required. Prerequisites: CGI 170 or ECH 273; enrollment in the Honors Collegium.

470 Senior Field Work Seminar in Education. (1–4, repeatable to 6) Supervised practice in an elementary or middle level classroom with accompanying seminars. Preservice teachers work closely with mentor teachers in planning and implementing instruction, including curriculum integration of technology, guiding student learning, and evaluating student progress in the elementary school curriculum. Transportation not furnished. Prerequisites: CGI 370, fully accepted into Teacher Education Program (TEP), and departmental permission. Graded S/U only.

EARLY CHILDHOOD (ECH)

271 Introduction to Early Childhood Education. (3) An overview of early childhood care and education including historical and cultural perspectives, organization, structure, programming, and basic values in the field. Considerations for diversity of culture, language, race, social-economic status, gender, ethnicity, and ability will be included. A minimum grade of C- is required of Teacher Education majors. Restricted: early childhood program or departmental permission.

273 Young Child Growth and Development. (3) A foundation course in theory and principles of the developmental continuum pre-natal through age 8, including an in-depth study of physical, social/ emotional, cognitive, language, and aesthetic development; an exploration of child development within a socio-cultural context. A minimum grade of C- is required of Teacher Education majors. Restricted: early childhood program or departmental permission. IAI: ECE 912.

274 The Young Child as a Learner. (3) The child's acquisition of language, intellectual, and personality development. Relationship between child's growth and development, his/her activities outside and within school. A minimum grade of C- is required of Teacher Education students. Restricted: early childhood program or departmental permission.
A minimum grade of C- is required of Teacher Education majors. Prerequisite: fully accepted into Teacher Education Program (TEP).

**380 Field Work in Early Childhood Education I.** (1–3, repeatable to 6) Clinical experience in pre-primary early childhood settings. Students explore and apply learning theories and practices as they observe and participate in daily classroom activities/instruction. Prerequisites: ECH 271, 273, departmental permission, fully accepted into Teacher Education Program (TEP). Corequisites: ECH 354 and 355. Graded S/U only.

**381 Field Work in Early Childhood Education II.** (1–3, repeatable to 6) Clinical experience in primary grade early childhood settings. Students explore and apply learning theories and practices as they observe and participate in daily classroom activities/instruction. Transportation not furnished. Prerequisites: ECH 271, 273, 380, departmental permission, fully accepted into Teacher Education Program (TEP). Graded S/U only.

**410 Senior Seminar in Early Childhood.** (0) Provides students with an opportunity for reflection, discussion, and professional reading related to their student teaching experience. Prerequisite: ECH 480. Corequisites: STCH 459 and 460. Graded S/U only.

**474 Early Childhood Assessment.** (3) Intensive investigation of informal and formal assessment strategies including basic principles of measurement and evaluation, to plan educational experiences, communicate with parents, identify children in need of specialized services, and evaluate programs for young children from birth through eight years of age. The administration of some assessment instruments is required. A minimum grade of C- is required of Teacher Education majors. Restricted: early childhood program or departmental permission. Prerequisites: ECH 271, 273, 274, 380, fully accepted into Teacher Education Program (TEP).

**480 Field Work in Early Childhood Education III.** (4) Clinical experience in pre-primary early childhood classrooms. Students work closely with mentor teachers in planning, implementing, and assessing instruction in all curricular areas. Student will complete a practice edTPA. Transportation not furnished. Prerequisites: ECH 271, 273, 380, 381, departmental permission, fully accepted into Teacher Education Program (TEP). Graded S/U only.

**481 Early Childhood Internship.** (10–12) A culminating, 14-week, center-based clinical experience in the student’s major area(s) of specialization under the supervision of a department faculty member and a senior teaching professional. Transportation not furnished. Prerequisites: ECH 271, 273, 277, 354, 355, and 380. Graded S/U only.

**EDUCATION (EDUC)**

**239 Pre-Teacher Education Program Admittance.** (0, repeatable with no maximum) Students pursuing teacher licensure are required to take this course in the semester they plan to be fully accepted in the Teacher Education Program (TEP). Students must meet established departmental criteria for admittance to TEP. Graded S/U.

**339 Pre-Student Teaching Clearance.** (0) Students pursuing teacher licensure are required to take this course prior to their student teaching semester. Students must meet established criteria for departmental clearance to student teach. Prerequisites: Full admittance to the Teacher Education Program (TEP). Graded S/U.

**469 Pre-Licensure Clearance.** (0) Students pursuing teacher licensure are required to take this course in the semester they student teach. Students must meet criteria established by the department in order to be recommended for licensure. Prerequisite: departmental clearance to student teach. Corequisite: Student Teaching (STCH). Graded S/U.

**EDUCATIONAL STUDIES (EDS)**

**Formerly EDUCATIONAL AND INTERDISCIPLINARY STUDIES (EIS)**

Courses transferred to Western Illinois University from other institutions need to be evaluated for equivalency. Evaluation forms are available in Horrabin Hall 99. Courses from two-year institutions are not accepted as satisfying 300/400 level courses.

**100 Introduction to Educational Studies.** (3) Introduction to out-of-school education settings. Students explore learning spaces like zoos/museums, early childhood centers, team sports, and nonprofit organizations, and how learning occurs in informal settings. Identification of career paths for educators outside the classroom.

**121 (Formerly FCS 121) Introduction to Life Span Development.** (3) (General Education/Human Well-Being) Growth and development of the individual throughout the life span and family life cycle within the context of the family and community.

**201 Educational Psychology—Human Growth and Development.** (3) Explores human growth and development from conception through adulthood, emphasizes relationship of developmental characteristics and experiences to the teaching/learning process. Field experiences are required. Prerequisite: EDS 100.

**202 (Formerly EIS 202) Multicultural and Social Foundations of Education.** (3) A study of the social, linguistic, and cultural factors that affect the educational experiences, practices, and environments in America. This course broadens students’ understanding of the diverse pluralistic nature of the contexts that either enhance or negate one’s educational experience. Field experience—10 hours required. A grade of C- or above must be earned for teacher licensure.

**204 Diversity Issues in Educational Studies.** (3) Surveys cultural and socioeconomic diversity issues in informal learning environments, including demographic change, access and equity concerns, stereotype threat, socialization to learning, and other relevant topics. Prerequisite: EDS 100.

**301 (Formerly EIS 301) Cognition, Development, and Motivation in Academic Settings.** (3) An introduction to the state of knowledge in contemporary educational and developmental psychology as related to academic settings. Topics include cognitive processing, motivation, and physical, social, and emotional development. A grade of C- or above must be achieved in EDS 301 for teacher licensure. Prerequisite: A grade of C- or above in EDS 202, the equivalent transfer course, or junior standing.

**303 (Formerly EIS 303) Classroom Management and Field Work in Academic Settings.** (2–3) Introduction to understanding and analyzing the learning environment as it relates to classroom and behavior management. Students will participate in supervised practicum in off-campus educational settings (public, private, or title programs) as part of professional preparation in Teacher Education. C- grade or above is required. Transportation not provided. Prerequisite: 2.50 cumulative and major GPAs; EDS 301 with a grade of C- or better; and admission to Teacher Education Program prior to enrolling in EDS 303. (See EDS 301 above for additional prerequisites.)

**304 (Formerly EIS 304) Field Work in Educational and Interdisciplinary Studies.** (1, repeatable to 2) The second supervised practicum in off-campus...
Education

PK–12 educational settings as part of professional preparation in Teacher Education. A grade of C- or above is required. Transportation not provided. Prerequisites: Full acceptance into the Teacher Education Program (TEP) and must have completed EDS 305 with a grade of C- or better. Candidates are required to have already completed a methods course or be concurrently enrolled in a methods course at the time of enrollment in EDS 304.

305 (Formerly EIS 305) Measurement and Assessment of Learning in Academic Settings. (2) An introduction to the language and principles of measurement and assessment, related issues (reliability, validity, etc.) within education grounded in a cognitive theoretical framework that views assessment as the integration of observation, interpretation, and cognition. A grade of C- or above must be achieved in EDS 305 for teacher licensure. Prerequisites: C- or better in EDS 202, EDS 301, and SPED 210.

306 (Formerly EIS 306) Learning and Development in the Adolescent Grades. (3) An introduction to the state of knowledge in contemporary educational and developmental psychology as related to the adolescent's experience in academic settings. Topics include cognitive processing, motivation, and physical, social, and emotional development in the context of adolescence. A grade of C- or above must be achieved in EDS 306 for teacher licensure. Prerequisites: C- or better in EDS 202 and SPED 210.

310 Learning, Cognition, and Motivation in Educational Settings. (3) An introduction to the state of knowledge in contemporary educational psychology. Topics include contemporary perspectives on learning, cognition, human motivation, instructional planning, and instructional strategies. Prerequisite: EDS 100.

311 Assessment and Evaluation in Educational Settings. (3) An introduction to the language and principles of assessment, program evaluation, and research methodology within education. Emphasis placed on identifying, gathering, and interpreting meaningful sources of information/data for effective decision-making in educational settings. Prerequisite: EDS 100.

321 (Formerly FCS 321) Preparation for Marriage and Family. (5) Study of factors associated with marital happiness and success including mate selection, changing roles in marriage through the life cycle, and adjustment to conflicts.

361 (Formerly EIS 361) Field Study Abroad. (1–12) Field study project in international setting. The student submits a written report and fulfills other requirements set up by the instructor. Prerequisite: Bilingual/English as a Second Language Education major.

401 (Formerly EIS 401) Educational Law and Policy. (2) An analysis of formal legal and ethical problems that will allow students to critique contemporary debates in educational policy, law, and ethics. The course will examine the tension between competing philosophical theories and the construction and function of educational policy. A grade of C- or above must be achieved in EDS 401 for teacher licensure. Prerequisite: full acceptance into Teacher Education Program (TEP); a grade of C- or better in EDS 301.

405 (Formerly EIS 405) Designing/Managing Learning Environments. (3) Examines the elements that foster an effective learning environment. Emphasis is placed on strategies that promote student engagement and a sense of community in educational settings. Prerequisites: prior or concurrent pre-service teaching instructional field experience, concurrent student teaching, or permission from the instructor.

427 (Formerly EIS 427) Foundations of Education for Culturally and Linguistically Diverse Populations. (3) An introduction to the historical, political, social, and educational issues that have contributed to policy regarding public school services for language minority populations. Clinical experience of 15 hours required.

428 (Formerly EIS 428) English Language Learners and Bilingualism: Theory, Policy, and Practice. (3) This course supports current and future educators in constructing a foundation of the critical elements in the education of ELLs that include: second language acquisition, culture and diversity, policies and law, ELL family involvement, language development standards, advocacy, and assessment. Prerequisite: EDS 202 or permission of instructor; clinical experience of 15 hours.

430 (Formerly EIS 430) Methods and Materials for Teaching in Bilingual Programs. (3) Acquaints students with methodology and materials, with instruction in the preparation of audio and visual teaching aids, lesson plans, behavioral objectives, and the inquiry teaching methods for the bilingual/ESL classroom. Portion of content presented in Spanish. Clinical experience—15 hours required. A grade of C- or higher must be earned for Teacher Education.

435 (Formerly EIS 435) Cultural Studies of Second Language Learners in the Classroom. (3) The study of historical and contemporary social and cultural issues affecting selected ethnic groups, with particular emphasis on the impact of culture, learning, and schooling on second language learners in U.S. schools. Clinical experience—15 hours required.

440 (Formerly EIS 440) Sociolinguistics. (3) Exploration of foundational work in the field of sociolinguistics and current issues in the field. This course will emphasize the culture-language interface at the level of social relationships within educational settings. Prerequisite: ANTH 110 or EDS 202 or equivalent; clinical experience of 15 hours.

447 (Formerly EIS 447) Teaching of Listening, Speaking, and Pronunciation to English Language Learners. (3) Students examine the articulation of English sounds, the rules that govern their use in speech, and explore ways of applying this knowledge to the teaching of pronunciation. Additional emphasis will be on teaching listening/speaking strategies in the TESOL environment. Prerequisite: EDS 458.

453 (Formerly EIS 453) Assessment of Bilingual and ESL Students. (3) Selection, administration, and interpretation of measurement instruments. Description of testing; multicultural, bilingual, ESL language competency tests; language profiles; assessment in classroom. Prerequisite: English Language Learners and Bilingualism: Theory, Policy, and Practice. Course will focus on teaching listening/speaking strategies in the TESOL environment. Clinical experience—15 hours required.

455 (Formerly EIS 455) Assessment of Bilingual and ESL Students. (3) Selection, administration, and interpretation of measurement instruments. Description of testing; multicultural, bilingual, ESL language competency tests; language profiles; assessment in classroom. Prerequisite: English Language Learners and Bilingualism: Theory, Policy, and Practice. Clinical experience—15 hours required.

457 (Formerly EIS 457) Methods and Materials of Teaching English Language Learners. (3) Analysis of language learning processes of bilingual children. The appropriate order for learning basic skills in two languages will be discussed and techniques of teaching English as a second language will be introduced and practiced. Clinical experience—15 hours required. A grade of C- or higher must be earned for Teacher Education.

458 (Formerly EIS 458) Linguistics for the Teacher of English Language Learners. (3) The study of linguistics applied to teaching limited-English-speaking students. Includes English and non-English phonology, syntax, analysis, and application of linguistic theory. Clinical experience—20 hours required.

490 Educational Studies Internship. (9–12) Field experience provides for practical application of knowledge and theory in an approved setting that provides learning experiences/programs as part of their mission. Supervised work will focus on the educational aspects of the work of the facility or organization. Prerequisites: junior or senior status, majoring in
445 (Cross-listed with ENG 443) Creative Uses of Literature with Children and Young Adults. (3) Presents the development of effective programs in informal and formalized interpretive experiences for children and young adults, emphasizing individual creativity and sources for materials. Not open to students with credit for ENG 443. Prerequisite: LLA 313.

READING (RDG)

382 Literacy Development: Birth through Preschool. (2) Focuses on both methods and content for fostering and assessing literacy development in children from birth through the preschool years in a variety of settings. The course will address the diverse needs of preschool children through differentiation. A minimum grade of C- is required of Teacher Education majors. Writing Instruction in the Disciplines (WID) course. Prerequisites: ECH 271, 273; fully accepted into Teacher Education Program (TEP). Corequisites: LLA 311.

399 (Formerly EIS 499) Special Problems in Education. (1–4; repeatable with no maximum) An independent study of a theoretical or applied problem in education. Approval by the faculty for the undergraduate to broaden understanding and skills in the profession through research and experience.

ELEMENTARY EDUCATION (ELED)

410 Senior Seminar in Elementary Education. (1) Provides students with an opportunity for reflection, discussion, and professional reading related to their student teaching experience. Prerequisites: fully accepted into Teacher Education Program (TEP) and C&H 470. Corequisites: STCH 459, 460, 461, or 462. Graded S/U only.

LITERATURE LANGUAGE ARTS (LLA)

311 Literature for Young Children. (2) A survey of literature for children birth through grade two. Selecting books in various genres through critical analysis and evaluation is emphasized. A minimum grade of C- is required of Teacher Education majors. Prerequisite: fully accepted into the Teacher Education Program (TEP).

313 Children’s Literature. (3) Survey of literature for children preschool through grade 6 with emphasis on critical analysis and evaluation of books in various genres. A minimum grade of C- is required of Teacher Education majors. Prerequisite: 2.50 cumulative GPA.

367 Language Arts in the Middle Level. (3) A study of communication skills: listening, speaking, reading, writing, and vocabulary; a comparison of current teaching methods and materials; and emphasis on the language arts as the core of the middle grades curriculum. A minimum grade of C- is required of Teacher Education majors. Prerequisite: junior standing or departmental approval; fully accepted into Teacher Education Program (TEP).

433 Introduction to Corrective Reading, K–8th Grade. (3) A course emphasizing group and individual identification and instructional procedures for corrective reading in primary-aged, elementary grades, and middle level. A minimum grade of C- is required of Teacher Education majors. Prerequisites: RDG 382, 383, and LLA 311 or 313; fully accepted into Teacher Education Program (TEP). *(If taking RDG 433G.)*

434 Literacy Assessments and Interventions for the Middle Level. (3) Focuses on methods for data-driven decision making, formative and summative assessments and problem-solving processes to monitor student progress. Multi-Tiered Systems of Support will provide the basis for possible interventions for readers in the middle school grades. A minimum grade of C- is required of Teacher Education majors. Prerequisites: RDG 388 and 433; fully accepted into the Teacher Education Program (TEP).

467 Critical Literacy for the Middle Level. (3) Focuses on the integration of 21st century technology competencies in the exploration and application of project-based learning. Middle level literacy teaching candidates’ knowledge of literacy content, concepts, and skills are assessed through engagement in this process. A minimum grade of C- is required of Teacher Education majors. Prerequisites: RDG 384 and 388; C&H 403; fully accepted into the Teacher Education Program (TEP).

SCIENCE EDUCATION (SCED)

352 Methods for Teaching Science PreK–2nd Grade. (3) Methods and content for planning, implementing, and assessing science curriculum when teaching children in PreK through second grade. A minimum grade of C- is required of Teacher Education majors.
Education

Prerequisites: ECH 271 and 273; fully accepted into Teacher Education Program (TEP).

364 Introductory Science Methods. (3) Introduces the nature of science and science education by exploring various issues and approaches relevant to elementary science instruction. Emphasis is placed on contemporary programs which stress direct experience and activity-based learning. A minimum grade of C- is required of Teacher Education majors. Prerequisites: junior standing or departmental approval; fully accepted into Teacher Education Program (TEP).

464 Integrating Science Through Inquiry. (3) Demonstrates how teachers can utilize the processes of inquiry to integrate the various science disciplines—physical, life, earth, and environmental—to provide appropriate science learning experience in the elementary and middle level classroom. A minimum grade of C- is required of Teacher Education majors. Prerequisites: SCED 364; fully accepted into Teacher Education Program (TEP).

465 Middle Level Science Methods. (3) Methods and content for deepening teacher candidate understanding of how the practices of inquiry are applied in the major science disciplines. Provides appropriate learning experiences specific to the middle level classroom. Prerequisites: SCED 364, BIOL/GEOL 181, or PHYS/GEOG 182; fully accepted into Teacher Education Program (TEP).

365 Teaching Our Heritage. (3) Develops the conceptual base for teaching the understanding of our heritage including the role of cultural diversity, change over time, place, government, production, and distribution. A minimum grade of C- is required of Teacher Education majors. Prerequisites: junior standing or departmental approval; fully accepted into Teacher Education Program (TEP).

390 Methods of Teaching Middle Level Social Studies. (3) Designed to aid the prospective middle level social studies teacher in developing objectives, identifying and organizing appropriate learning standards, selecting and organizing content, and using various instructional and assessment techniques. A minimum grade of C- is required of Teacher Education majors. Prerequisites: SCED 364; fully accepted into Teacher Education Program (TEP).

391 Methods of Teaching Middle Level and High School Social Studies. (3) Designed to aid the prospective middle and high school social studies teacher in developing objectives, identifying appropriate learning standards, selecting and organizing content, and using various instructional and assessment techniques. A minimum grade of C- is required of Teacher Education majors. Prerequisites: SED 301; grade of C- or better in all prerequisite courses.

495 Teaching with a Global Perspective. (3) (Global Issues) Develops the conceptual base for teaching the understanding of global connections including those dealing with social, environmental, economic, technological, and individual cultural dimensions. Field component required. A minimum grade of C- is required of Teacher Education majors. Prerequisites: SED 439 or 365; fully accepted into Teacher Education Program (TEP).

SPECIAL EDUCATION (SPED)

200 Introduction to Special Education. (3) Historical foundations of Special Education including litigation, legislation, models, theories, and philosophies. An introduction to professional ethics, conduct, and professional growth and reflection. A minimum grade of C- is required of Teacher Education majors. Corequisite: SPED 280.

210 The Exceptional Learner. (2) A survey of the characteristics of individuals with diverse mental, physical, behavioral, and communication needs. This course emphasizes the identification and education of exceptional learners. For non-majors only. A minimum grade of C- is required of Teacher Education majors.

250 Language Development and Exceptional Individuals. (2) Normal language development from birth through age 12 and children's progression through language development stages at differing rates, and the effects of disabilities on language development. Course will include effects of cultural and linguistic diversity on language development. A minimum grade of C- is required of Teacher Education majors. Prerequisite: SPED 200 or 210.

280 Field Work in Special Education. (1, repeatable to 2) Educational experiences acquired in practical service situations. Repeatable in different settings with permission. Corequisite: SPED 200. Graded S/U only.

300 Characteristics of the Learner. (3) Development of cognitive, emotional, physical, social, and communication skills of students with disabilities. Practices that support the intellectual, social, and personal growth of all students. A minimum grade of C- is required of Teacher Education majors. Prerequisite: SPED 200.

318 Introduction to Health Issues of Children with Disabilities. (2) Introduces to health issues of children with disabilities. Includes basic knowledge of common medical conditions, treatment, effects on physical, cognitive, emotional, social, and educational behaviors; basic skills for physical accommodation; and roles and responsibilities in identifying, assessing, and providing services. A minimum grade of C- is required of Teacher Education majors. Prerequisites: SPED 200 and 300, or permission of instructor.

360 Health Issues of Special Needs Students. (2) Introduction to health issues of children with disabilities. Includes basic knowledge of common medical conditions, treatment, effects on physical, cognitive, emotional, social, and educational behaviors; basic skills for physical accommodation; and roles and responsibilities in identifying, assessing, and providing services. A minimum grade of C- is required of Teacher Education majors. Prerequisites: SPED 200 and 300, or permission of instructor.

370 Assessment. (4) Educational assessment processes and strategies to support instructional planning for students with disabilities. Writing component required. A minimum grade of C- is required of Teacher Education majors. Prerequisites: SPED 280, 320; ENG 180 and 280; fully accepted into the Teacher Education Program (TEP).

390 Differentiating Instruction for Learners with Special Needs. (2) Introduces and provides practice in using various strategies, including Universal Design for Learning, collaboration, Response to Intervention, and Positive Behavior Interventions and Supports, to help general educators serve learners with special needs in
their classrooms. Not open to Special Education majors. A minimum grade of C- is required of Teacher Education majors. Prerequisites: EDS 305 or equivalent, a reading/literacy course, and a methods course in the major; grade of C- or better in all prerequisite courses.

392 Strategies and Procedures for Exceptional Children Ages Birth to Five. (2) Focuses on the use of co-teaching models and assistive technology as well as writing plans to best serve all children, age birth to five. Collaboration between educational fields (special education and early childhood education) will be addressed. Not open to Special Education majors. A minimum grade of C- is required of Teacher Education majors. Prerequisites: ECH 354, 355; SPED 210; fully accepted into Teacher Education Program (TEP).

400 Planning for Instruction. (3) Instructional planning, design, and adaptations to support the learning of students with disabilities. Writing Instruction in the Disciplines (WID) course. A minimum grade of C- is required of Teacher Education majors. Prerequisite: SPED 370.

405 Moderate to Severe Disabilities. (3) Assessment techniques and planning for the unique learning, social, behavioral, health, and transition needs of students with moderate to severe disabilities will be addressed. A minimum grade of C- is required of Teacher Education majors. Prerequisite: SPED 370 with a grade of C- or better.

410 Senior Seminar in Special Education. (0) Provides students with an opportunity for reflection, discussion, and professional reading related to their student teaching experience. Graded S/U only. Prerequisites: SPED 420 and 430; fully accepted into the Teacher Education Program (TEP). Corequisite: STCH 430 or 431.

415 Behavior Seminar. (2) Prepares teacher candidates to make data-driven decisions to proactively address and modify student behaviors across school settings. A minimum grade of C- is required of Teacher Education majors. Prerequisite: SPED 370 with a grade of C- or better. Corequisite: SPED 430 or 445.

417 Collaboration and Co-Teaching. (2) Factors and processes that promote effective communication and collaboration between school professionals, between the school and families, and school and community services are addressed. Theories and practice in models of co-teaching are included. A minimum grade of C- is required of Teacher Education majors. Prerequisite: SPED 370, fully accepted into the Teacher Education Program (TEP).

420 Instructional Delivery in Special Education—Pre-K–12. (4) Research-based instructional practices to encourage inquiry, problem-solving, and critical thinking. Best practices in providing access to general curriculum for Pre-K–12 students with disabilities through inclusion, modified instruction, and transition planning for students with disabilities. A minimum grade of C- is required of Teacher Education majors. Prerequisites: RDG 384; SPED 400, 460.

430 Fieldwork in Special Education: Pre-K–12. (4) Clinical experience in planning, implementation, and assessment of instruction with students with disabilities in elementary and secondary settings. A minimum grade of C- is required of Teacher Education majors. Prerequisites: RDG 384; SPED 400, 460.

440 Instructional Delivery—Secondary Level. (3) Research-based practices to encourage critical thinking skills and access to the general curriculum for secondary students with disabilities. Transition planning and instruction for students with mild to moderate disabilities. A minimum grade of C- is required of Teacher Education majors. Prerequisites: SPED 420 and 430; or permission of instructor.

445 Fieldwork in Special Education: Secondary. (3) Clinical experiences in the planning, implementation, and assessment of instruction with students with disabilities in secondary settings. A minimum grade of C- is required of Teacher Education majors. Prerequisites: SPED 420 and 430; or permission of instructor.

460 Fieldwork in Special Education. (1) Experience in the planning, implementation, and assessment of developmentally appropriate instruction of students with disabilities in different settings. A minimum grade of C- is required of Teacher Education majors. Prerequisites: SPED 370.
Program Offering and Locations:

- Bachelor of Science in Civil Engineering: Quad Cities
- Bachelor of Science in Electrical Engineering: Quad Cities
- Bachelor of Science in Engineering: Quad Cities
- Bachelor of Science in Mechanical Engineering: Quad Cities

For student learning outcomes, please see wiu.edu/provost/learningoutcomes.

Faculty: McDonald, Pratt, Shin, Zbeeb.

The School of Engineering offers four Bachelor of Science degree programs in Engineering at the Quad Cities campus. Although the freshman and sophomore years can be completed at the WIU Macomb campus or at a community college, all four years of all degrees can be completed at the Quad Cities campus. Students must take their junior and senior engineering courses at the Quad Cities campus. Transfer students (i.e., from schools other than Western Illinois University) have special requirements. Please consult the Transfer Students paragraphs (p. 191) for additional details.

Mechanical Engineering

Mechanical Engineering is one of the oldest and broadest of the engineering disciplines. Our ABET-accredited Bachelor of Science in Mechanical Engineering degree program builds upon a foundation of solid mechanics, fluid mechanics, and thermodynamics. The degree offers areas of emphasis in Design Engineering, Manufacturing Engineering, and Robotics Engineering. An elective course in Additive Manufacturing — 3D printing is available for all three emphases.

Electrical Engineering

The Bachelor of Science in Electrical Engineering degree program deals with the study of electricity, analog and digital electronics, electromagnetism, signal processing, and control theory. Students completing the requirements of this degree will also earn a minor in Mathematics.

Civil Engineering

The Bachelor of Science in Civil Engineering degree program deals with the design, construction, and maintenance of physical structures and modifications to our natural environment that are the foundation of our modern society. Our Civil Engineering degree requires students to complete studies in four sub-disciplines: Geotechnical, Structural, Transportation, and Water Resources Engineering.

Engineering

The Bachelor of Science in Engineering is an ABET-accredited multidisciplinary engineering degree designed to prepare graduates for professional practice and leadership in the 21st century. Students take classes in mechanics, materials, electronics, and quality, depending on their emphasis field. The two areas of emphasis offered are General Engineering and Industrial Engineering.

All Engineering programs emphasize innovation, hands-on laboratories, small, intimate classroom settings, mentoring by faculty, and thinking-outside-the-box solutions.
The School of Engineering has the only public Bachelor of Science engineering degree programs in the Quad Cities region, and as such, provides our students many unique opportunities to work with industry through paid internship programs and senior design projects. Please see our website for details.

Additionally, students can participate in many entrepreneurial high-technology development projects through the Quad Cities Manufacturing Laboratory at the Rock Island Arsenal.

All Engineering degrees require completion of 120 semester hours and can be finished in four years, depending on the student’s preparation in mathematics.

Entrepreneurial Engineering, Innovation, and Leadership are the hallmarks of this School!

Transfer Students

There are two primary paths for transfer students to enter the program: 1) transfer from a two- or four-year institution, or 2) through the Linkages program, where students co-register with WIU Engineering and a partner college.

Transfer students seeking admission to any engineering program must satisfy general University admissions requirements. Advanced placement credit for 18 hours of select lower-division Engineering courses from a community college or from a non-ABET accredited Engineering program will be provisionally granted providing the following is true: 1) the student earned a minimum grade of “C” or above (2.0 on a 4.0 scale) for completed courses that are deemed equivalent as determined by the School of Engineering, 2) the courses conform with IAI standards, and 3) the student completes the first 9 semester hours of 300-level Engineering courses with a “C” or above. Final advanced placement credit will be granted upon proof of passing the Fundamentals of Engineering Exam. Please contact the School of Engineering with any questions.

Students seeking transfer credit for required engineering, mathematics, and science courses must have earned a grade of C or better in all such courses to receive full credit (see degree requirements).

Honors Curriculum—Academically qualified students in this department are encouraged to complete an honors curriculum in University Honors, Honors in the Major, or General Honors. All Honors students must complete the one-hour honors colloquium (G H 299). General Honors includes General Honors coursework. Honors in the Major includes honors work in the major. University Honors combines Honors in the Major and General Honors. For more information about honors curricula, see page 100 or visit the Centennial Honors College website at wiu.edu/Honors.

Degree Programs

Bachelor of Science—Mechanical Engineering

All students seeking the Bachelor of Science in Mechanical Engineering must complete I, II, III.A or III.B or III.C, and IV below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

I. University General Education Curriculum (p. 70) ............................................................. 43 s.h.
II. Core Courses^ ...................................................................................................................... 51 s.h.
   ENGR 105, 211@, 212&, 220%, 251, 271, 300, 310, 320, 322, 331, 340, 351, 370, 411, 490†, 491
III. Emphases of Study^ (select A, B, or C) ........................................................................ 6 s.h.
   A. Design Engineering
      Select 6 s.h. from the following courses:
      ENGR 410, 440, 470, 481, 482 ................................................................. 6 s.h.
   B. Manufacturing Engineering
      Select 6 s.h. from the following courses:
      ENGR 345, 410, 440, 470, 481 ................................................................. 6 s.h.
C. Robotics Engineering
   Select 6 s.h. from the following courses:
   ENGR 440, 470, 472, 481 ......................................................... 6 s.h.

IV. Other Requirements^* ................................................................ 30 s.h.
   A. CHEM 201* ................................................................. 4 s.h.
   B. MATH 133*, 134*, 231, and 333 ................................. 15 s.h.
   C. PHYS 211* and 213 ....................................................... 8 s.h.
   D. One additional Chemistry or Physics course .......... minimum 3 s.h.

Note: MATH 311 is highly recommended for students who want to complete a minor in Mathematics.

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) any major's discipline-specific global issues course; or 4) an approved Study Abroad program.

^ Mechanical Engineering majors must complete each ENGR core course, emphasis course, directed elective course, and all directed mathematics and science courses (or equivalent transfer course) with a grade of C or better.

@ Students may also fulfill this requirement through the completion of PHYS 310 with a grade of C or better. See advisor.

& Students may also fulfill this requirement through the completion of PHYS 311 with a grade of C or better. See advisor.

% Students may also fulfill this requirement through the completion of CS 225 with a grade of C or better. See advisor.

† ENGR 490 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.

* 10 s.h. may count toward the University General Education requirement.

Bachelor of Science—Electrical Engineering

All students seeking the Bachelor of Science in Electrical Engineering must complete I, II, III, and IV below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

I. University General Education Curriculum (p. 70) ......................................................... 43 s.h.

II. Core Courses^ ...................................................................................... 48 s.h.
   ENGR 105, 211@, 212&, 220%, 251, 271, 300, 331, 340, 370, 371, 372, 373, 470, 490†,
   491

III. Directed Electives^ ................................................................................. 6 s.h.
   Select 6 s.h. from the following courses: ENGR 471, 472, 473

IV. Other Requirements^* .......................................................................... 33 s.h.
   A. CHEM 201* .............................................................................. 4 s.h.
   B. MATH 133*, 134*, 231, 311, and 333 ............................... 18 s.h.
   C. PHYS 211* and 213 ............................................................... 8 s.h.
   D. One additional Chemistry or Physics course .......... minimum 3 s.h.

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) any major's discipline-specific global issues course; or 4) an approved Study Abroad program.

^ Electrical Engineering majors must complete each ENGR core course, directed elective course, and all directed mathematics and science courses (or equivalent transfer course) with a grade of C or better.

@ Students may also fulfill this requirement through the completion of PHYS 310 with a grade of C or better. See advisor.
& Students may also fulfill this requirement through the completion of PHYS 311 with a grade of C or better. See advisor.
% Students may also fulfill this requirement through the completion of CS 225 with a grade of C or better. See advisor.
† ENGR 490 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.
* 10 s.h. may count toward the University General Education Curriculum requirement.

Bachelor of Science—Civil Engineering

All students seeking the Bachelor of Science in Civil Engineering must complete I, II, III, and IV below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

I. University General Education Curriculum (p. 70) ................................................................. 43 s.h.

II. Core Courses^ ....................................................................................................................... 54 s.h.

  ENGR 105, 211@, 212&, 220%, 251, 271, 305, 310, 331, 360, 405, 412, 452, 453, 460, 461, 490†, 491

III. Directed Electives^ ............................................................................................................. 3 s.h.

  Select 3 s.h. from the following courses: BIOL/GEOL 181; BOT 200; MICR 200; GEOG 100, 110, 121; GEOL 113; GIS 108, 201

IV. Other Requirements^* ........................................................................................................... 30 s.h.

  A. CHEM 201* ....................................................................................................................... 4 s.h.
  B. MATH 133*, 134*, 231, and 333 .................................................................................. 15 s.h.
  C. PHYS 211* and 213 .......................................................................................................... 8 s.h.
  D. One additional Chemistry or Physics course ...................................................... minimum 3 s.h.

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement (see Foreign Language/Global Issues Requirement, p. 64); 2) a General Education global issues course; 3) any major's discipline-specific global issues course; or 4) an approved Study Abroad program.

^ Civil Engineering majors must complete each ENGR core course, directed elective course, and all directed mathematics and science courses (or equivalent transfer course) with a grade of C or better.

@ Students may also fulfill this requirement through the completion of PHYS 310 with a grade of C or better. See advisor.

& Students may also fulfill this requirement through the completion of PHYS 311 with a grade of C or better. See advisor.

% Students may also fulfill this requirement through the completion of CS 225 with a grade of C or better. See advisor.

† ENGR 490 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.

* 10 s.h. may count toward the University General Education Curriculum requirement.

Bachelor of Science—Engineering

All students seeking the Bachelor of Science in Engineering must complete I, II, III.A or III.B, and IV below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

I. University General Education Curriculum (p. 70) ................................................................. 43 s.h.

II. Core Courses^ ....................................................................................................................... 36 s.h.

  ENGR 105, 211@, 212&, 220%, 251, 271, 300, 310, 331, 351, 490†, 491

III. Emphases of Study^ (select A or B) .................................................................................... 21 s.h.

  A. General Engineering

    1. Special Courses ........................................................................................................ 12 s.h.

      ENGR 320, 340, 370, 411
2. Directed Electives .............................................................................................................. 9 s.h.
    Select 9 s.h. from the following courses:
    ENGR 470, 472, 481, 482; MGT/OM 352; MGT 455

B. Industrial Engineering
    1. Special Courses ............................................................................................................ 15 s.h.
       ENGR 340, 345, 411; MGT/OM 352; MGT 455
    2. Directed Electives ........................................................................................................ 6 s.h.
       Select 6 s.h. from the following courses:

Course Descriptions

ENGINEERING (ENGR)

100 Engineering Study and Seminar. (0, repeatable with no maximum) This course facilitates engineering students attending a cohort study hall, seminars, and other engineering events. Enrollment is open to all Engineering majors (attendance is required for some engineering scholarships). Prerequisite: Engineering or Mechanical Engineering major. 3 hrs. lab. Graded S/U only.

105 (Cross-listed with ET 105) Engineering Graphics. (3) An introduction to drafting including shape description, geometric construction, orthographic and isometric drawing, sectioning, dimensioning, and applied descriptive geometry. Basic dimensioning, tolerancing, and pictorial drawings will be covered. An introduction to computer based drafting. Not open to students with credit for ET 105. 2 hrs. lect.; 2 hrs. lab. IAI: EGR 941.

211 Engineering Statics. (3) The first course in Engineering Mechanics for engineers; mechanics of forces and force systems, static equilibrium, forces in structures and machines, friction, centroids, moments of inertia, radii of gyration, and virtual work are examined. Not available to students who are currently enrolled in or have completed PHYS 310 or PHYS 312. Prerequisites: C or above in MATH 133 and PHYS 211. 3 hrs. lect. IAI: EGR 942.

212 Engineering Dynamics. (3) Kinematics, Newton's laws of motion, work-energy and impulse-momentum relationships, and vibrations applied to engineering systems. Not available to students who are currently enrolled in or have completed PHYS 311 or PHYS 312. Prerequisite: C or above in ENGR 211. 3 hrs. lect.

220 Computational Methods for Engineers. (3) Programming basic numerical methods using MATLAB for engineering applications. Matrix algebra, order of convergence, root finding, quadrature, solution of linear and nonlinear equations, eigenvalue problems, numerical integration, differentiation, ordinary differential equations, error analysis, and problem solving related to engineering applications. Prerequisite: C or above in PHYS 211. Prerequisite or Corequisite: MATH 333. 2 hrs. lect.; 2 hrs. lab.

251 Strength of Materials. (3) Introduction to stress and deformation analysis of basic structural materials subjected to axial, torsional, bending, and pressure loads. Prerequisite: C or above in ENGR 211 or PHYS 310. 2 hrs. lect.; 2 hrs. lab. IAI: EGR 945.

271 Engineering Electrical Circuits. (3) An introductory electrical circuits course for all engineering disciplines; provides comprehensive coverage of electronic theory, fundamentals, practices, and analysis and problem solving strategies for DC and AC circuitry, and RLC networks. Includes use of engineering software to simulate and analyze. Prerequisites: C or above in MATH 231 and PHYS 213. 2 hrs. lect.; 2 hrs. lab.
300 Engineering Thermodynamics. (3) First and second laws of thermodynamics, equations of state for liquids and gases, heat and work transfer, phase equilibrium and change, mass and energy balance for control volumes, availability, exergy, power and refrigeration cycles; strategies for solving engineering problems. Prerequisite: C or above in MATH 231. 3 hrs. lect.

305 Transportation Engineering. (3) An application of science, mathematics, and engineering mechanics to the movement of material, people, and goods. The planning, forecasting, and impact of various modes of transportation are considered with emphasis on capacity, level of service, and economy. Prerequisite: C or above in MATH 231. 2 hrs. lect.; 2 hrs. lab.

307 (Cross-listed with ACCT 307) Accounting for Managers and Engineers. (3) Covers basic financial and cost accounting concepts and techniques. Emphasis is on the use of accounting information by managers and engineers for planning, controlling, and operating decisions. Not open to those who have received credit for ACCT 201 or 202. Cannot be applied toward meeting the requirements for Accountancy major or minor or Engineering major without prior approval of the Department Chair or School Director. Not open to students with credit for ACCT 307. Prerequisite: junior standing.

310 Fluid Dynamics. (3) Introduction to the concepts and applications of fluid mechanics and dimensional analysis with an emphasis on fluid behavior, internal and external flows, analysis of engineering applications of incompressible pipe systems, and external aerodynamics. Prerequisite: C or above in ENGR 212 and MATH 333. 3 hrs. lect.; 1 hr. lab.

320 Mechanical Design I (3) Mechanical design including an overview of the design process, engineering mechanics, failure prevention under static and variable loading, bearings, transmission elements, lubrication, and characteristics of the principal types of mechanical elements. Includes use of engineering software to simulate and analyze. Prerequisites: ENGR 105 and grade of C or above in ENGR 211 and 251. 3 hrs. lect.

322 Mechanical Design II. (3) Kinematics and dynamics of machinery, including analytical kinematics, force analysis, cam design, and balancing. Application of mechanics of solids to analyze and size machine components for stress and deflection. Finite-element analysis with emphasis on beam and plate models. Prerequisite: C or above in ENGR 211, 212, 251, and 320. 3 hrs. lect.

331 Engineering Project Management. (3) Concepts, steps, and techniques required to select, organize, manage, and deliver a successful technical or engineering project. Includes concepts in managing innovation and change, entrepreneurial engineering, engineering management, and ethical responsibilities of engineers. Prerequisites: junior standing in Engineering or permission of instructor. 3 hrs. lect.

340 Manufacturing Engineering. (3) A comprehensive overview of the manufacturing process. Key concepts include production system structure and design, manufacturability, quality control, and the techniques, tools, and methods that organizations use to improve overall performance while meeting customer cost, performance, and delivery requirements. Prerequisites: junior standing as an Engineering, Electrical Engineering, or Mechanical Engineering student; C or above in MATH 133 or MATH 137; and permission of School. 3 hrs. lect.

345 (Cross-listed with ET 345) Continuous Improvement: Quality. (3) The study of Continuous Process Improvement. Students will learn about PDCA/ DMAIC models, fundamental quality tools, FMEA, minimizing variation through Statistical Process Control, process capability studies, reliability, VOC, layered audits, and performance metrics. Not open to students with credit for ET 345. Prerequisite: sophomore standing. 3 hrs. lect.

351 Engineering Material Science. (3) This course covers the use of materials in engineering designs including structures of polymers, metals, and ceramics; processes such as heat treatment and solidification; failure mechanisms in service and design techniques to avoid failures; and strategies for material selection. Prerequisite: C or above in ENGR 251. 3 hrs. lect.

360 Structural Analysis. (3) Modeling, analysis, and requirements for static design of trusses, frames, cable, and other common structural shapes including an introduction to light weight structures, use of computer analysis models and tools. Prerequisite: C or above in ENGR 251. 3 hrs. lect.

370 Micro-Electronics I. Circuit Analysis and Design. (3) An electronics course for interdisciplinary engineers dealing with the design, analysis, and strategies for using OpAmps, semi-conductor devices in both analog and digital power electronics, communications systems, sensor systems, and electric power applications as part of a Mechatronic System. Prerequisite: C or above in ENGR 271. 2 hrs. lect.; 2 hrs. lab.

371 Signals and Systems. (3) This course covers the study of signals and systems in continuous and discrete time. It constitutes the basic theory of communication systems, control systems, signal processing, and almost all disciplines of electrical and computer engineering. Prerequisites: C or above in ENGR 271, MATH 311, and MATH 333. 3 hrs. lect.

372 Engineering Probability and Stochastic Processes. (3) This course covers the fundamentals of basic probability theory, random variables, and random processes to provide analysis techniques for stochastic systems. Introduction of multivariate random variable principles, random processes, and characterization of random phenomena in engineering applications. Prerequisites: C or above in ENGR 271, MATH 311, and MATH 333. 3 hrs. lect.

373 Linear Control Systems. (3) The design and analysis of control systems using transfer function-based methods. Topics include modeling of physical systems as transfer functions, stability analysis, design specifications, design of controllers with Root Locus, frequency response techniques, and computer-aided analysis and design. Prerequisite: C or above in ENGR 371. 3 hrs. lect.

405 Highway Design. (3) A study in road and highway design including location, geometrics, drainage, materials, pavements, signage, and traffic controls. Prerequisite: C or above in ENGR 305. 3 hrs. lect.

410 Intermediate Thermo-Fluid Dynamics. (3) Differential equation form of the conservation of mass, momentum, and energy applied to internal flows, boundary layers, lift-drag, and open channel flows. Applications include turbomachinery, gas-vapor mixtures, psychrometrics, combustion, and compressible flow. Prerequisite: C or above in ENGR 310. 2 hrs. lect.; 2 hrs. lab.

412 Hydrology. (3) An introduction to the hydrologic cycle. Concepts and principles of water flow are developed into techniques to solve hydrologic problems; analysis of precipitation, evaporation, transpiration, infiltration, groundwater flow, surface
runoff, and streamflow is covered. Prerequisite: C or above in ENGR 310. 3 hrs. lect.

440 Additive Manufacturing. (3) An introduction to additive manufacturing processes such as powder bed fusion, direct energy deposition, extrusion, photopolymerization, material jetting, and binder jetting. An overview of additive manufacturing software, design, and applications is also incorporated. Prerequisite: C or above in ENGR 105 and C or above in ENGR 351, or permission of instructor and/or director. 3 hrs. lect.

452 Geotechnical Engineering. (3) An introduction to soil mechanics and geotechnical engineering. Topics covered include the origin of soil, definition of soil properties, phase relationships, soil classification, consolidation, shear strength, subsurface stress, settlement, and 1-D consolidation. Prerequisites: C or above in ENGR 251, 310, and MATH 333. 2 hrs. lect.; 2 hrs. lab.

453 Geotechnical Design. (3) Introduction to shear strength based design of foundations and structures in geotechnical engineering. Topics covered include bearing capacity and settlement of shallow foundations, deep foundations, earth retaining structures and slope stability; testing and analysis of soil for shear strength. Prerequisite: C or above in ENGR 452. 2 hrs. lect.; 2 hrs. lab.

460 Steel Design. (3) Design of structural steel elements using the LRFD (load and resistance factor design) methodology to resist the action of axial, shear, bending, and combined stresses; includes stability of structural elements and connections, and use of modern engineering software in design. Prerequisite: C or above in ENGR 360. 2 hrs. lect.; 2 hrs. lab.

461 Concrete Design. (3) This course covers the analysis and design of reinforced concrete members using current design standards including design of members for flexure, shear, and axial forces; serviceability criteria, bond and development length of members for flexure, shear, and axial forces; stability; testing and analysis of soil for shear strength. Prerequisite: C or above in ENGR 452. 2 hrs. lect.; 2 hrs. lab.

470 Mechatronics I. (3) Mechatronics is the integration of mechanical, electrical, computer control, and systems dynamics design engineering. This course brings together all previous instruction in structures, mechanisms, electronics, programming, and design and makes use of modern integrated software to design a mechatronic system. Prerequisites: C or above in ENGR 212, 220, and 370. 2 hrs. lect.; 2 hrs. lab.

471 Microelectronic Circuits II. (3) This course covers analysis and design of microelectronic devices and circuits with industrial applications. Devices and circuits will include: digital, single-ended, linear amplifiers, and other integrated circuits. Prerequisite: C or above in ENGR 470. 3 hrs. lect.; 1 br. lab.

472 Mechatronics II. (3) This course is a continuation of ENGR 470 and involves the design, fabrication, and demonstration of a novel practical mechatronic system. Prerequisite: C or above in ENGR 470. 2 hrs. lect.; 2 hrs. lab.

473 Industrial Controls. (3) This course will emphasize basic to advanced knowledge of methods used in industry to deliver, control, and monitor electrical devices. Course content will focus upon understanding and creating wire diagrams, selection of electrical devices and programmable logic devices applications. Prerequisite: C or above in ENGR 470. 2 hrs. lect.; 2 hrs. lab.

481 Finite Element Analysis. (3) The finite element method and its application to engineering problems: truss and frame structures, linear elasticity, plane stress and plane strain, axisymmetric elements, isoparametric formulation, heat conduction, transient analysis; use of commercial software; overview of advanced topics. Prerequisites: C or above in ENGR 300 and 351, and C or above in either ENGR 320 or 360. 2 hrs. lect.; 2 hrs. lab.

482 (Cross-listed with ET 482) Parametric Modeling. (3) The application of computer aided design techniques utilizing industrial software within a minicomputer and workstation environment. Not open to students with credit for ET 482. Prerequisite: ET 207. 2 hrs. lect.; 2 hrs. lab.

490 Engineering Senior Design. (2, repeatable to 4) Students working in teams solve an industry selected problem. Students will be required to research, provide analysis and solutions to assigned projects. The course will also focus upon communication, team building, and critical thinking skills. Writing Instruction in the Disciplines (WID) course. Prerequisites: only available to majors in the School of Engineering. C or above in all required Math, Science, and core courses (except for ENGR 491); also complete all except up to 9 s.h. in Emphasis of Study with a C or above. Arranged.

491 Engineering Internship. (2) Off-campus work experience in engineering. Written weekly reports and copies of all projects, analysis, and other work are required. Recommend completion before entering last term on campus. Prerequisites: senior standing, a minimum GPA of 2.000, a minimum GPA of 2.00 from courses completed within the major, and approval of program coordinator. Graded S/U only.
Program Offerings and Locations:

- Bachelor of Science in Construction and Facilities Management: Macomb
- Bachelor of Science in Engineering Technology: Macomb, Quad Cities
- Minor in Construction and Facilities Technology: Macomb
- Minor in Industrial Technology: Macomb, Online
- Minor in Manufacturing Technology: Macomb, Quad Cities
- Minor in Operations Management: Macomb, Quad Cities

For student learning outcomes, please see wiu.edu/provost/learningoutcomes.

Faculty: Gravitt, Hall, H. Hemphill, L. Hemphill, Higgins, Hsu, Hunter, Kim, Obregon, Payne, Stone, Thurman.

The Department of Engineering Technology offers a Bachelor of Science in Construction and Facilities Management, and a Bachelor of Science in Engineering Technology.

The degree in Construction and Facilities Management is designed to educate students to apply advanced materials and design techniques as solutions to construction problems. The comprehensive curriculum combines technical education with instruction in current design and methods employed in industry. Students learn to organize the available workforce, materials, and equipment to design, manage, and support projects. Graduates are prepared to take a managerial/supervisory role in the processes involved in industry.

The degree in Engineering Technology is designed to represent the practical application of mathematics, science, and engineering to real-world operation, production, and service problems. Students learn to organize and optimize resources to develop, create, operate, maintain, and manage projects. The program includes a strong foundation in hands-on learning coupled with business management principles and practices.

The department offers minors in Construction and Facilities Technology, Industrial Technology, Manufacturing Technology, and Operations Management.

Honors Curriculum—Academically qualified students in this department are encouraged to complete an honors curriculum in University Honors, Honors in the Major, or General Honors. All Honors students must complete the one-hour honors colloquium (G H 299). General Honors includes General Honors coursework. Honors in the Major includes honors work in the major. University Honors combines Honors in the Major and General Honors. For more information about honors curricula, see page 100 or visit the Centennial Honors College website at wiu.edu/Honors.

Degree Programs

Bachelor of Science—Construction and Facilities Management

All students seeking the Bachelor of Science in Construction and Facilities Management must complete I, II, III, IV, and V below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

I. University General Education Curriculum (p. 70) ......................................................... 43 s.h.
II. Core Courses.................................................................................................................54 s.h.
CSTM 132, 230, 234, 236, 260, 301, 302, 320, 337, 345, 348, 430, 433, 434, 440,
460, 493† (3 s.h.); ET 105

III. Directed Electives ........................................................................................................6 s.h.
Choose 6 s.h. from the following:
CSTM 336; ET 344, 345, 346; HRM 353; RPTA 482

IV. Open Electives ...........................................................................................................7 s.h.

V. Other............................................................................................................................23 s.h.
A. ACCT 200 or 201 or 307.......................................................................................3 s.h.
B. ECON 100 or 231 or 232.....................................................................................3 s.h.
C. GEOL 110.............................................................................................................4 s.h.
D. MATH 103.............................................................................................................3 s.h.
E. MGT 349.................................................................................................................3 s.h.
F. MGT 352................................................................................................................4 s.h.
G. MATH 128, 129 .....................................................................................................4 s.h.
H. PHIL 351................................................................................................................4 s.h.
I. PHYS 114, 116........................................................................................................3 s.h.
J. STAT 171.................................................................................................................3 s.h.

† CSTM 493 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) any major’s discipline-specific global issues course (including CSTM 440); or 4) an approved Study Abroad program.

Bachelor of Science—Engineering Technology

All students seeking the Bachelor of Science in Engineering Technology must complete I,
II, III, and IV below, and the foreign language/global issues requirement for the major#.
The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

I. University General Education Curriculum (p. 70) .....................................................43 s.h.

II. Core Courses ..............................................................................................................57 s.h.
ET 105, 207, 261, 281, 300, 301, 302, 320, 337, 345, 347, 356, 367, 403, 446, 448, 468, 477, 481, 482,
493 (9 s.h.)†

III. Other* .....................................................................................................................33 s.h.
CHEM 101 ................................................................................................................... 4 s.h.
CS 114 or 214 or 225 or 488 .......................................................................................3 s.h.
ECON 100 or 231 or 232.........................................................................................3 s.h.
MGT 349 ....................................................................................................................3 s.h.
MGT/OM 352 ..........................................................................................................3 s.h.
MATH 128, 129 ...................................................................................................... 6 s.h.
PHYS 114, 115 ...................................................................................................... 8 s.h.
STAT 171 .................................................................................................................3 s.h.

† ET 493 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.

* 13 s.h. may count toward the University General Education requirement.

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) any major’s discipline-specific global issues course; or 4) an approved Study Abroad program.
Minors

Minor in Construction and Facilities Technology .................................................. 18 s.h.
1. Required Courses ......................................................................................... 12 s.h.
   CSTM 132, 230, 234, 348
2. Choose 6 s.h. from the following: ............................................................... 6 s.h.
   CSTM 236, 260, 301, 302, 336, 337, 345, 430, 433, 434, 440, 460;
   ET 105, 344, 346

Minor in Industrial Technology ................................................................. 18 s.h.
1. ET 105 .......................................................................................................... 3 s.h.
2. 15 s.h. chosen from the following: ............................................................... 15 s.h.
   a. ET Electives from any area of specialization as approved by
      the department academic advisor
   b. MGT 349
   c. MGT/OM 352

Minor in Manufacturing Technology ......................................................... 21 s.h.
1. Required Courses ......................................................................................... 9 s.h.
   ET 105, 241, 345
2. Choose 12 s.h. from the following: ............................................................. 12 s.h.
   ET 207, 261, 344, 356, 367, 403, 446, 468, 477, 481, 482

Minor in Operations Management ............................................................... 18–21 s.h.
1. ACCT 201* and 202*, or (preferred) ACCT 307* ....................................... 3–6 s.h.
2. ET 344, 345; HRM 353; MGT/OM 352; SCM 457 ................................. 15 s.h.
   * Business majors should consult with their academic advisor.

Course Descriptions

CONSTRUCTION MANAGEMENT (CSTM)

132 Introduction to Construction Management. (3)
Introduction to the field of Construction and Facilities Management. Includes the study and application of methods, systems, processes, tools, and equipment that are common to current industry practices in the built environment. 2 hrs. lect.; 2 hrs. lab.

230 Construction Documents and Plan Reading. (3)
A comprehensive study of the common construction documents including plan reading methodologies, bid documents, addenda, and basic quantity take-off of construction materials. Corequisite: MATH 103 or permission of instructor. 3 hrs. lect.

234 Construction Systems and Concepts. (3)
Construction systems and concepts including relationships between materials used in construction. Content includes basic materials used in residential and commercial structures. Prerequisite or Corequisite: CSTM 132. 3 hrs. lect.

236 Surveying for Construction. (3) An introduction to surveying methods used in the construction industry. Students will learn surveying techniques for roads and building sites. Conventional as well as electronic surveying equipment will be used. Not open to students with credit in AGTM 461. Prerequisite: MATH 103 or permission of instructor. 2 hrs. lect.; 2 hrs. lab.

260 Construction Statics and Strength of Materials. (3) A study of structural factors that influence the development of building design. Survey of statics and strength of materials with an introduction to structural planning and preliminary structural design for temporary structures related to Construction Management. Prerequisite: MATH 103 or permission of instructor. 3 hrs. lect.

301 Residential Architectural Design. (3) The study of residential architectural design including drawing setup, architectural programming, site plan, floor plan layouts, elevation, construction details, and 3D modeling using current industry software. Provides students with the foundational knowledge of blueprint creation for residential building construction projects. Prerequisite: ET 105. 2 hrs. lect.; 2 hrs. lab.

302 Commercial Architectural Design. (3) A study of Building Information Modeling (BIM) for commercial construction teaching students the basic skills to develop and use BIM on a project for construction planning, documents, cost estimating, and high-quality 3D designs utilizing current industry software. Prerequisite: CSTM 301. 2 hrs. lect.; 2 hrs. lab.

320 (Cross-listed with ET 320) Professional Preparation. (3) Prepares and enables students to gain skills and experience with the professional internship search process and career success. Topics include cover letters, resume preparation, networking, job searching, interviewing, professional business communications, presentations, and industry appropriate correspondence specific to the major. Not open to students with credit in ET 320. Prerequisites: Engineering Technology major, Construction and Facilities Management/Technology major or minor, Engineering Technology major, or Manufacturing/Industrial Technology minor, and sophomore standing.

336 Aggregate Based Materials. (3) A study of residential and commercial uses of aggregate materials as structural systems with a focus upon aggregate, Portland cement concrete, and asphalt cement concrete. Laboratory experiences include application techniques. Prerequisite: CSTM 234. 2 hrs. lect.; 2 hrs. lab.

337 Electrical and Mechanical Systems. (3) A study of electrical and mechanical systems. Content includes electrical, plumbing, and HVAC system design; lighting, acoustics systems selection, and utilization for energy.
conservation. Sustainable energy options and trends for all systems will also be introduced. Prerequisite: CSTM 234. 3 hrs. lect.

345 Construction Scheduling. (3) A study of planning and scheduling practices used by the construction industry. Scheduling logic, productivity and durations, resource leveling, cost loading, critical path issues, and applications of computer software for the creation of construction project schedules are covered. Prerequisite: MATH 103 or permission of instructor. Pre- or co-requisites: CSTM 230 and 234, or permission of instructor. 3 hrs. lect.

348 (Formerly CSTM 448) Construction Occupational Safety and Health. (3) A study of the Federal OSHA Act and its applications to the construction industry. Beyond federal regulations, the course includes accident prevention plans, safety education, and documentation preparation. Pre- or co-requisite: CSTM 234 or permission of instructor. 3 hrs. lect.

356 (Cross-listed with ET 356) Introduction to Power Systems. (3) A study of electrical, hydraulic, and pneumatic power systems. Emphasis upon structural and behavioral characteristics of components used in the generation, transmission, and control of power systems used in contemporary industry. Not open to students with credit in ET 356. Prerequisite or Corequisites: PHY 114 or 115 or 150 or permission of instructor. 3 hrs. lect.

430 Construction Estimating. (3) A study of construction industry estimating techniques and practices for both residential and commercial construction. Students will practice estimating with both simulation exercises and actual construction projects. Computer software will be utilized in this course. Prerequisite: CSTM 230 or permission of instructor. 2 hrs. lect.; 2 hrs. lab.

433 Legal Aspects of Construction. (3) A comprehensive review of legal aspects of construction for managers. Topics include contracts/agreements, liens, bonds, insurance, codes, certification, laws, and ethics. Prerequisite: CSTM 230 or permission of instructor. 3 hrs. lect.

434 Construction and Facilities Management. (3) Summarizes the management issues in both Construction and Facilities Management professions. Includes Construction and Facilities Planning, Capital Projects Management, Real Estate, and Human Resource Management as they link to current technology. Prerequisite: CSTM 230 or permission of instructor. 3 hrs. lect.

440 Green and Sustainable Construction. (3) (Global Issues) Comprehensive coverage of green and sustainable construction principles, materials, and methods. Sustainable construction rating systems will be discussed with the focus on LEED criteria. Prerequisite: 75 hours of completed college coursework or permission of instructor. 3 hrs. lect.

455 Construction Management Seminar. (1–3) Each offering provides students with an opportunity for intensive study in specialty topics reflective of the variety in Construction Management. May be repeated with different topics for a maximum of 3 s.h. Graded S/U only. Prerequisite: junior/senior standing or permission of instructor.

460 Soils and Foundations for Construction. (3) A course on basic principles of structural soils and structure foundations, soil classification implications, and applications for the construction industry. Prerequisite: CSTM 260. 3 hrs. lect.

470 Facilities Management Capstone. (3) Summarizes the construction option of study in Facilities Management combining areas of Facilities Planning, Capital Projects Management, Real Estate, and Human Resource Management as they link to current technology. Prerequisites: RPTA 482, ET 346, and senior standing. 3 hrs. lect.

492 Independent Study. (1–3, repeatable to 6) Selection and exploration of a specific area of Construction Management or planning issue, solution of a specific construction industry problem, in-depth study of specific areas of construction, or exploration and/ or achievement of a relevant professional certification. Prerequisite: Senior college standing, 21 s.b. of CSTM coursework, and approval of department chairperson. GPA requirement of 2.50 in major.

493 Internship. (3, repeatable to 9) Off-campus work experience in construction. Written weekly reports are required. Writing Instruction in the Disciplines (WID) course. Recommended completion before entering last term on campus. A maximum of 9 s.h. may be applied toward major requirements. Prerequisites: junior/senior standing; ENG 280: CSTM 348. A cumulative minimum GPA of 2.00, a minimum GPA 2.00 in the major/minor, and approval of department chair. Graded S/U only.

ENGINEERING TECHNOLOGY (ET)

105 (Cross-listed with ENGR 105) Engineering Graphics. (3) An introduction to drafting including shape description, geometric construction, orthographic and isometric drawing, sectioning, dimensioning, and applied descriptive geometry. Basic dimensioning, tolerancing, and pictorial drawings will be covered. An introduction to computer based drafting. Not open to students with credit for ENGR 105. 2 hrs. lect.; 2 hrs. lab. IAE: EGR 941.

207 Geometric Modeling. (3) Principles and techniques of basic computer aided drafting and the application of software to produce two-dimensional and three-dimensional drawings and designs. Not open to students with credit for ENGR/ET 482. Prerequisite: ENGR/ET 105. 2 hrs. lect.; 2 hrs. lab.

241 Manufacturing Processes. (3) An introduction to production processes in manufacturing industries. Laboratory assignments will involve processing plastic and composite materials, along with welding and casting of metals. 2 hrs. lect.; 2 hrs. lab.

261 Machine Tool Production. (3) The theory and operation of machine tools and precision measuring instruments. Laboratory assignments will involve material removal processes. 2 hrs. lect.; 2 hrs. lab.

293 Industrial Work Experience. (1–3, repeatable to 3) This course will enable students to gain experience in manufacturing, construction, or graphic communication in a supervised and approved industrial environment. Written weekly reports, along with a final report, are required. Students will be under the general supervision of both the University instructor and the industrial supervisor. Evaluation of each student’s work will result from combined observations of all supervisors. This work experience will provide students an opportunity to apply basic industrial skills to the industrial work involved and enable them to better begin to understand the principles to be mastered for more advanced work. Completion of three 40-hour work weeks required for each semester hour of credit. Prerequisites: major in the Department of Engineering Technology and permission of instructor.

320 (Cross-listed with CSTM 320) Professional Preparation. (3) Prepares and enables students to gain skills and experience with the professional internship search process and career success. Topics include cover letters, resume preparation, networking, job searching, interviewing, professional business communications, presentations, and industry appropriate correspondence specific to the major. Not open to students with credit in CSTM 320. Prerequisites: Engineering Technology major, Construction and Facilities Management/Technology major or minor, Engineering Technology major, or
Engineering Technology

321 Industrial Plastics and Composites Fabrication. (3) The study and application of composite and plastic materials, forming, molding, and other industrial processes. 2 hrs. lect.; 2 hrs. lab.

344 Continuous Improvement: Lean Practices. (3) Comprehensive study of non-value-added practices, their financial impact, and techniques/tools used to reduce or eliminate them. Lean principles are emphasized. Includes SS, Kanban and supermarket systems, Value Streams, setup reduction, Visual Control, and corrective action. Prerequisite: sophomore standing. 3 hrs. lect.

345 (Cross-listed with ENGR 345) Continuous Improvement: Quality. (3) The study of Continuous Process Improvement. Students will learn about PDCA/DMAIC models, fundamental quality tools, FMEA, minimizing variation through Statistical Process Control, process capability studies, reliability, VOC, layered audits, and performance metrics. Not open to students with credit for ENGR 345. Prerequisite: sophomore standing. 3 hrs. lect.

346 Facilities Design. (3) This course covers the study of the design and layout of industrial facilities and equipment design. Students will be involved in case studies, economic models, and problem solving of manufacturing systems. Prerequisite: sophomore standing. 3 hrs. lect.

356 (Cross-listed with CSTM 356) Introduction to Power Systems. (3) A study of electrical, hydraulic, and pneumatic power systems. Emphasis upon structural and behavioral characteristics of components used in the generation, transmission, and control of power systems used in contemporary industry. Not open to students with credit in CSTM 356. Prerequisite or Corequisite: PHYS 114 or 115 or 150 or permission of instructor. 2 hrs. lect.; 2 hrs. lab.

367 Computer Numerical Controlled Machining. (3) Introductory and advanced applications of numerically controlled machines. Laboratory experiments will include both off line and machine programming of CNC mills and lathes. Prerequisite: ET 261 or permission of instructor. 2 hrs. lect.; 2 hrs. lab.

403 Design and Prototype Development. (3) Engineering and technology research, design, and development strategies are emphasized to develop the creative, critical thinking, and innovation skills necessary to generate new products, identify product ideas, and design, develop, test, analyze, and successfully fabricate a prototype. Prerequisites: ET 207 and 241; or permission of instructor. 2 hrs. lect.; 2 hrs. lab.

446 Material Science. (3) The study of metallurgy, plastics, and ceramics with emphasis on properties, structure, testing, and heat treatment for the design, manufacture, and failure analysis of materials. Stress, strain, and deformation tests will be included. 2 hrs. lect.; 2 hrs. lab.

448 Industrial Safety. (3) A study of the Federal OSHA Act as it applies to both industry and construction. Beyond federal regulations, the course includes accident prevention plans, safety education, and documentation preparation. 3 hrs. lect.

455 Engineering Technology Seminar. (1–3) Each offering provides students with an opportunity for intensive study in specialty topics reflective of the variety in Engineering Technology. May be repeated with different topics for a maximum of 3 s.h. Graded S/U only. Prerequisite: junior standing or permission of instructor.

468 Computer Aided Manufacturing (CAM) Machining. (3) The study and application of graphics and language based CAM systems for 2½D machining and 3D surfacing on numerically controlled machines, including cellular production team projects. Prerequisites: ET 207 and 367, 2 hrs. lect.; 2 hrs. lab.

477 Programmable Controller and Data Acquisition. (3) A study of programmable logic and data acquisition control systems used to monitor and update facilities, machines, and equipment. Topics include signal conditioning; A-D conversions; decision models; ladder, state, and object oriented programming; data logging and digital differential control. Prerequisite: one of the following: CS 114, CS 211/212, CS 214, CS 225, CS 488, or permission of instructor. 2 hrs. lect.; 2 hrs. lab.

481 Robotics Systems. (3) A comprehensive study of the mechanics, electronic, and computer technologies required to design and implement robotic systems. Prerequisites: PHYS 114, CS 114, CS 212, CS 214, CS 225, CS 488, or permission of instructor. 2 hrs. lect.; 2 hrs. lab.

482 (Cross-listed with ENGR 482) Parametric Modeling. (3) The application of computer aided design techniques utilizing industrial software within a minicomputer and workstation environment. Not open to students with credit for ENGR 482. Prerequisite: ET 207. 2 hrs. lect.; 2 hrs. lab.

492 Independent Study. (1–3, repeatable to 6) Selection, exploration, and solution of a problem in an area of Manufacturing Engineering. Prerequisites: senior college standing, 26 s.b. or ET coursework, and approval of department chairperson. GPA requirement of 2.50 in major.

493 Internship. (3–12 in 3-hour blocks, repeatable to 12) Off-campus work experience in manufacturing. Written weekly reports required. Writing Instruction in the Disciplines (WID) course. Recommended completion before entering last term on campus. A maximum of 9 s.b. may be applied toward major requirements. Prerequisites: junior/senior standing; prerequisites as related to the student’s technology option selected; ENG 289. A minimum GPA of 2.00, a minimum GPA of 2.00 from courses completed within the major, and approval of program coordinator. Graded S/U only.

GRAPHIC COMMUNICATION (GCOM)

111 Graphic Communication Foundations. (3) Overview of the Graphic Communication Industry. Topics include the history and current use of the technology and techniques used in printing, hardware and software tools used in the industry, and basic principles and methods used in the creation of print and non-print-based layouts. 2 hrs. lect.; 2 hrs. lab.

112 Introduction to Graphic Communication. (3) A study of the Graphic Communication industries including composition, photoconversion, press work, and finishing operations. 2 hrs. lect.; 2 hrs. lab.

117 Introduction to Electronic Publishing. (3) A study of programs, systems, and equipment used in electronic desktop publishing. An introduction and exposure to a variety of electronic desktop publishing programs and tools. Emphasis is upon design, layout, and execution of techniques used in publishing. 2 hrs. lect.; 2 hrs. lab.

122 (Cross-listed with ARTS/BC&J/IDT 122) Introduction to Emerging Design Technologies. (3) Introduction to concepts and issues related to emerging design technologies. Topics include ethical considerations, production design process, design decision-making process, and design principles. Course will conclude with an overview of other options and introduction to portfolio preparation. Not open to students with credit for ARTS/BC&J/IDT 122.
212 Introduction to Digital Image Manipulation. (3) The theory and practice of color, line, and halftone image scanning. Activities include: color separations, corrections, and working with halftones. Prerequisite: GCOM 112. 2 hrs. lect.; 2 hrs. lab.

213 Introduction to Graphic Illustration. (3) A study of illustration software with emphasis upon operational skills and techniques used in creating two-dimensional and three-dimensional illustrations. Prerequisites: GCOM 112 or permission of instructor. 2 hrs. lect.; 2 hrs. lab.

218 Introduction to Interactive Media Production. (3) An introduction and overview of using web authoring and content management tools for designing and producing online content. Emphasis on understanding foundations, terminology, identifying webpage elements, and technical aspects for creating basic online interactive documents and presentations for web publishing. 2 hrs. lect.; 2 hrs. lab.

314 3D Print and Web Technologies. (3) Focus is on the creation of three-dimensional objects for a wide range of uses in industry. Topics include the use of animation and modeling for product visualization and multi-Internet applications. Prerequisites: GCOM 117 and GCOM 218; or consent of instructor. 2 hrs. lect.; 2 hrs. lab.

316 Production Printing. (3) Printing production techniques are utilized throughout this course allowing the opportunity to view and practice the fundamental principles and production methods used in the graphic communication industry. Prerequisites: GCOM 117 and 212, or instructor approval. 1 br. lect.; 4 hrs. lab.

318 Intermediate Interactive Media Production. (3) An exploration and construction at an intermediate level of complex documents and presentations for web publishing. Emphasis on the technical aspects of using advanced techniques, hardware, and web authoring software and content management tools toward developing effective interactive online environments. Prerequisite: GCOM 218. 2 hrs. lect.; 2 hrs. lab.

320 Professional Preparation in Graphic Communication. (3) This course will prepare and enable students to gain skills and experience with the professional internship search process for career success. Topics will include cover letters, resume preparation, networking, job searching, interviewing, professional business communications, presentation, correspondence, and portfolio development. Prerequisite: Graphic Communication major and sophomore standing. 2 hrs. lect.; 2 hrs. lab.

412 Advanced Digital Image Manipulation. (3) The use of digital image manipulation equipment in creating special effect images. Emphasis will be placed upon advanced color theory, color separation, and digital enhancement. Prerequisite: GCOM 212. 2 hrs. lect.; 2 hrs. lab.

413 Packaging and Display Technologies. (3) An overview of packaging and display technologies. Emphasis on terminology, applications, processes, materials, and substrates, as well as conventional and digital technical aspects of creating basic packaging and point of purchase displays. Prerequisite: GCOM 213. 2 hrs. lect.; 2 hrs. lab.

414 Advanced Image Transfer and Printing Processes. (3) The study of advanced printing and image transfer systems and processes. Emphasis will be upon supervised experience in a Graphic Communication lab. Prerequisite: GCOM 213. 2 hrs. lect.; 2 hrs. lab.

415 Printing Production Management. (3) The study and application of estimation and production practices in the publishing industry. Emphasis will be on cost transfer and production to estimating. Emphasis is on processes and techniques characteristic of the publishing industry. Prerequisite: GCOM 212. 2 hrs. lect.; 2 hrs. lab.

417 Advanced Electronic Publishing. (3) Advanced work with electronic desktop publishing programs. Emphasis will be upon advanced design and layout techniques. Projects include multiple page documents, forms, booklets, and brochures. Integration of work from multiple software programs will also be stressed. Prerequisites: GCOM 117 and 213 or consent of instructor. 2 hrs. lect.; 2 hrs. lab.

419 Advanced Interactive Media Production. (3) The focus of this course is on website development. Topics will focus on HTML and a variety of WYSIWYG editors and software. Site planning and adding graphics and other media (video, animations, etc.) will also be discussed. Prerequisite: GCOM 318. 2 hrs. lect.; 2 hrs. lab.

422 (Cross-listed with ARTS/BC&J/IDT 422) Applied Emerging Design Technologies. (3) The course allows students to focus on personal portfolio development using emerging technologies. Students will also have the opportunity to work collaboratively on real-world projects that apply principles in emerging technologies. Not open to students with credit for ARTS/BC&J/IDT 422.

423 Advanced Graphic Illustration. (3) Advanced hands-on experience with illustration software for creating technical graphics. Emphasis on employing advanced technical processes to create technically-correct, two-dimensional and three-dimensional illustrations for use in various printed and electronic media. Prerequisites: GCOM 212 and 213. 2 hrs. lect.; 2 hrs. lab.

455 Graphic Communication Seminar. (1–3) Each offering provides students with an opportunity for intensive study in specialty topics reflective of the variety in Graphic Communication. May be repeated with different topics for a maximum of 3 s.h. Graded S/U only. Prerequisite: junior standing or permission of instructor.

492 Independent Study. (1–3, repeatable to 6) Selection, exploration, and solution of a problem in an area of Graphic Communication. Prerequisite: Senior college standing. 21 s.h. of GCOM coursework, and approval of department chairperson. GPA requirement of 2.50 in major.

493 Internship. (3–12 in 3-hour blocks, repeatable to 12) Off-campus work experience in Graphic Communication. Written weekly reports required. Writing Instruction in the Disciplines (WID) course. Recommend completion before entering last term on campus. A minimum of 9 s.h. may be applied toward major requirements. Prerequisites: junior/senior standing; prerequisites as related to the student’s technology option selected; ENG 280. A minimum GPA of 2.00, a minimum GPA of 2.00 from courses completed within the major, and approval of program coordinator. Graded S/U only.

INSTRUCTIONAL DESIGN AND TECHNOLOGY (IDT)

406 Advanced Topics in Photography. (3) Advanced camera and darkroom controls for processing and printing both black and white and color. Prerequisite: IDT 240.

408 Large Format Photography. (3) Introduction to the large format view camera and its controls. Studio, available, and location lighting will be used with a variety of different subjects and props in both black and white and color. Prerequisite: IDT 240.

433 Instructional Three-Dimensional Modeling and Animation. (3) Instructional uses of three-dimensional modeling and animation are explored including basic modeling, tools, virtual camera controls, materials, video production, and lighting. Prerequisite: ARTS/BC&J/GCOM/IDT 122 or IDT 250, or permission of instructor.
460 Instructional Virtual Reality Design. (3) Focuses on the integration of virtual reality technologies for instruction and training. Provides opportunities to develop instructional/training virtual environments utilizing virtual reality authoring systems. Prerequisite: IDT 355 or permission of instructor.

480 Advanced Web-Based Instruction. (3) Emphasizes the potential of Internet technology to foster interactivity in design of performance solutions. Students move beyond static Web page creation to advanced incorporation of resources in support of highly interactive forms, database creation and management, and client/server integration. Prerequisite: IDT 250 or permission of instructor.

(Professional Education)

278 Assistive Technology for Students with Special Needs. (1) Explores the research on using assistive technology devices with children with special needs, offers pre-service teachers the opportunity to develop the technological skills needed to work with children included in the regular classrooms who are required to use these technologies. Provides hands-on experience using these devices. Open only to students in the Teacher Education Program (TEP).

285 Technology Integration Standards for Pre-Service Teachers. (3) Introduces pre-service teachers to fundamental concepts, skills, and attitudes for applying technology in educational settings, as defined by ISTE National Technology Standards for Teachers and ISBE Technology Standards for All Illinois Teachers. Open only to students in the Teacher Education Program (TEP). Prerequisite: successful completion of the Technology Competency Assessment (TCA), or permission of instructor.

OPERATIONS MANAGEMENT (OM)

352 (Cross-listed with MGT 352) Operations Management. (3) Foundations for Operations Management as practiced in contemporary organizations. Focus is on the efficient and effective value-adding transformation of inputs into goods and services in both internal and external value chains. Extensive use of mathematics and statistics is involved. Not open to students with credit in MGT 352.
English

Interim Chairperson: Dr. Marjorie C. Allison
Office: Simpkins Hall 124
Telephone: (309) 298-1103; Fax: (309) 298-2974
Website: wiu.edu/English

Program Offerings and Locations:

• Bachelor of Arts in English: Macomb, Quad Cities (Literature and Language option)
• Minor in Creative Writing: Macomb
• Minor in English: Macomb, Quad Cities
• Minor in Film: Macomb
• Minor in Professional Writing: Macomb, Quad Cities, Online
• Minor in Queer Studies: Macomb

For student learning outcomes, please see wiu.edu/provost/learningoutcomes.

The Department of English offers the sequence of courses in composition required of all students; literature, drama, and film courses which fulfill the Humanities and Multicultural Studies requirements of the University General Education Curriculum; a major and minor in English; a comprehensive major in English Teacher Education; minors in Creative Writing, Film, and Professional Writing; and electives in advanced writing and creative writing. It also participates in interdisciplinary programs in Liberal Arts and Sciences, Environmental Studies, Queer Studies, and Women’s Studies.

Although the department’s offerings are diverse, critical writing, reading, and thinking—developed by active engagement with and participation in the related discourses of literature, film, creative, and expository writing—are the constant emphases. The department prepares its graduates to perform successfully in graduate and professional schools and in the many fields in which clear thinking and effective self-expression are valued.

GradTrac is available to English majors. See page 79 for information about GradTrac.

Honors Curriculum—Academically qualified students in this department are encouraged to complete an honors curriculum in University Honors, Honors in the Major, or General Honors. All Honors students must complete the one-hour honors colloquium (G H 299). General Honors includes General Honors coursework. Honors in the Major includes honors work in the major. University Honors combines Honors in the Major and General Honors. For more information about honors curricula, see page 100 or visit the Centennial Honors College website at wiu.edu/Honors.

Degree Program

Bachelor of Arts—English

All students seeking the Bachelor of Arts in English must complete I, II, and III.A or III B below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

In accordance with the Illinois State Board of Education licensure rule, all candidates seeking a Professional Education License or endorsement are required by Western Illinois University to obtain a grade of “C-” or better in all directed general education courses, all core courses, and all courses in the option. This rule does not supersede course prerequisite requirements in the catalog that specify a letter grade.

Please see the Teacher Education section of this catalog (p. 346) for more information about WIU’s Teacher Education Program.
I. University General Education and College of Arts and Sciences Curriculum
Requirements (p. 85) ........................................................................................................60 s.h.
Except Teacher Education students must complete the University General Education
Curriculum Requirements, including a General Education Mathematics course—43 s.h.
(p. 70)

II. Core Courses ..............................................................................................................16 s.h.
ENG 200, 201, 202, 299, 376, 476†

III. Options of Study (select A or B)
A. Literature and Language
1. Special Courses
   a. One upper-division course in Forms, chosen from among the following:
      ENG 302, 303, 304, 305, 306, 310, 356, 393, 395; or ENG 400, 409
      when appropriate .................................................................3 s.h.
   b. One upper-division course in Traditions, chosen from among the
      following: ENG 311, 312, 314, 319, 324, 331, 335, 337, 340, 347, 353, 355;
      ENG/BC&J 390; or ENG 400, 401, 409 when appropriate ..............3 s.h.
   c. One upper-division course in Social Justice, chosen from among the
      following: ENG 307, 346, 348, 350, 357, 358, 359, 392;
      or ENG 400, 401, 409 when appropriate ........................................3 s.h.
   d. One upper-division course in Theory/Writing, chosen from among
      the following: ENG 368, 370, 372, 388, 389, 483, 489 ......................3 s.h.
   e. One upper-division course in Pre-1800 Literature, chosen from
      among the following: ENG 311, 312, 314, 356; or ENG 304, 305, 306,
      310, 400, 401, 409 when appropriate ..............................................3 s.h.
   2. Departmental Electives (6 s.h. must be upper-division) .........................9 s.h.
   3. Any Minor.............................................................................................................16–20 s.h.
   4. Open Electives .................................................................................................0–4 s.h.

B. English—Teacher Education
1. Special Courses
   a. Choose two of the following: ENG/BC&J 290; ENG 303, 381, 388, 480 ......6 s.h.
   b. One upper-division course in Traditions, chosen from among the
      following: ENG 311, 312, 314, 319, 324, 331, 335, 337, 340, 347, 353, 355;
      ENG/BC&J 390; or ENG 400, 401, 409 when appropriate..............3 s.h.
   c. One upper-division course in Social Justice, chosen from among the
      following: ENG 307, 346, 348, 350, 357, 358, 359, 392;
      or ENG 400, 401, 409 when appropriate ........................................3 s.h.
   d. ENG 384†, 466, 471 ..................................................................................9 s.h.
   e. ENG 433 .......................................................................................................3 s.h.
   f. One upper-division course in Grammar and Language, chosen from
      among the following: ENG 370, 372, 483 .............................................3 s.h.
   2. Other
      a. Professional Education Sequence .........................................................15 s.h.
         ENG 366; EDS 202, 301, 303 (2 s.h.), 304 (1 s.h.), 305, 401
      b. SPED 210 and SPED 390 .................................................................4 s.h.
      c. EDUC 239, 339, 439 ...........................................................................3 s.h.
      d. STCH 480 ............................................................................................12 s.h.
   3. English Language Arts Emphasis (choose a, b, c, or d)
      a. Creative Writing .......................................................................................6 s.h.
         ENG 285 and one upper-division Creative Writing course
      b. Literature .....................................................................................................6 s.h.
         2 upper-division Literature courses
      c. Professional Writing ..................................................................................6 s.h.
         ENG 381 and one upper-division Professional Writing course
      d. Film.............................................................................................................6 s.h.
         ENG/BC&J 290 and one upper-division Film course
# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) an English (ENG) global issues course; or 4) an approved Study Abroad program.

† ENG 476 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement for the Literature and Language option. ENG 384 and 476 fulfill the Writing Instruction in the Disciplines (WID) graduation requirement for the Teacher Education option.

Minors

Minor in Creative Writing ............................................................................................................. 17–18 s.h.

1. ENG 285 ........................................................................................................ 3 s.h.
2. Choose one of the following three sequences: ......................................................... 6 s.h.
   a. ENG 385 and 485
   b. ENG 386 and 486
   c. ENG 387 and 487
3. Choose one intermediate course in second genre: ........................................... 2–3 s.h.
   ENG 385, 386, 387; THEA 409, 419
4. Choose two literature courses from the following: ........................................... 6 s.h.
   ENG 200, 201, 202, 300, 358; any 300-400 level course in English Literature

Minor in English ......................................................................................................................... 18 s.h.

1. ENG 299 ........................................................................................................ 3 s.h.
2. English Electives ...................................................................................................... 15 s.h.
   At least three electives must be taken at the 300-400 level

Minor in Film .............................................................................................................................. 18 s.h.

1. ENG/BC&J 290, 390, 496 .................................................................................. 9 s.h.
2. 9 s.h. of elective courses chosen from the following: ........................................ 9 s.h.
   BC&J 333; BC&J/ENG 394; BC&J/ENG/WS 494; ENG 389, 392, 393, 395; ENG/REL 492; POLS 301; THEA 473

Minor in Professional Writing................................................................................................... 16 s.h.

1. Core: ENG 380 and 481 ....................................................................................... 7 s.h.
2. Two elective courses chosen from: ENG 281, 381, 387, 388, 480, 483, 484, 487, 489, 495 (maximum of 3 s.h. of ENG 495) ......................... 6 s.h.
3. Writing Instruction in the Disciplines (WID) course from any major ... 3 s.h.

Note: No more than one course which fulfills a requirement for a major may be counted in the minor.

Minor in Queer Studies ............................................................................................................ 16 s.h.

See Interdisciplinary Minors (p. 239).

Proficiency Examinations

Freshmen who have been in accelerated programs in high school or transfer students from other institutions of higher education may request permission to take a proficiency examination for English 180 or 280. The examinations will be given by the second week of each semester. A student will receive 3 s.h. of credit upon passing the examination. Direct inquiries to Writing Director, 127 Simpkins Hall.
Course Descriptions

ENGLISH (ENG)

100 Introduction to Writing. (3) Introduction to writing as a social act with emphasis on developing flexible reading and writing processes for a range of genres. Required of students placed in the course during initial registration. Designated sections taught in computer labs. Not open to students who have completed ENG 180 or 280 with a grade of C or above. Graded A, A-, B+, B, B-, C+, C, C-, U, F.

IAI: C1 900.

195 Introduction to Literature. (3) (General Education/Humanities) An introduction to outstanding works of prose, poetry, and drama which emphasizes the development of the reader's interpretive skills. The course is designed to promote an appreciation of excellence in literature. For non-English majors.

IAI: H3 900.

200 Introduction to Poetry. (3) (General Education/Humanities) Reading and discussion of poetry from around the world and spanning more than a century, introducing students to questions of social justice and methods of interpretation.

IAI: H3 903.

201 Introduction to Fiction. (3) (General Education/Humanities) Reading and discussion of prose fiction from around the world and spanning more than a century, introducing students to questions of social justice and methods of interpretation.

IAI: H3 901.

202 Introduction to Drama. (3) (General Education/Humanities) Reading and discussion of plays from around the world and spanning more than a century, introducing students to questions of social justice and methods of interpretation.

IAI: H3 902.

205 Introduction to Shakespeare. (3) (General Education/Humanities) Reading and discussion of selected plays, with emphasis on modern methods of interpretation. For non-English majors.

IAI: H3 905.

206 Issues in U.S. Literature. (3) (General Education/Humanities) Reading and discussion of important works of American literature from several historical periods, with emphasis on their relation to American society and culture.

IAI: H3 909.

228 Introduction to British Literature. (3) Study of major historical periods of British literature by means of representative literary types, texts, and authors, and predominant genres. Prerequisite/Corequisite: ENG 180.

IAI: H3 901.

238 Introduction to American Literature. (3) Study of major historical periods of American literature by means of representative literary types, texts, and authors, and predominant genres. Prerequisite/Corequisite: ENG 180.

245 (Cross-listed with AAS 245) Survey of African American Literature. (3) A literary and cultural introduction to the study of African American writers, organized chronologically, but with special emphasis on the twentieth century. Not open to students with credit for AAS 245.

258 Introduction to World Literature. (3) Study of representative literary types, texts, and authors, and predominant genres from a range of cultures, both Western and non-Western. Prerequisite/Corequisite: ENG 180.

280 College Writing II. (3) (General Education/Communication Skills) Continued, advanced study and practice of writing as a social act with emphasis on disciplinary and professional contexts, rhetorical genre, and discourse community. Designated sections taught in computer labs. Prerequisite: ENG 180. Graded A, A-, B+, B, B-, C+, C, C-, U, F.

IAI: CI 901R.

281 (Formerly ENG 383) Writing and Social Action. (3) (General Education/Humanities) This course explores writing as social action and engages students in writing persuasively for public settings. Students will analyze and produce collaborative print and digital texts created for social action.

285 Introduction to Creative Writing. (3) (General Education/Humanities) An introductory course for students who wish to explore various forms of poetry and short-fiction writing. ENG 285 or consent of instructor is prerequisite for ENG 385, 386, 485.

290 (Cross-listed with BC&J 290) Introduction to Film. (3) (General Education/Humanities) Screening and discussion of films from around the world, introducing students to selected traditions, questions of social justice, and methods of interpretation (with laboratory). Not open to students with credit in BC&J 290.

IAI: F2 908.

299 Critical Methods of Reading and Writing. (3) Introduction to basic forms and conventions of critical writing, strategies of interpretation, and theoretical issues in literary studies. Prerequisites: ENG 180 (with a grade of C or better) and at least one of the following (with a grade of C or better): ENG 200, 201, 202, 206, 228, 238, 258; ENG/BC&J 290.

300 Short Story. (3) (General Education/Humanities) The analysis of short stories in light of the elements of fiction (plot, character, conflict, points of view, symbolism, theme, and authorial and narrative strategies). May include consideration of forms ranging from flash fiction to the novella.

301 (Cross-listed with WS 301) Women and Literature. (3) (General Education/Multicultural Studies) The study of literature as an art practiced by women, with an examination of portrayals of women in literature. Not open to students with credit in WS 301.

IAI: H3 911D.

302 Popular Forms of Literature. (3) Studies in selected popular forms of literature. Topics may include forms such as detective fiction, science fiction, westerns, horror, romance, adventure, or thrillers. Prerequisite: ENG 299 with a grade of C or better, or consent of instructor.

303 Forms of New Media Literature. (3) Studies in forms of new media literature, including forms such as digital literature, graphic novels, video games, and/or other literary forms which experiment with new media. Prerequisite: ENG 299 with a grade of C or better, or consent of instructor.

304 Poetic Forms. (3) Study of a major form of poetic expression. May include a single genre (e.g. epic or lyric), or individual forms (e.g. sonnet or ode). The course will also address both the technical vocabularies and major concepts of poetics. Prerequisite: ENG 299 with a grade of C or better, or consent of instructor.

305 Non-Fiction Forms. (3) Study of one or more of the forms of non-fiction writing such as autobiography, diary, essay, epistolary, or non-fiction movements such as the New Journalism or creative non-fiction. Prerequisite: ENG 299 with a grade of C or better, or consent of instructor.

306 Forms of the Novel. (3) An intensive study of one or more of the forms of the novel. Topics may include the epistolary, picaresque, gothic, or other forms. The course will also address narratology and major critical
approaches to the novel. Prerequisite: ENG 299 with a grade of C or better, or consent of instructor.

307 (Cross-listed with WS 307) Issues for Women Writing. (3, repeatable to 6 for different topics) Reading, discussion, and writing focused on a particular social, cultural, or personal issue related to how and what women write. Not open to students with credit in WS 307. Prerequisite: ENG 299 or WS 190, or consent of instructor.

310 Forms of Drama. (3) A study of one or more of the forms of drama such as medieval morality and mystery plays, revenge tragedy, heroic tragedy, and comedy of manners. Prerequisite: ENG 299 with a grade of C or better, or consent of instructor.

311 Studies in Medieval British Literature. (3) Studies of selected British literary works from the beginnings to about 1500, with the Old English and more difficult Middle English texts read in translation. Prerequisite: ENG 299 with a grade of C or better, or consent of instructor.

312 Studies in Renaissance and Seventeenth-Century British Literature. (3) Studies of selected British literary works from 1485 to 1660. Prerequisite: ENG 299 with a grade of C or better, or consent of instructor.

314 Shakespeare. (3) A study of the major comedies, histories, and tragedies of Shakespeare and his contemporaries in the historical, cultural, intellectual, and theatrical contexts in which they were written. Prerequisite: ENG 299 with a grade of C or better, or consent of instructor.

319 Studies in Nineteenth-Century British Literature. (3) Investigates those qualities, issues, and forms which distinguish nineteenth-century British writers from their predecessors and which inform the literature of their successors. Prerequisite: ENG 299 with a grade of C or better, or consent of instructor.

324 Studies in Twentieth-Century British Literature. (3) Investigates selected poetry, drama, fiction, and nonfiction in the context of changing social and political horizons characteristic of modern Britain. Prerequisite: ENG 299 with a grade of C or better, or consent of instructor.

331 Studies in Nineteenth-Century American Literature. (3) Investigates the development of a distinctive American literature against the background of the cultural changes in an expanding nation. Prerequisite: ENG 299 with a grade of C or better, or consent of instructor.

335 Studies in American Poetry. (3) Focuses on one or more of the critical issues which have characterized the emergence and development of poetry in America. Prerequisite: ENG 299 with a grade of C or better, or consent of instructor.

337 Contemporary American Literature. (3) Study of contemporary American fiction, poetry, non-fiction, drama, and film, emphasizing recent formal and thematic trends. Prerequisite: ENG 299 with a grade of C or better, or consent of instructor.

340 American Nature Writing. (3) Study of selected literary works, primarily non-fiction, from the seventeenth century to the present, that explore the human engagement with the American landscape and its forms of life. Prerequisite: ENG 299 with a grade of C or better, or consent of instructor.

346 (Cross-listed with AAS 346) African American Fiction. (3) A survey of selected African American short stories and novels from the beginning to the present, from Brown, Johnson, and Toomer to Ellison, Baldwin, Morrison, and beyond. Not open to students with credit in AAS 346. Prerequisite: AAS/ENG 245, or ENG 299 with a grade of C or better, or consent of instructor.

347 The Novel in Context. (3) Study of the novel in light of a particular context such as literary movements, social conditions, an award (Booker, Pulitzer, etc.), or political issues. Prerequisite: ENG 299 with a grade of C or better, or consent of instructor.

348 Ethnic Literatures of the United States. (3) (General Education/Multicultural Studies) Study of literary texts, authors, and genres from various ethnic groups in the U.S. Examinations of culturally specific and cross-cultural questions including issues of race, class, and gender. Prerequisite: ENG 299 with a grade of C or better, or consent of instructor.

350 Postcolonial Literature. (3) (Global Issues) A study of texts that address the experiences of empire by writers from countries with a history of colonialism or works by writers who have migrated from formerly colonized countries. Prerequisite: ENG 299 with a grade of C or better, or consent of instructor.

353 Great Books. (3) Study of selected literary masterpieces, from the ancient Greeks through the present: European epics, drama, lyric poetry, and prose in English translation. IAI: H3 906.

354 (Cross-listed with AAS 354) African Americans in American Film. (3) Analysis of the representation of African Americans in American films as a way to consider how imagery affects society's attitudes about race. Films from early 20th century depictions of mammies to the 1990s hip-hop sagas will be examined. Not open to students with credit in AAS 354. Prerequisite: AAS 100 or consent of instructor.

355 Myths, Legends, and Literature. (3) A literary study of myths and legends, with special emphasis on European myths and legends and their relationship to literature.

356 Forms of Biblical Literature. (3) A study of the literary variety of the Testaments, including Biblical history, lyric poetry, biography, and letters, among other forms.

357 Nation and Literature. (3) (Global Issues) The study of literature by writers of a particular nation (or related nations) with special attention to that nation's identity, history, cultural traditions, and international relations. Prerequisite: ENG 299 with a grade of C or better, or consent of instructor.

358 Studies in Non-Western Literature. (3) (General Education/Multicultural Studies) (Global Issues) Study of selected literary works (in English translation) from developing countries, with attention to their distinctive forms and viewpoints. IAI: H3 908N.

359 LGBT Topics in Literature. (3) Examines sexual diversity and representations of sexuality in American, British, and/or World Literature and culture, with specific attention to lesbian, gay, bisexual, and transgender topics. Introduce students to queer studies and queer theoretical understanding of literature. Prerequisite: ENG 180.

366 Reading Instruction in Middle and High Schools. (2) This course addresses instructional reading strategies for secondary school content area classrooms. It focuses on reading and literacy instruction, design and selection of content-specific reading materials, creating course content to meet learner needs, and formal and informal reading assessment. Prerequisites: EDS 202, EDS 301, and SPED 210.

368 Studies in Literary Theory. (3) Studies in selected works of literary theory. This course may focus on specific themes or topics such as structuralism, hermeneutics, deconstruction, queer theory, disability studies. Prerequisite: ENG 299 with a grade of C or better, or consent of instructor.
370 Rhetorical Grammar. (3) Use a rhetorical framework to study grammatical and discourse structures and apply them to students’ own writing. Prerequisites: ENG 180 and 280, or permission of instructor.

372 The English Language in Historical and Social Contexts. (3) Origins and varieties of the English language and its acquisition. Prerequisite: ENG 299 with a grade of C or better, or consent of instructor.

376 Professional Development Workshop. (1) Studies the rhetorical processes, materials for internships, jobs, or further schooling, a portfolio of writing, and an essay that articulates personal and professional goals. Students will also take part in workshops for career and/or educational opportunities for English majors. Prerequisite: junior standing.

380 Introduction to Professional Writing. (3) Focus on the roles disciplinary structures play in reading and writing. Topics will include rhetorical genre theory, writing research, audience analysis, and the craft of writing. Writing Instruction in the Disciplines (WID) course. BGS online writing course. Prerequisites: ENG 180 and 280, or permission of instructor.

381 Technical Communication. (3) Developing informative, reader-centered technical communication. Writing, testing, and revising common genres and styles. Writing Instruction in the Disciplines (WID) course. BGS online writing course. Prerequisites: ENG 180 and 280, or permission of instructor.

384 Teaching Writing in Middle and High Schools. (3) An advanced writing course designed primarily for English education majors and minors; a study of the rhetorical process, practice in writing essays, and consideration of teaching composition. Writing Instruction in the Disciplines (WID) course. Prerequisite: ENG 280.

385 Writing Workshop: Poetry. (3) Further work in the writing of poetry. Prerequisite: ENG 285 or consent of instructor.

386 Writing Workshop: Fiction. (3) Further work in the writing of fiction. Prerequisite: ENG 285 or consent of instructor.

387 Writing Workshop: Nonfiction. (3) Work in the writing of literary nonfiction. Prerequisites: ENG 180 and 280, or consent of instructor.

388 Writing for the Web. (3) Theory and practice in writing for the demands of the web: brief, modular, visually oriented, and accessible. Prerequisite: ENG 180 and 280, or consent of instructor.

389 Film Theory and Criticism. (3) Study of various critical approaches to film and an exploration of the theories informing these approaches (with laboratory). Prerequisite: ENG/BC&J 290 or consent of instructor.

390 (Cross-listed with BC&J 390) Film History. (3) This course is an historical survey that covers the international history of cinema from its origins to the present. It considers issues including the development of national film industries, national and international film movements, and the social history of film (with laboratory). Not open to students with credit in BC&J 390. Prerequisite: ENG/BC&J 290 or consent of instructor.

392 National Cinemas. (3) (Global Issues) An intensive study of selected national cinemas, concentrating on how different nations have developed film industries and how these films have affected national identities. Prerequisite: ENG/BC&J 290 or consent of instructor.

393 American Film Genres. (3) Study of American film genres including Westerns, gangster and detective films, musicals, horror and science fiction films, melodramas, and comedies (with laboratory). Prerequisite: ENG/BC&J 290, ENG 299 with a grade of C or better, or consent of instructor.

394 (Cross-listed with BC&J 394) Documentary Film and Video. (3) History of documentary film and video with focus on the documentary as a medium of communication, information, and interpretation (with laboratory). Not open to students with credit in BC&J 394.

395 Film and Literature. (3) Selected literary works and their film adaptations will serve as the basis for the comparative analysis of the different aesthetics of literature and film (with laboratory). Prerequisite: ENG/BC&J 290 with a grade of C or better, ENG 299 with a grade of C or better, or permission of instructor.

400 Topics in Literature. (1–3, repeatable for different topics) A study of a special theme or topic in literature. Prerequisite: ENG 299 with a grade of C or better, or consent of instructor.

401 Major Authors. (1–3, repeatable for different authors) A thorough study of the work of a major author or two closely related authors. Prerequisite: ENG 299 with a grade of C or better, or consent of instructor.

408 Senior Honors Thesis. (1–4, repeatable to 4) An independent study project resulting in a substantial original paper. Students will work closely with a single instructor who will evaluate the project. Prerequisites: registration for departmental honors in English, approval of the thesis advisor and the departmental honors coordinator, and senior status in the University.

409 Independent Study. (1–3, repeatable to 3) Independent reading or research projects for the senior English major. Prerequisite: consent of instructor.

433 Literature for Young Adults. (3) Survey of literature for secondary students grades 7–12. Emphasis on critical analysis, evaluation, and use of books in various genres.

466 Teaching Literature and Reading in Middle and High Schools. (3) Constructs teaching units for 6–12 grade students that integrate age-appropriate literary genres, and examines reading strategies derived from literary theory. Prerequisites: ENG 280 and 374; 12 s.b. (or equivalent) of coursework in literature, or consent of instructor.

471 Language Diversity and Grammar for Middle and High School Teachers. (3) Examines the relationships among standard and nonstandard dialects and effective practices for teaching grammar. Prerequisites: ENG 280 and 372, or consent of instructor.

476 Senior Seminar. (3, repeatable to 6 for different topics) Intensive exploration of a major issue, era, author, or text, culminating in the writing of a substantial scholarly essay. Writing Instruction in the Disciplines (WID) course. Prerequisite: ENG 280, ENG 299 with a grade of C or better, senior standing, or consent of department chairperson.

480 Writing and Social Networks. (3) Writing unique to the collaborative, social environment of the contemporary web: groups, conversations, distributed work. In-depth work with electronic writing tools. Prerequisites: ENG 380, or permission of instructor.

481 Topics in Writing Studies. (4) Semester-long study of a topic in the theory, practice, or history of writing studies. Prerequisites: ENG 380 or permission of instructor.

483 (Formerly ENG 382) Editing and Reviewing. (3) Theory and practice of editing and reviewing documents. Focus on helping peers or colleagues improve their writing. Prerequisites: ENG 380, or permission of instructor.

484 Writing Center Studies. (3) Theory and practice of writing center studies. Issues relevant to consulting, research, and administration. Prerequisites: ENG 380 or permission of instructor.
485 Advanced Poetry Workshop. (3) An advanced course in writing poetry for students already accomplished in the genre. Prerequisites: ENG 285 and 385.

486 Advanced Fiction Workshop. (3) An advanced course in writing fiction for students already experienced in the genre. Prerequisites: ENG 285 and 386.

487 Advanced Nonfiction Workshop. (3) An advanced course in writing nonfiction for students already experienced in the genre. Prerequisites: ENG 285 and 387.

489 Grant and Proposal Writing. (3) Best practices for finding, researching, planning, and writing proposals and grant applications. Prerequisites: ENG 380 or permission of instructor.

492 (Cross-listed with REL 492) Religion, Literature, and Film. (3) (Global Issues) Study of multicultural literary and cinematic texts engaging a wide range of religious traditions. Not open to students with credit for REL 492. Prerequisite: ENG 299 with a grade of C or better, or one 100- or 200-level Religious Studies or Philosophy course, or consent of instructor.

494 (Cross-listed with BC&J 494 and WS 494) Women and Film/Television. (3) An overview of women in film and television that considers the on-screen images of women as well as the positions of women working behind the scenes (with laboratory). Not open to students with credit for BC&J 494 or WS 494. Prerequisites: ENG 180 and 280.

495 Internship. (1–12, repeatable to 12) Actual work assignments and on-the-job experiences in businesses and public agencies which value the skills of intellect, imagination, research, reading, and writing of the English major. Prerequisite: permission of department chairperson. Graded S/U only.

496 (Cross-listed with BC&J 496) Topics in Film. (3) Study of major subjects and themes in film. Topics vary but may include intensive study of directors such as Alfred Hitchcock and Federico Fellini, or artistic movements such as Italian Neorealism, French New Wave, Contemporary Spanish Cinema, or Russian Formalism. Not open to students with credit in BC&J 496. Prerequisites: ENG/BC&J 290, ENG/BC&J 390, and 6 s.h. in approved film minor electives, or permission of instructor.

(English Education)

239 Pre-Teacher Education Program Admittance. (0, repeatable with no maximum) Students pursuing teacher licensure are required to take this course in the semester they plan to be fully accepted in the Teacher Education Program (TEP). Students must meet established departmental criteria for admittance to TEP. Graded S/U.

339 Pre-Student Teaching Clearance. (0) Students pursuing teacher licensure are required to take this course prior to their student teaching semester. Students must meet established criteria for departmental clearance to student teach. Prerequisites: Full admittance to the Teacher Education Program (TEP). Graded S/U.

439 Methods for Middle and High School English Language Arts. (3) Preparation for student teaching, including analysis of techniques and materials useful to the English teacher in the secondary school. Observation and demonstration teaching. Open to English majors and minors. Prerequisites: ENG 384, 466, and 499; EDS 301.

443 (Cross-listed with LLA 443) Creative Uses of Literature for Children and Young Adults. (3) Presents the development of effective programs in informal and formalized interpretive experiences for children and young adults, emphasizing individual creativity and sources for materials. Not open to students with credit for LLA 443. Laboratory. Prerequisite: LLA 313.

480 See STCH 480.

499 Teaching New Media in Secondary Schools. (3) This course is designed to prepare students for teaching in middle and secondary schools by focusing on contemporary issues and controversies in education. Additionally, students will examine research methodologies and read a range of professional publications. Prerequisites: ENG 384 and 466.

QUEER STUDIES (QS)

100 Introduction to Queer Studies. (3) (General Education/Multicultural Studies) Introduction to Queer Studies introduces the study of sexual diversity, with specific attention to lesbian, gay, bisexual, and transgender topics in a variety of media. It provides terminology and analytic tools and explores important topics and controversies in sexuality studies.

400 Capstone in Queer Studies. (4) This course focuses on writing and research in the area of queer studies. Students will complete an in-depth project (research, video, internet-based resource, artistic work) that creatively and critically addresses issues relevant to queer studies. Prerequisites: QS 100 and two electives in the Minor in Queer Studies.
Program Offerings and Locations:

- Bachelor of Arts in Foreign Languages and Cultures: Macomb
- Minor in French: Macomb
- Minor in Spanish: Macomb, Quad Cities

For student learning outcomes, please see [wiu.edu/provost/learningoutcomes](http://wiu.edu/provost/learningoutcomes).

Faculty: Asare, Brown, Cabal-Jiménez, Cabejo-Timmons, Obregón, Picanço.

The Department of Foreign Languages and Literatures offers the Bachelor of Arts degree in Foreign Languages and Cultures, with options in French, Spanish, French Teacher Education, and Spanish Teacher Education. Minor programs are available in French and Spanish. The formal study of one of the languages consists of courses in the language as well as courses in the literatures and cultures of the countries where these languages are spoken.

The study of language, culture, and literature prepares the student for advanced and graduate study in literature and/or language, and for the use of language in business and industry, government at the federal, state, or local level, law enforcement, libraries and museums, parks and recreation, social services and health-related fields, transportation and tourism, and numerous other areas having a multicultural clientele.

Students completing the Teacher Education options develop pedagogical skills and proficiency in the language which lead to licensure to teach the language in Illinois at the K–12 level.

The Department of Foreign Languages and Literatures encourages students to double major in Foreign Languages and Cultures and another field in which linguistic and cultural expertise can be utilized to reach professional or academic goals. To make it possible to complete a double major in FLC and another discipline in four years, the department has developed joint curriculum sequences with some departments. For more information, please contact the Foreign Languages and Literatures advisor or the department office.

GradTrac is available to Foreign Languages and Cultures majors. See page 79 for information about GradTrac.

Honors Curriculum—Academically qualified students in this department are encouraged to complete an honors curriculum in University Honors, Honors in the Major, or General Honors. All Honors students must complete the one-hour honors colloquium (G H 299). General Honors includes General Honors coursework. Honors in the Major includes honors work in the major. University Honors combines Honors in the Major and General Honors. For more information about honors curricula, see page 100 or visit the Centennial Honors College website at [wiu.edu/Honors](http://wiu.edu/Honors).

Integrated Baccalaureate and Master’s Degree Program—An integrated baccalaureate and master’s degree program is available for the Bachelor of Arts in Foreign Languages and Cultures: Master of Liberal Arts and Sciences. An integrated degree program provides the opportunity for outstanding undergraduates to earn both degrees in five years. Please refer to the Graduate Studies catalog for details about the integrated program.

Degree Programs

Bachelor of Arts—Foreign Languages and Cultures

All students seeking the Bachelor of Arts in Foreign Languages and Cultures must complete I, II, III, IV, V, and VI below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h. All students seeking the Bachelor of Arts in Foreign Languages and Cultures must complete
a minimum of 12 s.h. of upper-level (300- or 400-level) coursework in the major language at WIU.

In accordance with the Illinois State Board of Education licensure rule, all candidates seeking a Professional Education License or endorsement are required by Western Illinois University to obtain a grade of “C-” or better in all directed general education courses, all core courses, and all courses in the option. This rule does not supersede course prerequisite requirements in the catalog that specify a letter grade.

Please see the Teacher Education section of this catalog (p. 346) for more information about WIU’s Teacher Education Program.

I. University General Education and College of Arts and Sciences Curriculum Requirements (p. 85).................................................................60 s.h.
   Except Teacher Education students must complete the University General Education Curriculum Requirements—43 s.h. (p. 70), including a General Education Mathematics course

II. Core Course ...........................................................................................................3 s.h.

      2. Directed Electives  
         a. Two 300-level FR courses.................................6 s.h.
         b. Two 400-level FR courses.................................6 s.h.
         c. Any additional 300/400-level FR course........3 s.h.
   C. Spanish Teacher Education  
      1. Option Courses  
         a. SPAN 223*, 224*, 325, 326†, 327.................................15 s.h.
         b. Select any course in a secondary foreign language at the intermediate level (223 or 224)........................................3 s.h.
      2. Directed Electives .................................................................12 s.h.
         Four 300/400-level SPAN courses
   D. French Teacher Education  
      1. Option Courses  
         a. FR 223*, 224*, 325, 326†, 327.................................15 s.h.
         b. Select any course in a secondary foreign language at the intermediate level (223 or 224)........................................3 s.h.
      2. Directed Electives .................................................................12 s.h.
         Four 300/400-level FR courses

IV. Any Approved Minor ..............................................................................................16 s.h.

V. Open Electives ...........................................................................................................0–10 s.h.
VI. Other........................................................................................................................................ 0–34 s.h.

Options A, B: N/A

Options C, D:
A. EDUC 439 ................................................................. 3 s.h.
B. EDS 202, 301, 303 (2), 304 (1), 305, 401 ......................................................... 13 s.h.
C. SPED 210, 390 ................................................................. 4 s.h.
D. RDG 387 .................................................................................... 2 s.h.
E. Student Teaching ................................................................. 12 s.h.

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64].

* May count toward the University General Education Requirement.

# For all options, courses numbered 279 and 379 may only be used as Open Electives.

^ For options A and B, a maximum of 9 s.h. of Directed Electives may be taken during an approved Study Abroad program.

† FR/SPAN 326 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.

Minors

Minor in French............................................................................................................................. 16 s.h.
1. FR 122, 223, 224 ...................................................................................... 10 s.h.
2. Upper-division (300/400 level) FR coursework, with at least one course (3 s.h.) taken at WIU ................................................................. 6 s.h.

Note: Students majoring in Foreign Languages and Cultures with French as their secondary language and who are minoring in French may count only one FR course (up to 4 s.h.) in the minor.

Note: Courses numbered 279, 361, or 379 may not be used in the French minor.

Minor in Spanish............................................................................................................................ 16 s.h.
1. SPAN 122, 223, 224 ................................................................. 10 s.h.
2. Upper-division (300/400 level) SPAN coursework, with at least one course (3 s.h.) taken at WIU ................................................................. 6 s.h.

Note: Students majoring in Foreign Languages and Cultures with Spanish as their secondary language and who are minoring in Spanish may count only one SPAN course (up to 4 s.h.) in the minor.

Note: Courses numbered 279, 361, or 379 may not be used in the Spanish minor.

Advanced Placement

Advanced placement into the foreign language program may be achieved by one of the following: 1) completion of four years of high school foreign language study (in the same language); 2) scoring above the beginning level on the departmental placement examination; 3) completion of the College Entrance Board Advanced Placement Examination (CEEB); 4) completion of the College Level Examination Program (CLEP). College credit may be obtained by passing CEEB or CLEP. Students beginning college language study at the 300- or 400-level may qualify, upon application, for advanced placement credit (equivalent to 122, 223, 224) by completing two 300- or 400-level courses (in the same language) with grades of C or better. Students who begin at the 224-level may qualify, upon application, for advanced intermediate placement credit (equivalent to 122 and 223) by completing 224 and one 300-level class (in the same language) with a grade of C or better. Students who begin at the 223-level may qualify, upon application, for intermediate placement credit (equivalent to 122) by completing 223 with a grade of C or better. Please note that a grade of C- does not fulfill this requirement. Credit cannot be earned for courses numbered 121, 122, 223, or 224 which are more elementary than coursework already completed, unless the credit is earned through Advanced Placement. Students earning the Illinois State Seal of Biliteracy will receive credit for courses numbered 121, 122, 223, and 224 in the specified language.
Course Descriptions

EDUCATION (EDUC)

439 Foreign Language Methods. (3) An exploration of current foreign language teaching methodologies and techniques through assigned readings, discussion, and practical application such as microteaching. Prerequisite: EDS 301 or consent of instructor.

FOREIGN LANGUAGE (F L)

101 Introductory Seminar in World Languages and Cultures. (3) (General Education/Humanities) (Global Issues) Introduces the content and methods of foreign language scholarship. Centers on a particular topic or theme within the context of (a) non-English-speaking culture(s). Methods may include linguistics, cultural studies, film studies, literary studies, interdisciplinary approaches, and/or pedagogy.

121 Less Commonly Taught Languages I. (3, repeatable for different topics to no maximum) Designed to introduce and develop the four basic language skills (speaking, listening, reading, and writing) in the target language and to create and increase competence about the target language culture or cultures.

122 Less Commonly Taught Languages II. (3, repeatable for different topics to no maximum) Designed to further develop the four basic language skills (speaking, listening, reading, and writing) in the target language and to further increase competence about the target language culture or cultures. Prerequisite: F L 121 or by permission of department chairperson.

350 Introduction to Contemporary Critical Theory. (3) (General Education/Multicultural Studies) This course, to be taught in English, will introduce students to critical theories that shape literary, artistic, and cultural studies as they apply to foreign languages. Prerequisites: ENG 180, 280; junior standing or consent of instructor.

480 (Cross-listed with WS 480) Sexuality in German and Austrian Culture. (5) Examines the representation of sexuality in film, literature, and non-fiction of German-speaking countries in the twentieth and twenty-first centuries. Not open to students with credit for WS 480. Prerequisite: QS 100 or junior standing.

490 Senior Capstone. (3) Course designed to integrate linguistic, critical, cultural, and analytical skills with the knowledge acquired during course work towards the major. Students demonstrate their achievement of the program learning outcomes through a major writing project, an oral presentation, and a portfolio. Writing Instruction in the Disciplines (WID) course. Prerequisites: senior standing or permission of the department chairperson.

499 Selected Topics in Foreign Languages and Literatures. (3) Seminar in topics related to foreign languages, literatures, and cultures. Taught in English. Prerequisites: junior standing or consent of the instructor.

FRENCH (FR)

(Language Skills Courses)

121 Elementary French I. (4) (General Education/ Humanities) Development of the four basic skills: listening, speaking, reading, and writing. Not open to students who have had two years of high school French without permission of the department chairperson.

122 Elementary French II. (4) (General Education/ Humanities) Continuation of Elementary French I. Development of listening, speaking, reading, and writing skills along with cross-cultural insights and appreciation. Prerequisite: FR 121 or appropriate score on placement examination administered by the Department of Foreign Languages and Literatures.

223 Intermediate French I. (3) (General Education/ Humanities) Continued development of the four basic language skills with increased emphasis on reading and culture. Class conducted in French. Prerequisite: FR 122 or appropriate score on placement examination administered by the Department of Foreign Languages and Literatures.

224 Intermediate French II. (3) (General Education/ Humanities) Continuation of Intermediate French I. Prerequisite: FR 223 or appropriate score on placement examination administered by the Department of Foreign Languages and Literatures. IAI: HI 900.

325 French Conversation. (3) Intensive practice in oral expression and conversation. Prerequisite: FR 224 or equivalent

326 French Composition. (3) Intensive practice in written expression and composition. Writing Instruction in the Disciplines (WID) course. Prerequisites: FR 224 or equivalent; ENG 280.

(Literature and Civilization Courses)

327 Introduction to French Literature. (3) An introduction to critical reading and appreciation of French literature, surveying representative texts from major periods and genres. Conducted in French. Prerequisite: FR 224 or equivalent. IAI: HI 916.

328 Masterpieces of French Literature. (3) A study of selected masterworks representing major periods and genres of French literature. Conducted in French. Prerequisite: FR 224 or equivalent. IAI: HI 917.

361 Field Study Travel. (1–3, repeatable in one language to a maximum of 9) Field study project. The student submits a written report and fulfills other requirements set up by the instructor. Prerequisite: 6 s.h. of intermediate college French or equivalent.

404 French Civilization and Culture I. (3) An overview of cultural, social, political, and religious history of France from the Middle Ages to the French Revolution, with special readings and reports on individuals, events, and socio-cultural phenomena of the times. Conducted in French.

438 20th Century French Literature. (3) Selected works of Gide, Proust, Sartre, Camus, St. Exupéry, Anouilh, Colette, Sarrute, Duras, de Beauvoir, and others. Prerequisite: FR 327 or equivalent.

492 Individual Studies in French. (1–5, repeatable to 5) Prerequisites: advanced standing and consent of department chairperson.

499 Selected Topics in French Language and Literature. (3, repeatable for different topics to no maximum) Prerequisite: FR 327 and consent of the instructor.

GERMAN (GER)

(Language Skills Courses)

121 Elementary German I. (4) (General Education/ Humanities) Development of the four basic skills: listening, speaking, reading, and writing. Not open to students who have had two years of high school German without permission of the department chairperson.

122 Elementary German II. (4) (General Education/ Humanities) Continuation of Elementary German I. Development of listening, speaking, reading, and writing skills along with cross-cultural insights and
223 Intermediate German I. (3) (General Education/Humanities) Continued development of the four basic language skills with increased emphasis on reading and culture. Class conducted in German. Prerequisite: GER 122 or appropriate score on placement examination administered by the Department of Foreign Languages and Literatures.

224 Intermediate German II. (3) (General Education/Humanities) Continuation of Intermediate German I. Prerequisite: GER 223 or appropriate score on placement examination administered by the Department of Foreign Languages and Literatures. IAI: H3 900.

325 German Conversation. (3) Intensive practice in oral expression and conversation. Prerequisite: GER 224 or equivalent

326 German Composition. (3) Intensive practice in written expression and composition. Writing Instruction in the Disciplines (WID) course. Prerequisites: ENG 180 and 280, and GER 224 or equivalent.

(Literature and Civilization Courses)

327 Introduction to German Literature. (3) An introduction to critical reading and appreciation of German literature, surveying representative texts from major periods and genres. Conducted in German. Prerequisite: GER 224 or equivalent. IAI: H3 916.

337 (Cross-listed with HIST 337) The Holocaust. (3) (General Education/Multicultural Studies) (Global Issues) Examines the pre-history, history, and post-history of the Holocaust and its representations from a German Studies perspective and within the broader context of European culture. Not open to students with credit for HIST 337. Prerequisite: HIST 116 or GER 224 or consent of instructor.

361 Field Study Travel. (1–3, repeatable for different topics to no maximum) Field study project. The student submits a written report and fulfills other requirements set up by the instructor. Prerequisite: 6 s.b. of intermediate college German or equivalent.

406 German Civilization and Culture. (3) A survey of the civilization of the German-speaking people with particular emphasis on modern developments. Conducted in German. Prerequisite: GER 224 or equivalent.

492 Individual Studies in German. (1–5, repeatable to 5) Prerequisites: advanced standing and consent of department chairperson.

499 Selected Topics in German Language and Literature. (3, repeatable for different topics to no maximum) Prerequisite: GER 327 and consent of the instructor.

PORTUGUESE (PORT)

(Language Skills Courses)

121 Elementary Portuguese I. (4) (General Education/Humanities) Development of the four basic skills: listening, speaking, reading, and writing. Not open to students who have had two years of high school Portuguese without permission of the department chairperson.

122 Elementary Portuguese II. (4) (General Education/Humanities) Continuation of Elementary Portuguese I. Development of listening, speaking, reading, and writing skills along with cross-cultural insights and appreciation. Prerequisite: PORT 121 or appropriate score on placement examination administered by the Department of Foreign Languages and Literatures.

SPANISH (SPAN)

(Language Skills Courses)

121 Elementary Spanish I. (4) (General Education/Humanities) Development of the four basic skills: listening, speaking, reading, and writing. Not open to students who have had two years of high school Spanish without permission of the department chairperson.

122 Elementary Spanish II. (4) (General Education/Humanities) Continuation of Elementary Spanish I. Development of listening, speaking, reading, and writing skills along with cross-cultural insights and appreciation. Prerequisite: SPAN 121 or appropriate score on placement examination administered by the Department of Foreign Languages and Literatures.

223 Intermediate Spanish I. (3) (General Education/Humanities) Continued development of the four basic language skills with increased emphasis on reading and culture. Class conducted in Spanish. Prerequisite: SPAN 122 or appropriate score on placement examination administered by the Department of Foreign Languages and Literatures.

224 Intermediate Spanish II. (3) (General Education/Humanities) Continuation of Intermediate Spanish I. Prerequisite: SPAN 223 or appropriate score on placement examination administered by the Department of Foreign Languages and Literatures.

302 Spanish for Business. (3) An introduction to business practices in Spain and Latin America, with emphasis on business vocabulary, written and oral communication, and the role of culture and cultural differences in business transactions. Prerequisite: SPAN 224 or equivalent, or permission of instructor.

320 Spanish for Heritage Speakers. (3) Designed for heritage speakers of Latino/Hispanic heritage, to raise awareness of their bilingual/bicultural background as well as their social and linguistic identity of speakers of U.S. Spanish, through intensive practice in writing, reading, and linguistic skills. Prerequisites: SPAN 224 or consent of instructor.

325 Spanish Conversation. (3) Intensive practice in oral expression and conversation. Prerequisite: SPAN 224 or equivalent.

326 Spanish Composition. (3) Intensive practice in written expression and composition. Writing Instruction in the Disciplines (WID) course. Prerequisites: SPAN 224 or equivalent, or permission of instructor.

340 Spanish for Law Enforcement. (3) Attention is focused on oral proficiency in the contexts likely to be useful to law enforcement personnel. Vocabulary specific to the profession is taught, as well as practical cultural information. Prerequisite: SPAN 224 or permission of instructor.

344 Spanish for Social Work. (3) Intensive Spanish practice through simulations involving real-life situations in intercultural settings. Provides vocabulary, idiomatic expressions, and cultural information for the specific needs of professional social workers. Prerequisite: SPAN 224 or equivalent, or permission of instructor.

392 Spanish and Latin American Cinema. (3) Historical survey of the film industry in Spain and Latin America, with particular attention to the works of major filmmakers and genres. Prerequisite: SPAN 224 or equivalent, or permission of instructor.

401 Introduction to Spanish Linguistics. (3) Introduction to the main concepts and methods of linguistic analysis, focusing on the Spanish sound
system, social dynamics, and dialectal variation.  
Prerequisite: SPAN 326 or equivalent.

402 Introduction to Spanish Morphology and Syntax. (3)  
Introduction to the systematic study of the morphological and syntactical elements of Spanish  
with practice in application. Prerequisite: SPAN 326 or equivalent.

449 Spanish for Content-Based Instruction. (3)  
The study of Spanish vocabulary and phrases for the teaching of different subjects of the school curriculum including mathematics, science, social studies, and grammar. Prerequisite: SPAN 224 or permission of instructor.

457 Contemporary Spanish American Prose. (3)  
Selected prose works of major contemporary Spanish American writers. Prerequisite: SPAN 327 or equivalent.

Literature and Civilization Courses

327 Introduction to Hispanic Literature. (3)  
An introduction to critical reading and appreciation of Hispanic literature, surveying representative texts from major periods and genres. Conducted in Spanish. Prerequisite: SPAN 224 or equivalent.  
IAI: H3 916.

328 Masterpieces of Spanish Literature. (3)  
A study of selected masterworks representing major periods and genres of Spanish literature. Conducted in Spanish. Prerequisite: SPAN 224 or equivalent.  
IAI: H3 917.

361 Field Study Travel. (1–3, repeatable in one language to a maximum of 9)  
Field study project. The student submits a written report and fulfills other requirements set up by the instructor. Prerequisite: 6 s.b. of intermediate college Spanish or equivalent.

408 Spanish Civilization and Culture. (3)  
A survey of Peninsular civilization from the prehistoric past to the post-Franco present, emphasizing cultural achievements of universal significance. Conducted in Spanish.

409 Spanish American Civilization. (3)  
The study of fundamental historical and cultural facts concerning Spanish America; the role of contrasting value systems of Spanish America and the United States in intercultural communication. Conducted in Spanish.

453 The Generation of 1898. (3)  
Representative works of the major figures of early twentieth-century Spanish literature. Prerequisite: SPAN 327 or equivalent.

454 Spanish Literature of the 20th Century. (3)  
Study of major works of prose, poetry, and drama from the Generation of 1898 to the present. Prerequisite: SPAN 327 or equivalent.

456 Masterpieces of Spanish American Literature. (3)  
Selected works of prose, poetry, and drama from the Colonial period to the present. Prerequisite: SPAN 327 or equivalent.

492 Individual Studies in Spanish. (1–5, repeatable to 5)  
Prerequisites: advanced standing and consent of department chairperson.

499 Selected Topics in Spanish Language and Literature. (3, repeatable for different topics to no maximum)  
Prerequisite: SPAN 327 and consent of the instructor.
Program Offerings and Locations:

- Bachelor of Arts in General Studies: Macomb, Quad Cities, Online
- Undergraduate Certificate in Fire Administration and Management: Macomb, Online
- Undergraduate Certificate in Fire Prevention Technology: Macomb, Online

For student learning outcomes, please see wiu.edu/provost/learningoutcomes.

Western Illinois University offers a unique online Bachelor of Arts degree program designed to provide non-traditional students an opportunity to earn an undergraduate degree in a manner compatible with their educational needs and lifestyles: The Bachelor of Arts in General Studies degree. This highly individualized and flexible program recognizes that adults may have attended a variety of educational institutions and accepts transfer of passing coursework taken at other regionally accredited colleges and universities. Students may apply for academic credit through the preparation of a prior learning portfolio, which documents specific college-level knowledge gained through nonacademic pursuits that can be related to WIU courses. Students may also receive academic credit through the use of various proficiency examinations and testing programs. Students can apply WIU coursework offered online or at the two campus locations toward the completion of their degree and the 30 semester hour residency requirement.

Students with baccalaureate degrees from regionally accredited colleges or universities may not be admitted to the WIU Bachelor of Arts in General Studies degree program. Firefighters who hold a bachelor's degree who would like to complete additional coursework through the National Fire Academy higher education curriculum and attain a second bachelor's degree should contact the School of Global Education and Outreach by calling (309) 298-1929 or via email at BGS@wiu.edu.

Admission Requirements

1. Applicants who have attended other colleges or universities must:
   a. have a C average for all work attempted;
   b. be in good standing at last college or university attended; and
   c. have successfully completed 24 semester hours of coursework at a regionally accredited institution; or have had a scheduled high school graduation date at least five years ago.

2. Applicants who do not meet the admission requirements identified in 1 above may be considered for admission if they have been separated from higher education institutions for five or more years.

Any former WIU student admitted to the degree program under option 2 above will continue under the last transcriptsed academic standing status (e.g., academic probation, academic warning). Applicants who do not meet the criteria identified in 1 or 2 above may appeal to the Bachelor of Arts in General Studies Advisory Committee for admission. **Note:** Students who have been academically suspended or dismissed from WIU must be readmitted to the University before seeking admission to the Bachelor of Arts in General Studies degree program.

Admission into the Bachelor of Arts in General Studies degree program does not guarantee admission into any other degree program at WIU.
General Studies Degree

Transfer Credit
All academic credit earned before admission to the Bachelor of Arts in General Studies degree program, regardless of when the credit was earned, may be transferred into the program provided that:

1. The college or university was regionally accredited at the time the credit was earned.
2. A grade of A, B, C, D, P, or S was earned.
3. The credit could be applied at that institution to an associate or bachelor degree program.
4. The course was not a repeated course.
5. The course was not remedial or developmental.
6. A “C” was earned for the equivalent of freshman composition.

National Fire Academy Fire and Emergency Services Higher Education (FESHE) Curriculum
The National Fire Academy higher education curriculum consists of 13 fire-related, upper-division courses. Members of the fire service may choose to take any number of these courses to enhance their professional growth, and the NFA will award certificates for successful completion.

WIU’s General Studies degree provides 30-hour undergraduate certifications in:

- Fire Administration and Management
- Fire Prevention Technology

Through completion of one or both of the certificates, firefighters will be able to focus their General Studies degree in a fire-related academic area and have the certificate posted on their academic transcript.

Prior Learning Portfolio Credit
A maximum of 30 credit hours for portfolio assessment may be accepted toward credit for graduation. University faculty evaluate and recommend credit for the prior learning. Upon approval of the department chair and college dean, the academic credit awarded as a result of a portfolio evaluation will be entered on the WIU transcript.

Honors Curriculum—Academically qualified students in this program are welcome to complete an honors curriculum in University Honors, Honors in the Major, or General Honors. All Honors students must complete the one-hour honors colloquium (G H 299). General Honors includes General Honors coursework. Honors in the Major includes honors work in the major. University Honors combines Honors in the Major and General Honors. For more information about honors curricula, see page 100 or visit the Centennial Honors College website at wiu.edu/Honors.

Integrated Baccalaureate and Master's Degree Program—Three integrated baccalaureate and master’s degree programs are available for the Bachelor of Arts in General Studies: Master of Science in Education in Educational Studies (Language, Culture, and Education option), Master of Science in Instructional Design and Technology, and Master of Arts in Public Safety Administration. An integrated degree program provides the opportunity for outstanding undergraduates to earn both degrees in five years. Please refer to the Graduate Studies catalog for details about the integrated program.

Degree/Graduation Requirements
All students seeking the Bachelor of Arts in General Studies must successfully complete the requirements listed below.

1. General Education: Satisfy the University General Education Curriculum—43 s.h. (p. 70) or the IAI Transferable General Education Core Curriculum Requirements listed below—37–38 s.h.
Courses approved as equivalent to those in the IAI Transferable General Education Core Curriculum may be used (itransfer.org). Courses available in the WIU Arts and Sciences University General Education and Curriculum Requirements may also be used (p. 85).

IAI General Education Core Curriculum

A. Communication ................................................................. 9 s.h.
   3 courses, including a 2-course sequence in writing (6 s.h.) and 1 course (3 s.h.) in oral communication

B. Mathematics ............................................................................ 3 s.h.
   1 course

C. Physical and Life Sciences .................................................. 7–8 s.h.
   2 courses, with 1 course selected from the life sciences and 1 course from the physical sciences and including at least 1 laboratory course

D. Humanities and Fine Arts ................................................... 9 s.h.
   3 courses, with at least 1 course selected from humanities and at least 1 course from the fine arts.

E. Social and Behavioral Sciences .......................................... 9 s.h.
   3 courses, with courses selected from at least 2 disciplines

No more than 2 courses from any 1 discipline can be used to fulfill General Education Core Curriculum Requirements.

Students must earn a passing letter grade in each course used to fulfill requirements. A grade of C or better will be required for satisfactory completion of the Communication writing requirements.

2. Grade Point Average (GPA): Earn a minimum overall GPA of 2.00 (C). See page 51 for information about computing GPA.

3. Semester Hours: Earn a minimum of 120 semester hours. Of the 120 semester hour minimum:
   A. At least 40 must be earned from a senior (4-year) institution
   B. At least 40 must be earned in upper division (junior/senior) level courses from a senior (4-year) institution.
   C. At least 30 must be earned from WIU (at least 16 must be upper division).

4. MATH Competency: Demonstrate ability to use baccalaureate-level skills in mathematics. (See University General Education Requirements, p. 70.)

5. Writing Requirement: Successfully complete a Writing Instruction in the Disciplines (WID) course OR a Bachelor of Arts in General Studies (BGS) online writing course*.

6. Foreign Language/Global Issues: Fulfill the foreign language/global issues requirement for the degree program.#

7. Graduation Application: File an application for graduation in the School of Global Education and Outreach by the following deadlines: Fall semester—July 15; Spring semester—November 15; Summer session—April 15.

8. Financial Obligations: Clear all financial obligations to the University before proof of degree will be provided.

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) any major’s discipline-specific global issues course; or 4) an approved Study Abroad program.

* BGS online writing courses: BC&J 350, 351, 352; CS 320; ECON 351; ENG 380, 381; FS 484, 485; HIST 316; PHIL 300, 330; SOC 300, 360; UNIV 490; WS 355, 360.
Undergraduate Certificates

Certificate in Fire Administration and Management ........................................ 30 s.h.
Complete the following courses:
EM 477—Disaster and Fire Defense Planning (3 s.h.)
EM 478—Managerial Issues in Hazardous Materials (3 s.h.)
FS 443—Fire Protection Structure and Systems Design (3 s.h.)
FS 481—Fire and Emergency Administration (3 s.h.)
FS 482—Analytic Approaches to Public Fire Protection (3 s.h.)
FS 483—Personnel Management for the Fire and Emergency Services (3 s.h.)
FS 484—Fire Prevention Organization and Management (3 s.h.)
FS 485—Political and Legal Foundations (3 s.h.)
SOC 487—Application of Fire Research (3 s.h.)
SOC 488—Community and the Fire Threat (3 s.h.)

Certificate in Fire Prevention Technology ......................................................... 30 s.h.
Complete the following courses:
FS 443—Fire Protection Structure and Systems Design (3 s.h.)
FS 444—Fire Dynamics (3 s.h.)
FS 481—Fire and Emergency Administration (3 s.h.)
FS 482—Analytic Approaches to Public Fire Protection (3 s.h.)
FS 483—Personnel Management for the Fire and Emergency Services (3 s.h.)
FS 484—Fire Prevention Organization and Management (3 s.h.)
FS 485—Political and Legal Foundations (3 s.h.)
FS 486—Fire Investigation and Analysis (3 s.h.)
FS/PSY 488—Fire-Related Human Behavior (3 s.h.)
SOC 488—Community and the Fire Threat (3 s.h.)
Program Offerings and Locations:

- Bachelor of Science in Health Services Management: Macomb
- Bachelor of Science in Public Health: Macomb
- Bachelor of Social Work: Macomb
- Minor in Occupational Safety: Macomb

For student learning outcomes, please see [wiu.edu/provost/learningoutcomes](http://wiu.edu/provost/learningoutcomes).

Faculty: Allwardt, Bezold, Marchand, Oden, Perone, Peterman, Smith Okon, Wen, Zellmann.

Advisors: Dorsett (Health Sciences), Dadello (Social Work)

The Department of Health Sciences and Social Work strives to create the highest quality teaching, research, and service programs to advance the mission of the College of Education and Human Services and Western Illinois University. The department endeavors to prepare students to be effective professionals in the U.S. and internationally by integrating the divergent disciplines of public health education and promotion, health services management, and social work, and to contribute to the University’s Human Well-Being curriculum. This mission is accomplished through engaged teaching and learning, applied research, and committed service.

The degree program in Public Health allows students to pursue one of the following:

**Community Health Education:** Community health educators are professionally prepared in the disciplines of community and public health education. They demonstrate competence in planning, implementation, and evaluation of health promoting and health enhancing programs for individuals, groups, and communities.

**Environmental and Occupational Safety:** Environmental and occupational safety specialists analyze various environments and design programs to control, eliminate, and prevent disease or injury caused by chemical, physical, radiological, and biological agents or ergonomic factors that impact workers’ safety. Other preparation includes the development of health and safety policies and procedures to evaluate and coordinate programs that impact the environment, such as storage and handling of hazardous waste or monitoring the cleanup of contaminated air, water, or food.

**Public Health Preparedness:** Public health preparedness educates students about the major principles of both emergency management and public health. Students will acquire fundamental knowledge in mitigating, preparing for, responding to, and long-term recovery from disasters and emergencies with specific applications focused on public health, health care, educational, and state and local governmental settings.

The Health Services Management degree program prepares students for the following career opportunities:

**Long Term Care Administration:** This discipline includes a wide spectrum of health care delivery involving the complete continuum of chronic care management and administration—nursing home, rehabilitation, senior care, palliative care, specialized long-term chronic care, and mental health.

**Private Sector:** The private sector includes many different areas of primary care delivery management and administration. Careers in this emphasis will focus on primary health
care delivery in settings such as hospitals, outpatient clinics, physician practices, managed care organizations, health insurance companies, and pharmaceutical sales companies.

**Public Sector:** This sector includes all areas of public health management and administration. Career opportunities for public health managers and administrators include employment in public health departments at the local, county, state, and federal levels; health agencies focused on at-risk populations such as senior care and Medicaid populations, and voluntary and community health agencies.

The Bachelor of **Social Work** (B.S.W.) degree program is accredited by the Council on Social Work Education. The B.S.W. prepares students as generalist social workers for entry-level professional employment in social service agencies, providing services to individuals, families, groups, organizations, neighborhoods, and communities. Generalist social workers serve children, adolescents, adults, and elderly persons with a variety of needs. The Social Work curriculum provides students with the opportunity to obtain the knowledge, values, and skills needed for beginning professional practice and for continuation of their studies at the graduate level. This curriculum is built upon and integrates the liberal arts through the basic University General Education requirements.

**Pre-Social Work**

Initially, all students entering the Social Work degree program are classified as Pre-Social Work majors. Enrollment in the Pre-Social Work program does not guarantee acceptance as a candidate for the Bachelor of Social Work degree.

To be accepted as a Social Work major and a candidate for the Bachelor of Social Work degree, students must satisfy the following requirements:

1. Complete SW 100 or transfer equivalent with a final grade of C or better. Complete, be registered in, or have a plan of study in place for BIOL 100, ENG 180, PSY 100, and SOC 100.
2. Have a minimum GPA of 2.00 overall.
3. Complete the Social Work Program application materials and have a personal interview with a member of the Social Work faculty. See the application materials for further information.
4. Be accepted, on the basis of the application process, by the Social Work faculty. If the application is denied, the student has the right to appeal to the chairperson. The department will consider the appeal as a committee of the whole.

Questions about the admissions process should be directed to the Social Work advisor.

**Social Work Degree Candidacy**

Candidates for the Bachelor of Social Work degree must satisfy the following requirements for graduation:

1. Meet the requirements stated above.
2. Meet the University and program General Education course requirements for graduation.
3. Obtain a grade of C or better in every graded SW course.
4. Achieve a minimum 2.50 grade point average for all SW courses prior to enrolling in the practicum course, SW 480.
5. Earn a minimum 2.50 SW grade point average at the conclusion of SW 480.
6. Demonstrate professional knowledge, values, and skills after formal admission to the program and throughout the practicum. Failure to do so may result in dismissal from the program.

Students must maintain good standing in the major after admission. Students must complete 100 volunteer or work hours in the social services field, as described in the application materials. Students will not be able to successfully complete SW 440 without completion of the 100 hours prior to SW 440. Students must successfully complete an
evaluation of professional practice behaviors in SW 315 and SW 440 to continue enrollment in the Social Work degree program.

**GradTrac** is available to Health Services Management, Public Health, and Social Work majors. See page 79 for information about GradTrac.

**Honors Curriculum**—Academically qualified students in this department are encouraged to complete an honors curriculum in University Honors, Honors in the Major, or General Honors. All Honors students must complete the one-hour honors colloquium (G H 299). General Honors includes General Honors coursework. Honors in the Major includes honors work in the major. University Honors combines Honors in the Major and General Honors. For more information about honors curricula, see page 100 or visit the Centennial Honors College website at [wiu.edu/Honors](http://wiu.edu/Honors).

**Degree Programs**

**Bachelor of Science—Health Services Management**

All students seeking the Bachelor of Science in Health Services Management must complete I, II, III, IV, and V below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h. A grade of C (2.0) or better is required in all Core Courses, Directed Electives, and their required prerequisites to complete the Health Services Management major. Students must have an overall GPA of 2.00 and major GPA of 2.50 to enroll in HS 490, a required course for the major. Current WIU students must be in good standing (2.0 GPA or higher) to declare a major in Health Services Management.

I. **University General Education Curriculum** (p. 70) ............................................................................. 43 s.h.

II. **Core Courses** ......................................................................................................................... 51–53 s.h.

   EOS 310, 311; HE 120*; HS 211, 250, 410, 414, 479, 490; HSM 212, 314, 315†; 470; MICR 200*; either ZOOL 330 and 331 or KIN 290 and 291

III. **Directed Electives** .............................................................................................................. 9 s.h.

   Choose 9 s.h. from one of the following emphases:‡

   A. **Long Term Care:** FIN 371, MGT 350, MGT 425, SOC 405
   B. **Private Sector:** B L 431, FIN 351, MGT 448, MGT/OM 352, MKTG 327
   C. **Public Sector:** EOS 417; HS 313, 411, 412, 413

IV. **Other Required Courses** ......................................................................................................... 27 s.h.

   ACCT 201, 202; ECON 231*, 232*; FIN 311 or 331; HRM 353; IS 340; MGT 349; STAT 171*

V. **Open Electives** ...................................................................................................................... 0–1 s.h.

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; or 3) an approved Study Abroad program.

* May count toward completion of the University General Education requirement.

† HSM 315 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.

‡ Directed Electives may require fulfillment of one of more prerequisites.

**Bachelor of Science—Public Health**

All students seeking the Bachelor of Science in Public Health must complete I, II, III, IV, and V below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h. A maximum of 6 s.h. of workshop coursework (EOS 450/HS 450/HE 450) can count toward the degree. A grade of C (2.0) or better is required in all Core Courses, Directed Electives, and their required prerequisites to complete the Public Health major. Students must have an overall GPA of 2.00 and major GPA of 2.50 to enroll in HS 490, a required course for the major.
Current WIU students must be in good standing (2.0 GPA or higher) to declare a major within the Department of Health Sciences and Social Work. These majors include Public Health and Health Services Management.

I. University General Education Curriculum (p. 70) ................................................................. 43 s.h.
II. Core Courses .......................................................................................................................... 32 s.h.
    EOS 310; HS 211, 370†, 410, 411, 412, 479, 490; MICR 200
III. Directed Electives .................................................................................................................. 15 s.h.
    Choose one of the following emphases:
    A. Community Health Education ................................................................. 15 s.h.
       HS 313, 400, 413, 414, 444
    B. Environmental and Occupational Safety ...................................................... 15 s.h.
       EM 425, 478; EOS 270, 311, 377
    C. Public Health Preparedness ............................................................................. 15 s.h.
       Select 15 s.h. from the following: EM 304, 305, 323, 324, 425, 460

IV. Other Requirements ............................................................................................................. 8 s.h.
    HE 120*, 325*; STAT 171*
V. Approved Minor ..................................................................................................................... 16 s.h.
VI. Open Electives ....................................................................................................................... 6 s.h.

Bachelor of Social Work

All students seeking the Bachelor of Social Work must complete I, II, III, IV, and V below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h. A grade of C or better is required in all graded Social Work (SW) courses. Social Work students must complete a one-semester practicum in a social service agency to gain experience in Social Work practice. The practicum is a closely supervised learning experience that helps prepare students for beginning level practice.

I. University General Education Curriculum (p. 70) ................................................................. 43 s.h.
    (To include: BIOL 100, COMM 241, 6 s.h. of Math/Science courses, a Foreign Language course or an additional Multicultural course, lower division Philosophy course, POLS 122, PSY 100, and SOC 100)

II. Core Courses .......................................................................................................................... 48 s.h.
    SW 100, 212, 213, 312, 313, 315, 316†, 325, 380, 415, 425, 440, 480

III. Directed Electives
    Select 6 s.h. from the following: SW 330, 331, 332, 334, 335, 336, 338, 340, 345, 496 ............................................. 6 s.h.

IV. Minor or Open Electives ........................................................................................................... 17 s.h.

V. Other ........................................................................................................................................ 6 s.h.
    A. Additional General Education Social Sciences course .............................. 3 s.h.
    B. Additional General Education Humanities course ................................. 3 s.h.

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; or 3) an approved Study Abroad program.
† HS 370 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.
* May count toward the University General Education requirement.
Minor
Minor in Occupational Safety .................................................. 20 s.h.

1. Required Courses: EM 276; EOS 270, 310, 311, 377 .................. 15 s.h.
2. Electives (see advisor) ......................................................... 5 s.h.

Course Descriptions
ENVIRONMENTAL AND OCCUPATIONAL SAFETY (EOS)

270 Principles of Accident Prevention. (3) An analysis of the tools, methods, content, and common problems associated with the establishing and administering of safety programs for homes, school, and industry.

310 Environmental Sciences. (3) The principles and practices of public health sanitation. Includes discussion of water and air pollution, food and milk sanitation, housing, vector and rodent control, solid wastes, other general sanitation problems, and principles involved in water and waste water treatment plant operation. Also considered are local, state, and federal regulations relevant to the sanitary control of the environment. Prerequisite: HS 211 or junior standing or permission of instructor.

311 Environmental and Occupational Health Problems. (3) Overview of the recognition, evaluation, prevention, and control of chemical, physical, and environmental factors that impact human health in the workplace and community. Identification and evaluation of interventions for environmental and occupational health problems will be addressed. Prerequisite: MICR 200 or junior standing or permission of instructor. Field study costs may be approximately $10.00.

377 Occupational Safety. (3) A study of the fundamentals of industrial hygiene, hazardous and municipal solid waste regulations, accident causation theories, and workplace violence. Prerequisite: EOS 270.

417 Field Experiences in Public Health Sanitation. (3) An analysis of selected sanitation laws, regulations, and ordinances in the field. The field experience will enable the student to observe the application of the codes in an enforcement setting and to gain expertise in the practical aspects of public health sanitation. Prerequisites: EOS 310 and senior standing.

450 Environmental Health Workshop. (1, repeatable to 2 with change in topic) Examination of environmental concerns that may impact directly or indirectly on humans and their surroundings. Educational strategies and abatement measures are included. Prerequisite: senior standing or permission of instructor.

499 Independent Study in Environmental and Occupational Safety. (1–4, repeatable to 4) Independent study of an approved topic. Prerequisite: senior department major or minor, or permission of instructor.

HEALTH EDUCATION (HE)

120 Personal Health Promotion. (2) (General Education/Human Well-Being) Designed to enhance students’ physical, intellectual, emotional, social, and spiritual health which will enable them to pursue their college and life goals more effectively.

121 Human Sexuality. (2) (General Education/Human Well-Being) The anatomical, physiological, psychological, and sociological characteristics unique to men and women, and what they bring to each other in their personal relationships.

123 Drug Use and Abuse. (2) (General Education/Human Well-Being) A comprehensive and in-depth study of the use and abuse of drugs in our society.

251 First Aid. (2) Theory and practice of first aid and CPR for the ill and injured. Instruction will be provided in accordance with the American Red Cross or National Safety Council First Aid standards.

321 (Cross-listed with WS 321) Women’s Health. (3) Provides information about how women can improve their chances of achieving and maintaining high level wellness. Among the topics included are: prevention, early detection, and treatment of health problems commonly occurring among women, contraception, pregnancy and childbirth, using the medical care system, and mental health. Open to male and female students. Not open to students with credit in WS 321. Prerequisite: junior standing.

325 Multicultural Health Issues. (3) (General Education/Multicultural Studies) A survey of health issues that specifically affect African Americans, American Indians, Hispanics, Asian Americans, and others. Health related lifestyles, behaviors, and prevention interventions will be emphasized. Prerequisite: HE 120, 121, 123, or permission of instructor.

432 The Coordinated School Health Program. (3) A description and analysis of the eight components of a K–12 coordinated school health program and the relationship of these components to the reduction of youth risk behaviors. Prerequisite: HS 313 or permission of instructor.

433 School Health Curriculum. (3) Investigates the nature of school health curriculum development which addresses objectives, resources, content, evaluation, sequencing, scheduling, and implementation. Prerequisite: HE 432 or permission of instructor.

440 Sexuality Education in the Home, School, and Community. (3) The principles of sex education of the pre-school and school-age child. Emphasis is placed on preparing the student in content, resources, procedures, and philosophy of home, school, and community sexuality education. Prerequisites: HE 121 (or its equivalent) and HS 313, or permission of instructor.

441 Mental Health. (3) Personality development, mental dynamisms, the mature individual, and the mentally ill. Special emphasis is given to teacher-student relationships. Prerequisite: senior standing or permission of instructor.

442 Drug Education in the Home, School, and Community. (3) Concepts of drug education with emphasis placed on preparing the student in content, resources, procedures, and philosophy of home, school, and community drug education. Prerequisites: HE 123 (or its equivalent) and HS 313, or permission of instructor.

450 Health Promotion Workshop. (1, repeatable to 2 with change in topic) Designed to provide new and updated information relative to current health issues confronting the health promotion professional. Prerequisite: senior standing or permission of instructor.

450 School Health Workshop. (1, repeatable to 2 with change in topic) Designed to provide new and updated information relative to current health issues confronting the school health professional. Prerequisite: senior standing or permission of instructor.
499 Independent Study in Health Education. (1–4, repeatable to 4) Independent research study of an approved topic. Prerequisite: senior department major or minor, or permission of instructor.

HEALTH SCIENCES (HS)

211 Principles of Health Sciences. (3) An introduction which emphasizes history, sociology, careers, and resources in community health and the interaction between school and community health programs. Also includes an overview of major community health programs. Prerequisite: HE 120 (or its equivalent) or permission of instructor.

250 Introduction to Medical Terminology. (2) Designed to provide a working knowledge and understanding of health and medical terms. Students in health education, health services management, EMT, pre-professional healthcare programs, and all other health-related fields will particularly benefit. Learning, interpretation, and understanding is enhanced via discussion of word roots, prefixes, and suffixes.

313 Application of Theories and Concepts in Health Education. (3) Provides a basic understanding of the application of theories and concepts related to health and health education. Concepts of health, behavior, learning, and group process, as well as community organization and networking included. Prerequisite: HS 211 or permission of instructor.

370 Research Methods in Health Sciences. (3) The process of evaluating, planning, and organizing research studies for solving problems unique to health sciences. Introduction to the application of the scientific method and statistics in health sciences research. Writing Instruction in the Disciplines (WID) course. Prerequisites: ENG 290, STAT 171, and junior standing.

400 Grant Writing. (3) Focuses on skills and techniques necessary to research and write grant proposals for nonprofit organizations, businesses, and government agencies. Prerequisite: HS 370 or permission of instructor.

410 Human Diseases. (3) An overview of human diseases commonly affecting humans. Emphasis on organic, systemic, disseminated, and multisystem diseases. Genetic, behavioral, and environmental approaches will be applied. Prerequisites: MICR 200 or permission of instructor.

411 Principles of Epidemiology. (3) Public health problem solving methods emphasizing biostatistics and epidemiology. Methods of epidemiologic investigation and research are included. Prerequisite or Corequisite: HS 410 or permission of instructor.

412 Public Health Administration. (3) Overview of administrative responsibilities and organizational patterns of local, state, and national public health agencies including core functions and essential public health services. Includes focus on emergency preparedness and response, performance measurement and improvement, and communication. Prerequisites: 12 s.h. of professional health sciences courses or permission of instructor.

413 Community Health Program Development and Evaluation. (3) Focuses upon developing the skills necessary to carry out program development—assessing needs, planning, implementing, and evaluating—in community health settings. Prerequisites: HS 313 and 9 s.h. of professional health sciences courses, or permission of instructor.

414 Ethical Conduct and Conflict in Health Sciences. (3) Students will interpret ethical codes of conduct as set forth by professional organizations; conflict arising from existing and evolving codes of conduct will be examined using case studies as an arena for discussion. Prerequisites: 12 s.h. of professional health sciences courses and junior standing, or permission of instructor.

425 (Cross-listed with EM 425) Public Health Emergency Preparedness. (3) This course introduces students to how public health agencies prepare for and respond to public health emergencies. Topics include biosurveillance, crisis and emergency risk communication, and the Strategic National Stockpile. Not open to students with credit in EM 425. Prerequisites: Junior standing; EM 304 or HS 211; or permission of instructor.

444 Methods and Techniques of Health Education. (3) This course focuses upon the practical application of health information involved with learning theories, diversity, and uniqueness of learners. It concentrates on skills in facilitation, using audio-visual equipment, and cognitive affective methodologies unique to the health profession. The student develops professional health communication skills in speaking, writing, and publishing. Prerequisite or Corequisite: HS 413; Prerequisite: 9 s.h. of professional health sciences courses.

450 Health Sciences Careers Workshop. (1, repeatable to 2 with change in topic) Current trends and issues affecting community health professions including professional preparation, job availability, and continuing education for professional growth. Designed for students and professionals in community health promotion, environmental health, and health services management. Prerequisite: senior standing or permission of instructor.

450 Health Sciences Workshop. (1, repeatable to 2 with change in topic) Examination and analysis of significant current concerns and controversies in community health. Content varies according to contemporary issues. Prerequisite: senior standing or permission of instructor.

479 Health Sciences Pre-Internship. (1) Developing professional application materials required for internship, investigating potential internships, and emphasizing interviewing and job search skills. To be taken the semester preceding the internship. Prerequisites: HSM 314 or HS 370, senior standing, and major in Health Services Management or Public Health.

490 Professional Internship. (9–12) Provides field work experience and knowledge in appropriate community health services programs, under supervision of preceptor qualified by education and experience. Prerequisites: HS 479. All coursework must be completed with exception of 9 s.h. in the minor or General Education. Must have overall GPA 2.00 and major GPA 2.50. Graded S/U only.

499 Independent Study in Health Sciences. (1–4, repeatable to 4) Independent research study of an approved topic. Prerequisite: senior department major or minor, permission of instructor.

HEALTH SERVICES MANAGEMENT (HSM)

212 Introduction to U.S. Health Policy. (3) Equips future health services management professionals with a working knowledge of the U.S. health care delivery system. Health policy is analyzed, utilized, and applied in the U.S. health care industry. Prerequisite or Corequisite: HS 211.

314 Health Care Management. (3) Explores management theory and practice as it relates to middle management positions such as department heads and supervisors in hospitals, ambulatory surgical centers, long term care facilities, and other health care organizations. Prerequisite: HSM 212 or permission of instructor.

315 Long Term Care Management. (3) Application of management knowledge in resident care, personal, finance, environment, regulations, and organization
specific to long term care facilities. Writing Instruction in the Disciplines (WID) course. Prerequisite: ENG 280 and HSM 314.

470 Legal Aspects of Health Services Management. (3) Equips future health services management professionals with a working knowledge of health law. Provides necessary background on a variety of health care topics, preparing students to deal with common legal and practical problems facing health care professionals. Prerequisites: HSM 314 and junior standing, or permission of instructor.

SOCIAL WORK (SW)

100 Introduction to Social Work. (3) An introduction to professional values, ethics, history, policies, services, and fields of Social Work practice, emphasizing generalist Social Work. Twenty-five volunteer hours required. A grade of C or better is required to continue through the curriculum.

212 Human Behavior and the Social Environment I. (3) An exploration of human development theories in the context of biological, physical, psychological, social, and cultural environments that help shape behavior. The focus is on conception through adolescence. A grade of C or better is required to continue through the curriculum. Prerequisites: SW 100 (C grade or better); BIOL 100; or consent of instructor.

213 Human Behavior and the Social Environment II. (3) An exploration of human development theories in the context of biological, physical, psychological, social, and cultural environments that help shape behavior. The focus is on young adulthood through late adulthood. A grade of C or better is required to continue through the curriculum. Prerequisite: SW 212 (C grade or better); BIOL 100; or consent of instructor.

312 Social Work Research Methodology. (3) The first of a two-course research sequence preparing students to be effective and ethical consumers and producers of research. Application of qualitative and quantitative methods for direct practice and program evaluation. A grade of C or better is required to continue through the curriculum. Prerequisite: SW 212 (C grade or better); BIOL 100; or consent of instructor.

313 Social Work Research Statistics. (3) The second of a two-course sequence. An introduction to descriptive and inferential statistical analyses for the assessment of practice and program effectiveness. Data collection, descriptive statistics, experimental design, multivariate statistics. A grade of C or better is required to continue through the curriculum. Prerequisite: SW 312 (C grade or better); completion of math competency; or consent of instructor.

315 Generalist Social Work Practice I. (4) Provides knowledge, values, and skills needed in the generalist method of Social Work, focusing on working with individuals. A concurrent lab provides skill development. A grade of C or better is required to continue through the curriculum. Prerequisites: Social Work major; SW 212 (C grade or better); permission of advisor. Corequisite: SW 316.

316 Case Management in Social Work. (3) An introduction to case management as a Social Work function. Theories and models of case management will be studied and case management skills will be developed. Writing Instruction in the Disciplines (WID) course. Prerequisites: Social Work major; SW 212 (C grade or better); permission of advisor. Corequisite: SW 315.

325 Social Welfare Policy. (3) Study of the formulation and implementation of social welfare policy and its impact on all social levels. Policies are analyzed for their philosophical foundations, populations served, and social and political implications. Policy models, implementation strategies, and budgetary constraints are examined. A grade of C or better is required to continue through the curriculum. Prerequisite: SW 100 (C grade or better); or consent of instructor.

330 Child and Family Services. (3) An introduction to theories, policies, and practices in child welfare. Current trends in protective services, family preservation, adoption, and substitute care will be studied. Prerequisite: junior standing or consent of instructor.

331 Social Work and Addictions. (3) An introduction to addictions and their effects on individuals, families, and society. Current theories, treatments, and Social Work roles and functions will be studied. Prerequisite: junior standing or consent of instructor.

332 Social Work with Aging Persons. (3) An introduction to working with persons as they age and as their circumstances change. Social Work roles and personal, familial, and societal implications of aging will be studied. Prerequisite: junior standing or consent of instructor.

334 Social Work and Disabilities. (3) An introduction to disabilities and rehabilitative Social Work. Issues of access, managed care, ethics, social policies, and Social Work roles will be studied. Prerequisite: junior standing or consent of instructor.

335 Domestic Violence and Social Work Intervention. (3) An introduction to major topics in the area of domestic violence. Definitions, warning signs, use of appropriate Social Work services, and prevention will be studied. Prerequisite: junior standing or consent of instructor.

336 Medical Social Work. (3) An introduction to a generalist Social Work perspective of medical Social Work. Theoretical perspectives integrated within medical Social Work will be discussed within a practice-oriented learning environment. Specific skills required in medical Social Work will be emphasized and practiced. Prerequisite: junior standing or consent of instructor.

338 Social Work and Mental Health. (3) Introduction to mental health; impact of mental illness on individuals, families, and society; roles and functions of social workers in mental health services. Introduction to the DSM V will be provided. Focus will be on generalist Social Work. Prerequisite: junior standing or consent of instructor.

340 Topics in Social Work. (3, repeatable for different topics to 6) Varied topics of interest to Social Work and other human service majors. Topics might include diversity; advocacy; political activity, criminal justice issues; professional ethics, and interdisciplinary teamwork. Prerequisite: junior standing or consent of instructor.

345 Investigation in Social Work. (1–6, repeatable to 6) Investigation into a specific area of Social Work that requires more intense study of longer duration. Prerequisite: junior standing or consent of instructor.

380 Social Justice and Diversity. (3) (Global Issues) Explores how societies and their cultures’ structures and values may oppress, discriminate, or create or enhance power. Develops skills to engage in socially just professional practice with diverse populations. Prerequisites: Social Work major and SW 100 (C grade or better); or consent of instructor.

415 Generalist Social Work Practice II. (3) Covers the theory and skills of the generalist method of Social Work. Its focus is on families and small groups. A grade of C or better is required to continue through the curriculum. Prerequisites: Social Work major; SW 315 (C grade or better); SW 316 (C grade or better).

425 Generalist Social Work Practice III. (3) Covers the theory and skills of the generalist method of Social Work. Its focus is on organizations, communities, society, and international issues. Thirty hours of
community service required. A grade of C or better is required to continue through the curriculum. Prerequisites: Social Work major; SW 315 (C grade or better); SW 316 (C grade or better).

440 Pre-Practicum. (1) Prepares majors for the practicum. Content includes resume preparation; investigation of agency placement opportunities; interviews for placement; overview of ethical, safety, and liability issues; and the role of participants as adult learners. A grade of C or better is required to continue through the curriculum. Prerequisites: Social Work major; SW 315 (C grade or better); permission of the director of Field Education.

480 Generalist Social Work Practicum. (13) An educational experience in an agency setting that offers practical application of Social Work knowledge, values, and skills. A concurrent integrative seminar provides opportunities for discussion and direction from the instructor. A grade of C or better is required to graduate. Prerequisites: Social Work major; SW 415 (C grade or better); SW 425 (C grade or better); SW 440 (C grade or better); 2.50 GPA in the major; completion of all other required Social Work courses (C grade or better); being within 20 s.h. of completion of degree; permission of the Director of Field Education and chairperson.

496 Senior Honors Thesis in Social Work. (3–6, repeatable to 6) Thesis research under the direction of at least two Social Work faculty members on a topic of mutual agreement. Minimum of 3 s.h. required for honors. Prerequisite: approval of departmental honors advisor.

499 Senior Assessment Exam. (0) An exam that all social work majors must take at the completion of SW 480. This exam assesses the knowledge gained through completing the social work curriculum. Completion of the exam will result in a grade of S. Prerequisites: Social Work major; senior standing. Corequisite: SW 480. Graded S/U only.

Program Offerings and Locations:

- Bachelor of Arts in History: Macomb
- Minor in History: Macomb, Quad Cities, Online
- Minor in Middle Level Social Studies Teaching: Macomb

For student learning outcomes, please see wiu.edu/provost/learningoutcomes.

Faculty: Brice, Chamberlin, Cole, Filipink, Hall, Pamonag, Roberts, Woell.

As the cornerstone of a liberal arts education, the study of History helps us to understand self and society and to appreciate cultures and traditions that have shaped the present. As an academic discipline, its mastery imparts critical awareness, vital skills, and recognition of the essential value gained from pursuing greater knowledge.

The mission of the Department of History is to help students become informed citizens, capable of thinking intelligently about the past and its relevance to the present, while assisting them to develop the analytical, research, and communication skills that will enable them to excel in their chosen vocations. In support of this mission, the department offers a program that prepares graduates for success in teaching and graduate school as well as in a wide array of other careers and professions, including law, business, management, non-profits, and public service.

GradTrac is available to History and Pre-Law majors. See page 79 for information about GradTrac.

Honors Curriculum—Academically qualified students in this department are encouraged to complete an honors curriculum in University Honors, Honors in the Major, or General Honors. All Honors students must complete the one-hour honors colloquium (G H 299). General Honors includes General Honors coursework. Honors in the Major includes honors work in the major. University Honors combines Honors in the Major and General Honors.

GradTrac is available to History and Pre-Law majors. See page 79 for information about GradTrac.

Integrated Baccalaureate and Master’s Degree Program—An integrated baccalaureate and master’s degree program is available for the Bachelor of Arts in History: Master of Arts in History. An integrated degree program provides the opportunity for outstanding undergraduates to earn both degrees in five years. Please refer to the Graduate Studies catalog for details about the integrated program.

Degree Program

Bachelor of Arts—History

All students seeking the Bachelor of Arts in History must complete I, II, and III.A, III.B, or III.C below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

In accordance with the Illinois State Board of Education licensure rule, all candidates seeking a Professional Education License or endorsement are required by Western Illinois University to obtain a grade of “C-” or better in all directed general education courses, all core courses, and all courses in the option. This rule does not supersede course prerequisite requirements in the catalog that specify a letter grade.

Please see the Teacher Education section of this catalog (p. 346) for more information about WIU’s Teacher Education Program.
I. University General Education and College of Arts and Sciences Curriculum
Requirements (p. 85) ........................................................................................................ 60 s.h.
Except Teacher Education students must complete the University General Education
Curriculum Requirements (including ANTH 110, ECON 100*, GEOG 100*, GEOG 121,
PSY 100, and a General Education Math course)—43 s.h. (p. 70)

II. Core Courses ........................................................................................................... 15 s.h.
HIST 105, 106, 115, 116, 201

III. Options of Study (Select A, B, or C)
A. History
1. Special Course: HIST 491† or 492‡ ................................................................. 3 s.h.
2. Directed Electives
   a. U.S. History (Area I) ............................................................................... 9 s.h.
   b. World History (Area II) ........................................................................ 9 s.h.
   c. Any additional History course ............................................................... 3 s.h.
   15 of the semester hours in 2 above must be at the 300 or 400 level;
of those, at least 3 semester hours must be at the 400 level.
3. Any Minor ........................................................................................................... 16–20 s.h.
4. Open Electives ................................................................................................. 1–5 s.h.

B. Pre-Law
1. Special Courses: .............................................................................................. 15 s.h.
   HIST 491† and any four of the following courses:
   HIST 303, 333, 350, 351, 352, 353, 354, 355, 414, 426
2. Directed Electives
   a. World History course (Area II) ................................................................. 3 s.h.
   b. Any 400-level History course ................................................................. 3 s.h.
   c. Any two of the following courses: ENG 281; PHIL 420; POLS 226, 319,
      410 or 411, 448; SOC 355 ....................................................................... 6 s.h.
3. Other: PHIL 205 and POLS 122 ..................................................................... 6 s.h.
4. Any approved minor .......................................................................................... 18 s.h.

Note: Must graduate with at least a 3.0 GPA in the major.
Note: May not count toward the major a grade of D+ or lower in any course
required for this major option.

C. History—Teacher Education
1. History Directed Electives .............................................................................. 24 s.h.
   At least 24 s.h. of History courses must be taken, including:
   a. At least 12 s.h. of U.S. History (Area I)
   b. At least 12 s.h. of World History (Area II)
      Of those, at least 12 s.h. must be 400-level courses including HIST 420†
2. Other Directed Electives: POLS 122, 267 ....................................................... 6 s.h.
3. Other..................................................................................................................... 37 s.h.
   a. EDS 202, 301, 303 (2 s.h.), 304 (1 s.h.), 305, 401 ................................... 13 s.h.
   b. SSED 439, 449 ....................................................................................... 6 s.h.
   c. SPED 210, 390 ....................................................................................... 4 s.h.
   d. ENG 366 or RDG 387 ............................................................................. 2 s.h.
   e. STCH 480 (16 weeks) ............................................................................ 12 s.h.
   See the “Teacher Education” section (p. 346) for more information about
   WIU’s Teacher Education Program.
4. Open Elective ...................................................................................................... 1 s.h.

* Required for the major.
# The foreign language/global issues graduation requirement may be fulfilled by
successfully completing one of the following: 1) a designated foreign language requirement
[see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global
issues course; or 3) a History (HIST) global issues course.
† HIST 491 or 492 fulfills the Writing Instruction in the Disciplines (WID) graduation
requirement for the History non-teaching option. HIST 491 fulfills the Writing Instruction
in the Disciplines (WID) graduation requirement for the Pre-Law option. HIST 420 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement for the History—Teacher Education option.

Minors

Minor in History......................................................................................................................... 18 s.h.

1. Select three courses from: HIST 105, 106, 115, 116......................................................... 9 s.h.
2. History Electives ..................................................................................................................... 9 s.h.

Note: At least 6 s.h. must be earned at the upper division level at a senior institution.

Note: Transfer students may use world history credits to satisfy the major or minor requirements for HIST 115 and 116.

Minor in Middle Level Social Studies Teaching ................................................................. 24 s.h.

1. HIST 115, 116; GEOG 100; POLS 267; SSED 390..................................................... 15 s.h.
2. Directed Electives
   a. Two upper-division courses from History Directed Electives
      Area I (U.S. History) ............................................................................................................. 6 s.h.
   b. One upper-division course from History Directed Electives
      Area II (World History) ........................................................................................................ 3 s.h.

Note: This minor is offered in conjunction with the major in Middle Level Education.

By itself, this minor will not be sufficient for education endorsement purposes.

Course Descriptions

HISTORY (HIST)

105 American History to 1877. (3) (General Education/Humanities) A survey of American history from European backgrounds to the close of Reconstruction.
IAI: H2 904.

106 American History since 1877. (3) (General Education/Humanities) A survey of American history from the end of Reconstruction to the present.
IAI: H2 905.

115 World History to 1500. (3) (General Education/Humanities or Multicultural Studies) (Global Issues) An introduction to the history of world societies from human origins to 1500 emphasizing social and political institutions, economics, thought, and culture as well as cross-cultural contacts.
IAI: H2 906.

116 World History since 1500. (3) (General Education/Humanities or Multicultural Studies) (Global Issues) An introduction to the history of world societies from 1500 to the present emphasizing social and political institutions, economics, thought, and culture as well as cross-cultural contacts.
IAI: H2 907.

201 Historical Methods. (3) Introduction to the discipline of history, including fundamental research, analytical, and writing skills required of historians.
Prerequisites: History major; one of HIST 105, 106, 115, or 116; ENG 180; permission of department advisor.

211 Technology and Science in World History. (3) (General Education/Humanities) (Global Issues) An introduction to the history of global technology and science from ancient times to the present. Directed Elective Area II.

217 The History of Sports in the United States. (3) The history of American sports from their origins to the present focusing on college and professional sports as reflecting changes in American culture. Directed Elective Area I.

231 The History of American Sports from Their Origins to the Present. (3) (Global Issues) A survey of the development of American sports from their origins to the present, focusing on college and professional sports as reflecting changes in American culture.
IAI: H2 907.

245 History of Asia. (3) (General Education/Humanities or Multicultural Studies) (Global Issues) A survey of Asian history from ancient times to the present. Directed Elective Area II.

300 Urban America. (3) A survey of the growth and development of American urban society. The course is designed to show both how technological, economic, social, and political forces have shaped our cities over time and how cities have affected American life. No prerequisite. Directed Elective Area I.

302 American Indian History, Pre-Contact to the Present. (3) (General Education/Multicultural Studies) This course surveys the history of American Indians from pre-contact to recent times within the current area of the U.S. Prerequisite: HIST 105 or 106, or consent of instructor. Directed Elective Area I.

303 American Legal History. (3) A study of American law, emphasizing the origins and development of fields of law and legal institutions, and the relationship between the law and American society and politics. Prerequisite: 3 s.h. of U.S. History or consent of instructor. Directed Elective Area I.

304 United States Military History. (3) (Global Issues) A survey of the military policies and engagements which had significance in America’s independence, expansion, and present world position. Prerequisites: HIST 105 and 106 or enrollment in or completion of MS 311, or consent of instructor. Directed Elective Area I.

306 Vietnam War. (3) A survey of the origins of the Vietnam War and of its social, diplomatic, and political impact in the U.S. Directed Elective Area I or II.

307 U.S. Foreign Relations Since 1898. (3) (Global Issues) A history of American foreign relations with emphasis on the period from the war with Spain to the present, stressing the behavior of the United States as a world power. Prerequisite: HIST 106 or consent of instructor. Directed Elective Area I.

308 American West. (3) The settlement and development of the West from the Appalachian Range to the Pacific Ocean. Prerequisite: HIST 105 or 106, or consent of instructor. Directed Elective Area I.
309 American South. (3) A survey of the American South from the colonization period to the present. Prerequisite: HIST 105 or 106, or consent of instructor. Directed Elective Area I.

311 History of Flight Culture. (3) (General Education/Multicultural Studies) (Global Issues) A cross-cultural survey of the origins, development, and representation of human flight from the ancient world to the present. Prerequisite: HIST 106 or 116, or consent of instructor. Directed Elective Area I or II.

312 Technology, Culture, and Society. (3) (Global Issues) A history of key technological developments from the Industrial Revolution to the present, with an emphasis on how these innovations have transformed human culture and society. Directed Elective Area I or II.

314 (Cross-listed with AAS 314) African American History. (3) (General Education/Multicultural Studies) A survey of African American history and culture. Not open to students with credit for AAS 314. Prerequisite: HIST 106 or AAS 100 or consent of instructor. Directed Elective Area I.

316 American Environmental History. (3) A history of Americans’ interaction with their natural environment from pre-contact to the present with special emphasis on the last two hundred years. BGS online writing course. Prerequisites: HIST 105 or 106, or consent of instructor. Directed Elective Area I.

317 (Cross-listed with WS 317) Women in American History. (3) (General Education/Multicultural Studies) A multicultural and historical survey of women in the United States, from 1500 to the present. Not open to students with credit in WS 317. Prerequisite: HIST 105 or 106, or consent of instructor. Directed Elective Area I.

318 (Cross-listed with WS 318) Women and Gender in European History. (3) (General Education/Multicultural Studies) (Global Issues) A study of women and gender in Europe, from antiquity to the present, focusing on changes in culture, society, the economy, and politics. Not open to students with credit in WS 318. Prerequisite: HIST 115 or 116, or consent of instructor. Directed Elective Area II.

320 Ancient Greece. (3) A study of Hellenic civilization and the institutional and cultural life of the Greeks. Prerequisite: HIST 115 or consent of instructor. Directed Elective Area II.

321 Ancient Rome. (3) A study of Roman civilization from the Republic through the Empire. Prerequisite: HIST 115 or consent of instructor. Directed Elective Area II.

322 Pre-Modern Military History. (3) Intermediate survey of military history from the ancient world through the Renaissance. Prerequisite: HIST 115 or consent of instructor. Directed Elective Area II.

323 The Crusades. (3) A history of the Christian Crusades (1095–1291), emphasizing the historical contexts, causes, and impacts of the conflicts that started in the Eastern Mediterranean and spread to France, Spain, and the Baltic. Prerequisite: HIST 115 or consent of instructor. Directed Elective Area II.

324 Middle Ages. (3) A study of the political, economic, and cultural institutions of Europe from the Germanic invasions and the fall of Rome to 1300. Prerequisite: HIST 115 or consent of instructor. Directed Elective Area II.

325 Early Modern Europe, 1350–1648. (3) Study of political, economic, social, and cultural developments of early modern Europe from the mid-fourteenth to mid-seventeenth centuries, including the Renaissance, the Protestant and Catholic Reformation, the age of religious wars, state-building, witchcraft persecution, and the Age of Discovery. Prerequisite: HIST 115 or consent of instructor. Directed Elective Area II.

326 Old-Regime Europe, 1648–1815. (3) An intermediate survey of European politics, society, economics, and culture; with emphasis on how Old-Regime beliefs, practices, and institutions either culminated or broke down in the French Revolution and the Napoleonic era. Prerequisite: HIST 116 or consent of instructor. Directed Elective Area II.

327 Nineteenth-Century Europe. (3) A study of Europe from 1815 to 1914. Prerequisites: HIST 116 or consent of instructor. Directed Elective Area II.

328 Europe, 1914–1968. (3) A study of Europe from 1914 to 1968. Prerequisites: HIST 116 or consent of instructor. Directed Elective Area II.

329 Great-Power Diplomacy. (3) A history of relations between the great powers from the 1890s to the present. In addition to the major European powers, the course includes the U.S., China, and Japan. Prerequisite: HIST 116 or consent of instructor. Directed Elective Area II.

333 Britain to 1688. (3) A survey of British social and political history, with emphasis on constitutional development. Prerequisite: HIST 115 or consent of instructor. Directed Elective Area II.

337 (Cross-listed with GER 337) The Holocaust. (3) (General Education/Multicultural Studies) (Global Issues) Examines the pre-history, history, and post-history of the Holocaust and its representations from a German Studies perspective and within the broader context of European culture. Not open to students with credit for GER 337. Prerequisite: HIST 116 or GER 224, or consent of instructor. Directed Elective Area II.

341 History of Latin America. (3) (General Education/Multicultural Studies) (Global Issues) A survey of Latin American history and culture from the Pre-Columbian era to the present. Prerequisite: HIST 115 or 116, or consent of instructor. Directed Elective Area II.

342 (Cross-listed with WS 342) Women and Gender in Asian History. (3) (General Education/Multicultural Studies) A study of women and gender in Asia from ancient times to the present, with an emphasis on social, political, economic, and cultural aspects of their lives. Not open to students with credit for WS 342. Prerequisite: HIST 116 or consent of instructor. Directed Elective Area II.

345 China. (3) A survey of Chinese history from ancient times to the present, with emphasis from the late dynastic (Ching) period through the Cultural Revolution. Prerequisite: HIST 115 or 116 or consent of instructor. Directed Elective Area II.

346 Japan. (3) (Global Issues) A survey of Japanese history from ancient times to the present, with emphasis on the period from the late feudal (Tokugawa) period. Prerequisite: HIST 115 or 116 or consent of instructor. Directed Elective Area II.

347 Modern East Asia. (3) (Global Issues) A study of China, Japan, and Korea in the 20th century. Prerequisites: HIST 116 or 245 or consent of instructor. Directed Elective Area II.

349 (Cross-listed with AAS 349) Africa since 1800. (3) (General Education/Multicultural Studies) A study of major themes from 1800 to the present from an African perspective: slave trade and its abolition, European colonialism, independence movements, and problems of independence. Not open to students with credit for AAS 349. Prerequisite: HIST 116 or consent of instructor. Directed Elective Area II.

350 American Colonial History. (3) A history of the discovery, settlement, and development of the American colonies to 1763. Prerequisite: HIST 105 or consent of instructor. Directed Elective Area I.

351 American Revolution and the New Nation. (3) An intermediate survey of the social, economic, and political causes of the American Revolution, the War of Independence, the development of a new system of
government, and the early years of the new nation to 1824. Prerequisites: HIST 105 or consent of instructor. Directed Elective Area I.

352 Civil War Era and Reconstruction. (3) An intermediate survey of the political, social, economic, military, and diplomatic history of the period 1824 to 1877, with focus on the causes, course, and consequences of the Civil War. Prerequisites: HIST 105 or consent of instructor. Directed Elective Area I.

353 America in Transition, 1877–1914. (3) An examination of the forces transforming America from Reconstruction to the Wilson administration. Prerequisites: HIST 106 or consent of instructor. Directed Elective Area I.

354 Emergence of Modern America, 1914–1945. (3) A study of American history from World War I to the end of World War II. Prerequisites: HIST 106 or consent of instructor. Directed Elective Area I.

355 Recent America, 1945 to Present. (3) An examination of American History from the end of World War II to the present. Prerequisites: HIST 106 or consent of instructor. Directed Elective Area I.

380 The Great War, 1914–1918. (3) (Global Issues) A history of World War I emphasizing military, cultural, and technological developments and the conflict's global impact in shaping the twentieth century. Prerequisite: HIST 106 or 116, or consent of instructor. Directed Elective Area I or II.

381 World War II. (3) A history of the Second World War emphasizing the military conflict's impact in transforming politics, cultures, and societies around the globe and its foundational role in spiking the “Cold War” that dominated the last half of the twentieth century. Prerequisite: HIST 106 or 116, or consent of instructor. Directed Elective Area I or II.

385 History of Drugs. (3) Examination of the history of drugs, in historical and modern contexts, in both the United States and globally, with a focus on cannabis and other “recreational drugs.” Prerequisite: sophomore standing or permission of instructor. Directed Elective Area II.

399 Imperial Russia, 1689–1917. (3) A survey of major cultural, intellectual, and political developments within the Russian Empire from the reign of Peter the Great to the fall of the Romanov dynasty. Prerequisite: HIST 116 or consent of instructor. Directed Elective Area II.

402 (Cross-listed with AAS 402) The Civil Rights Movement. (3) An intensive study of the history of the African American civil rights movement concentrating on the post-World War II era. The course also examines the contested historical memory over the long black freedom struggle. Not open to students with credit for AAS 402. Prerequisites: at least junior standing and either HIST 106 or AAS 100; or consent of instructor. Directed Elective Area I.

414 Early American Republic, 1800–1848. (3) An intensive study of the development of the United States from 1800 to 1848, emphasizing the development of political culture within the expanding nation, among post-revolutionary Americans. Prerequisites: at least junior standing and HIST 105, or consent of instructor. Directed Elective Area I.

420 Capstone Seminar: Illinois History. (3) Periods and themes in Illinois history including social, political, economic, cultural, and environmental change. Working in a seminar setting, students complete a major historical research project. Writing Instruction in the Disciplines (WID) course. Prerequisites: HIST 105, 106, and 201; ENG 280; and at least junior standing; or consent of instructor. Directed Elective Area I.

421 Seminar in Global Environmental History. (3) (Global Issues) This thematic seminar is an in-depth comparative, historical study of the interactions between humans and the natural environment from 1500 to the present. Prerequisites: at least junior standing and HIST 116 or 316, or consent of instructor.

423 The Vietnam War and Its Times. (3) A seminar on the Vietnam War, with particular emphasis on domestic social and political aspects during the 1960s. Research in primary sources will be required. Prerequisites: at least junior standing and HIST 106, or consent of instructor. Directed Elective Area I or II.

426 The Enlightenment, 1721–1784. (3) Advanced study of a cultural revolution in the Atlantic world; a “republic” of philosophers, ideas, and debates; social institutions promoting reform; emergence of new media, mass literacy, public opinion, and private sentiment, and the boundaries in which these flourished. Prerequisites: at least junior standing and HIST 116, or consent of instructor. Directed Elective Area II.

427 French Revolution and Napoleon. (3) A detailed examination of the period from 1789 to 1815 in Europe. Prerequisites: at least junior standing and HIST 116, or consent of instructor. Directed Elective Area II.

430 Topics in Ancient History. (3, repeatable to 6 with permission of department chairperson) Study of a theme or chronological period in Greek or Roman History. Topics will vary. Prerequisites: at least junior standing and HIST 115, or consent of instructor. Directed Elective Area II.

431 Alexander the Great. (3) Advanced study of the life, achievements, and historical context of Alexander III of Macedon, with particular focus on his impact outside Europe. Prerequisites: at least junior standing and HIST 320, or consent of instructor. Directed Elective Area II.

433 Tudor/Stuart England: 1485–1714. (3) Political, economic, cultural, and social history of early modern England during the reigns of the Tudor and Stuart monarchs, emphasizing social structures, cultural movements, religious continuity and change, and constitutional developments. Prerequisites: at least junior standing and HIST 115 or 325 or 333, or consent of instructor. Directed Elective Area II.

434 Topics in British History. (3, repeatable to 6 with permission of department chairperson) Selected topics dealing with the political, social, and economic development of Britain. Topics will vary. Prerequisites: at least junior standing and HIST 115 or 313 (as appropriate), or consent of instructor. Directed Elective Area II.

438 Hitler's Germany, 1919 to 1949. (3) Study of Germany from the end of World War I to its division following World War II, focusing on the Weimar Republic, the rise and fall of Adolf Hitler and the Nazi Party, the Holocaust, and Germany’s postwar breakup. Prerequisites: at least junior standing and HIST 116, or consent of instructor. Directed Elective Area II.

451 Problems in History. (1–6, repeatable to 6) Research into areas not specifically covered in other courses. Course credit depends on the nature of the problem and the length of time required to complete the project. Only 3 s.h. may be applied to major or minor requirements. Prerequisites: 9 s.h. of History, 3 s.h. of which must be from WIU; junior standing; and consent of instructor.

452 Readings in History. (1–3, repeatable to 3) Prerequisites: 9 s.h. of History, 3 s.h. of which must be from WIU; junior standing; and consent of instructor.

482 Topics in European History. (3, repeatable to 6) In-depth study of a theme or chronological period in European history. Topics will vary. Prerequisites: at least junior standing and HIST 115 or 116 (as appropriate), or consent of instructor. Directed Elective Area II.

483 Topics in the History of Science and Technology. (3) In-depth study of a subject or theme in the History of Science and Technology. Topics will
vary. Prerequisites: HIST 105, 106, 115, or 116, and at least junior standing; or consent of the instructor. Directed Elective Area I or II.

485 Topics in Asian History. (3, repeatable to 6) In-depth study of a theme or chronological period in Asian History. Topics will vary. Prerequisites: at least junior standing and HIST 116 or 345 or 346 or 347, or consent of instructor. Directed Elective Area II.

488 Topics in U.S. History. (3, repeatable to 6) In-depth study of a theme or chronological period in U.S. history, from the colonial period to the present. Topics will vary. Prerequisites: at least junior standing and HIST 105 or 106 (as appropriate), or consent of instructor. Directed Elective Area I.

490 Honors Thesis in History. (3) The preparation by an honors student of an undergraduate History thesis under the direction of one or more members of the History Department. Prerequisite: Honors major in History with junior or senior standing.

491 Capstone Seminar in History. (3) Historical research and writing in a seminar setting is the primary focus of this course. Students will complete a major historical research project. Writing Instruction in the Disciplines (WID) course. Prerequisites: History major; HIST 105, 106, 115, 116, and 201; at least two upper-division History courses; ENG 280; at least junior standing; and permission of department advisor.

492 Capstone Seminar in Public History. (3) This thematic seminar will focus on the theory and practice of public history and introduce students to methodologies and approaches used by public historians. Students will complete a major historical research project. Writing Instruction in the Disciplines (WID) course. Prerequisites: HIST 105, 106, 115, 116, and 201; at least two upper-division History courses; ENG 180 and 280; at least junior standing; and permission of department advisor.

494 Internship. (1-12, repeatable to 12) Supervised experience of work in archives, historical institutions, or other institutions requiring historical expertise. Prerequisites: consent of department chairperson and junior or senior standing.
Interdisciplinary Minors

Western Illinois University offers a variety of minor programs using an interdisciplinary approach. These programs include individual courses, taught by instructors from one or more departments, that embrace the subject matter and class methods of several disciplines. All interdisciplinary minors include courses from at least two departments (not including the student’s major). To enroll in an interdisciplinary minor, students should consult their major academic advisor and the minor advisor listed below.

Interdisciplinary Minor in Aging Studies ................................................................. 18 s.h.

Program Location: Macomb
Academic Advisor: Dr. Robert C. Intrieri, Department of Psychology

1. Core Courses ........................................................................................................ 12 s.h.
   AGE/ANTH/RPTA/SOC 202—Introduction to Gerontology (3)
   AGE 487—Practicum in Aging Studies (2)
   AGE 490—Seminar in Aging Studies (1)
   PSY 423—Psychology of Adulthood and Aging (3)
   SOC 405—Sociology of Aging in Rural and Urban America (3)

2. Electives ........................................................................................................ 6 s.h.
   Select 6 s.h. from the following courses*:
   AGE 460—Individual Research in Aging Studies (1–3)
   AGE 463—Individual Readings in Aging Studies (1–3)
   HS 410—Human Diseases (3)
   HS 412—Public Health Administration (3)
   HSM 314—Health Care Management (3)
   HSM 315—Long Term Care Management (3)
   KIN 300—Fitness for Older Adults and Special Populations (3)
   RPTA 251—Foundations of Therapeutic Recreation (3)
   RPTA 452—Leisure Services for Older Adults (3)
   SW 332—Social Work with Aging Persons (3)
   ZOOL 420—Biology of Aging (3)
   * Check the course prerequisites to determine eligibility to take the course.

Interdisciplinary Minor in Cannabis and Culture .................................................. 18 s.h.

Program Location: Macomb
Academic Advisor: Dr. Sarah Haynes, Department of Liberal Arts and Sciences

1. Core Courses ........................................................................................................ 9 s.h.
   ANTH 180—Cannabis Cultures: The Anthropological Study of Cannabis (3)
   LAS 420—Senior Seminar in Cannabis and Culture (3)
   REL 180—Religion and Drugs (3)

2. Directed Electives ............................................................................................. 9 s.h.
   Select 9 s.h. from the following courses with at least 3 s.h. at the 300- or 400-level. No more than two courses from one department:
   ANTH 205—Drugs and Cultures: From Magic Mushrooms to Big Pharma (3)
   ANTH 210—Medical Anthropology (3)
   ANTH/BOT 463—Ethnobotany (4)
   ANTH/REL 324—Religion, Magic, and Shamanism (3)
   HIST 385—History of Drugs (3)
   PHIL 120—Contemporary Moral Problems (3)
   POLS 302—Introduction to Public Policy (3)
   POLS 400—Comparative Public Policy (3)
   Note: A maximum of 3 s.h. of LAS 420 may count for this minor.
Interdisciplinary Minor in Environmental Studies .................................18–22 s.h.

Program Location: Macomb
Academic Advisor: Ms. Jennifer Sandrik-Rubio, College of Arts and Sciences

1. Core Requirements .................................................................................. 6 s.h.
   - ENVR 201—Introduction to Environmental Studies (3)
   - ENVR 401—Colloquium on Environmental Studies (3)

2. Must take at least one course from each Foundation Area and a fourth course from any Foundation Area .................................12–16 s.h.
   a. Foundation Area 1: Environmental and Earth Sciences
      - AGRN 278—Fundamentals of Soil Science (4)
      - BIOL 350—General Ecology (4)
      - BOT 210—Local Flora (3)
      - CHEM 342—Fundamentals of Environmental Chemistry (4)
      - EOS 310—Environmental Sciences (3)
      - EOS 311—Environmental and Occupational Health Problems (3)
      - GEOL 113—Energy and Earth Resources (3)
      - GEOL 310—Geologic Field Methods (2)
      - GEOL 375—Environmental Geology (3)
      - GEOL 380—Hydrogeology (4)
      - GEOL 420—Geomorphology (3)
      - METR 327—Environmental Climatology (3)
      - PHYS 124—General Physics (5)

   b. Foundation Area 2: Human Dimensions and Environmental Interactions
      - ANTH 410—Anthrozoology (3)
      - ANTH/BOT 463—Ethnobotany (4)
      - ANTH/WS 395—Gender, Race, and the Environment (3)
      - ENG 340—American Nature Writing (3)
      - ENG 481—Topics in Writing Studies (4)
      - HIST 316—American Environmental History (3)
      - HIST 420—Capstone Seminar: Illinois History (3)
      - PHIL 333—Environmental Ethics (3)
      - RPTA 376—Perspectives in Outdoor Recreation (3)
      - RPTA 448—Interpretation of Cultural and Environmental Resources (3)

   c. Foundation Area 3: Environmental Management and Decision-Making
      - CONS 405—Soil and Water Conservation (4)
      - ECON/AGEC 430—Environmental Economics (3)
      - GEOG/BIOL 426—Conservation and Management of Natural Resources (3)
      - INAG 310—International Agriculture in Developing Countries (3)
      - MGT 481—Management and Society: Ethics and Social Responsibility (3)
      - POLS 393—Environmental Politics (3)

Interdisciplinary Minor in Horticulture .....................................................18 s.h.

Program Location: Macomb
Academic Advisor: Ms. Ember Keithley; School of Agriculture

1. Required Courses .................................................................................... 8 s.h.
   - BOT 329—Plant Structure and Function (3)
   - HORT 180— Principles of Horticultural Science (4)
   - HORT 493—Practicum in Horticultural Science (1–3)
2. Choice of one of the following courses: ............................................. 3 or 4 s.h.
   FOR 208—Dendrology (4)
   HORT 380—Landscape Plants I (3)
   HORT 381—Landscape Plants II (3)

3. Electives to be selected from any of the following four emphases: ................. 7 or 8 s.h.
   a. Production
      AGRN 373—Integrated Pest Management (4)
      FOR 406— Arboriculture (4)
      HORT 384—Sustainable Landscape Construction and Management (3)
      HORT 385—Landscape Design (3)
      HORT 393—Greenhouse and Nursery Management (3)
      HORT 480—Plant Propagation (3)
      HORT 485—Turf Management (3)
   b. Design and Construction
      RPTA 487—Site Planning in Recreation and Parks (3)
   c. Plant Science
      AGRN 278—Fundamentals of Soil Science (4)
      HORT 389—Home Horticulture (3)
   d. Operations
      FOR 407—Urban Forest Management (3)
      RPTA 489—Park Maintenance and Operations Management (3)

Interdisciplinary Minor in International Studies ............................................. 18 s.h.

Program Location: Macomb
Academic Advisor: Dr. Vincent A. Auger, Department of Political Science

1. Core Requirements .................................................................................... 6 s.h.
   a. Required of all minors:
      POLS 228—Fundamentals of International Relations (3)
   b. Choose one of the following four courses:
      The chosen course must not be in the student’s major department.
      ANTH 110—Introduction to Cultural Anthropology (3)
      GEOG 110—World Regional Geography (3)
      HIST 116—World History since 1500 (3)
      POLS 267—Introduction to Comparative Government and Politics (3)

2. Language Component ............................................................................ 0–6 s.h.
   Some, but not all, of the areas of study require a foreign language.
   Language study is encouraged but not required for the others.
   This requirement can be satisfied in whole or part by proficiency credit. The areas which involve language requirements are:
   Latin America (6 hours Spanish)
   Eastern Europe (6 hours German)
   Western Europe (6 hours French or 6 hours German or 6 hours Spanish)

3. Area Studies ......................................................................................... 6–12 s.h.
   This requirement is for 6 or 12 s.h., depending on whether a language is required for the student’s area of study (see 2 above).
   If a language is required in 2, only 6 s.h. are required here. If no language is required in 2, 12 s.h. are required. Note that courses in a non-required but appropriate language (e.g., Japanese for a student in Asian Studies) can satisfy part of this requirement. Courses must be
Interdisciplinary Minors and Courses

in a minimum of two departments. The elective courses from which 
the student must elect 6 or 12 s.h., as appropriate, are listed below by area.

a. African Studies
   AAS/POLS 327—African Politics (3)  
   AAS/GEOG 466—World Regions—Africa (3)  
   AAS/HIST 349—Africa since 1800 (3)  
   AAS 381—Modern African Literature (3)  
   ANTH 201—World Culture Regions—Africa (3)  
   ECON 420—Economic Development (3)  
   ECON 470—International Trade (3)  
   INAG 310—International Agriculture in Developing Countries (3)

b. Asian Studies
   ANTH 201—World Culture Regions—Asia (3)  
   ECON 420—Economic Development (3)  
   ECON 470—International Trade (3)  
   GEOG 466—World Regions—Monsoon Asia (3)  
   HIST 345—China (3)  
   HIST 346—Japan (3)  
   INAG 310—International Agriculture in Developing Countries (3)  
   REL 350—Hinduism (3)  
   REL 355—Buddhism (3)

c. Latin American Studies
   ANTH 201—World Culture Regions—Latin America (3)  
   ECON 420—Economic Development (3)  
   ECON 470—International Trade (3)  
   GEOG 466—World Regions—Latin America (3)

Interdisciplinary Minor in Law and Society .................................................................18 s.h.

Program Location: Macomb
Academic Advisor: Dr. Keith Boeckelman, Department of Political Science

1. Required Courses ........................................................................................................3 s.h.
   - POLS 226—Introduction to Law and Society (3) or
   - PHIL 205—Philosophy, Law and Society (3)

2. Electives .......................................................................................................................15 s.h.

- Courses must be selected from the following list. They must be drawn from three different departments, not including the student’s major. Student may count PHIL 205 as a Directed Elective only if the student has taken POLS 226.

- AAS 270—Blacks and the Law (3)
- BC&J 400—Mass Communication Law and Ethics (3)
- HIST 303—American Legal History (3)
- LEJA 212—Criminal Law (3)
- LEJA 312—Criminal Procedure (3)
- LEJA 441—Seminar on Current Issues in the Court System (3)
- PHIL 205—Philosophy, Law and Society (3)
- PHIL 330—Moral Philosophy (3)
- POLS 319—The Judiciary (3)
- POLS 382—Modern Political Theory (3)
- POLS 411—Constitutional Law: Civil Liberties and Civil Rights (3)
- POLS 447—Administrative Law and Politics (3)
- POLS 448—The Supreme Court (3)
- PSY 453—Psychology and Law (3)
- SOC 355—Criminology (3)
- SOC 463—Sociology of Law (3)

Interdisciplinary Minor in Queer Studies .................................................................16 s.h.

Program Locations: Macomb
Academic Advisor: Dr. Merrill Cole, Department of English

1. Required Courses ........................................................................................................7 s.h.
   - QS 100—Introduction to Queer Studies (3)
   - QS 400—Capstone in Queer Studies (4)

2. Three of the following: .............................................................................................9 s.h.

- ENG 359—LGBT Topics in Literature (3)
- F L/WS 480—Sexuality in German and Austrian Culture (3)
- PSY 355—Psychology of Sexual Orientation (3)
- SOC 427—Sociology of Sexual Identities and Inequalities (3)
- WS 280—Lesbianism and Gender Identity (3)
- WS 455—Feminist Theory & Practice (3)
Interdisciplinary Courses

The College of Arts and Sciences offers Interdisciplinary Courses, which involve the consideration of significant concepts and topics that cross the lines of a single department. Several of these courses, such as those dealing with themes in law and society, are primarily designed to serve the needs of students enrolled in interdisciplinary minors. Although not specifically designed for this purpose, Interdisciplinary Courses can be useful for career preparation in some areas.

Course Descriptions

ENVIRONMENTAL STUDIES (ENVR)

201 Introduction to Environmental Studies. (3) Dimensions and scope of environmental studies, includes relationship of humans to nature, ecosystems, earth resources, population, environmental economics, politics, health, and biodiversity.

401 Colloquium on Environmental Studies. (3) The capstone course in the Environmental Studies minor. Variable topics on such issues as population growth, terrestrial resources, environmental ethics, global warming, politics and economics of environment, environmental regulations, agriculture—world food resources will be examined. Students will complete a research project. Prerequisites: ENVR 201 or permission of instructor.
Program Offerings and Locations:

- Bachelor of Science in Exercise Science: Macomb
- Bachelor of Science in Nutrition and Dietetics: Macomb
- Bachelor of Science in Nutrition and Foodservice Management: Macomb
- Bachelor of Science in Physical Education: Macomb
- Minor in Coaching: Macomb
- Minor in Nutrition: Macomb
- Minor in Scuba Diving: Macomb
- Minor in Sports Health and Wellness: Macomb

For student learning outcomes, please see [wiu.edu/provost/learningoutcomes](http://wiu.edu/provost/learningoutcomes).

**Faculty:** Bories, Chapel, Gabbei, Gurzell, Hyllegard, Kanauss, Kovacs, Murray, Narvaez, Piper, Plos, Polubinsky, Radlo, Shupe, Walter.

Kinesiology is an academic discipline that involves the study of physical activity and its impact on health, society, and quality of life. Undergraduate students in the Department of Kinesiology at WIU may choose to major in Exercise Science, Nutrition and Dietetics, Nutrition and Foodservice Management, or Physical Education. Common to all majors is a focus on the body from psychological, biological, and physiological perspectives, as well as an appreciation of an active and healthy lifestyle.

Students majoring in Exercise Science are prepared for a wide variety of kinesiology-related fields. Graduates of the program work in cardiac rehabilitation, health/fitness facility management, personal training, strength and conditioning, and employee wellness to name a few. In addition, the Exercise Science degree can provide students with the necessary prerequisites and field experience that will make them strong candidates for future study in athletic training, physical therapy, occupational therapy, and physician assistant programs.

The Physical Education degree program leads to Illinois state licensure in grades K–12. The curriculum focuses on the development of the knowledge, skills, and dispositions needed to positively impact K–12 student learning. To achieve this goal, we offer coursework and a variety of field experiences that focus on the use of evidence-based practices, differentiated instruction, technology, and varied assessments to plan and implement instruction in ways that promote student growth and achievement.

The Bachelor of Science in Nutrition and Dietetics degree program’s mission is to prepare graduates with the knowledge expected of those entering a supervised practice program leading to eligibility for the CDR credentialing exam to become a registered dietitian nutritionist. The curriculum is designed to facilitate the intellectual, personal, and professional growth of students and to encourage them to be lifelong learners. The Nutrition and Dietetics program is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND), located at the headquarters of the Academy of Nutrition and Dietetics at 120 Riverside Plaza, Suite 2000, Chicago, IL 60606; telephone (800) 877-1600. Graduation is based on completion of requirements of the accredited Nutrition and Dietetics major requirements and fulfillment of University requirements.

The Bachelor of Science in Nutrition and Foodservice Management provides students with the competencies, knowledge, and experiences required of nutritional and foodservice professionals working in nutrition services and the foodservice industry. Career opportunities exist in hospitals, long-term care, schools, correctional facilities, senior living facilities, and other commercial and noncommercial foodservice industries. The curriculum covers areas such as the science of food and human nutrition, the principles and practices of food production, foodservice operation systems, and safety and sanitation. Opportunities
GradTrac is available to Nutrition and Dietetics and Nutrition and Foodservice Management majors. See page 79 for information about GradTrac.

**Honors Curriculum**—Academically qualified students in this department are encouraged to complete an honors curriculum in University Honors, Honors in the Major, or General Honors. All Honors students must complete the one-hour honors colloquium (G H 299). General Honors includes General Honors coursework. Honors in the Major includes honors work in the major. University Honors combines Honors in the Major and General Honors. For more information about honors curricula, see page 100 or visit the Centennial Honors College website at [wiu.edu/Honors](http://wiu.edu/Honors).

**Degree Programs**

**Bachelor of Science in Nutrition and Dietetics**

All students seeking the Bachelor of Science in Nutrition and Dietetics must complete I, II, and III below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 122 s.h.

* Students with a career objective of becoming a registered dietitian must complete a program of study which meets the accredited Didactic Program in Nutrition and Dietetics at WIU. (These program competencies must be met prior to the application to an accredited dietetic internship.)

** May count toward the University General Education Curriculum requirement.

*** Does not count toward the University General Education Curriculum requirement.

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; or 3) NUTR 300.

† NUTR 408 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.

**Bachelor of Science—Exercise Science**

All students seeking the Bachelor of Science in Exercise Science must complete I, II, III, IV, and V below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h. A grade of C- or better is required in all Kinesiology (KIN) courses required for the major. A 2.5 GPA in the major is required before internship clearance.
I. University General Education Curriculum (p. 70) ........................................... 43 s.h.
   (To include NUTR 109 and one of BIOL 100, BIOL 101, or ZOOL 200)

II. Department Core Courses .................................................................................. 12 s.h.
   KIN 270, 359, 391, 392

III. Major Core Courses ......................................................................................... 32 s.h.
   A. KIN 170, 300, 343, 347, 440, 444†, 463 ......................................................... 20 s.h.
   B. Internship: KIN 400 ..................................................................................... 12 s.h.

IV. Major Elective Courses ..................................................................................... 15 s.h.
   A. KIN 290 or ZOOL 330 ............................................................................... 3–4 s.h.
   B. KIN 291 or ZOOL 331 ............................................................................... 3–4 s.h.
   C. Choose 7–9 s.h. from:
      KIN 247, 248, 319, 369, 396, 401, 464, 473 ................................................ 7–9 s.h.

V. Open Electives .................................................................................................... 18 s.h.

* For successfully meeting established criteria, the National Strength and Conditioning
   Association officially recognizes Western Illinois University’s educational program in
   Strength and Conditioning.
# The foreign language/global issues graduation requirement may be fulfilled by
   successfully completing one of the following: 1) a designated foreign language requirement
   [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global
   issues course; 3) any major’s discipline-specific global issues course; or 4) an approved
   Study Abroad program.
† KIN 444 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.

Bachelor of Science in Nutrition and Foodservice Management

All students seeking the Bachelor of Science in Nutrition and Foodservice Management
must complete I, II, III, and IV below, and the foreign language/global issues requirement
for the major#. The minimum semester hour requirement for the baccalaureate degree is
120 s.h.

I. University General Education Curriculum (p. 70) ........................................... 43 s.h.

II. Core Courses ................................................................................................... 66 s.h.
   A. HM 151, 250, 251, 253, 254, 353, 354, 356, 359, 451, 458 ......................... 26 s.h.

Course Descriptions

ATHLETIC TRAINING (AT)

200 Lower Extremity. (3) Assessment and immediate care of athletic injuries of the lower extremity. Prerequisites: AT 110; KIN 292 and KIN 293 or concurrent registration in these courses and permission of program director. 2 hrs. lect.; 2 hrs. lab.

210 Upper Extremity. (3) An in-depth study of athletic injuries involving the upper extremity. Evaluation, immediate care, and rehabilitation of these injuries are discussed. Prerequisites: AT 110; KIN 292 and KIN 293 or concurrent registration in these courses and permission of program director. 2 hrs. lect.; 2 hrs. lab.

211 Clinical Education and Experience in Athletic Training I. (1) Instruction, practice, and evaluation of NATA clinical proficiencies and clinical experience in clinical settings. Prerequisite: permission of program director.

300 Therapeutic Modalities. (3) An introduction to the physiological principles and operational procedures of contemporary therapeutic modalities as they relate to the immediate care, treatment, and rehabilitation of athletic injuries. Prerequisite: admission to ATEP and permission of the program director. 2 hrs. lect.; 2 hrs. lab.

301 Clinical Education and Experiences in Athletic Training II. (1) Continuation of instruction, practice, and evaluation of NATA proficiencies, and experience in clinical settings. Prerequisite: AT 211 and permission of the program director.

305 Therapeutic Exercise. (3) Concepts and principles of rehabilitation program design including determination of goals, progressions, and criteria for return to competition. Includes fundamentals of therapeutic exercise principles for common rehabilitation protocols. Prerequisite: admission to ATP and permission of the program director. 2 hrs. lect.; 2 hrs. lab.

310 Head, Neck, Spine, and Abdomen. (3) Assessment and care of athletic injuries including the regions of the head, neck spine, and abdomen. Prerequisites: KIN 292, KIN 293, and permission of the program director. 2 hrs. lect.; 2 hrs. lab.

311 Field Experience in Athletic Training I. (1) Field experience in Athletic Training in various clinical settings. Also includes continuation of practice and evaluation of NATA clinical proficiencies. Prerequisites: AT 301 and permission of the program director.

315 Advanced Rehabilitation Techniques. (2) Instruction and application in rehabilitation program design and progression strategies for various pathologies and diagnoses will be explored. Prerequisites: AT 300, AT 305, and junior status. 1 hr. lect.; 2 hrs. lab.

401 Field Experience in Athletic Training II. (1) Continuation of Field Experience I. Practice and evaluation of NATA clinical proficiencies. Prerequisites: AT 311 and permission of the program director.

403 Pharmacological Issues in Athletic Training. (3) Study of pharmacological issues in Athletic Training. Prerequisites: admission to ATP and permission of the program director.

405 Medical Conditions and Pathologies in Athletic Training. (3) Study of the pathology of general medical conditions common to athletes and physically active individuals. Prerequisite: admission to ATP and permission of the program director.

410 Athletic Training Administration. (3) Development and administration of an Athletic Training program including employment, documentation, budget, and facilities. Writing Instruction in the

Disciplines (WID) course. Prerequisites: permission of the program director; ENG 280.

411 Athletic Training Professional Preparation. (1) Preparation, practice, and assessment of educational competencies and clinical proficiencies in Athletic Training. Prerequisites: AT 401 and permission of the program director.

413 Senior Seminar in Athletic Training. (1) Foundational behaviors of professional practice in Athletic Training. Prerequisite: senior standing in Athletic Training program.

420 Internship. (12) An internship with an approved affiliated site, under the supervision of a Certified Athletic Trainer, designed for the practical application of knowledge and theory in a professional setting. Prerequisites: Admission to ATP and permission of the program director.

KINESIOLOGY (KIN)

(Kinesiology Courses)

102 Swimming. (1) (General Education/Human Well-Being) For individuals who have some experience and feel comfortable in the water. The individual should be able to move on the face and back and should have had some experience in deep water. Front crawl, back crawl, elementary back stroke, breast stroke, side stroke, fall-in dive, standing front dive, and surface dive will be taught.

108 Open Water Scuba. (2) Provides classroom and confined water work needed to scuba dive safely in open water. Certification is available, but not required. Must be able to swim 250 yards continuously, tread water 10 minutes, and swim underwater 50 feet. Physical examination required.

118 Aerobic Dance. (1) (General Education/ Human Well-Being) Concepts and principles of aerobic dance movements; routines consisting of different beats, tempo, and movement forms.

121 Badminton. (1) (General Education/Human Well-Being) Beginning of knowledge, and etiquette. A one-time lab fee of $15 will be charged for this class.

127 Riflery. (1) Ammunition charge.

128 Tennis. (1) (General Education/Human Well-Being) Beginning skills, strategies, and rules used to play the game of tennis.

131 Acrobic Conditioning. (1) (General Education/ Human Well-Being) Designed to acquaint students with cardiovascular endurance exercise. Various training programs will be introduced which are directed at conditioning of the vital organs.

140 Personal Fitness Program. (1) (General Education/Human Well-Being) After initial assessment, each student undertakes an individualized conditioning program designed to improve the function of his/her cardiovascular system.

142 Conditioning. (1) A course emphasizing physical fitness and weight control. Much time is spent on conditioning exercises and their benefits. Correct posture is also covered.

145 Pickleball. (1) Indoor net game for beginners and advanced players alike.

146 Court Sports. (1) Beginning level skills, techniques, and rules used to play various court sports including but not limited to pickleball, team handball, badminton, and tennis.

245
247 Olympic Weightlifting. (1) Designed to enhance the individual's power development and overall performance as well as increase his/her knowledge of plyometric training and Olympic lifting techniques.

248 Advanced Strength Training. (1) Methods of manipulating exercise selection, technique, sets, reps, rest, and intensity for improving overall body symmetry and appearance. Training and principles will focus on the skills needed by the modern day personal trainer, strength coach, athletic trainer, and other fitness professionals. Majors only or permission of instructor. Prerequisite: KIN 147.

270 Motor Behavior. (3) Introduction to psychomotor learning and theoretical models of skill acquisition. Selected topics will include neurological structure and function, theory of motor control, scheduling of practice, use of feedback, and motor coordination.

271 (Formerly KIN 371) Principles of Coaching. (3) Theory and methodology relevant to coaching at any competitive level. Course content will focus on preparation for American Sport Education Program (ASEP) Certification credential necessary to coach any competitive level. Course content will focus on the skills necessary to be an effective exercise psychologist and fitness and wellness professional of stress management techniques. Prerequisite: KIN 170.

286 Functional Anatomy and Physiology. (3) Introduction of principles and application of anatomy, physiology, and biomechanics for sport and physical activities.

290 Anatomy & Physiology I. (3) An examination of the structural organization and function of the human body with an emphasis on the integumentary, skeletal, muscular, nervous, and cardiovascular systems. 2 hrs. lect.; 2 hrs. lab.

291 Anatomy & Physiology II. (3) A study of normal human anatomy and physiology. Topics include respiration, digestion, metabolism, urology, special senses, reproduction, and endocrinology. 2 hrs. lect.; 2 hrs. lab.

292 Palpatory Anatomy. (2) This course will offer the student an opportunity to learn physical palpation skills. These skills are critical to an accurate and timely physical assessment within the practice of athletic training, physical therapy, occupational therapy, exercise science, and fitness. Prerequisite: KIN 290 or permission of instructor. 1 hr. lect.; 2 hrs. lab.

293 Manual Muscle Testing. (2) This course will offer the student a practical experience in assessing muscular strength, endurance, and neurological deficits using manual testing procedures. These skills are critical within the practice of athletic training, physical therapy, occupational therapy, exercise science, and fitness. Prerequisite: KIN 290 or permission of instructor. 1 hr. lect.; 2 hrs. lab.

294 (Formerly KIN 394) Management of Athletic Injuries. (3) The role of the coach in preventing sport injuries, recognizing injury mechanisms, and providing emergency care. Laboratory sessions emphasize wrapping, taping, and emergency first aid. Includes Red Cross First Aid and CPR training and certification. Prerequisite: KIN 286 or 290 or permission of instructor. 2 hrs. lect.; 2 hrs. lab.

300 Fitness for Older Adults and Special Populations. (3) Development of leadership skills, assessment techniques, and program designs necessary to be an effective fitness professional for older adults and selected special populations (e.g., arthritis, asthma, obesity, fibromyalgia, etc.). Students will be involved in hands-on learning. Prerequisites: KIN 170, 290, 391, and CPR certification; or permission of instructor.

308 Scuba Diving Specialties. (2, repeatable to 4) Instruction in rescue and at least two other diving specialties (e.g., deep, night, dry suit, ice, cave, wreck) within the realm of recreational scuba diving. Certification available, but not required. Must have a current scuba physical exam on file. Prerequisites: KIN 208 with certification or permission of instructor.

319 Exercise Psychology and Stress Management. (3) Theories, concepts, and principles of exercise psychology and stress management will be covered with focus on skills necessary to be an effective exercise psychologist and fitness and wellness professional of stress management techniques. Prerequisite: KIN 170.

343 Cardiovascular Exercise Principles and Assessment. (3) Development of leadership skills and assessment techniques for cardiovascular exercise. Principles will focus on the skills and skills necessary to develop and lead appropriate cardiovascular programs. Prerequisite: KIN 170, 391.

346 Candidate Physical Ability Test Preparation for Firefighters. (2) The knowledge and physical activities required for the successful completion of the Candidate Physical Ability Test for firefighters will be simulated and practiced in this course. Prerequisites: PS 300, 301, or permission of instructor.

347 Strength and Conditioning Principles and Methods. (3) Development of leadership skills and assessment techniques for resistive exercise. Principles will focus on the skills necessary to be an effective fitness professional of resistive exercise and other weight training techniques. Prerequisites: KIN 170, 290.
350 Sport Psychology. (3) An introduction to sport psychology theories and research including application to performance enhancement. Selected topics include motivation, confidence, stress and anxiety, team dynamics, performance enhancement, and professional and ethical issues. Prerequisite: PST 100 or permission of instructor.

369 Motor Development. (3) A study of the process of change in perception, acquisition, and performance of physical skills across the lifespan. Prerequisites: KIN 270, 290. 2 hrs. lect.; 2 hrs. lab.

370 Advanced Techniques of Performance/Management. (1, repeatable for different subjects/performance to 6) Prerequisite: permission of instructor. Graded S/U only.

384 Field Experience in Sports Health I. (1, repeatable to 2) Minimum of 30 hours at an assigned on-campus field experience with a focus in sports health and wellness, providing care to student-athletes during practices or events while under the supervision of an Athletic Trainer. Prerequisite: KIN 294 or permission of instructor.

391 Physiology of Exercise. (3) A study of the physiological responses to exercise including acute effects, training adaptations, and health related benefits. Specific topics covered include exercise metabolism, neurological and endocrine regulation of exercise, cardiovascular and respiratory physiology, environmental influences, and ergogenic aids. Prerequisite: KIN 290 and MATH 123 or higher. 2 hrs. lect.; 2 hrs. lab.

392 Biomechanics. (3) The integrated study of applied anatomy and applied mechanics to the analysis of human motion. Prerequisite: KIN 290 and MATH 123 or higher. 2 hrs. lect.; 2 hrs. lab.

396 Surface Palpations and Manual Muscle Testing. (2) Hands-on assessment of anatomical landmarks and muscle function through palpation and manual muscle testing skills. These skills are critical within the practice of athletic training, physical therapy, occupational therapy, and exercise science. Prerequisite: KIN 286 or equivalent, or permission of instructor.

397 Injury Recognition. (3) Instruction on how to recognize an injury and understand the severity using appropriate classifications. Common terminology unique to the sports healthcare world will be addressed. Prerequisite: KIN 294 or permission of instructor.

400 Internship. (12) An internship in an approved program designed as laboratory field experiences for practical application of knowledge and theory in a professional setting. Prerequisite: 2.5 GPA in the major, C- or better in all KIN coursework, and permission of instructor.

401 Senior Seminar in Exercise Science. (2) Practical and theoretical information for professional career situations. Prerequisites: senior standing; Exercise Science major.

408 Diveremaster. (2, repeatable to 4) Students complete supervised dives, perform dive briefings, act as safety/rescue divers, and lead underwater tours to learn to be responsible Diveremasters and eligible for employment. Must have a current scuba physical exam on file. Diveremaster certification available, but not required. Prerequisites: KIN 308, Dive Rescue certification, or permission of instructor.

440 Exercise Stress Testing. (3) Designed to provide an in-depth study of the theories, concepts, procedures, and techniques of exercise stress testing. Prerequisites: KIN 391, CPR Certification, and permission of instructor.

444 Exercise and Wellness Programming. (3) Administration of exercise science and wellness programming with special attention given to leadership skills and assessments necessary to direct exercise and wellness programs. Writing Instruction in the Disciplines (WID) course. Prerequisites: senior standing, KIN 440, and permission of instructor; ENG 280.

450 Professional Workshops in Sport and Exercise. (1–3, repeatable to 6) Examination and analysis of current topics, trends, or problems in sport and exercise. Content varies according to contemporary issues. Prerequisite: junior standing or permission of instructor.

451 Basketball Coaching. (2) Beginning and advanced strategies for coaching basketball through high school and collegiate levels.

454 Football Coaching. (2) Beginning and advanced strategies for coaching football.

459 Individual/Team Sport Coaching. (2, repeatable for different topics to 4) Beginning and advanced strategies for coaching individual or team sports other than basketball, football, or volleyball (e.g., tennis, golf, swimming, soccer, baseball, softball, or track and field). Prerequisite: junior or senior standing.

460 Observation and Practice. (1, repeatable for different topics to 2) Preservice practical experiences in Kinesiology activity courses under the supervision of staff. Prerequisite: permission of instructor.

463 Personal Training. (2) Provides practical application of theoretical information in personal training for Exercise Science students. Prerequisites: KIN 440, 2.5 GPA in major, and senior status—majors only.

464 Field Experience in Exercise Science. (1) A 30-hour field experience in Exercise Science settings for the practical application/observation of theory and skills. Prerequisites: junior or senior standing, permission of instructor, and one of the following: KIN 300, 343, or 347.

466 Organization and Administration of Athletic Teams. (3) Study of administrative principles, policies, laws, and ethics as they relate to budget, finance, equipment, staff, facilities, and public relations for the management and promotion of athletic teams. Prerequisite: KIN 271.

470 (Cross-listed with WS 470) Gender and Sport. (3) Examines relationships between gender, sport, and physical activity. Gender is examined within the context of stereotypes and the structure/philosophy of sport and physical activity. Sport and physical activity are investigated as cultural phenomena relative to cultural constructions of gender. Not open to students with credit in WS 470. Prerequisite: WS 190 or permission of instructor.

471 Practicum in Coaching. (1) 40 clock hours of observation and practice under the supervision of a middle school or high school teacher, coach, or outside agency administrator. Prerequisites: KIN 451, 454, or 459, and permission of instructor. Observation and coaching will be required in an outside setting.

472 Coaching Internship and Capstone. (3) A 120 clock hour coaching capstone experience under the supervision of a coach and university supervisor. Students will help prepare a team for competition, manage a team culture, and evaluate athlete performance. Prerequisite: KIN 272.

473 Practicum in Adapted Physical Activity Motor Clinic. (1, repeatable to 4) Interdisciplinary practicum experience (30 hours per semester) working with PreK–12 students with disabilities in a physical activity setting. Students will get hands-on experiences along with opportunities for collaboration with undergraduate and graduate students from various majors across campus. Prerequisites: SPA 381, SPA 385, PETE 393, PSY 221, RPTA 251, SPED 210, or permission of instructor.

484 Field Experience in Sports Health II. (1, repeatable to 2) Minimum of 30 hours at an assigned on- or off-campus field experience with a focus on
sports health and wellness, providing care to student-athletes during practices or events while under the supervision of an Athletic Trainer. Prerequisite: KIN 294 and 384, or permission of instructor.

485 Independent Study. (1–3, repeatable for different topics to 3) Individualized study of a particular topic or problem in the field of Kinesiology. Prerequisite: permission of instructor. Students must secure approval for independent study prior to semester registration.

490 Honors Thesis in Kinesiology. (3) Independent thesis project resulting in a substantial original research paper and oral presentation. Students will work under the direction of one or more members of the Kinesiology Department faculty who will oversee and evaluate the project. Prerequisites: junior or senior honors major in Kinesiology, with good standing in the Centennial Honors College. Approval of thesis advisor(s).

493 (Cross-listed with RPTA 493) Sport and Recreation for Individuals with Disabilities. (3) The course will provide students with information about sport and recreation opportunities for individuals with disabilities across the lifespan at all levels from community programs to elite levels of competition. Not open to students with credit in RPTA 493. Prerequisite: PETE 393, RPTA 251, or consent of instructor. Laboratory charge for course and field trip is required.

494 Advanced Techniques for Injury Management. (3) Techniques in sports health and wellness for advanced emergency care, rehabilitation of injuries, and application of protective equipment. Prerequisite: KIN 294 or permission of instructor.

496 Advanced Sports Health and Wellness. (2) Concepts covering general medical conditions, pharmacology, target populations, and crisis management in the sports health and wellness industry. Prerequisite: junior standing or permission of instructor.

(Physical Education Methods)

430 Methods and Materials in Physical Education. (3) Planning, developing, and teaching Physical Education content at the secondary level. Includes a field experience at the middle or high school level. Grade of C- or better required. Prerequisite: EDS 301; PETE 115, 124, 135, 226, 251, 252, 253, 365; fully accepted in the Teacher Education Program (TEP). 2 hrs. lect.; 2 hrs. lab.

NUTRITION (NUTR)

109 Introduction to Nutrition. (3) (General Education/Human Well-Being) Basic principles of human nutrition related to maintenance of optimum nutritional status.

152 Principles of Food Preparation. (2) Study of the principles of food selection, basic preparation techniques and methods, evaluation, and safety. Prerequisite or Corequisite: HM 151. Corequisite: NUTR 153.

153 Principles of Food Preparation Lab. (1) Practice and application of selected principles of food selection, basic preparation techniques and methods, evaluation, and safety of food products. Prerequisite or Corequisite: HM 151. Corequisite: NUTR 152. 3 hrs. lab.

190 (Cross-listed with ATM 190 and HM 190) Introduction to Professional Practices. (1) This course is designed to introduce DFMH majors to program expectations specific to their careers. Students will be exposed to a variety of resources to aid them in their studies. Not open to students with credit in ATM 190 or HM 190.

203 (Formerly NUTR 303) Child Nutrition. (2) Evaluation of the nutrition needs and problems of children and examination of the foodservice and nutrition components in programs designed for children. Activities outside of class may be required. Prerequisite: NUTR 109.

206 Nutrition and Foodservice Management Practicum. (3) A course designed to give students practicum experience in the nutrition and/or foodservice management industries. Prerequisites: HM 151; NUTR 109, 152, and 153.

300 Food and Culture. (3) (General Education/ Multicultural Studies) (Global Issues) Overview of the socio-cultural aspects of food and habits. The study of the cultural influences on food in different global societies including nourishment, health beliefs and practices, religion, cross-cultural communication, and health status outcomes. Prerequisites: permission of department.

301 Food Science Theory and Applications. (3) Basic food science principles and applications in the field of dietetics. Prerequisites: NUTR 109, 152, and 153; CHEM 101; or permission of instructor. 2 hrs. lect.; 3 hrs. lab.

304 Nutrition Informatics. (3) Nutrition research as the basis for evidence-based practice in dietetics, including additional focus on locating professional literature and evaluating research on nutrition and dietary supplements. Prerequisites: NUTR 209; STAT 171 or SOC 323.

305 Nutrition Throughout the Life Span. (3) Evaluation of nutritional needs and problems and identification of community nutrition programs for individuals at different stages of the lifespan. Prerequisite: NUTR 109. Activities outside of class may be required.

307 Nutrition Field Study. (1) Field study to take students as a group outside of the Macomb area to bridge their didactic program to a range of observations included in dietetic practice. Prerequisite: junior standing or permission of instructor. There will be a $50 fee for this class.

308 Nutrition for the Older Adult. (3) Evaluate the nutrition needs and problems of older adults, and examine the foodservice and nutrition components in programs designed for older adults. Prerequisite: NUTR 109.

379 Nutrition Travel Studies. (3) Studies of international and domestic properties, facilities, and agencies related to the nutrition industry. Prerequisite or corequisite: NUTR 109.

404 Nutrition Assessment. (3) Methods of screening and assessment of nutritional status including clinical, biochemical, and anthropometric measurements. Prerequisite: NUTR 209.

405 Nutrition Science II. (3) Biochemical and physiological basis of nutrients in metabolism and their interrelations. Research methodology used in nutrition. Prerequisite: NUTR 306.

407 Dietetics Communications and Education. (3) Dietetics communication and education theories and applications. Counseling theories and methods of changing food behavior. Prerequisite: Permission of department.
408 Community Nutrition. (3) Community nutrition programs in the United States. Development and evaluation of community nutrition programs. Writing Instruction in the Disciplines (WID) course. Prerequisites: ENG 180 and 280. Activities outside of class may be required.

409 Dietetic Practicum. (1) Practicum provides students with the opportunity to experience various aspects of dietetics including clinical, foodservice management, and community nutrition in a practical setting. Prerequisites: NUTR 307 and junior standing, or permission of the instructor.

410 Medical Nutrition Therapy II. (3) A study of the physiological and biochemical basis for using therapeutic diets for GI disorders, pulmonary diseases, and cancer among others. Prerequisites: NUTR 404.

438 Dietetic Pre-Internship. (1) Researching accredited dietetic internships. Completion of DICAS application and other professional documents. Prerequisite: permission of instructor.

440 Nutrition and Foodservice Management Internship. (9) Supervised field experience for application of theory and skills in an agency or property approved by the department. Prerequisites: senior standing, HM 458; GPA of 2.5 in four of the following courses: HM 353, HM 354, HM 451, NUTR 209, NUTR 408; site approved by department; approval of internship coordinator or department chair. Graded S/U only.

450 Professional Workshops in Nutrition. (1–3, repeatable with no limit) These courses are intended for majors in Nutrition and Foodservice Management, minors in Nutrition, and others interested in the field. They are offered in the topic areas of Healthy Cooking (1 s.h.), Sports Nutrition (2 s.h.), and Weight Management (1 s.h.). Prerequisite: NUTR 109 or permission of instructor.

PHYSICAL EDUCATION TEACHER EDUCATION (PETE)

115 (Formerly KIN 115) Social Dance Forms. (1) Basic fundamentals of ballroom movement. Beginning levels in Fox Trot, Lindy, Waltz, Polka, and country western dances.

124 (Formerly KIN 124) Educational Gymnastics. (1) Performance and analysis of educational gymnastics skills appropriate for children. Prerequisite: Physical Education Teacher Education major.

135 (Formerly KIN 135) Lifelong Leisure Activities. (2) Surveys contemporary noncompetitive activities suitable for participation throughout the lifetime. Examples include hiking, walking, rope challenge course, and adventure activities. Prerequisite: Physical Education Teacher Education major.

160 (Formerly KIN 160) Introduction to Physical Education. (2) Introductory course in Physical Education that presents educational and professional responsibilities and foundations of Physical Education. Designed to help students considering a career in Physical Education to formalize their decision to study Physical Education. Requires 10-hour field experience.

226 (Formerly KIN 226) Net/Wall Games. (2) Content knowledge and skill development in movement concepts and tactics associated with games where a ball is sent to a wall or over a net (e.g., tennis, badminton, volleyball). Development of resource notebook required. Prerequisite: Physical Education Teacher Education major.

250 (Formerly KIN 250) Instructional Foundations in Physical Education. (2) Theoretical and philosophical foundations of instruction and learning in Physical Education with opportunities to apply these essential concepts. Grade of C- or better required. Prerequisites: KIN 270; PETE 160.

251 (Formerly KIN 251) Invasion Games. (2) Content knowledge and skill development in movement concepts and tactics associated with invasion games (e.g., basketball, soccer, flag football, floor hockey). Development of resource notebook required. Prerequisite: Physical Education Teacher Education major.

252 (Formerly KIN 252) Contemporary Physical Activities. (1) Content knowledge and skill in movement concepts associated with contemporary physical activities (e.g., yoga, Pilates, tai chi). Development of resource notebook required. Prerequisite: Physical Education Teacher Education major.

253 (Formerly KIN 253) Target/Field Games. (2) Content knowledge and skill development in movement concepts and tactics in games where balls are pitched, hit, and fielded (baseball, softball) or where the objective is to place an object into a target (bowling, golf). Development of resource notebook required. Prerequisite: Physical Education Teacher Education major.

255 (Formerly KIN 255) Elementary Movement Fundamentals. (2) Development of knowledge and skill in fundamental movement skills, movement concepts, and basic elements of dance. Designed to provide a content base for elementary school Physical Education programs. Prerequisite: PETE 160.

265 (Formerly KIN 265) Skill Analysis and Assessment in Physical Education. (2) Techniques in analyzing motor skills and selecting and designing assessments of student learning in physical education. Emphasis on performance-based assessment. Prerequisite: PETE 160.

325 (Formerly KIN 325) Principles of Health-Related Fitness for the Physical Educator. (3) Principles of health-related fitness and policies of wellness in school-based Physical Education programs. Focusing on application, development, assessment, and teaching of cardiovascular and strength training principles. Prerequisite: Physical Education Teacher Education major or Coaching minor. 2 hrs. lect.; 2 hrs. lab.

360 (Formerly KIN 360) Methods of Elementary Physical Education. (2) Introduction to teaching Physical Education in K–5. Designed especially for the elementary classroom teacher candidate. May include some field experiences and outside teaching assignments. Not open to Kinesiology majors.

365 (Formerly KIN 365) Physical Education for the Elementary Grades. (3) Planning a curriculum of educational games, gymnastics, and dance based on a movement analysis and exploratory approach. Content centers on curriculum and teaching methodologies for grades K–5. Grade of C- or better required. Prerequisites: KIN 270; PETE 124, 160, 250, 255, 265; fully accepted in the Teacher Education Program (TEP). 2 hrs. lect.; 2 hrs. lab.

393 (Formerly KIN 392) Physical Activity for Learners with Exceptionalities. (3) Characteristics of individuals with disabilities across the lifespan. Emphasis on modifications and instructional strategies for physical activity in the physical education, recreation, sports, and fitness settings. Includes clinical experience. Grade of C- or better required for Teacher Education majors. Prerequisite: KIN 290 or RPTA 251 or permission of instructor. 2 hrs. lect.; 2 hrs. lab.

395 (Formerly KIN 395) Assessment in Adapted Physical Education. (2) Content centered on purposes, methods, appropriate tools, and processes of assessment (referral, screening, assessment, program implementation, and evaluation and selection) for individuals with disabilities. The focus of the assessment will be in the areas of motor skills and physical fitness. Prerequisites: PETE 265 and 393.
**461 (Formerly KIN 461) Field Experiences.** (1) 30-hour observation and teaching experience in area K–12 Physical Education programs with on-campus seminars sessions. *Grade of C- or better required. Prerequisite or Corequisite: EDUC 439 in the Department of Kinesiology and PETE 477; fully accepted in the Teacher Education Program (TEP).*

**477 (Formerly KIN 477) Physical Education Curriculum.** (3) Planning, sequencing, implementing, and evaluating developmentally appropriate and standards driven Physical Education curricula in K–12 Physical Education programs. *Writing Instruction in the Disciplines (WID) course. Prerequisites: acceptance into the Teacher Education Program (TEP); ENG 280. Corequisite: PETE 461.*
Program Offerings and Locations:

- Bachelor of Science in Emergency Management: Macomb
- Bachelor of Science in Fire Protection Services: Macomb, Online (Fire Administration option)
- Bachelor of Science in Law Enforcement and Justice Administration: Macomb, Quad Cities, Online
- Minor in Corrections: Macomb, Online
- Minor in Criminalistics: Macomb
- Minor in Emergency Management: Macomb
- Minor in Emergency Management—Operational: Macomb
- Minor in Emergency Management—Tactical: Macomb
- Minor in Fire Administration: Macomb, Online
- Minor in Fire Science: Macomb, Online
- Minor in Homeland Security: Macomb, Online
- Minor in Law Enforcement and Justice Administration: Macomb, Quad Cities, Online
- Minor in Legal Studies: Macomb, Quad Cities
- Minor in Security Administration: Macomb, Quad Cities, Online

For student learning outcomes, please see wiu.edu/provost/learningoutcomes.

Faculty: Alexander, Bailey, Bitner, Butts, Daugherty, Ekici, Enzminger, Johnson, Kelly, Lough, McBride, McCrary, Meloni, Mhlanga, Myers, Schafer, Schwartz, Schweitzer, Sergevnin, Swanson, Urby, Walton, Young.

Adjunct Faculty: Barker, Bytner, Cisna, Crouch, Greene, Henning, Nichols.

Academic Advisors: Dorsett, Eskridge, Moreno, Wilson

The Law Enforcement and Justice Administration degree program is designed to provide professional knowledge, understanding, and skills for criminal justice, public safety, emergency management, loss prevention, and fire personnel and, at the same time, develop an educational base for further development into staff and administrative positions in criminal justice, public safety, emergency management, and private security agencies. The program allows the student ample flexibility for liberal and professional education to meet the anticipated needs of the criminal justice and fire networks. Most majors in the program participate in an internship for one academic semester to gain firsthand acquaintance with criminal justice agencies or organizations at the federal, state, county, or local level. Some work with agencies and entities at the international level. Graduates find employment in city, county, state, and federal agencies, in private security, in fire service, in adult and juvenile court services, and in legal and legislative capacities.

The Emergency Management degree program will prepare students to become future leaders who will create and administer emergency plans, coordinate disaster response, and develop and utilize communication networks for addressing natural catastrophes (tornadoes, floods, earthquakes, and hurricanes), technological disasters (hazardous materials spills and nuclear power plant emergencies), and weapons of mass destruction incidents.

GradTrac is available to Law Enforcement and Justice Administration, Emergency Management, and Fire Protection Services majors. See page 79 for information about GradTrac.

Honors Curriculum—Academically qualified students in this School are encouraged to complete an honors curriculum in University Honors, Honors in the Major, or General Honors. All Honors students must complete the one-hour honors colloquium (G H 299).
General Honors includes General Honors coursework. Honors in the Major includes honors work in the major. University Honors combines Honors in the Major and General Honors. For more information about honors curricula, see page 100 or visit the Centennial Honors College website at wiu.edu/Honors.

Integrated Baccalaureate and Master’s Degree Program—Two integrated baccalaureate and master’s degree programs are available for the Bachelor of Science in Law Enforcement and Justice Administration: Master of Arts in Public Safety Administration and Master of Business Administration. An integrated degree program provides the opportunity for outstanding undergraduates to earn both degrees in five years. Please refer to the Graduate Studies catalog for details about the integrated program.

Selection/Retention Policy

1. All students are required to take the following LEJA core courses, or their equivalents: LEJA 101, 201, 212, 255, 303, 306, 312, 345, and 357. Students must complete each course with a grade of C or better.

2. All students are required to take the following LEJA core courses, or their equivalents, before being eligible for an LEJA internship (must have earned 60 hours): LEJA 101, 201, 212, and 255.

3. LEJA majors must establish and maintain a 2.25 cumulative GPA and 2.50 GPA in the LEJA major to apply for and be assigned an internship.

4. Students having double majors of LEJA and another major are held to the same standards in LEJA as other LEJA majors.

Degree Programs

Bachelor of Science—Law Enforcement and Justice Administration

All students seeking the Bachelor of Science in Law Enforcement and Justice Administration must complete I, II, III, and IV below, and the foreign language/global issues requirement for the major*. The minimum semester hour requirement for the baccalaureate degree is 120 s.h. LEJA majors must complete at least 30 s.h. in LEJA courses at WIU (including internship); at least 9 s.h. must be at the 300/400 level (no more than 3 s.h. LEJA 404).

I. University General Education Curriculum (p. 70) .......................................................... 43 s.h.
   Students must take one of the following mathematics courses before they are allowed to take LEJA 303: any WIU or IAI General Education mathematics courses, or permission of the instructor.

II. Core Courses .................................................................................................................. 39 s.h.
    LEJA 101, 201, 212, 255, 303, 306, 312, 345, 357, 490, 491, 497

III. Directed Electives ........................................................................................................ 3 s.h.
    Any one of the following: LEJA 440†, 441†, 442†, 443†, 444†

IV. Other Requirements
   A. Any approved minor ..................................................................................................... 16–24 s.h.
   B. Electives (number of hours depends on choice of minor) ........................................... 11–19 s.h.

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) any major’s discipline-specific global issues course; or 4) an approved Study Abroad program.

† LEJA 440 or 441 or 442 or 443 or 444 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.
Bachelor of Science—Emergency Management

All students seeking the Bachelor of Science in Emergency Management must complete I, II, III, IV, and V below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h. A grade of C (2.0) or better is required in all Core Courses, Directed Electives, and their required prerequisites to complete the Emergency Management major. Students must have an overall GPA of 2.00 and major GPA of 2.50 to enroll in EM 490, a required course for the major. Current WIU students must be in good standing (2.0 GPA or higher) to declare a major in Emergency Management.

I. University General Education Curriculum (p. 70) .......................................................... 43 s.h.
II. Core Courses .................................................................................................................. 43 s.h.
    EM 276, 304, 305†, 323, 324, 401, 460, 465, 480, 490, 491; FS 303; GIS 202
III. Any Approved Minor ....................................................................................................... 16–21 s.h.
IV. Open Electives ................................................................................................................ 13–18 s.h.
# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; or 3) an approved Study Abroad program.
* May count toward completion of the University General Education requirement.
† EM 305 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.

Bachelor of Science—Fire Protection Services

All students seeking the Bachelor of Science in Fire Protection Services must complete I, II, and either III.A or III.B below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

I. University General Education Curriculum (p. 70) .......................................................... 43 s.h.
II. Core Courses .................................................................................................................. 18 s.h.
    FS 210, 211, 212, 303, 345, 485†, 499
III. Options of Study (select A or B) ..................................................................................... 59 s.h.
A. Fire Administration (Comprehensive)
   1. Special Courses ............................................................................................................. 30 s.h.
      EM 477, 478; FS 300, 481, 482, 483, 484, 488;
      SOC 487, 488
   2. Directed Electives ......................................................................................................... 6 s.h.
      Select 6 s.h. from the following list of courses:
      EM 461; FS 443, 444, 486; HRM 353, 443; HS 400; LEJA 231;
      POLS 300, 302
   3. Open Electives ............................................................................................................. 23 s.h.
B. Fire Science (Comprehensive)
   1. Special Courses ............................................................................................................. 27 s.h.
      FS 301, 302, 444, 486, 487, 490; FS 491 or 492
   2. Directed Electives ........................................................................................................... 8 s.h.
      Select 8 s.h. from the following courses:
      EM 251, 252; FS 101, 102, 103; KIN 208, 308, 346, 408;
      LEJA 231
   3. Open Electives ............................................................................................................. 24 s.h.
# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) any major’s discipline-specific global issues course; or 4) an approved Study Abroad program.
† FS 485 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.
Minors

Minor in Corrections ................................................................. 24 s.h.
1. LEJA 101, 201, 202, 313, 442 ................................................. 15 s.h.
2. Choose three courses from the following: AAS 251; ECON 350; LEJA 444; PSY 250, 251, 334, 424; SOC 300, 424, 435, 455, 480, 485; SW 332, 334 ........................................ 9 s.h.

Minor in Criminalistics ............................................................ 18 s.h.
Plan A—Minor in Criminalistics for students whose major is Law Enforcement and Justice Administration
1. LEJA 212, 355, 412, 455 .................................................. 12 s.h.
2. Choose 6 s.h. from the following courses: ................................. 6 s.h.
   ANTH 405; ARTS 140, 246; ATM 270; CHEM 101, 440;
   COMM 305, 341, 344, 377; CS 305, 395, 455; ENG 380; EOS 311;
   FS 486; GIS 403; IDT 406, 433
Plan B—Minor in Criminalistics for students whose major is other than Law Enforcement and Justice Administration
1. LEJA 212, 255, 355, 455 .................................................. 12 s.h.
2. Choose 6 s.h. from the following courses: ................................. 6 s.h.
   ANTH 405; ARTS 140, 246; ATM 270; CHEM 101, 440;
   COMM 247, 305, 341, 344, 377; CS 305, 395, 455; ENG 380;
   EOS 311; FS 486; GIS 403; IDT 406, 433

Minor in Emergency Management ............................................. 18 s.h.
1. Required Courses: EM 276, 304, 323, 401 ................................ 12 s.h.
   GEOG 430; GIS 202; HS 400; POLS 300 .................................... 6 s.h.

Minor in Emergency Management—Operational .......................... 17–23 s.h.
Plan A—Minor in Emergency Management—Operational for students whose major is Emergency Management
   Choose 6 of the following courses: ........................................... 17–21 s.h.
   EM 251, 252, 441, 461; GEOL 310; GIS 201; LEJA 208, 309;
   METR 220
Plan B—Minor in Emergency Management—Operational for students whose major is other than Emergency Management
1. Choose 3 of the following courses: ......................................... 9–10 s.h.
   EM 276, 304, 323; GIS 202
2. Choose 3 of the following courses: ......................................... 8–13 s.h.
   EM 251, 252, 276, 304, 323, 441, 461; GEOL 310; GIS 201, 202;
   LEJA 208, 309; METR 220

Minor in Emergency Management—Tactical ............................... 18–23 s.h.
Plan A—Minor in Emergency Management—Tactical for students whose major is Emergency Management
   Choose 6 of the following courses: ........................................... 18–21 s.h.
   EM 251, 252, 441; FS 211, 303; LEJA 208, 230, 231, 309, 414, 416
Plan B—Minor in Emergency Management—Tactical for students whose major is other than Emergency Management
1. Choose 3 of the following courses: ......................................... 9–10 s.h.
   EM 276, 304, 323; GIS 202
2. Choose 3 of the following courses: ......................................... 9–13 s.h.
   EM 251, 252, 276, 304, 323, 441; FS 211, 303; GIS 202;
   LEJA 208, 230, 231, 309, 414, 416
Minor in Fire Administration .............................................. 18 s.h.
1. FS 481, 482, 483, 485 .............................................. 12 s.h.
2. Any two of the following: FS 300, 345, 443, 444, 484, 488;
   HRM 353, 443; POLS 300, 302; SOC 487, 488 ................. 6 s.h.

Minor in Fire Science ....................................................... 18 s.h.
1. FS 210, 212, 301, 444 .............................................. 12 s.h.
2. Choose at least 6 s.h. from the following courses: EM 251, 252,
   323, 461, 478; FS 302, 345, 443, 484, 486, 487, 488;
   LEJA 230, 231; SOC 487, 488 ...................................... 6 s.h.

Minor in Homeland Security ............................................. 18 s.h.
1. LEJA 230, 231, 414, 416 .......................................... 12 s.h.
2. Choose two courses from the following: BC&J 400; CS 455;
   DS 435; ECON 310; EM 461; EOS 377; LEJA 332, 333; POLS 353;
   REL 456; SOC 462 ...................................................... 6 s.h.
Sophomore standing required to declare a minor in Homeland Security.

Minor in Law Enforcement and Justice Administration .......... 18 s.h.
1. LEJA 101, 212, 306 ................................................ 9 s.h.
2. Any one of the following: LEJA 440, 441, 442, 443, 444 ...... 3 s.h.
3. LEJA Electives .......................................................... 6 s.h.
   *Note: At least 6 s.h. of LEJA coursework must be taken from WIU, excluding
   LEJA 404.

Minor in Legal Studies .................................................... 18 s.h.
1. LEJA 212, 312, 412, 441 .......................................... 12 s.h.
2. Choose any two of the following: B L 230, 431, 432;
   LEJA 413, 414, 415; FS 485 ......................................... 6 s.h.
   *Note: The Legal Studies minor is not open to Law Enforcement and Justice
   Administration majors.

Minor in Security Administration ..................................... 18 s.h.
Plan A—Minor in Security Administration for students whose major is
Law Enforcement and Justice Administration
1. Core Requirements: LEJA 208, 309, 413, 443 .................. 12 s.h.
2. Electives ................................................................. 6 s.h.
   Choose 6 s.h. from the following courses: ACCT 201, 202;
   CS 305, 455; FIN 351, 452; EOS 270, 311, 377; ET 448; HM 453;
   HRM 353, 443; FS 210; LEJA 430; MGT 349; MKTG 327, 343
Plan B—Minor in Security Administration for students whose major is
other than Law Enforcement and Justice Administration
Core Requirements: LEJA 101, 208, 255, 309;
413 (note prerequisites), 443 .............................................. 18 s.h.

Course Descriptions

LAW ENFORCEMENT AND JUSTICE ADMINISTRATION (LEJA)

101 Survey of Criminal Justice. (3) Administration of justice in the United States with emphasis on the total system of police, courts, corrections; loss prevention, and principles of law. LEJA majors must earn a grade of C or better in this course. IAI: CRJ 901.

200 Introduction to Corrections. (3) Study of the history, theory, and practice of probation, parole, and correctional institutions, exploration of punishment rehabilitation, and correctional policies. Prerequisite: LEJA 101 with a grade of C or better.

205 Traffic Administration. (3) Basic principles of traffic control, education, engineering, and enforcement; practical applications to traffic control and administration; current research techniques. Prerequisite: LEJA 101 with a grade of C or better.

255

prevention, treatment, and control. LEJA majors must earn a grade of C or better in this course. Prerequisite: LEJA 101 with a grade of C or better. IAI: CRJ 901.

202 Introduction to Corrections. (3) Study of the history, theory, and practice of probation, parole, and correctional institutions, exploration of punishment rehabilitation, and correctional policies. Prerequisite: LEJA 101 with a grade of C or better; permission of the instructor.

205 Traffic Administration. (3) Basic principles of traffic control, education, engineering, and enforcement; practical applications to traffic control and administration; current research techniques. Prerequisite: LEJA 101 with a grade of C or better.
208 Security Methods and Technologies. (3) Establishes a critical understanding of security, life-safety devices, equipment, and technologies integrated into a total protection approach for reducing risks and preventing organizational losses. Discussion centers on GPR strategies, risk management, and various physical controls.

212 Criminal Law. (3) The study of legal terminology and definitions of crimes, criminal procedures, criminal responsibility, analysis of crimes and their proof in the context of practical fact situations. LEJA majors must earn a grade of C or better in this course. Prerequisite: LEJA 101 with a grade of C or better.

230 Principles of Terrorism. (3) Overview of terrorism, including definition, root causes, ideologies, historical and current perspectives, modus operandi and targets, radicalization and recruitment, terrorist group structures, terrorists in the economic system, domestic and international terrorist groups, state sponsors, and counterterrorism.
private employers and executive branch employees while engaging in enforcement, protection, and investigatory activities, including tort immunity, policy, and oversight. Prerequisites: LEJA 312 with a grade of C or better, and junior standing; or permission of the instructor.

414 Local Aspects of Homeland Security and Terrorism. (3) This course covers the legal aspects of terrorism and homeland security including domestic, foreign, and international legislation and cases. Other civil and criminal legal matters and public policy relating to terrorism/homeland security will be addressed. Prerequisites: LEJA 231 and junior standing; or permission of the instructor.

415 Privacy, Technology, and Law. (3) This course examines the controversial developments in technology, legislative enactments, and governmental policy that challenge and shape traditional expectations of privacy. Surveillance strategies impacting public safety, health, law enforcement, consumer behavior, immigration, property rights, and family matters are discussed. Prerequisite: junior standing or permission of the instructor.

416 Terrorism and Law Enforcement. (3) Discusses law enforcement risks and responses in relation to terrorist activities. Counterterrorism policing policies and U.S. law enforcement experiences with terrorism are addressed. Law enforcement experiences overseas are shared. Case studies in this realm are analyzed. Prerequisites: LEJA 230 and junior standing; or permission of the instructor.

417 International Studies in Criminal Justice. (3-6, repeatable to 9 with different locations) Integrates the study of international criminal justice with student internships. Travel to countries selected for the course. Focuses on preparing students for global employment in the 21st Century by providing first-hand knowledge of different cultures. Prerequisites: junior standing and permission of the instructor and director.

430 White-Collar Crime. (3) Analysis of types of white-collar crime (occupational, economic, political, and corporate). Emphasis also on financial investigations, property rights, and family matters are discussed. Prerequisite: junior standing or permission of the instructor.

431 Organized Crime. (3) Historical and contemporary review of organized criminal groups with emphasis on structure and range of activities. Analysis of laws and successful investigations and prosecutions of organized crime figures and families. Prerequisite: junior standing or permission of the instructor.

440 Seminar on Current Issues in Policing. (3) Discussion of emerging issues in American policing. Emphasizing the pillars of policing: building trust and legitimacy through transparency, policy and oversight, community policing, cultural competency, de-escalation and use of force policies, and best practices for recruitment, training, and diversity. Writing Instruction in the Disciplines (WID) course. Prerequisites: ENG 280 and junior standing; or permission of instructor.

441 Seminar on Current Issues in the Court System. (3) Examination of the structure and functions of courts, including informal and formal aspects of judicial process. Emphasis on organizational as well as legal roles. Writing Instruction in the Disciplines (WID) course. Prerequisites: LEJA 201 with a grade of C or better, LEJA 212 with a grade of C or better, ENG 280, and junior standing; or permission of the instructor.

442 Seminar on Current Issues in Corrections. (3) Ideological and pragmatic justification for punishment and imprisonment; sentencing trends and alternatives to incarceration; organization and management of correctional institutions; inmate life, prisonization; treatment and custody; discharge and parole. Writing Instruction in the Disciplines (WID) course. Prerequisites: LEJA 201 with a grade of C or better, ENG 280, and junior standing; or permission of the instructor.

443 Seminar on Current Issues in Security. (3) Discussion of cutting-edge protection requirements, trends, and movements in the public and private sectors. Emphasis on results-oriented security management practices using comprehensive protection plans designed to reduce organizational risks and vulnerabilities. Writing Instruction in the Disciplines (WID) course. Prerequisites: LEJA 208 and 309 and junior standing; or permission of the instructor.

444 Seminar on Current Issues in Probation and Parole. (3) The process of probation and parole in terms of its historical development, philosophy, and standards. Concepts and problems in administration, organization, investigation, and supervision. Selection and discharge process will be examined. Writing Instruction in the Disciplines (WID) course. Prerequisites: LEJA 201 with a grade of C or better, ENG 280, and junior standing; or permission of the instructor.

455 Advanced Criminal Investigation. (3) Course explores specialized information and techniques in dealing with victims with trauma, various detection and deception methods as they relate to interrogation, profiling, and crime classification. Prerequisites: LEJA 355 and junior standing; or permission of the instructor.

490 Internship in Law Enforcement. (9–12) Off-campus practical work experience in an appropriate field. Seminars and written reports required. Prerequisites: Approval of the internship coordinator or chair and 2.25 GPA overall and a 2.50 GPA in LEJA major at time of application (semester prior to internship), and during internship. Internship application must be made during the first month of the semester prior to actual internship (i.e., Spring internship—application made in September; Summer/Fall internship—application made in January). Internship application is made by attending a mandatory internship meeting the semester prior to the internship. Corequisite: LEJA 491. Graded S/U only.

491 Internship Summary. (3) Projects designed to bring together all experiences acquired during internship for discussion and analysis. A complete overview of the criminal justice system as observed by interns. Corequisite: LEJA 490.

495 Seminar in Criminal Justice. (1–3, repeatable to 6) Study of specific criminal justice topics not covered in-depth within the current Law Enforcement and Justice Administration. Topic(s) to be announced prior to enrollment. Prerequisite: open only to junior and senior students; permission of the instructor and director prior to enrollment.

497 Senior Comprehensive Exam. (0) A comprehensive exam administered to all seniors majoring in Law Enforcement and Justice Administration. Prerequisite: senior standing. Graded S/U only.

499 Honors Internship Project. (3) The preparation of a major written work involving analysis of appropriate scholarly literature applied within the context of the internship experience. Corequisite: LEJA 490.

EMERGENCY MANAGEMENT (EM)

251 (Formerly EM 351) Emergency Medical Technician's Training I.A. (5) Includes experiences designed to prepare persons who are responsible for giving emergency care to the sick and injured.

252 (Formerly EM 352) Emergency Medical Technician's Training I.B. (4) May include sessions with paramedics, directors of ambulance services, respiratory therapists, and physicians; ten hours of
hospital observation in an approved emergency room; and extrication exercise. Satisfactory completion of EM 251 and 252 and recommendation of instructor results in student eligibility to take EMT state examination. Prerequisite: EM 251 or proof of current CPR certification, or permission of instructor.

270 Disaster Management and Media. (3) The genre of contemporary disaster media, including disaster coverage, will be presented as case studies followed by in-class discussions which will allow for a critical analysis of the relationships between filmed images and disaster management.

276 Hazards and Disasters in Emergency Management. (3) Overview of the dynamic relationships between natural and technological hazards and disasters and associated requirements for mitigation, preparation, response, and recovery.

304 Principles of Emergency Management. (3) Presents the theories, principles, and approaches to emergency management. Philosophy of comprehensive emergency management will be discussed including mitigation; preparedness, response, and recovery. Role, duties, and responsibilities of the emergency manager will be discussed. Prerequisite: EM 276.

305 Dimensions of Disaster. (3) Overview of empirical vs. theoretical approaches to disasters; human behavior in disaster, disaster myths; group disaster behavior; community social systems and disaster; cultures, demographics and disaster behavior distinctions, and contemporary disaster research. Writing Instruction in the Disciplines (WID) course. Prerequisites: EM 304 and ENG 280, or permission of instructor.

306 Individual and Community Disaster Education. (3) Provides an extensive study of the design, implementation, and evaluation of public disaster preparedness education programs. Model preparedness education curricula and educational methods and techniques will be examined. Prerequisites: EM 304 and 305, or permission of instructor.

324 Legal Aspects of Emergency Management. (3) Introduction to federal, state, and local laws, regulations, and policies governing emergency management; history of statute development; significant legislation; federal, state, and local authorities and responsibilities. Prerequisite: EM 304.

401 Hazard Mitigation and Disaster Recovery. (3) Concepts, theories, principles, programs, and requirements of pre- and post-disaster hazard mitigation; governmental planning and practice; hazard and risk assessment; building code development. Overview of disaster recovery programs and requirements; public and individual assistance; risk management mitigation. Prerequisite: EM 304.

425 (Cross-listed with HS 425) Public Health Emergency Preparedness. (3) This course introduces students to how public health agencies prepare for and respond to public health emergencies. Topics include biosurveillance, crisis and emergency risk communication, and the Strategic National Stockpile. Not open to students with credit in HS 425. Prerequisites: Junior standing; EM 304 or HS 211; or permission of instructor.

441 Disaster Management. (3) This course addresses the response, mitigation, and recovery phases of the Disaster Life Cycle, to help rebuild communities' and individuals' resilience and quality of life after a disaster. Prerequisites: EM 304 or permission of instructor/chairperson.

460 Weapons of Mass Destruction in Public Health. (3) Provides an overview of weapons of mass destruction from the public health and emergency management perspectives. Examination of various forms of weapons of mass destruction and discussion of primary, secondary, and tertiary prevention practices facing future professionals is included. Prerequisites: CHEM 101 and EM 304, or permission of instructor.

461 Business and Industry Emergency Management. (3) Provides an analysis of governmental emergency management, legal requirements, employee and business disaster awareness and preparedness, public policy considerations, and coordination of emergency management programs. Prerequisite: EM 304 or permission of instructor.

465 Evacuation Planning and Response. (3) Focuses on emergency evacuation issues as a result of natural disasters and human intentional injuries. Students learn to develop proper evacuation techniques for a wide range of areas, such as public schools, colleges and universities, private buildings, and government institutions. Prerequisite: junior standing or permission of Instructor or Director.

470 Comparative Emergency Management Systems. (3) Examines concepts, theories, principles, and requirements of emergency management systems: local, state, regional, federal, and global. Case studies of best practice exemplars will be explored. Prerequisite: EM 304 or permission of instructor.

472 Disaster and Fire Defense Planning. (3) Covers disaster and fire defense planning, and the interrelationship between those two areas. The concepts and principles of community risk assessment and regional and cooperative procedures and plans, and the relationship of structural, climatic, and topographical variables to fire and structural fires, and natural disasters will be discussed. Prerequisites: permission of instructor/chairperson or acceptance into National Fire Academy Certificate Program.

478 Managerial Issues in Hazardous Materials. (3) The role of the fire service in planning for, responding to, and managing hazardous material incidents. Prerequisite: permission of instructor/chairperson or acceptance into National Fire Academy Certificate Program.

480 Senior Comprehensive Exam. (0) A comprehensive exam administered to all seniors majoring in Emergency Management. Prerequisites: senior standing. Graded S/U only.

490 Emergency Management Internship. (9) Provides field work experience and knowledge in appropriate emergency management programs, under supervision of a qualified preceptor. Prerequisites: Approval of the internship coordinator or Director and a 2.25 GPA overall and a 2.50 GPA in the EM major at the time of application (semester prior to internship), and during internship. Internship application must be made during the fall or spring semester prior to the actual internship (i.e., a summer internship application made in September, summer/fall internship application made in January). Internship application will be considered for attending a mandatory internship meeting the semester prior to the internship Corequisite: EM 491. Graded S/U only.

491 Emergency Management Internship Summary. (3) The course consists of written exercises and projects designed to bring together all experiences acquired during the internship and academic program including events that played an important role in the academic or internship experience as it relates to student career pursuits. Corequisite: EM 490.

499 Independent Study in Emergency Management. (1-4, repeatable to 4) Independent research study of an approved topic in emergency management. Prerequisite: senior with Emergency Management major or minor, and permission of instructor.
FIRE SERVICE (FS)

101 Basic Elements of Firefighting I. (3) An introduction to essential concepts and practices in fire suppression. This course is part of the Illinois Basic Firefighter Certification series. Topics include organization structures, safety, fire chemistry, building construction, rope practices, and fire extinguishers.

102 Basic Elements of Firefighting II. (3) An introduction to essential concepts and practices in fire suppression. This course is part of the Illinois Basic Firefighter Certification series. Topics include ladder practices, hose operations, fire ground ventilation, and fire-related hydraulics.

103 Basic Elements of Firefighting III. (3) An introduction to essential concepts and practices in fire suppression. This course is part of the Illinois Basic Firefighter Certification series. Topics include fire ground tactics, rescue operations, fire cause determination, salvage, and post fire overhaul practices.

210 Fire Protection. (3) Organization and function of fire prevention; inspections and hazard analysis; economics of and survey of fire protection equipment. Examination of direct and indirect personnel functions, responsibilities, and coordination with other agencies.

211 Fire Suppression Tactics. (3) This course is an introduction to basic concepts in fire suppression operations. Topics include an overview of the incident command system, building basic fire strategy, fire ground tactics, and situational response. Prerequisite: FS 210 or permission of instructor/ chairperson.

212 Introduction to Fire Prevention. (3) This course serves as a general introduction to strategies in fire prevention. Concepts reviewed include building inspection, enforcement, construction plan review, zoning practices and public education programs. Prerequisite: FS 210 or permission of instructor/ chairperson.

300 Administration of Firefighter Safety Programs. (3) An exploration of the fire administrator's role in meeting governmental regulatory obligations, and industry standards related to firefighter safety, health, and well-being. Credit cannot be given for both FS 300 and 301. Prerequisite: FS 210 or permission of instructor.

301 Firefighter Safety and Survival. (3) Firefighter safety introduces essential principles and history related to the national firefighter life safety initiatives, focusing on the need for cultural and behavioral change throughout the emergency services. Credit cannot be given for both FS 300 and 301. Prerequisite: FS 210 or permission of instructor/ chairperson.

302 Fire Department Hazardous Materials Operations. (3) The Hazardous Materials Operations course provides instruction needed for firefighters to evaluate and mitigate risks associated with the release of hazardous materials. Students will explore risk assessment techniques, decontamination modalities, and physical qualities related to selected hazardous materials. Prerequisite: FS 210 or permission of instructor.

303 Leading Community Risk Reduction. (3) This course provides a theoretical framework for the understanding of the organizational, logistical, ethical, political, and legal components of fire service-based community risk reduction, and methodology for the development of a comprehensive community risk-reduction plan. Prerequisite: FS 210 and 212, or permission of instructor.

345 Ethics, Diversity, and Professionalism in the Fire and Emergency Services. (3) This course will familiarize students with concepts relating to diversity, professionalism, ethics, and morality within fire service delivery from both the individual and organizational perspective. Special attention is provided to ethical and moral dilemmas that are recurrent and problematic. Prerequisite: 12 hours in fire protection study or permission of instructor.

443 Fire Protection Structure and Systems Design. (3) The principles of protection of the structure from fire involvement. Topics include empirical tests, prediction procedures, detection and fire suppression systems, sprinkler design, and recent innovations. Not open to students with credit for ET 443. Prerequisite: FS 210, or permission of instructor/ chairperson, or acceptance into National Fire Academy Certificate program.

444 Fire Dynamics. (3) Fire dynamics is a study of fire propagation through a building and the interacting phases, e.g., variables in pre- and post-flashover fire development, as well as geometric, material, gaseous, fluid flow, and thermodynamic parameters. Not open to students with credit for ET 444. Prerequisite: FS 210, or permission of instructor/ chairperson, or acceptance into National Fire Academy Certificate program.

481 Fire and Emergency Administration. (3) Organization and management of fire services, including new technologies and changing organizational structures. Blending personnel and equipment. Municipal fire protection planning. Fire department functions. Manpower and training. Prerequisite: FS 210, or permission of instructor/ chairperson, or acceptance into National Fire Academy Certificate Program. Permission of instructor is required for all online sections of this course.

482 Analytic Approaches to Public Fire Protection. (3) The course is designed to show the application of the systems approach to problems in the fire protection services including fire suppression and prevention systems. Prerequisite: FS 210, or permission of instructor/ chairperson, or acceptance into National Fire Academy Certificate Program. Permission of instructor is required for all online sections of this course.

483 Personnel Management for the Fire and Emergency Services. (3) Examines personnel practices, personnel procedures, and legal standards. Investigates collective bargaining, binding arbitration, applicable legislative procedures, and administrative and supervisory procedures. Other topics: promotion and personnel development. Prerequisite: FS 210, or permission of instructor/ chairperson, or acceptance into National Fire Academy Certificate Program. Permission of instructor is required for all online sections of this course.

484 Fire Prevention Organization and Management. (3) Examines and evaluates the techniques, procedures, programs, and agencies involved with fire prevention. Consideration is given to related governmental inspection and education procedures. BGS online writing course. Prerequisite: FS 210, or permission of instructor/ chairperson, or acceptance into National Fire Academy Certificate Program. Permission of instructor is required for all online sections of this course.

485 Political and Legal Foundations. (3) The legal basis for the police power of government related to public safety. Legal limitations and responsibility. Liability of fire prevention organizations and personnel. Review of judicial decisions. Writing Instruction in the Disciplines (WID) course: BGS online writing course. Prerequisite: ENG 180 and 280; FS 210, or permission of instructor/ chairperson, or acceptance into National Fire Academy Certificate Program. Permission of instructor is required for all online sections of this course.

486 Fire Investigation and Analysis. (3) Examination of techniques for the collection and analysis of evidence relative to a fire's origin. Legislative, economic, psychological, and sociological variables of the incendiary fire. Prerequisite: FS 210, or permission of instructor/ chairperson, or acceptance into National Fire
Academy Certificate Program. Permission of instructor is required for all online sections of this course.

487 Fire Codes and Standards. (3) This course surveys fire codes and standards, explores their development process, impact on life safety, and the challenges present in their application. Prerequisite: FS 210 or 212, or permission of instructor.

488 (Cross-listed with PSY 488) Fire-Related Human Behavior. (3) Considers fire-related behavior in general including fire detection, suppression action, and evacuation behavior. Also considers fire-setting behavior, fire-prevention education, and eyewitness processes. Not open to students with credit in PSY 488. Prerequisite: FS 210, or permission of instructor/chairperson, or acceptance into the National Fire Academy Certificate program.

490 Fire Service Internship. (9) The fire internship provides practical experience through real world observation and interaction with practitioners in the work environment. The student observes and participates in the daily routines associated with the provision of public safety services. Prerequisites: Minimum 2.25 GPA overall and a 2.50 GPA in the core courses within the fire major; C grade or better in each of FS 210, 211, 212, 301, and 345; junior or senior standing. Corequisite: FS 491. Graded S/U only.

491 Fire Service Internship Paper Summary. (3) This course consists of a writing exercise whereby interns reflect on their thoughts and opinions regarding the internship experience, including events that played an important part in their academics or internship experience as it relates to their career pursuits. Corequisite: FS 490.

492 Honors Internship Project. (3) A preparation by an honors student of a significant written work involving analysis of appropriate scholarly literature applied within the context of the internship experience. Corequisite: FS 490.

499 Senior Comprehensive Exam. (0) A comprehensive exam administered to all seniors majoring in Fire Protection Services. Prerequisite: Senior standing. Graded S/U only.
Interim Chairperson: Dr. James A. Schmidt
Coordinator: Dr. Betsy C. Perabo
Office: Morgan Hall 232
Telephone: (309) 298-2214

Faculty: Baker-Sperry, Carr, Haynes, Perabo.

Academic Advisor, Macomb: Ellen Poulter

Academic Advisor, Quad Cities: Kenneth W. Wheeler II

The Bachelor of Liberal Arts and Sciences is a multidisciplinary degree that embodies the spirit of a liberal arts education, emphasizing comparative critical thinking, communication, and a broad range of methodologies and applied skills. As is true of many degree programs in the Liberal Arts and Sciences, students pursuing a Bachelor of Liberal Arts and Sciences are not specifically trained for a particular vocation or career path. Instead, graduates of the program bring the integration of multiple disciplinary perspectives, combined with critical thinking, problem-solving, and communication skills, to a variety of careers that value adaptability, flexibility, and innovation. Rather than training for a specific career, this degree offers a comprehensive and rigorous intellectual foundation for a lifetime of learning, preparing individuals to adapt to many different academic, personal, and professional paths.

In addition to the introductory and capstone courses, the degree consists of two possible emphases. The first emphasis, Paired Minors, requires students to complete two approved minors as their multidisciplinary major. The second emphasis, Peace Corps, allows students to choose from among approved courses with a focus on community development and international service. Both emphases offer students the opportunity to complete an internship as part of the major.

GradTrac is available to Liberal Arts and Science majors. See page 79 for information about GradTrac.

Integrated Baccalaureate and Master's Degree Program—An integrated baccalaureate and master's degree program is available for the Bachelor of Liberal Arts and Sciences: Master of Liberal Arts and Sciences. An integrated degree program provides the opportunity for outstanding undergraduates to earn both degrees in five years. Please refer to the Graduate Studies catalog for details about the integrated program.

Degree Program

Bachelor of Liberal Arts and Sciences

All students seeking the Bachelor of Liberal Arts and Sciences must complete I, II, III, IV, and V below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

I. University General Education and College of Arts and Sciences Bachelor of Liberal Arts and Sciences Requirements (p. 87) ............................................................. 57 s.h.

II. Core Courses .................................................................................................................. 6 s.h.
   LAS 195, 495†
III. Directed Electives ................................................................. at least 33 s.h.
(Select one of the following emphases; at least 18 s.h. must be at the 300 or 400 level; no more than two courses can count in both the major and General Education; no more than 6 s.h. of independent study, directed readings, or internship can count toward the major without LAS director approval.)

A. Paired Minors Emphasis......................................................... 33–48 s.h.
Choose any two minors from within the College of Arts and Sciences (which includes CAS-centered interdisciplinary minors listed below). No more than two courses or 6 s.h. may be shared across selected minors. One Writing Instruction in the Disciplines (WID) course (in addition to LAS 495) must be taken from either of the departments offering the selected minors, or ENG 380† or ENG 381‡.
Any two College of Arts and Sciences minors may be paired.
The current list of available minors includes:
1. Minors in the Humanities: Creative Writing; English; Film; French; History; Philosophy; Professional Writing; Religious Studies; Spanish
2. Minors in the Natural Sciences/Mathematics: Botany; Chemistry; Forensic Chemistry; Forensic Science; Geology; Mathematics; Microbiology; Neuroscience; Physics; Weather and Climate; Zoology
3. Minors in the Social Sciences: Anthropology; Economics; Forensic Psychology; Geography; Global Politics; Political Science; Psychology; Public Administration and Public Service; Sociology
4. Interdisciplinary Minors in CAS or housed primarily in CAS: African American Studies; Aging Studies; Environmental Studies; Geographic Information Systems; International Studies; Law and Society; Women’s Studies

B. Peace Corps Emphasis .............................................................. 33 s.h.
No more than 12 s.h. under the same prefix can count toward the major. This emphasis is for students interested in a focus on community development and international service, with the possibility of joining the Peace Corps after completing the WIU Peace Corps Prep program through the Illinois Institute for Rural Affairs.

Note: Completion of the emphasis alone does not constitute completion of the WIU Peace Corps Prep program. For more information on PC prep, please visit wiu.edu/peace_corps/pb_prep or contact pcprep@wiu.edu.

1. Select 9 s.h. from any of the following prefixes:
   AAS, AGE, ANTH, BIOL, BOT, CHEM, ECON, ENG, ENVR, F L, FR, GEOG, GEOL, GER, HIST, LAS, MATH, MICR, PHIL, PHYS, POLS, PSY, REL, SOC, SPAN, STAT, WS, ZOOL
2. Select 9 s.h. from one of the Peace Corps sectors listed below (for example, three courses from Community and Economic Development, or three courses from Environment, etc.):
   a. Community and Economic Development
      ECON 100, 232, 350, 352, 350†, 351, 420, 465, 470;
POLS 334; SOC 312, 345
   b. Environment
      ANTH 395, 415, 463; BIOL 350, 425, 426, 451, 456, 479;
      BOT 463; CHEM 342; ENVR 201, 401; GEOG 100, 110,
      121, 426, 430, 466; GEOL 113, 375, 380; METR 327, 337;
      MICR 400, 405, 434, 460, 463; POLS 393; WS 395;
      ZOOL 414
   c. Youth in Development
      ANTH 353; PSY 100, 250, 251, 353, 355, 422; REL 101;
      SOC 312
3. Select 9 s.h., based on cultural sensitivity and agility, from the following: AAS 100, 283, 349, 420; ANTH 110, 201, 315, 324, 353, 380; ENG 357, 492; FL 101; GEOG 110, 466; HIST 245, 307, 318, 341, 349; LAS 210; POLS 228, 267, 322, 329, 331, 334, 338, 350, 353, 400; PSY 353; REL 111, 303, 464, 492; SOC 285, 300, 360, 410, 420, 430, 440, 464; WS 190, 285, 303, 315, 318, 360, 410, 420, 430

4. Select one additional Writing Instruction in the Disciplines (WID) course from the following:
   ENG 380†, 381†; FR 326†; PHIL 312**†; PSY 323†; REL 312**†; SOC 323†; SPAN 326†; WS 455†
   Or other appropriate WID course in consultation with LAS chair.
   ** Requires corequisite

5. Complete LAS 496

IV. Minor ........................................................................................................................... 16–24 s.h.

V. Open Electives ........................................................................................................... 0–8 s.h.

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) any major’s discipline-specific global issues course; or 4) an approved Study Abroad program.

† LAS 495 and one other approved Writing Instruction in the Disciplines (WID) course will fulfill the WID graduation requirement.

Minors

**Minor in African American Studies** ................................................................. 18 s.h.
1. AAS 100 .............................................................................................................. 3 s.h.
2. Select one of the following: AAS 251, 281, or 282 .................................... 3 s.h.
3. AAS Electives .................................................................................................. 12 s.h.
   6 s.h. must be chosen from 300- and 400-level courses.

**Minor in Cannabis and Culture** ................................................................. 18 s.h.
See Interdisciplinary Minors (p. 235).

**Minor in Religious Studies** ................................................................. 18 s.h.
1. REL 110, 111 ................................................................................................... 6 s.h.
2. Complete any four Religious Studies courses (3 of which must be at the 300 or 400 level) ................................................................. 12 s.h.

**Minor in Women’s Studies** ................................................................. 18 s.h.
1. WS 190 ............................................................................................................ 3 s.h.
2. WS 355 ............................................................................................................ 3 s.h.
3. WS Electives .................................................................................................. 12 s.h.

Course Descriptions

**AFRICAN AMERICAN STUDIES (AAS)**

**100 Introduction to African American Studies. (3) (General Education/Multicultural Studies)** A survey of the history of Black people including the “Cradle of Civilization,” the ancient empires of West Africa, the slave trade, and the Caribbean. It also includes African and African American literature, art, and music.

**145 Famous People of African Descent. (3) (General Education/Multicultural Studies)** A study of the lives and works of famous people of African descent throughout the world with particular emphasis on African Americans.

**245 (Cross-listed with ENG 245) Survey of African American Literature. (3)** A literary and cultural introduction to the study of African American writers, organized chronologically, but with special emphasis on the twentieth century. Not open to students with credit in ENG 245.

**251 Social Problems in Black America. (3)** A sociological investigation of such problems as crime and delinquency, racism, mental illness, drug use, alcoholism, and poverty. Prerequisite: sophomore standing or consent of instructor.
255 Migration and Urbanization of African Americans. (3) An introduction to migration patterns of free African Americans from 1865 to the present, with special emphasis on "push and pull" factors, geographical location, residential and school segregation, and physical and social mobility.

260 African American Music Survey. (3) A survey of the styles and figureheads of the African American music legacy. A historical approach beginning with the Trans-Atlantic slave trade through African American musical history. Genres will range from slave work songs to contemporary music of Black America. Prerequisite: AAS 100 or permission of the instructor.

262 African Americans and Hip Hop as Cultural Phenomenon. (3) An examination of the distinct elements of the hip hop phenomenon and its cultural influence on a global society. Prerequisite: AAS 260 or consent of the instructor.

270 Blacks and the Law. (3) This course familiarizes students with primary source materials including, but not limited to, case law and biographies. The course critically examines the assumptions about the Black struggle for equality and the role of the law, demonstrating the gap between the promise and the practice of the U.S. Constitution.

281 Literature of the Black World. (3) (General Education/Humanities or Multicultural Studies) A comparative presentation of literary works by African, Caribbean, and African American writers.

282 African American Theatre. (3) (General Education/Fine Arts or Multicultural Studies) A survey of the African American contributions to the American stage from 1760 to the present, with an examination of representative works by various African American playwrights.

283 African American Folklore. (3) (General Education/Humanities or Multicultural Studies) A study of the relationship between African and Diaspora folktales, folk beliefs, and customs. Identification of parallel folktales, symbols, and social practices. An interdisciplinary approach to the study of this folklore.

290 Black Popular Culture. (3) The African roots of Black people and their contributions to American culture, emphasizing African American culture, artistic expression, identity, and contemporary Black popular culture.

302 Black Intellectual Traditions. (3) An examination of the dimensions of Black intellectual traditions and movements that have developed in the modern world. Prerequisite: AAS 100, or junior standing, or consent of instructor.

304 (Formerly AAS 404) African Americans in the Age of Obama. (3) An examination of the trajectory of President Barack Obama's life and his impact on the status of African Americans. Prerequisite: AAS 100 or consent of instructor.

310 (Cross-listed with WS 310) Black Women in the United States. (3) A sociological analysis of the various social roles of Black women, including those of gender, education, occupations, and marriage and family, with some attention given to contributions and achievements. Not open to students with credit in WS 310.

311 (Cross-listed with POLS 311) Race and Ethnicity in American Politics. (3) This course examines how racial and ethnic minority groups shape, and are shaped by, American politics and society. It focuses primarily on the politics of specific racial and ethnic minority groups in the United States. Not open to students with credit in POLS 311. Prerequisite: POLS 122 or permission of instructor.

312 Black Men in the U.S. (3) Examination of cultural, economic, political, and social factors impacting the experience of African American males in the United States. Topics may include Black male/female relationships, sexuality, self-determination, criminal justice system, family unit, community, and media representations. Prerequisite: AAS 100, or AAS 251, or consent of instructor.

314 (Cross-listed with HIST 314) African American History. (3) (General Education/Multicultural Studies) A survey of African American history and culture. Not open to students with credit for HIST 314. Prerequisite: HIST 106 or AAS 100 or consent of instructor.

316 (Formerly AAS 415) African Americans and Sport in the United States. (3) An examination of how organized athletics have served as symbolic sites of protest, power, and mission of historical existence, culture, and other minorities in the nineteenth, twentieth, and twenty-first centuries. Prerequisite: AAS 100 or consent of instructor.

317 (Formerly AAS 417) Black Women in American Sports. (3) An analysis of the role and mission of historical existence, culture, and contemporary issues facing Black women in the United States. Prerequisite: AAS 100 or consent of instructor.

325 The Black Family. (3) An analysis of structures and functions of Black family life in the United States, with emphasis on adaptive features. Some attention is also given to the African and Caribbean family.

327 (Cross-listed with POLS 327) African Politics. (3) This course examines the nature of institutions and political rule in Africa before and after independence. Key topics include the colonial inheritance, ethnicity and social characteristics of African societies, and the nature and role of political institutions. Not open to students with credit in POLS 327. Prerequisite: POLS 267 or permission of instructor.

336 (Cross-listed with WS 336) Womanist Theory & Perspectives. (3) Introduction to African and African American women's perspectives, to enhance interest and understanding of the existing wide range of feminist scholarship in the U.S., and other feminine discourses pertaining to activism/contributions of Black women in Africa, the U.S., the Caribbean, and Europe. Not open to students with credit for WS 336. Prerequisite: AAS 100 or AAS 145 or AAS/WS 310 or WS 190 or permission of instructor.

346 (Cross-listed with ENG 346) African American Fiction. (3) A survey of selected African American short stories and novels from the beginning to the present, from Brown, Johnson, and Toomer to Ellison, Baldwin, Morrison, and beyond. Not open to students with credit in ENG 346. Prerequisite: AAS/ENG 245, or ENG 299 with a grade of C or better, or consent of instructor.

349 (Cross-listed with HIST 349) Africa since 1800. (3) (General Education/Multicultural Studies) A study of major themes from 1800 to the present from an African perspective: slave trade and its abolition, European colonialism, independence movements, and problems of independence. Not open to students with credit in HIST 349. Prerequisite: HIST 116 or consent of instructor.

354 (Cross-listed with ENG 354) African Americans in American Film. (3) Analysis of the representation of African Americans in American films as a way to consider how imagery affects society's attitudes about race. Films from early 20th century depictions of mammy's to the 1990s hip-hop sagas will be examined. Not open to students with credit in ENG 354. Prerequisite: AAS 100 or consent of instructor.

360 African American Communities. (3) A study of development, demographic characteristics, social institutions, social stratification, and rural and urban differences of Black communities in the U.S.
Prerequisite: sophomore standing or consent of instructor.

370 African American Interest Groups and Organizations. (3) An examination of African American interest groups organized around themes important to the African American community, analyzing the techniques and strategies used to shape U.S. policies and laws. Prerequisite: AAS 100 or consent of the instructor.

380 Media and the Black Experience. (3) A survey of the Black experience in the media, radio, television, cinema, and advertising. The course shall examine the roles of media in the Black struggle for equality in class, race, and gendered society. Emphasis may vary by semester. Prerequisite: AAS 100 or permission of instructor.

381 Modern African Literature. (3) A survey of African Literature, both oral and written. This course will focus attention on the social, cultural, and political movements of modern Africa as presented in its literature.

384 (Formerly AAS 484) African Americans and the Fine Arts. (3) An interdisciplinary survey of the history and evolution of African American creative expression in the fine arts. Images, symbols, styles, techniques/content will be examined as well as the influence of social, political, and religious structures on the works of representative artists. Prerequisite: junior or senior standing or consent of the instructor.

397 (Cross-listed with ARTH 397) African Americans in Art. (3) The study of African Americans in art and visual culture from 1619 to the present. This course examines images of African Americans within a social, historical context as a way to understand evolving American perceptions about race, class, and gender. Writing Instruction in the Disciplines (WID) course. Not open to students with credit for ARTH 397. Prerequisites: ENG 180 and 280; sophomore standing or permission of the instructor.

400 Social and Political Thought of Black Americans. (3) An analysis and critique of ideologies relating to the achievement of full citizenship of Black Americans with emphases on: abolition, emigration, assimilation, nationalism, and Pan-Africanism. Prerequisite: junior standing or consent of instructor.

401 (Cross-listed with WS 401) African American Women and Dance. (3) Black women in modern dance, 1930s to the present, including relationships between the lived experience of African American women and their contributions to U.S. performance culture. Choreographers and dancers whose works have changed contemporary movement will be explored. Not open to students with credit in WS 401. Prerequisite: WS 190 or permission of instructor.

402 (Cross-listed with HIST 402) The Civil Rights Movement. (3) An intensive study of the history of the African American civil rights movement concentrating on the post-WWII era. The course also examines the related historical memory over the long black freedom struggle. Not open to students with credit for HIST 402. Prerequisites: at least junior standing and either HIST 100 or AAS 100; or consent of instructor. Directed Elective Area I.

420 (Cross-listed with SOC 420 and WS 420) Race, Class, and Gender. (3) The course will examine issues of race, class, and gender in historical, cultural, and contemporary societal contexts. Not open to students with credit in SOC 420 or WS 420. Prerequisite: AAS 100, or SOC 100, or WS 190; or permission of instructor.

425 African Americans, Corporate America, and Diversity. (3) An examination of racial and gender discrimination in American corporations. It explores the origins of Black businesses, Black independent self-help enterprises, and the agency of African Americans forging their own economic liberations through business activities and entrepreneurship. Prerequisite: AAS 100 or consent of instructor.

445 Critical Issues in the Education of African Americans. (3) Study of African Americans’ historical and contemporary struggles for educational access, equity, and excellence. Special emphasis given to the achievement gap, standardized testing, dropout/retention rates, and alternatives to the sponsored curriculum such as Afrocentric education and culturally relevant pedagogy. Prerequisite: AAS 100 or instructor’s consent.

446 Historically Black Colleges and Universities and Desegregation. (3) An examination of the evolution and growth of Historically Black Colleges and Universities (HBCU) and desegregation in the United States. Prerequisite: AAS 302 or 445 or consent of instructor.

463 Honors Thesis in African American Studies. (3) Students will write original scholarly research/academic findings in the AAS discipline, under faculty supervision. Thesis will follow completed fieldwork (AAS 363) of academic research, data collection (interviews, library work, oral history, observation) and relevant scholarly traditions of the discipline. Prerequisite: AAS 363(H).

466 (Cross-listed with GEOG 466—Africa) Geography of Africa. (3, repeatable for different regional subtitles to 9) (Global Issues) Analysis of the physical and cultural geography of Africa. Not open to students with credit for GEOG 466—Africa. Prerequisites: AAS 100 and junior standing, or permission of instructor.

488 Black Speech and Language Communication. (3) Course covers historical and contemporary discourse on the development and practice of Black communication behaviors. Pre-diasporan influences on Black communication styles, the role of oral communication during slavery, and issues such as the ongoing contentious debates about the use of Ebonics will be explored. Prerequisites: AAS 100 and junior standing, or permission of instructor.

490 Independent Study. (2–4, repeatable to 4) Individual study of a particular topic in the field of African American Studies.

491 Seminar in African American Studies. (1–6, repeatable to 6) Topics will vary from semester to semester, and will be announced prior to registration. Prerequisites: AAS 100 and junior standing, or consent of instructor.

494 (Cross-listed with REL 494) Religion in African American Culture. (3) This course acquaints students with religiosity and spirituality among African Americans and provides understanding of a world view, via concepts of nature, God, and human interaction, that reflects African cultural retentions in the U.S. Not open to students with credit for REL 494. Prerequisites: AAS 100 or instructor’s consent. Directed Elective Area I. Not open to students with credit for GEOG 466—Africa.

498 Individual Study. (1–3, repeatable to 3) Individual study of an approved research topic. Prerequisite: junior or senior standing or consent of the instructor.

499 Internship in AAS. (1–12, repeatable to 12) Supervised work assignments in applied occupational area involving specific projects in areas related to African American Studies. A maximum of 6 s.h. may be counted toward the African American Studies major. Prerequisites: permission of department chair, junior or senior standing, minimum 2.0 GPA.
ARTS AND SCIENCES (A&S)

196 Introduction to Research Methods. (0) An introduction to methodologies to plan and execute a research project with emphasis on data collection, analysis, and presentation. Prerequisite: permission of instructor. Graded S/U only.

LIBERAL ARTS AND SCIENCES (LAS)

195 Introduction to Liberal Arts and Sciences. (3) (General Education/Multicultural Studies) A comparative introduction to the major areas of the liberal arts and sciences, covering their evolution and distinctive approaches to problems. Addresses how the study of race, gender, religion, and multiculturalism informs and is embedded within each field.

210 Engaging Multiculturalism. (3) (General Education/Multicultural Studies) An interdisciplinary study of cultural identities, values, and interaction of diverse groups. Among the concepts explored will be race, ethnicity, gender, religion, class, sexual orientation, ableism, and age.

298 Individual Studies. (1–3) Special projects in interdisciplinary studies carried out under the supervision of a faculty member.

420 Senior Seminar in Cannabis and Culture. (3, repeatable to 6 for different topics) Examination of various issues related to cannabis, culture, history, and politics. See course schedule for description. Prerequisite: ANTH 180 or REL 180 or permission of instructor.

495 Liberal Arts and Sciences Senior Capstone. (3) Capstone course for the Bachelor of Liberal Arts and Sciences degree. Students will study examples of scholarship from a multidisciplinary perspective, research and present an interdisciplinary solution to a significant problem, and produce a self-reflective academic personal narrative. Writing Instruction in the Disciplines (WID) course. Prerequisites: LAS 195, ENG 280, senior standing, and permission of the director of the Liberal Arts and Sciences program.

496 Internship. (1–6, repeatable to 6) An internship provides LAS majors the opportunity to gain practical experience and training through observation and interaction in a professional environment connected to their career interests. Prerequisites: LAS major, junior or senior standing, and permission of the program director. Graded S/U.

498 Individual Studies. (1–3) Special projects in interdisciplinary studies carried out under the supervision of a faculty member.

RELIGIOUS STUDIES (REL)

(Introductory Courses—Any introductory course may be taken as a first course in Religious Studies.)

101 Religion and Popular Culture. (3) (General Education/Humanities) An examination of religious and spiritual themes as they manifest in popular culture, including film, literature, Internet, television, arts, music, news media, etc. IAI: H5 900.

107 (Formerly REL 207) The Bible. (3) (General Education/Humanities) An examination of the Hebrew Bible (Old Testament) and New Testament scriptures which shaped the intellectual and cultural history of Western civilization with emphasis on cultural, social, and historical factors leading to the birth of Judaism and Christianity. IAI: H5 901.

110 Introduction to Eastern Religions. (3) (General Education/Humanities or Multicultural Studies) (Global Issues) A comparative introduction to the religions of Asia—Hinduism and Buddhism—with attention to historical development, scriptures, beliefs, practices, and diverse cultural expressions.

111 Introduction to Western Religions. (3) (General Education/Humanities or Multicultural Studies) (Global Issues) A comparative introduction to the ‘religions of Abraham’—Judaism, Christianity, and Islam—with attention to historical development, scriptures, beliefs, practices, and diverse cultural expressions.

457 Hinduism. (3) (Global Issues) A study of the Hindu religious tradition covering its historical development, basic beliefs, practices, and their use in indigenous cultures and smaller religious traditions, as well as their use in indigenous cultures and smaller religious traditions. Not open to students with credit in ANTH 225.

370 Judaism. (3) (General Education/Multicultural Studies) (Global Issues) An examination of the Jewish people including the relations of Judaism to Christianity and Islam and the causes of anti-Semitism. Prerequisite: one 100- or 200-level Religious Studies course or consent of instructor.

255 Buddhism. (3) (Global Issues) A study of the Buddhist religious tradition covering its historical development, basic beliefs, and practices, emphasizing the relation between this religion and society in the East and in America. Prerequisite: one 100- or 200-level Religious Studies course or consent of instructor.

360 (Formerly REL 203) Christianity. (3) Examines Christian scriptures, beliefs, and rituals from both historical and contemporary perspectives, with coverage of Christianity in different places around the world. Prerequisite: one 100- or 200-level Religious Studies course or consent of instructor.

225 (Cross-listed with ANTH 225) (Formerly REL 457) Myth and Ritual. (3) (General Education/Multicultural Studies) An introduction to the anthropological study of myth and ritual systems and their importance in religious development and anthropological thought. The course focuses on a cross-cultural comparison of myth and its relationship to ritual. Not open to students with credit in ANTH 225.

301 Religion in America. (3) An examination of the diversity of religion and religions in the United States with attention to the variety of religious traditions and expressions and to the histories and themes that have shaped the distinctive tapestry of American religious life. Prerequisite: one 100- or 200-level Religious Studies course or consent of instructor.

303 (Cross-listed with WS 303) Women in Religion. (3) (General Education/Multicultural Studies) A cross-cultural, comparative, interdisciplinary investigation of the presence of women in shaping the religious cultures of the world. Not open to students with credit in WS 303. Prerequisite: one 100- or 200-level Religious Studies course or consent of instructor.

266
324 (Cross-listed with ANTH 324) Religion, Magic, and Shamanism. (3) (Global Issues) Survey of cross-cultural perspectives on beliefs and practices dealing with the supernatural, magic, and religion. The functions and social positions of spiritual leaders from different cultures are explored. Not open to students with credit in ANTH 324. Prerequisite: ANTH 110 or consent of instructor.

454 Contemporary Spiritual Movements. (3) An exploration of contemporary spiritual movements with special emphasis on the relationship between cultural change and the emergence of new religious movements. Prerequisite: one 100- or 200-level Religious Studies course or consent of instructor.

456 Religion and War. (3) (Global Issues) An examination of religious perspectives on the legitimacy of war, the conduct of war, and participation in or support for the military. Prerequisite: one 100- or 200-level Religious Studies course or consent of instructor.

464 (Cross-listed with SOC 464) Sociology of Religion. (3) (Global Issues) An analysis of religious groups and institutions, the role of religion in sacred and secular societies, and the effect of religion on behavior and social institutions. Not open to students with credit in SOC 464. Prerequisites: SOC 100 and one additional Sociology course, or consent of instructor.

492 (Cross-listed with ENG 492) Religion, Literature, and Film. (3) (Global Issues) Study of multicultural literary and cinematic texts engaging a wide range of religious traditions. Not open to students with credit for ENG 492. Prerequisite: ENG 299 with a grade of C or better, or one 100- or 200-level Religious Studies or Philosophy course, or consent of instructor.

494 (Cross-listed with AAS 494) Religion in African American Culture. (3) This course acquaints students with identity and spirituality among African Americans and provides understanding of a world view, via concepts of nature, God, and human interaction, that reflects African cultural retentions in the U.S. Not open to students with credit for AAS 494. Prerequisites: AAS 100 and junior standing, or one 100- or 200-level Religious Studies course, or permission of instructor.

(Religious Thought)

300 Religion, Ethics, and Law. (3) This course discusses the ways in which religions develop and sustain ethical traditions and how adherents of different faiths have worked to create or challenge laws based on these traditions. Topics include issues such as marriage, sexuality, war, and economics. Prerequisite: one 100- or 200-level Religious Studies course or consent of instructor.

380 Jesus. (3) A study of Jesus as pictured in the Gospels, history, and culture. Prerequisite: one 100- or 200-level Religious Studies course or consent of instructor.

405 Philosophy of Religion. (3) A critical examination of the philosophical issues arising from religious beliefs, utilizing historical and contemporary writings. Topics may include the existence of God, evil, faith, religious pluralism, and the relation between religious beliefs and ethics. Not open to students with credit in PHIL 405. Prerequisite: one 100- or 200-level Philosophy course or consent of instructor.

452 Theology. (3) Introduction to theological thought and a selection of thinkers who have shaped Christian, Jewish, and/or Muslim religious imagination. Such figures might include Paul, Augustine, Aquinas, Maimonides, Luther, Teresa of Avila, Abraham Heschel, Simone Weil, al-Ghazali, or Rabia (among others). Prerequisite: one 100- or 200-level Religious Studies course or consent of instructor.

460 The Bible and Current Issues. (3) Examines how Christians and Jews interpret the Bible in their reflections and debates about current issues. Possible topics may include (among others) gender norms, same-sex relationships, interreligious understanding, evolution, ecological concerns, apocalyptic thinking, and the nature of scriptural authority. Prerequisites: one 100- or 200-level Religious Studies course or consent of instructor.

(Specialized Research)

312 Writing in Religious Studies. (1) Instruction and practice in writing a 20 page research paper within the field of Religious Studies. Writing Instruction in the Disciplines (WID) course. Prerequisite: ENG 280. Corequisite: one 300- or 400-level Religious Studies course taught by Religious Studies faculty.

490 Capstone Project. (3) Selection of research project, preparation of bibliography, description of methodology, writing of senior thesis, oral defense, and participation in career-related seminars. Prerequisites: senior standing and REL 312.

499 Directed Readings. (1–3, repeatable for different topics, with no maximum) Individual study of particular religious traditions, ideas, or problems. Prerequisites: courses in Religious Studies and consent of the instructor. By arrangement.

WOMEN’S STUDIES (WS)

190 Introduction to Women's Studies. (3) (General Education/Multicultural Studies) An exploration of women’s roles and their status in society with insights gained from various disciplines including History, Sociology, Psychology, and Literature.

220 (Cross-listed with PHIL 220) Feminism and Ethics. (3) (General Education/Multicultural Studies) A multicultural and comparative investigation of feminist issues in ethics and women’s contributions to moral theory. Not open to students with credit in PHIL 220.

265 Women and Creativity. (3) (General Education/Humanities) This course explores some of the ways that women represent female experiences through creativity. Primary emphasis is on their contributions as producers and creators of various artistic forms. Prerequisite: WS 190 or permission of instructor.

270 Hispanic Women. (3) (General Education/Humanities) Emphasizing Hispanic women's cultural production and activism, this course considers the diversity of perspectives and experiences of Hispanic women from a range of cultural and geographical backgrounds. Globally, Hispanic language, heritage, and culture constitute an important intersecting factor of identity.

280 Lesbianism and Gender Identity. (3) (General Education/Humanities) Using political and historical narratives of same-sex desiring women and women of other queer identities, this course will consider the diversity of perspectives, realities, and activism of these women as informed by their culture, race, class, and disability.

285 (Cross-listed with SOC 285) Women: A Global Perspective. (3) (General Education/Social Sciences or Multicultural Studies) (Global Issues) This course emphasizes the voices of women across the globe from an interdisciplinary perspective. Special attention will be paid to women's activism, the transnational feminist movement, and an examination of the category “woman” in the global context. Not open to students with credit in SOC 285. Prerequisite: WS 190 or SOC 100.

301 (Cross-listed with ENG 301) Women and Literature. (3) (General Education/Multicultural Studies) The study of literature as an art practiced by women, with an examination of portrayals of women in literature. Not open to students with credit in ENG 301. IAI: H3 911D.
303 (Cross-listed with REL 303) Women in Religion. (3) (General Education/Multicultural Studies) A cross-cultural, comparative, interdisciplinary investigation of the presence of women in shaping religious cultures of the world. Not open to students with credit in REL 305. Prerequisite: ENGL 106 or an advanced-level Religious Studies course or consent of instructor.

307 (Cross-listed with ENG 307) Issues for Women Writing. (3, repeatable to 6 for different topics) Reading, discussion, and writing focused on a particular social, cultural, or personal issue related to how and what women write. Not open to students with credit in ENG 307. Prerequisite: ENG 299 or WS 190, or consent of instructor.

310 (Cross-listed with AAS 310) Black Women in the United States. (3) A sociological analysis of the various social roles of Black women, including those of gender, education, occupations, and marriage and family, with some attention given to contributions and achievements. Not open to students with credit in AAS 340.

315 (Cross-listed with ANTH 315) Gender and Anthropology. (3) Exploration of cross-cultural ethnographies of variations in gender roles, economic, religious, and political domains. This course also addresses gender identity and gender diversity issues. Not open to students with credit in ANTH 315. Prerequisite: ANTH 110 or consent of instructor.

316 (Cross-listed with COMM 315) Gender and Communication. (3) This course examines gender and gender-role differences and similarities in verbal and nonverbal communication and surveys several contexts in which sex differences in human communication occur. Not open to students with credit in COMM 315. Prerequisite: ANTH 110 or consent of instructor.

317 (Cross-listed with HIST 317) Women in American History. (3) (General Education/Multicultural Studies) A multicultural and historical survey of women in the United States, from 1500 to the present. Not open to students with credit in HIST 317. Prerequisite: HIST 105 or 106, or consent of instructor.

318 (Cross-listed with HIST 318) Women and Gender in European History. (3) (General Education/Multicultural Studies) A global study of women and gender in Europe, from antiquity to the present, focusing on changes in culture, society, the economy, and politics. Not open to students with credit in HIST 318. Prerequisite: HIST 115 or 116, or consent of instructor.

321 (Cross-listed with HE 321) Women's Health. (3) Provides information about how women can improve their chances of achieving and maintaining high-level wellness. Among the topics included are: prevention, early detection and treatment of health problems commonly occurring among women, contraception, pregnancy and childbirth, using the medical care system, and mental health. Open to male and female students. Not open to students with credit in HE 321. Prerequisite: junior standing.

330 (Cross-listed with ANTH 330) Sex and Gender in Archaeology. (3) The study of sex, gender, and power in archaeological investigations and theory, including cross-cultural comparison of gender and social differentiation in past societies. Changing perspectives on the roles of females in human evolution and prehistory are emphasized. Not open to students with credit in ANTH 330. Prerequisite: ANTH 110 or 111 or WS 190, or consent of instructor.

335 (Cross-listed with POLS 335) Women and Politics. (3) (General Education/Multicultural Studies) An examination of the changing role of women in American politics. Focus on women as participants in politics, public policies of concern to women, and feminist theories of political change. Not open to students with credit in POLS 335. Prerequisite: POLS 101 or 122, or permission of instructor.

336 (Cross-listed with AAS 336) Womanist Theory & Perspectives. (3) Introduction to African and African American women's perspective, to enhance interest and understanding of the existing wide range of feminist scholarship in the U.S., and other feminine discourses pertaining to African American women. Women in Africa, the U.S., the Caribbean, and Europe. Not open to students with credit for AAS 336. Prerequisite: AAS 100 or AAS 145 or AAS/WS 310 or WS 190 or permission of instructor.

342 (Cross-listed with HIST 342) Women and Gender in Asian History. (3) (General Education/Multicultural Studies) A study of women and gender in Asia from ancient times to the present, with an emphasis on social, political, economic, and cultural aspects of their lives. Not open to students with credit for HIST 342. Prerequisite: HIST 116 or consent of instructor.

355 Introduction to Feminist Theory. (3) A study of the theoretical foundations of modern feminist theory. Readings of early feminists such as Sara Grimke, Mary Wollstonecraft, Harriet Taylor, Sojourner Truth, Anna Julia Cooper, and Elizabeth Cady Stanton are explored for their impact on the development of feminist thought. BGS online writing course. Prerequisite: WS 190 and one additional Women’s Studies course, or permission of instructor.

357 (Cross-listed with PSY 357) Women and Work. (3) (General Education/Multicultural Studies) Examination of major psychological issues encountered by women entering the workforce, including career choice, combining work and family life, leadership, and inequities. Not open to students with credit in PSY 357. Prerequisite: PSY 100.

360 (Cross-listed with SOC 360) Gender and Society. (3) (General Education/Multicultural Studies) This course provides a sociological examination of theories of gender, socio-historical gender patterns, gender and American social institutions, social structure and gender, and cross-cultural comparisons. BGS online writing course. Prerequisite: SOC 100 or WS 190, or consent of instructor.

370 Women in Popular Culture. (3) (General Education/Multicultural Studies) A sociocultural study of stereotypes of women as portrayed in American popular culture with a particular emphasis placed upon the images of women of color. Prerequisite: WS 190.

391 Special Topics in Women's Studies. (1–3, repeatable to 6) An in-depth investigation of special topics in the field of Women's Studies. Prerequisites: WS 190 and permission of instructor.

395 (Cross-listed with ANTH 395) Gender, Race, and the Environment. (3) (General Education/Multicultural Studies) Explores research, scholarship, and fictional ecocriticism works. Students will consider the influence of women, feminists, and ecocriticism writings on local and global environmental movements. Not open to students with credit in ANTH 395. Prerequisite: ANTH 110 or WS 190 or consent of instructor.

401 (Cross-listed with AAS 401) African American Women and Dance. (3) Black women in modern dance, 1930s to the present, including relationships between the lived experience of African American women and their contributions to U.S. performance culture. Choreographers and dancers whose works have changed contemporary movement will be explored. Not open to students with credit in AAS 401. Prerequisite: WS 190 or permission of instructor.

405 Women's Spirituality. (3) This course will examine some of the predominant themes in women's experience from a multicultural perspective as a means of understanding how women develop their spirituality. Prerequisite: WS 190 or permission of instructor.
Women and Poverty. (3) The poverty of women in the United States including factors of race, place of residence, and age are covered. Structural hierarchies that maintain poverty are examined from a sociological perspective. Not open to students with credit in SOC 410. Prerequisite: WS 190 or SOC 100 or consent of instructor.

Politics of Reproduction. (3) This course examines reproduction as an issue of public interest and considers how public and private interests can conflict regarding women’s ability to control their reproduction. Not open to students with credit in POLS 415. Prerequisite: WS 190 or permission of instructor.

Race, Class, and Gender. (3) The course will examine issues of race, class, and gender in historical, cultural, and contemporary societal contexts. Not open to students with credit in AAS 420 or SOC 420. Prerequisite: WS 190, or AAS 100, or SOC 100; or permission of instructor.

Sociology of Women’s Health. (3) Uses sociological theories and research to examine the gendered experience of illness. Includes sociological analysis of medical knowledge about women’s health. Topics include medicalization of women’s health, the gendered hierarchy of professions, and feminist critiques of scientific research. Not open to students with credit in SOC 430. Prerequisite: SOC 100 or WS 190, or consent of instructor.

Psychology of Gender. (3) Examines the psychological, social, and biological bases for societal-defined sex roles. The knowledge of these factors will assist students in recognizing and understanding the influence of gender on human experiences (i.e., behaviors, cognitions, emotions, physiology) and relationships. Not open to students with credit in PSY 433. Prerequisite: 9 s.h. of Psychology coursework, or graduate standing, or permission of instructor.

Women and Crime. (3) Theories of female criminality, patterns of female crime and victimization, women in corrections, and women as criminal justice practitioners are examined. Not open to students with credit in SOC 435. Prerequisite: SOC 100 or consent of instructor.

Feminist Theory & Practice. (3) This course explores how contemporary feminist theory describes and explains women’s realities, focusing specifically on the intersections of women’s sexual diversity, race, and other identities. Writing Instruction in the Disciplines (WID) course. Prerequisites: ENG 280; WS 355 or permission of instructor.

Gender and Sport. (3) Examines relationships between gender, sport, and physical activity. Gender is examined within the context of stereotypes and the structure/philosophy of sport and physical activity. Sport and physical activity are investigated as social institutions relative to cultural constructions of gender. Not open to students with credit in KIN 470. Prerequisite: WS 190 or permission of instructor.

Sexuality in German and Austrian Culture. (3) Examines the representation of sexuality in film, literature, and non-fiction of German-speaking countries in the twentieth and twenty-first centuries. Not open to students with credit for F L 480. Prerequisite: QS 100 or junior standing.

Women’s Studies Honors Thesis. (1–4, repeatable to 4) An independent study project or paper to be supervised by two members of the faculty in Women’s Studies. Prerequisite: enrollment in the Honors Program; senior status.

Women and Film/Television. (3) An overview of women in film and television that considers the on-screen images of women as well as the positions of women working behind the scenes (with laboratory). Not open to students with credit for BC&J 494 or ENG 494. Prerequisites: ENG 180 and 280.

Independent Study in Women’s Studies. (1–3, repeatable to 6) Individual readings and/or research on a topic within Women’s Studies. Prerequisites: WS 355 and permission of department chair.

Internship in Women’s Studies. (1–9, repeatable to 9) Supervised work in an applied occupational area related to women. Prerequisites: junior or senior status and permission of department chair.

Faculty: Baril, Bobina, Chakravorti, Conrad, Creasey, Gates, Gorshunov, Grachev, Howe, Humphrey, Hunt, Koo, Liao, Mhango, Rands, Sawhney, Shamsuddoha, Shike, Stewart, Tarrant, Western, Wienczek, Yang, Zimmerman.

The School of Management and Marketing offers four Bachelor of Business degree programs that provide the theory, practical knowledge, and skills needed for high-potential managerial and specialist jobs in various types of organizations.

Human Resource Management improves the effectiveness of people in organizations. The B.B. in Human Resource Management degree program is designed to develop the professional skills needed for a successful career in any organization. In addition, students receive a solid base in other functional areas of an organization. Typical career areas are employment recruiting and staffing, training and development, industrial and labor relations, compensation and benefits, safety and health, and government compliance. Human Resource Management faculty strongly recommend that HRM majors engage in enrichment activities such as an internship, a Study Abroad program, or a minor.

The B.B. in Management degree program emphasizes practical professional management skills, allowing students the flexibility to focus on such areas as organizational behavior/organization development, small business management, and operations management. Management is a diverse and applied field of study. Therefore, the objectives of the program include 1) preparing generalists who integrate and coordinate organizational activities of marketing, finance, accounting, operations, and human resources in order to meet organizational goals, and 2) preparing specialists who focus on management analysis, information systems, policy and strategic analysis, and the management of a single operation. Typical placements include general management, retailing management, hotel/motel management, and operations management positions in manufacturing and service organizations, computer-related occupations, high technology administration, organization development consulting, health care administration, government services, and non-profit organization administration. Management faculty strongly recommend that Management majors engage in an enrichment activity from among the following: an internship, a Study Abroad program, or a minor.

Marketing is the activity of developing products and services to satisfy customers' needs and then making them available at the right places, at the right times, and at competitive prices. Changes in social and economic systems have created new challenges for Marketing professionals. Increasingly, they must focus on both domestic and global opportunities in-step with ever-evolving technologies. They must also be continually responsive to cultural differences and ethical issues. The B.B. in Marketing degree offers students a broad-based education in a variety of marketing specialties including integrated marketing communications, marketing technologies, and sales management. When combined with
the capstone course in marketing management, students are qualified to assume a variety of careers including personal selling (for consumer and industrial products), marketing research, public relations, advertising management, and retailing management.

Supply Chain Management (SCM) is a field that cuts across the functional lines of a company. SCM involves managing the internal and external components of a supply system including purchasing parts and supplies, arranging transportation, and managing inventory levels. SCM professionals work with marketing, operations, accounting, and finance to ensure that products/services are available to the company and the consumer when needed and to control costs. For the B.B. in Supply Chain Management, students take courses in logistics, transportation, international business, professional selling, negotiations, and purchasing. Employment opportunities in SCM are particularly attractive as graduates command above-average salaries.

GradTrac is available to Human Resource Management, Management, Marketing, and Supply Chain Management majors. See page 79 for information about GradTrac.

Honors Curriculum—Academically qualified students in this School are encouraged to complete an honors curriculum in University Honors, Honors in the Major, or General Honors. All Honors students must complete the one-hour honors colloquium (G H 299). General Honors includes General Honors coursework. Honors in the Major includes honors work in the major. University Honors combines Honors in the Major and General Honors. For more information about honors curricula, see page 100 or visit the Centennial Honors College website at wiu.edu/Honors.

Integrated Baccalaureate and Master's Degree Program—An integrated baccalaureate and master's degree program is available for the Bachelor of Business in Human Resource Management, Management, Marketing, or Supply Chain Management: Master of Business Administration. An integrated degree program provides the opportunity for outstanding undergraduates to earn both degrees in five years. Please refer to the Graduate Studies catalog for details about the integrated program.

Degree Programs

Bachelor of Business—Human Resource Management

All students seeking the Bachelor of Business in Human Resource Management must complete I, II, III, IV, and V below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

Pre-Human Resource Management students who have earned 60 hours, but are ineligible to declare a business major will be limited to a maximum of 29 hours of business courses (see Limit on Business Credits, page 92) and may be removed from business courses.

I. University General Education Curriculum (p. 70) ................................................................. 43 s.h.

II. Business Core Courses† (p. 93) ...................................................................................................... 33 s.h.

III. Departmental Core Courses ..................................................................................................... 21 s.h.
     B L 431 or 432; CS 302; HRM 353, 441, 442, 446, 449, 499

IV. Electives
    A. Directed .................................................................................................................................. 12 s.h.
       COMM 305; ECON 440; HRM 400, 443, 444; MGT 350, 448, 481; either
       MGT 425 or 445; MGT/OM 352; EOS 311 or EOS 377 or ET 448 (choose one);
       SCM 451
    B. Open ...................................................................................................................................... 11 s.h.

V. Other .......................................................................................................................................... 15 s.h.*
    Natural Sciences/Mathematics: MATH 137 and STAT 171
    Social Sciences: ECON 231 and 232 and either PSY 100 or SOC 100

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) any major's discipline-specific global issues course; or 4) an approved Study Abroad program.
† BCOM 320 (Business Core) fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.
* 15 s.h. may count toward the University General Education requirement.

**Bachelor of Business—Management**

All students seeking the Bachelor of Business in Management must complete I, II, III, IV, and V below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

Pre-Management students who have earned 60 hours, but are ineligible to declare a business major will be limited to a maximum of 29 hours of business courses (see Limit on Business Credits, page 92) and may be removed from business courses.

I. University General Education Curriculum (p. 70) .................................................. 43 s.h.
II. Business Core Courses† (p. 93) ................................................................................ 33 s.h.
III. Departmental Core Courses .................................................................................. 21 s.h.
    B L 431 or 432; CS 302; HRM 353; MGT 350, 455, 481, 499; MGT/OM 352
IV. Electives
    A. Directed ..................................................................................................................... 12 s.h.
       Upper-division Management courses ................................................................. 6 s.h.
       Upper-division Business courses ........................................................................ 6 s.h.
    B. Open ......................................................................................................................... 11 s.h.
V. Other .................................................................................................................................. 15 s.h.*
    Natural Sciences/Mathematics: MATH 137 and STAT 171
    Social Sciences: ECON 231 and 232 and either PSY 100 or SOC 100

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) any major’s discipline-specific global issues course; or 4) an approved Study Abroad program.

† BCOM 320 (Business Core) fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.
* 15 s.h. may count toward the University General Education requirement.

**Bachelor of Business—Marketing**

All students seeking the Bachelor of Business in Marketing must complete I, II, III, IV, and V below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

Pre-Marketing students who have earned 60 hours, but are ineligible to declare a business major will be limited to a maximum of 29 hours of business courses (see Limit on Business Credits, page 92) and may be removed from business courses.

I. University General Education Curriculum (p. 70) .................................................. 43 s.h.
II. Business Core Courses† (p. 93) ................................................................................ 33 s.h.
III. Departmental Core Courses .................................................................................. 18 s.h.
    CS 302; MKTG 329, 331, 337, 429, 497
IV. Options of Study (select A, B, or C) ..................................................................... 18 s.h.
    A. Enterprise Marketing
       Choose six 300-400 level MKTG courses ............................................................. 18 s.h.
       **Note:** No more than 3 s.h. of MKTG 400 may be applied towards this total.
    B. Marketing Technology
       1. MKTG 371, 411, 421, 441; DS 200 ..................................................................... 15 s.h.
       2. Choice of 3 s.h. from any 300-400 level MKTG courses ............................. 3 s.h.
       **Note:** No more than 3 s.h. of MKTG 400 may be applied towards this total.
Management and Marketing

C. Omni-Channel Marketing
   1. MKTG 343, 400, 417, 431; SCM 211 ................................................................. 15 s.h.
   2. Choose 3 s.h. from SCM 330, 340, 470 ....................................................... 3 s.h.

V. Open Electives ........................................................................................................... 8 s.h.

VI. Other ...................................................................................................................... 15 s.h.*
    Natural Sciences/Mathematics: MATH 137 and STAT 171
    Social Sciences: ECON 231 and 232 and either PSY 100 or SOC 100

* The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) any major's discipline-specific global issues course; or 4) an approved Study Abroad program.

† BCOM 320 (Business Core) fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.

Bachelor of Business—Supply Chain Management

All students seeking the Bachelor of Business in Supply Chain Management must complete I, II, III, IV, and V below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

Pre-Supply Chain Management students who have earned 60 hours, but are ineligible to declare a business major will be limited to a maximum of 29 hours of business courses (see Limit on Business Credits, page 92) and may be removed from business courses.

I. University General Education Curriculum (p. 70) .................................................. 43 s.h.

II. Business Core Courses† (p. 93) ............................................................................... 33 s.h.

III. Departmental Core Courses .................................................................................. 24 s.h.
    CS 302; MGT/OM 352; SCM 211, 340, 400 (or approved substitute), 411, 451, 453, 499

IV. Electives
   A. Directed .................................................................................................................... 9 s.h.
      One of the following courses (3): SCM 330, 457, 460, 461, 465, 470
      Two of the following courses (6):
         AGEC 333, 349
         B L 431
         HRM 353
         MGT 425, 455
         MKTG 317, 335, 441, 497
         ET 241, 344, 346, ET/ENGR 345
         SCM 330, 457, 460, 461, 465, 470, or any SCM elective with School Director approval
   B. Open ....................................................................................................................... 11 s.h.

V. Other ...................................................................................................................... 15 s.h.*
    Natural Sciences/Mathematics: MATH 137 and STAT 171
    Social Sciences: ECON 231 and 232 and either PSY 100 or SOC 100

* The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) any major's discipline-specific global issues course; or 4) an approved Study Abroad program.

† BCOM 320 (Business Core) fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.

* 15 s.h. may count toward the University General Education requirement.
Minors

Minor in Human Resource Management .................................................. 18 s.h.
1. BL 230*, MGT 349*, HRM 353 ............................................................... 9 s.h.
2. Select three courses from the following:
   HRM 441, 442, 443, 444, 446, 449 ......................................................... 9 s.h.
* Business majors should consult with their academic advisor.

Minor in International Business

Option I: For Business Majors ............................................................... 16 s.h.
1. Foreign Language (3–4 s.h); MKTG 317 .............................................. 6–7 s.h.
2. 9 or 10 s.h. from ECON 420 or 470, FIN 497, HRM 444,
   INAG 310, MGT 485, MKTG 417, SCM 411; one course may be
   taken from Foreign Languages (any second course in the same
   language as core course), BAT 300, NUTR 300, POLS 331, or
   History (any non-U.S. History course at the 300 or 400 level) .......... 9–10 s.h.

Option II: For Non-Business Majors .................................................... 24 s.h.
1. Foreign Language (3 or 4 s.h.); MKTG 317; 6 s.h. from
   ACCT 200, ECON 231, FIN 311, MGT 349, MGT 125,
   MKTG 327, SCM 211 ........................................................................... 12–13 s.h.
2. 11–12 s.h. from same courses listed in Option I.2 ......................... 11–12 s.h.

Note: Non-business majors are strongly encouraged to consult Business Advising to
ensure timely completion of the minor.

Minor in Management ........................................................................... 18 s.h.
1. BL 230*, MGT 349*, MGT/OM 352, HRM 353 ................................. 12 s.h.
2. Select two courses from the following ............................................. 6 s.h.
   MGT 350, 425, 445, 447, 448, 470, 474, 481, 483, 485
* Business majors should consult with their academic advisor.

Minor in Marketing .................................................................................. 18 s.h.
1. ACCT 200 or ACCT 201 or ECON 232 .............................................. 3 s.h.
2. Business Elective ............................................................................... 3 s.h.
3. MKTG 327 ...................................................................................... 3 s.h.
4. Marketing Electives .......................................................................... 9 s.h.

Minor in Supply Chain Management ................................................... 18 s.h.

Course Descriptions

APPAREL AND TEXTILE MERCHANDISING (ATM)

170 Introduction to Apparel Merchandising. (3) Introduction to the merchandising of fashion through
the study of fashion vocabulary, the fashion process,
fashion publications, and career opportunities.

171 Basic Clothing Construction Techniques. (3) A
broad range of sewing techniques and problems applied
to a variety of projects for the individual. 2 hrs. lect.; 2
hrs. lab. (Additional lab supplies to be purchased.)

190 (Cross-listed with HM 190 and NUTR 190)
Introduction to Professional Practices. (1) This
course is designed to introduce DFHM majors to
program expectations specific to their careers. Students
will be exposed to a variety of resources to aid them in
their studies. Not open to students with credit in HM 190
or NUTR 190.

270 Textile Science. (3) Introduction to textile fibers,
yarns, structures, and finishes related to performance,
selection, and care of textile products. Prerequisite:
ATM 170.

272 Basic Design Concepts for Merchandising. (3) Explore the visual aspect of fashion products using
principles and elements of design. Prerequisite: ATM
170. 2 hrs. lect.; 2 hrs. lab. (Additional lab supplies to be
purchased.)

274 Apparel Merchandising Systems. (3) Provides an
overview of basic math functions used in the fashion
merchandising industry. Prerequisite: ATM 170.

276 Apparel Forecasting. (3) Introduction to methods
and analysis techniques used by forecasters to predict
future trends in the fashion industry including styles,
fabrics, and colors. Prerequisites: ATM 170 and STAT 171.

278 Merchandising Practicum. (3) Expose students
to the fashion related retail environment. Prerequisite:
ATM 170. 3 hrs. lect.; 4 hrs. lab.
331 Consumer and Professional Practice. (3) Interrelationship of environments and the consumer, in addition to integrating professional practices in the apparel industry. Study of consumer services, consumer wants, professional behavior, and cultural diversity in the workplace. Prerequisites: ATM 170 and junior standing.

370 Quality Assurance in the Apparel Industry. (3) A pragmatic application of evaluating performance characteristics of textiles, textile testing techniques, and the significance of quality in textile products. Prerequisite: ATM 270. 2 hrs. lect.; 2 hrs. lab.

371 Apparel Product Analysis. (3) Study of manufacturing processes and practices used by fashion industries focused on ready-to-wear apparel production including writing specifications, labeling, styling details, garment assembly, and cost. Prerequisite: ATM 270.

372 Visual Merchandising. (3) Practical application of visual merchandising practices and techniques related to fashion retail organizations, interiors, and their merchandise. Prerequisite: ATM 272. 2 hrs. lect.; 2 hrs. lab. Additional lab supplies to be purchased.

373 Fashion Promotion. (3) A practical approach to promotion techniques in the fashion industry. Prerequisites: ATM 372 and junior standing.

374 Buying. (3) A study of fashion retail buying, practices, and procedures. Computer technology will be a part of this course. Prerequisite: ATM 274. Field trips and production work are required.

375 Diversity of Dress, (3) (General Education/Multicultural Studies) (Global Issues) An exploration of diverse cultures through dress and adornment. Prerequisites: At least one course in each of Category III and Category IV of the University General Education Curriculum or permission of instructor.

376 Historical Costume—Twentieth Century. (3) A theoretical approach to twentieth century historic dress examined in the context of social, economical, political, and artistic development. Writing Instruction in the Disciplines (WID) course. Prerequisites: ATM 170; ENG 180 and 280.

377 Apparel Merchandising Travel Study. (3) Tours to domestic and international properties, facilities, and agencies related to the fashion industry. Prerequisite: junior standing or permission of instructor.

378 Seminar in Apparel Merchandising. (3) An analysis of current issues, trends, and future projections influencing the field of apparel and textile merchandising. Prerequisites: ATM 170 and permission of instructor.

470 Apparel Brand Management. (3) Overview of essential elements of fashion brands and the fashion branding process within the apparel and textile industry. Explore concepts, strategies, and issues involved in fashion branding and merchandising activities with respect to the stylistic aspects of the apparel industry. Prerequisites: ATM 372 and junior standing.

472 Merchandising Strategies. (3) Visual merchandising practices and techniques applied to merchandise, store design, and store layout using industry software. Prerequisites: ATM 372 and junior standing.

473 Apparel Merchandising Entrepreneurship. (3) A practical approach to researching and developing a fashion retail business plan. Prerequisites: ATM 274 and junior standing.

474 Apparel Multi-Channel Retailing. (3) An overview and analysis of multi-channeling as a retail model and its impact on the fashion industry. Prerequisites: ATM 374 and junior standing.

476 Global Issues Affecting Apparel Merchandising. (3) A critical analysis of merchandising principles and practices as applied to the textile and apparel complex in a global context with emphasis on economic, political, environmental, cultural, and societal issues; geographic distribution, trade theory; trade data; and technological developments. Prerequisites: ATM 170, and junior standing or permission of instructor.

477 (Cross-listed with HM 477) Theory and Research in Apparel Merchandising and Hospitality Management. (3) A study of theory, research methods, and analytical concepts in apparel and textile merchandising, hospitality management, and nutrition. Not open to students with credit in HM 477. Prerequisites: STAT 171 and junior standing.

478 Apparel Merchandising Pre-Internship. (1) Preparation for the internship including resume writing, investigation of site opportunities, interviewing, and overview of the internship program. To be taken the semester before the internship. Prerequisites: ATM 170, 270, 276, and 331.

479 Internship in Apparel Merchandising. (6) Supervised field experience for application of theory and skills in an agency or business approved by the School. 40 clock hours per semester hour are required. Prerequisites: ATM 478, 2.5 GPA in the major and 2.0 GPA overall, and site approved by the School. Graded S/U only.

480 Apparel Styling. (3) This course focuses on adapting fashion appearance to create the image working with clientele. It will acquaint students with the principles and practices of the image consulting industry. Prerequisites: ATM 170; junior standing or permission of instructor.

BUSINESS AND TECHNOLOGY (BAT)

300 Global Study. (1–9, repeatable to 9) (General Education/Multicultural Studies) Integrates the study of international business or technology with international travel. Focuses on preparing students for the global environment of the 21st century. Only 3 s.h. can be applied toward the International Business minor. Prerequisite: permission of instructor.

490 Business Core Assessment. (0) Requires each business major to demonstrate his/her proficiency on selected learning goals for the Bachelor of Business program. The course is taken during the student’s senior year. Corequisite: MGT 490. Graded S/U.

BUSINESS COMMUNICATION (BCOM)

320 Business Communications. (3) Practical application of effective written and oral business communication concepts. Writing Instruction in the Disciplines (WID) course. Prerequisite: ENG 280.

BUSINESS LAW (B L)

230 The Legal Environment of Business. (3) An introduction to the legal system and the laws governing activities of business, including a study of the foundations of the legal system, business ethics, alternative dispute resolution, contracts, business wrongs (torts), and an introduction to business organizations.

431 The Law of Commercial Transactions. (3) A study of commercial transactions including contracts, sales, bankruptcy, secured transactions, and the legal environment of business.

432 The Law of Business Organizations. (3) A study of the laws governing business organizations, including agency, partnerships, corporations, employment, real estate, and an overview of the legal relationships between business and government.
HUMAN RESOURCE MANAGEMENT (HRM)

355 Human Resource Management. (3) This course focuses on recruitment and human resource planning; employment, placement, compensation, and benefits; training and development; employee and labor relations; health, safety, and security; and personnel research in business and industry.

400 Human Resource Management Internship. (1–3, repeatable to 3) Integrates human resource management theories with application to actual business practice. Internships are supervised by a faculty coordinator and an executive in the firm. Proportional credit available for shorter internships. Hours cannot be applied toward requirements of a Human Resource Management minor. Prerequisites: Human Resource Management major; junior standing; completion of HRM 353 with a B- or higher; 2.0 GPA; written approval of School Director. Graded S/U only.

441 Staffing. (3) The study of human resource planning techniques in business and industry such as measurement and testing principles; attracting, selecting, and placing personnel. Prerequisite: HRM 353.

442 Employee Benefits. (3) The course focuses on employee benefits practices, which include the socio-economic and institutional context of the development and management of employee benefits systems, procedures used in benefits administration, and employer-sponsored and government-mandated programs. Prerequisite: HRM 353.

443 Collective Bargaining. (3) A comprehensive study of collective bargaining. Stress is given to legislation, policies, and practices pertinent to collective bargaining, as well as to procedures and techniques utilized in bargaining. Attention also focuses upon the problem of handling and settling industrial controversy. Prerequisite: HRM 353.

444 International Human Resource Management. (3) (Global Issues) The study of human resource management practices and regulations. Topics will include staffing, selection, training and development, labor relations, performance appraisal, and managing workforce diversity in a global economy.

446 Human Resource Management in the Legal Environment. (3) Social and economic implications of government regulations concerning equal employment opportunity are covered. Includes laws and agencies related to equality in employment for women, minorities, veterans, older employees, and disabled workers. Prerequisite: HRM 353.

449 Appraising and Developing Employees. (3) Examination of employee performance appraisal and development activities in organizations. Emphasis on their design, implementation, and evaluation, and on the systemic relationships among training, careers, and the management of organization development. Prerequisite: HRM 353.

460, 461, 462 Independent Research in Human Resource Management I, II, and III. (1–3 each, not repeatable) Independent research study of an approved topic. For selected Human Resource Management majors. Prerequisites: a cumulative GPA of 2.50 or above and permission of the School Director.

499 HRM Knowledge Assessment. (0) All Human Resource Management majors are required to complete the knowledge assessment examination prior to graduation. Prerequisites: senior standing; Human Resource Management major. Graded S/U only.

MANAGEMENT (MGT)

125 Business and Technology in a Global Society. (3) A comprehensive overview of global business principles, practices, and trends that are reshaping today’s business and affecting tomorrow’s competitive environment. Consideration of the impact of technology, ethics, diversity, culture, and various emerging issues on all business disciplines.

349 Principles of Management. (3) Study of the managerial process in an organizational setting with emphasis on decision making, planning, organizing, and controlling including discussion of motivation, leadership, communication, and interpersonal dynamics in an organization context.

350 Organizational Behavior. (3) Extended study of concepts dealing with individual and group behavior in organizations. Students explore theory and research as well as practical applications related to management. Prerequisite: MGT 349.

352 (Cross-listed with OM 352) Operations Management. (3) Foundations for Operations Management as practiced in contemporary organizations. Focus is on the efficient and effective value-adding transformation of inputs into goods and services in both internal and external value chains. Extensive use of mathematics and statistics is involved. Not open to students with credit in OM 352.

400 Management Internship. (3–12, repeatable to 12) Work experience in an organization involving training in management-related areas. Intern will be supervised by a faculty coordinator and a supervisor in the organization. Reports of work experience are submitted to the coordinator. These hours cannot be applied toward meeting the requirements for the Management minor. A minimum of 3 s.h. may be applied toward the requirements for the Management major. Prerequisites: MGT 349 with a C or higher; Management major or minor, junior standing, minimum 2.5 GPA; and written approval of School Director. Graded S/U only.

425 Managerial Decision Making. (3) An examination of problem solving or decision making processes. Emphasis is on skills and techniques of individual and group problem solving and decision making including creative and critical thinking. Prerequisites: MGT 349 and CS 101.

445 Organization Development. (3) Examines current models and methods for bringing about change in organizations. Emphasizes understanding organizations as complex adaptive systems. Provides knowledge and practical tools to promote and maintain system viability across the dynamic contexts facing modern organizations. Prerequisite: MGT 350.

447 Analysis of Behavior in Organizations. (3) Examines organizational behavior from a cultural/interpretive perspective for the purpose of describing how organizations are run rather than how they should be run. The nature of the course allows the students to gather information on how to cope with life in organizations, with specific focus on being a successful organizational member. Prerequisite: MGT 350.

448 Business Organization Structure/Theory. (3) Explores the influence of organization structure on behavior by examining such topics as technology, environment, bureaucracy, effectiveness, and power. Course includes case analysis and small group activities. Prerequisite: MGT 349.

460, 461, 462 Independent Research in Management I, II, and III. (1–3 each, not repeatable) Independent research study of an approved topic. For selected Management majors.
Prerequisites: a cumulative GPA of 2.50 or above and permission of the School Director is required.

470 Seminar in Management. (3, repeatable once) An in-depth treatment of various facets of management problems and concepts. Possible topics include conflict resolution, organizational change, and stress management. Topics determined by instructor. Prerequisite: MGT 349.

474 Small Business Management. (3) This course examines issues in running a small business. Topics include: problems, advantages, and disadvantages of operating and managing a small business. A complete business plan will be prepared. Cases, interviews, and other hands-on methods are used. Prerequisite: MGT 349.

481 Management and Society: Ethics and Social Responsibility. (3) A study of relationships between business, government, society, and individuals. Topics include ethics, social responsibility, regulation, globalization, and managing ethical and social issues of concern to various stakeholders and the natural environment. Prerequisite: MGT 349.

483 Managing Organizations for Environmental Sustainability. (3) Studies how businesses and other organizations can become more environmentally sustainable, emphasizing sustainability management practices/methods. Includes background coverage of sustainability, ecological principles, and environmental problems and philosophies, organizations' environmental impacts, and government policy approaches. Includes a project to improve organization sustainability. Prerequisite: MGT 349 or permission of instructor.

485 International Management. (3) (Global Issues) The study of managing people and organizations in a multicultural global environment. Topics include the management functions of planning, organizing, leading, and controlling as they apply to strategy formulation, decision-making, cross-cultural organizational behavior, global teams, and intercultural communication. Prerequisite: MGT 349.

490 Business Strategy. (3) This capstone course integrates functional perspectives in a general manager's view of organizational competition under uncertainty; explores frameworks analyzing external environments and firm resources; building and sustaining competitive advantage; and develops skills in designing, communicating, and implementing strategies. Prerequisites: senior business major, 12 s.h. in major area, and FIN 311 or 331, MGT 349, and MKTG 327. Corequisite: BAT 490.

499 Management Knowledge Assessment. (0) All Management majors are required to complete the knowledge assessment examination prior to graduation. Prerequisites: senior standing; Management major. Graded S/U only.

MARKETING (MKTG)

317 International Business. (3) (Global Issues) Introductory review of international trade emphasizing the role of marketing and distribution in directing the flow of products to and from the United States. The course also focuses on the impact of competition, politics, regulation, culture, finance, and technology.

327 Marketing Principles. (3) A general examination of the basic elements of the marketing functions. Such elements include the development, pricing, promotion, and distribution of goods and services studied in the framework of strategic and tactical decision-making by marketing managers as applied to business and non-business situations. Prerequisites: ACCT 200 or ACCT 201 or ECON 232 or junior standing.

329 Marketing Research. (3) This course concentrates on the fundamental techniques involved in determining problems, gathering and processing secondary and primary sources of information to solve marketing problems. Students will apply the research process to particular problem areas or cases through computer applications and statistical analysis. Prerequisites: MKTG 327 and STAT 171 or equivalent.

331 Promotional Concepts. (3) Emphasis is on promotion as the communication function of marketing. Attention is given to marketing communications theory, concepts, and research with in-depth treatment of all elements of the promotion mix (i.e., advertising, sales promotion, personal selling, public relations, and point-of-purchase communications). Prerequisite: MKTG 327.

333 Consumer Behavior. (3) The application of behavior science concepts and methods to the solution of marketing problems and the development of marketing strategies. Psychological and socio-cultural factors are examined in relation to the consumer decision-making process. Prerequisite: MKTG 327.

335 Professional Selling. (3) Learning to develop and apply essential professional selling skills through the use of interpersonal communication to effectively market yourself and the organization you represent. Basic concepts, processes, and techniques for selling, including customer analysis, prospecting, developing rapport, handling objections, customer service, and other related areas. Prerequisite: MKTG 327.

337 Services and Product Marketing. (3) This course provides students with skills to understand and effectively manage both services and product marketing strategies. Students will apply these skills in developing a new service in either a profit or non-profit context. Prerequisite: MKTG 327.

343 Retailing Management. (3) Retailing is studied from a decision-making approach. Topics covered include retailing strategy, consumer shopping behavior, human resource planning, the retail mix, communications, merchandising, and location. Prerequisite: MKTG 327.

371 Internet Marketing. (3) An examination of how businesses are using the Internet as a viable marketing tool. Understanding the impact of the World Wide Web on the marketing mix and examine the unique competencies of this technology. Prerequisite: MKTG 327.

400 Marketing Internship. (1–12, repeatable to 12) Integrates marketing theories with application to actual business practice. All internships are supervised by a faculty coordinator and an executive in the business firm. In order to receive maximum credit, the student must be in a full-time position for a minimum of 16 weeks. Proportional credit will be granted for internships of shorter duration or with less working hours. These hours cannot be applied toward meeting the requirements for a Marketing minor. Prerequisites: Marketing major or minor, minimum junior standing, 2.75 GPA, 9 s.h. of Marketing coursework, and written approval of School Director. Graded S/U only.

411 Mobile Marketing. (3) An exploration of the applications of mobile marketing to increase brand awareness, generate customer profile information, increase site traffic, improve customer loyalty, and enhance revenues. Prerequisite: MKTG 327.

417 International Marketing. (3) (Global Issues) Emphasis is on marketing planning and strategies in the global environment. An examination of the cultural, political, economic, and other important factors affecting the international marketer and international marketing operations. Prerequisite: MKTG 327.

421 Seminar in Marketing Technologies. (3) A seminar course on the latest technological advances being deployed by marketers. Students will learn to understand and evaluate the impact of potential
429 Marketing Measurement and Pricing. (3) This course provides students with skills to measure the effectiveness of marketing strategies with emphasis on the pricing component of the marketing mix. Computation, application, and interpretation of commonly used marketing measurements provide students the ability to evaluate marketing decisions. Prerequisite: MKTG 327. Prerequisite or Corequisite: CS 302.

431 Direct Marketing Management. (3) An examination of the concepts, strategies, and applications involved in direct marketing, including direct mail, direct response advertising, telemarketing, category management, and co-ops. Measure accountability, lists, database management, and the integration of direct marketing programs into the marketing mix are stressed. Prerequisite: MKTG 327.

432 Advertising and Promotional Campaigns. (3) Planning and development of advertising campaigns by students. A skills and techniques course which focuses on the application of advertising, sales promotion, and public relations concepts to the development of a promotional campaign. Prerequisites: MKTG 331, 333, or permission of the instructor.

441 Customer Relationship Management. (3) A systematic overview of the background and the methods of facilitating customer relationships for competitive advantage including a discussion of the concepts and frameworks surrounding the process of developing and maintaining efficient customer relationship management. Prerequisite: MKTG 327 or SCM 211.

460, 461 Independent Study in Marketing. (1–3 each, not repeatable) The student works with a Marketing professor to pursue an investigation of special marketing interest. Prerequisites: Marketing major or minor, a grade of "C" or higher, 12 s.h. of Marketing coursework, written permission of the professor and School Director.

470 Marketing Practicum in Survey Research. (3) Student will work one-on-one with a faculty member on a research project in survey research. This course brings together the theory and practice of survey research methods. Prerequisite: Successful completion of MKTG 329 and POLS/SOC 432.

497 Marketing Management. (3) The integration and implementation of marketing strategy by the marketing management manager is the focus of this capstone course. Through participative analysis and discussion, each student is exposed to the dynamic marketing environment. Prerequisites: MKTG 327, an additional 6 s.h. of Marketing coursework, and senior standing.

SUPPLY CHAIN MANAGEMENT (SCM)

211 Supply Chain Management. (3) A survey course in Supply Chain Management. The student will study strategies involving quality and service, procurement, inventory management, warehousing, material handling, transportation, supplier selection, information flows, international trade, and rigorous statistical analysis of business uncertainties.

330 Warehouse Management. (3) An examination of the body of handling and warehousing knowledge common to all materials management. Should provide the student with skills necessary to cope with problems in the areas of purchasing, inventory control, traffic management, and production. Prerequisite: SCM 211 or permission of instructor.

340 Transportation Management. (3) Deals with the day-to-day buying and selling of transportation services. Reviews the basic job of a traffic manager, the decision variables considered by a traffic manager, the organization position of traffic management, and freight classifications and tariff interpretations. Prerequisite: SCM 211 or permission of instructor.

400 Supply Chain Management Internship. (1–12, repeatable to 12) Integrates Supply Chain Management theories with application to actual business practice. All internships are supervised by a faculty coordinator and an executive in the business firm. A maximum of 3 s.h. can be applied toward meeting the requirements for a Supply Chain Management major or minor. Prerequisites: SCM major or minor; written approval of the School Director; completion of SCM 211 with a grade of "C" or higher, 2.0 GPA, and BCOM 320 or COMM 241 or permission of instructor. Graded S/U only.

411 Global Supply Chain Management. (3) (Global Issues) Advanced study of global Supply Chain Management and the managerial functions involved in the movement of goods into and out of businesses. Prerequisite: SCM 211 or permission of the instructor.

451 Supply Chain Negotiation. (3) Course examines the various aspects and processes of supply chain negotiation, particularly between buyers and sellers of goods and services. Through instruction and practice, students gain knowledge and understanding of the principles and techniques of business bargaining. Cross-cultural comparisons will be included. Prerequisite: SCM 211 or consent of instructor.

452 Supply Management. (3) A study of procurement with specific attention to strategic sourcing of goods and services. Emphasis is on supplier relationship management; supplier selection, evaluation, and development; as well as e-sourcing, lean supply chain management, contract management, and purchasing law and ethics. Prerequisites: SCM 211 or MGT/OM 352 or permission of instructor.

455 Project Management. (3) Examines principles of selecting, organizing, staffing, controlling, and directing projects in operations/supply chain management. Topics include developing cross-functional teams, leading and mentoring team members, applying critical thinking methods while meeting outcomes and objectives, CPM/PERT techniques, and utilizing project management software. Prerequisite: SCM 211 or MGT/OM 352 or SCM 211 or permission of instructor.

460, 461 Independent Study in Supply Chain Management I, II. (1–3 each, not repeatable) An independent research or study course on Supply Chain Management problems for selected students. Prerequisites: SCM major or minor; written approval of the School Director; completion of SCM 211 with a grade of "C" or higher, 12 s.h. of SCM coursework, and permission of instructor and School Director.

465 Supply Chain Risk Management. (3) Examination of effective risk management in global supply chains. Topics include: identification of risk sources; contingency planning; risk and disaster mitigation and recovery; responses to government regulatory, sustainability, societal, and stakeholder demands; and financial aspects of managing supply chain risk. Prerequisites: SCM 340 or 411 or 453 or permission of instructor.

470 Inventory Strategy. (3) A review of current and emerging strategies for managing and controlling inventory levels. Emphasis is on the development of quantitative techniques for successfully managing inventory costs and supply. Prerequisites: SCM 211 and STAT 171 or equivalent.

499 SCM Knowledge Assessment. (0) All Supply Chain Management majors are required to complete the knowledge assessment examination prior to graduation. Prerequisites: senior standing; Supply Chain Management major. Graded S/U only.

Program Offerings and Locations:
- Bachelor of Science in Mathematics: Macomb
- Minor in Applied Mathematics: Macomb
- Minor in Mathematics: Macomb, Quad Cities
- Minor in Middle Level Mathematics Teaching: Macomb
- Minor in Philosophy: Macomb

For student learning outcomes, please see wiu.edu/provost/learningoutcomes.

Mathematics and philosophy exemplify logical analysis in its highest form. Logic is shared by the two disciplines and binds them together. The study of mathematics and philosophy develops students’ abilities to read critically, write logically, analyze complementary and contrasting assumptions, and give rigorous justification and arguments. Mathematical knowledge and skills are tools for modeling and solving quantifiable problems; philosophical training provides tools for analyzing and understanding fundamental issues arising out of human thought and existence.

Mathematics, literally knowledge, study, learning, investigates the logic of structure, quantity, and change, developing concepts that provide the foundations and landscape of many fields of knowledge. Mathematicians engage in determining exact explanations for the truth of subtle and complex propositions. Mathematical ideas, studies, and findings range from abstract and theoretical to applied and practical. Applied mathematics and statistics lend effectiveness to study of many fields such as sciences, engineering, economics, finance, and risk management.

Philosophy, literally love of wisdom, is the study of the intellectual foundations of every area of human thought and action. Philosophers engage in critical examination of such topics as existence, knowledge, values, religion, science, language, mind, logic, and reasoning. Studying philosophy develops analytic reasoning, promotes clear writing, and provides students with the tools for success in many other professions, such as law, finance, business, public relations, journalism, consulting, and public policy making.

The department offers Mathematics and Statistics courses that fulfill the Natural Sciences and Mathematics requirement of the University General Education Curriculum, as well as Philosophy courses fulfilling the Humanities requirement. Degree programs offered include a major and minor in Mathematics, a comprehensive major in Mathematics Teacher Education (for licensure as a secondary teacher), a minor in Applied Mathematics, a minor in Middle Level Mathematics Teaching (for endorsement in the area of mathematics as a 5th-8th grade teacher), and a minor in Philosophy.

GradTrac is available to Mathematics, Data Science and Statistics, and Actuarial Science majors. See page 79 for information about GradTrac.

Honors Curriculum—Academically qualified students in this department are encouraged to complete an honors curriculum in University Honors, Honors in the Major, or General Honors. All Honors students must complete the one-hour honors colloquium (G H 299). General Honors includes General Honors coursework. Honors in the Major includes honors work in the major. University Honors combines Honors in the Major and General Honors.
For more information about honors curricula, see page 100 or visit the Centennial Honors College website at wiu.edu/Honors.

Integrated Baccalaureate and Master's Degree Program—An integrated baccalaureate and master's degree program is available for the Bachelor of Science in Mathematics (Mathematics and Data Science and Statistics options): Master of Science in Mathematics. An integrated degree program provides the opportunity for outstanding undergraduates to earn both degrees in five years. Please refer to the Graduate Studies catalog for details about the integrated program.

Advanced Placement (AP) and College Level Examination Program (CLEP)

Students scoring 3 or higher on the AP Calculus AB Examination will receive 4 s.h. of credit for MATH 133 and advanced placement into MATH 134. Students scoring 5 or 4 on the AP Calculus BC Examination will receive 8 s.h. of credit for MATH 133 and 134 and advanced placement into MATH 231. Students scoring a 3 on the AP Calculus BC Examination will receive 4 s.h. of credit for MATH 133 and advanced placement into MATH 134.

Students scoring 3 or higher on the AP Statistics Examination will receive 3 s.h. of credit for STAT 171.

Students scoring 53 or higher on the CLEP Calculus Examination will receive 4 s.h. of credit for MATH 133 and advanced placement into MATH 134.

Proficiency Examinations

Proficiency examinations are available from the Proficiency Examination Coordinator (Morgan Hall 476) for the material covered in MATH 133, 134, 231, 137, 138, 139, and STAT 276. The department may approve proficiency examinations in some upper division courses if sufficient justification and evidence of knowledge are presented. Students will receive the appropriate hourly credit for each course for which they pass the proficiency examination.

Advisement

The Department of Mathematics and Philosophy provides advising for:

1. Mathematics majors and minors
2. Philosophy minors
3. Transfer students
4. Area of endorsement in Mathematics for Teacher Education majors

A person seeking advice in one of these areas should contact the Department of Mathematics and Philosophy.

Degree Program

Bachelor of Science—Mathematics

All students seeking the Bachelor of Science in Mathematics must complete I, II, and III.A, III.B, or III.C below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

In accordance with the Illinois State Board of Education licensure rule, all candidates seeking a Professional Education License or endorsement are required by Western Illinois University to obtain a grade of “C-” or better in all directed general education courses, all core courses, and all courses in the option. This rule does not supersede course prerequisite requirements in the catalog that specify a letter grade.

Please see the Teacher Education section of this catalog (p. 346) for more information about WIU's Teacher Education Program.
I. University General Education and College of Arts and Sciences Curriculum Requirements (p. 86) .................................................... 55 s.h.
Except Teacher Education students must complete the University General Education Curriculum Requirements—43 s.h. (p. 70)

II. Core Courses ........................................................................ 19 s.h.
MATH 133, 134, 231, 311, 341, and either 391† or 444†

III. Options of Study (select A, B, C, or D)

A. Mathematics
1. Special Courses ........................................................................ 12 s.h.
   a. MATH 421 and 435 ................................................................. 6 s.h.
   b. Choose one course from: MATH 333, 383, or 433 .......... 3 s.h.
   c. Choose one course from: MATH 481 or STAT 471 .......... 3 s.h.
2. Directed Electives ................................................................... 9 s.h.
   Three additional approved upper-division courses in a single focus area.
   Must include one 400-level course. Focus areas include (but are not limited to) general mathematics, applied mathematics, statistics, natural sciences, and economics. If double majoring in one of the focus areas, approved focus courses may be satisfied by the second major. May include 3–6 s.h. of internship, MATH 496.
3. Any Minor ................................................................................ 16–21 s.h.
4. Open Electives .......................................................................... 1–6 s.h.
5. Other: Choose one course from CS 114 or 214 ...................... 3 s.h.

B. Mathematics—Teacher Education
1. Special Courses ....................................................................... 24 s.h.
   a. STAT 276 ........................................................................... 3 s.h.
   b. MATH 304, 310, 355, 383, 389, 421 ................................. 18 s.h.
   c. MATH 433 or 435 ................................................................. 3 s.h.
2. Other ...................................................................................... 43 s.h.
   a. 8 s.h. science sequence ....................................................... 8 s.h.
   b. MATH/EDUC 439 ............................................................... 4 s.h.
   c. EDS 202, 301, 303 (2 s.h.), 304 (1 s.h.), 305, 401 .......... 13 s.h.
   d. RDG 387 or ENG 366 .......................................................... 2 s.h.
   e. SPED 210 and 390 ............................................................. 4 s.h.
   f. Student Teaching ............................................................... 12 s.h.

C. Data Science and Statistics
1. Special Courses ....................................................................... 18 s.h.
   a. MATH 383 and 481 ................................................................. 6 s.h.
   b. STAT 276 and 478 ................................................................. 6 s.h.
   c. DS 435 and 480 ................................................................. 6 s.h.
2. Directed Electives ................................................................. 6 s.h.
   a. Choose one course from: DS 303 or STAT 474 .......... 3 s.h.
   b. Select 3 s.h. from approved Computer Science (CS),
      Decision Sciences (DS), Mathematics (MATH), or
      Statistics (STAT) courses .................................................. 3 s.h.
3. Other: CS 214, 250, 351, 470 ............................................. 12 s.h.
4. Approved Minor ...................................................................... 16–21 s.h.

Note: A minor in Algorithms and Data Management is strongly encouraged.

D. Actuarial Science
1. Special Courses ....................................................................... 15 s.h.
   a. MATH 383 and 370 ................................................................. 6 s.h.
   b. STAT 276, 471, and 472 ..................................................... 9 s.h.
2. Directed Electives .................................................................... 6 s.h.
   Select 6 s.h. from approved Computer Science (CS), Decision Sciences (DS), Finance (FIN), Mathematics (MATH), or Statistics (STAT) courses.
   May include 3–6 s.h. of internship, MATH 496
Mathematics and Philosophy

3. Other ................................................................. 18 s.h.
   a. ACCT 201, 371; FIN 331 ........................................ 9 s.h.
   b. ECON 231 and 232 ............................................. 6 s.h.
   c. CS 114 or 214 .................................................. 3 s.h.

4. Any Minor .......................................................... 16 s.h.

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) any major’s discipline-specific global issues course; or 4) an approved Study Abroad program. † MATH 391 or MATH 444 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.

Minors

Minor in Applied Mathematics .................................................. 18–19 s.h.
   1. MATH 133 or 137 ......................................................... 3–4 s.h.
   2. STAT 171 or 276 ....................................................... 3 s.h.
   3. Select three of the following courses, with at least 6 s.h. in courses numbered above 300: MATH 138, 255, 311, 370, 383, 481; STAT 471, 473, 474, 478 ......................................................... 9 s.h.
   4. Select one of the following courses:
      ACCT 201; CS 214; DS 480, 490; ECON 231; FIN 331 ......................................... 3 s.h.

   Note: This minor is not open to students majoring in Mathematics.

Minor in Mathematics .............................................................. 17 s.h.
   1. MATH 133, 134 .......................................................... 8 s.h.
   2. At least 9 hours of approved Mathematics Electives with at least 6 of the hours in courses numbered above 300 ................................................. 9 s.h.

   Note: Students majoring in Physics and minoring in Mathematics may count PHYS 406 as one three-hour Mathematics elective course numbered above 300.

Minor in Middle Level Mathematics Teaching ............................ 24 s.h.
   1. MATH 128, 137, 260, 367, 402, 407; STAT 171 ................. 21 s.h.
   2. MATH 406 or MATH 408 ............................................... 3 s.h.

   Note: This minor is offered in conjunction with the major in Middle Level Education. By itself, this minor will not be sufficient for education endorsement purposes.

Minor in Philosophy .............................................................. 18 s.h.

   Complete a minimum of six courses (18 s.h.) in Philosophy, three of which (9 s.h.) must be 300- or 400-level courses.

Courses Not Counting toward a Mathematics Major or the Minor in Mathematics (#)

The following courses do not count towards a Mathematics major or the minor in Mathematics: MATH 099N, 100, 101, 102, 103, 123, 128, 129, 137, 138, 139, 260, 362, 364, 367, 402, 406, 407, 408; STAT 171.

   Note: The symbol # is placed by each of the numbers above in the course descriptions which follow.

Course Descriptions

MATHEMATICS (MATH)

#100 Core Competency in Mathematics. (3) Introduction to and use of mathematics in problem solving, modeling, and drawing inferences, through a study of diverse examples and cases of real-world problems. Prerequisite: one year of high school geometry
with grade of C or higher and MATH 099N or equivalent with a grade of S (C grade or higher), or WIU placement. Graded A, A-, B+, B, B-, C+, C, or U.

#101 Concepts of Mathematics. (3) (General Education/Mathematics) An introduction to sets, logic, counting and probability, and statistics to provide students with an insight into mathematical reasoning and its applications. Prerequisite: MATH 100 or equivalent (C grade or higher) or WIU placement.

IAI: M1 904.

#102 Creative Perspectives in Mathematics. (3) (General Education/Mathematics) Three or four topics chosen from Mathematics of social choice and game theory, management science and graph theory, linear programming, mathematics of finance, geometry and symmetry, emphasizing applications. Prerequisite: WIU placement, or MATH 100 or equivalent (C grade or better).

IAI: M1 904.

#103 Technical Mathematics. (3) Topics in algebra, geometry, and trigonometry with applications in technical fields. Ratios and proportions, functions and graphs, equations and systems of linear equations. Area and volume of plane and solid geometric objects. Right triangle trigonometry, laws of sines and cosines. Prerequisite: MATH 100 or equivalent (C grade or higher) or WIU placement.

#123 Modeling with Mathematical Functions. (3) (General Education/Mathematics) The application of numeric, geometric, algebraic, and trigonometric models to analyze situations and solve problems from natural, social, and applied sciences, with integrated use of technology. Not open to students with credit in MATH 128. Prerequisite: MATH 100 (grade of C or higher) or WIU placement.

IAI: M1 907.

#128 Precalculus Algebra. (3) Polynomic, exponential, logarithmic, and rational functions. Emphasis on algebraic manipulation. Not open to students with credit in MATH 131. Prerequisite: WIU placement, or MATH 100 or equivalent (C grade or better).

#129 Precalculus Trigonometry. (3) Trigonometric and inverse trig functions, graphing, proving identities, solving equations, and additional trig topics. Some non-trig material such as polar coordinates and complex numbers are included. Not open to students with credit in MATH 131. Prerequisite: MATH 128 (C grade or better) or WIU placement.

#133 Calculus with Analytic Geometry I. (4) (General Education/Mathematics) Derivatives and integrals of elementary functions with applications and analytic geometry. Prerequisite: MATH 129 or equivalent (C grade or better).

IAI: M1 900-I; MTH 901.

#134 Calculus with Analytic Geometry II. (4) (General Education/Mathematics) Further techniques of integration with applications, additional topics in analytic geometry, infinite series. Prerequisite: MATH 133 (C grade or better).

IAI: M1 900-2; MTH 902.

#137 Applied Calculus I. (3) (General Education/ Mathematics) Introduction to differential and integral calculus with applications to business and social science. Not open to students who have credit for MATH 133 or equivalent. Prerequisite: MATH 128 (C grade or better) or MATH 129, or equivalent.

IAI: M1 900-B as MATH 137/138 sequence.

#138 Applied Calculus II. (3) (General Education/ Mathematics) Extension of basic operations to new functions including functions of several variables with appropriate applications. Prerequisite: MATH 137 (C grade or better).

IAI: M1 900-B as MATH 137/138 sequence.

#139 Applied Linear Algebra and Finite Mathematics. (3) (General Education/Mathematics) Matrix algebra with applications. Topics from finite mathematics. Not open to students with credit in MATH 311. Prerequisite: MATH 128 (C grade or better) or equivalent.

IAI: M1 900-3; MTH 903.

255 Discrete Mathematical Structures for Computer Science. (3) Topics to be studied include sets, logic, method of proof, combinatorial methods, graph theory, and trees. Prerequisite: MATH 128 or equivalent.

#260 Numeric, Algebraic, and Geometric Reasoning for Teaching and Learning. (4) A mathematics course for elementary and middle school teachers examining numbers, algebra, geometry, and measurement; featuring problem solving, applications, and concrete and visual representations. Prerequisite: WIU placement or MATH 128 (C or better) or equivalent.

280 Topics in Computer-Assisted Mathematics. (3) Computer tools in service to mathematical experimentation and investigation in various subjects; tools include a Computer Algebra System, such as Mathematica, and other mathematical software; subjects include calculus, number theory, algebra, geometry, and other areas. Prerequisites: MATH 231 or equivalent.

304 Pedagogical Content Knowledge and Reading in Secondary School Mathematics. (4) Study of the secondary Mathematics curriculum for purposes of representing knowledge meaningfully for all students. Focus is on conceptual content knowledge, methods of inquiry, appropriate use of technology in the classroom, creation of learning experiences, and instruction in reading Mathematics. Prerequisites: 2 S (C grade or better), and EDS 301; or permission of the department chair. Corequisite: EDS 303 (2 s.h.).

310 Euclidean and Non-Euclidean Geometry. (4) A rigorous study of Euclidean geometry through constructions and proofs. Topics include Euclidean transformations, triangles, quadrilaterals, circles, congruence and similarity, area, three-dimensional solids, volume, and surface area. Non-Euclidean geometry is introduced via spherical geometry and hyperbolic geometry. Not open to students with credit in MATH 211 or MATH 411. Prerequisite: MATH 134 or equivalent, or consent of the instructor.

311 Linear Algebra. (3) Systems of linear equations, matrix algebra, vector spaces, linear transformations, and related topics. Prerequisite: MATH 134; or MATH 138; or MATH 133 and MATH 255; or MATH 137 and MATH 255.

333 Ordinary Differential Equations. (3) Elementary theory and applications of ordinary differential equations, including linear equations of first and second order and linear systems. Prerequisite: MATH 231.

IAI: M1 912.

334 Differential Equations Computation Laboratory. (1) The computer as an investigative tool to study the theory and applications of differential equations. Basic numerical methods such as Euler and Runge-Kutta are illustrated. Prerequisites: CS 214 and co-enrollment in MATH 333, or consent of instructor.
341 Logic and Sets. (3) Propositional and predicate logic, proof, induction, sets and their finite and infinite operations, relations and functions, Boolean algebra, and cardinality of sets. Prerequisite: MATH 134 (C grade or better).

355 Applied Combinatorics. (3) Applications of enumerations (counting) and graph theory (networks, circuits, state standards) are covered. Combinatorial problems including applications in computer science and operations research are solved through a careful logical analysis of possibilities. Prerequisite: STAT 276 or MATH 311.

#362 Teaching Mathematics in PreK–2nd Grade. (3) Methods and content for planning, implementing, and assessing math curriculum for children in PreK–2nd grade. Prerequisites: MATH 260 or MATH 273; MATH 260 or equivalent (C grade or better).

#364 Teaching Elementary School Mathematics. (4) An examination of pedagogical mathematics content in elementary school (Grades 1–6), the development of lesson plans and assessments implementing national and state standards, and integration of technology in the mathematics classroom. Prerequisites: MATH 260 or equivalent (C grade or better) or permission of the College of Education and Human Services; full acceptance into the Teacher Education Program.

#367 Teaching Middle School Mathematics. (3) An examination of the pedagogical Mathematics content in middle school (Grades 5–8), the development of lesson plans and assessments implementing national and state standards, and integration of technology in the Mathematics classroom. Prerequisite: MATH 260 or equivalent (C grade or better) or permission of the College of Education and Human Services; full acceptance into the Teacher Education Program.

370 Financial Mathematics. (3) Calculus based mathematical study of compound interest and annuities with applications to problems in finance. This course covers the mathematics of investment topics for the Financial Mathematics Exam for the Society of Actuaries. Prerequisite: MATH 134 or consent of instructor.

383 An Introduction to Mathematical Modeling. (3) Modeling using graphs, proportionality, and the derivative; the modeling process; model fitting; optimization, dimensional analysis. Prerequisite: MATH 133 and either STAT 171 or STAT 273; or consent of instructor.

389 Teaching of Algebra Seminar. (1) A course for students concurrently assigned to assist in laboratory sections of MATH 099N. The course will provide students with a weekly forum to reflect upon and discuss experiences from the algebra classroom. Prerequisite: 2.50 GPA or higher in Mathematics with permission of the department chair. Graded S/U only.

390 Independent Study. (1–3, repeatable to 3) Prerequisites: sophomore standing and consent of instructor.

391 Writing in the Mathematical Sciences. (1) Issues of technical writing and the effective presentation of Mathematics in formal and informal formats. Instruction and practice in writing. Writing Instruction in the Disciplines (WID) course. Prerequisites: MATH 231; ENG 280. Corequisite: Any 300- or 400-level MATH or STAT course counting toward a major in Mathematics.

#402 Investigations in School Geometry. (2) A conceptual development of geometry through the investigation of geometric relationships and informal understandings leading to formal deductions. Middle and junior high school emphasis. Prerequisite: MATH 123 or MATH 128 or equivalent.

#406 Problem Solving and the History of Mathematics. (3) Various problems, their solutions, related mathematical concepts, and their historical significance are analyzed through investigation of classic problems and their connection to middle school mathematics. Contributions by Archimedes, Descartes, Eratosthenes, Euler, Gauss, Pascal, Pythagoras, and others are studied. Open only to students majoring in an Elementary Education program or Middle Level Education program. Prerequisite: MATH 123 or 128 or equivalent.

#407 Number Theory Concepts in School Mathematics. (3) Divisibility, prime numbers, perfect numbers, modular arithmetic, linear Diophantine equations, and related topics. Open only to students majoring in an Elementary Education program or Middle Level Education program. Prerequisite: MATH 123 or MATH 128 or equivalent.

#408 Mathematical Topics and Technology for Middle School (EFG). (3) The study of computer programming, algorithms, and technology resources to investigate concepts and connections in the content areas of middle school Mathematics. Prerequisite: MATH 123 or MATH 128 or equivalent.

411 Geometry. (3) A rigorous study of Euclidean and non-Euclidean geometries. The necessary axioms are introduced and several models including the hyperbolic geometry are examined. Prerequisite: MATH 341.

421 Abstract Algebra. (3) An introduction to the basic properties of groups, rings, and fields. Prerequisite: MATH 341.

424 Advanced Linear Algebra. (3) Matrix algebra, vector spaces, linear independence, bases, linear transformations, canonical forms, inner product spaces. Prerequisite: MATH 311 and 341, or equivalent.

430 Multivariable Calculus. (3) The algebra of functions, continuity, differentiation, and integration of n-place functions, and related topics. Prerequisites: MATH 231 and 311.

433 Complex Variables and Applications. (3) Functions of a complex variable including differentiation, integration, series, residues, and conformal mappings. Applications to evaluation of real integrals and boundary value problems. Prerequisite: MATH 231.

435 Introduction to Real Variables I. (3) Topology of the real line, sequences, limits, and series. Rigorous introduction to the study of one-variable functions, continuity, differentiation, integration, and related topics. Prerequisites: MATH 231 and 311.

439 Teaching and Assessment in Secondary School Mathematics. (4) A study of teaching strategies and current trends in secondary mathematics education. Students will focus on curriculum, lesson-planning, and assessment, and will learn to effectively incorporate technology into the teaching and learning of mathematics. Open to Teacher Education majors only. Prerequisite: 2.50 GPA or higher in Mathematics; MATH 304, MATH 341, and co-registration in EDS 304; or permission of the department chair.

441 Mathematical Logic. (3) An introduction to some of the principal topics of mathematical logic. Topics include propositional calculus, quantification theory, the Completeness Theorem, formal theories, models of theories, and recursion theory. Prerequisite: MATH 341.

444 Undergraduate Research Project. (1-2) Dedicated, individual pursuit of a mathematical topic/application from an area of research that is presented within the department culminating in a final paper or presentation to peers and faculty. Writing Instruction in the Disciplines (WID) course. Prerequisites: MATH 341, ENG 280, junior standing, and consent of instructor.

480 Student Teaching. (12) See STCH 480 in Teacher Education curriculum. Credit for Teacher Education major only.

481 Numerical Analysis I. (3) A survey of current methods in numerical analysis. Error analysis, solution of nonlinear equations and systems of linear equations,
polynomial interpolation and approximations, and related topics. Prerequisites: CS 214 and MATH 311; or consent of instructor.

488 Models in Applied Mathematics. (3) Theory and computer exploration of mathematical models using difference equations, differential equations, and dynamical systems. Applications from the sciences. Prerequisites: CS 214, MATH 231 and 311; or consent of instructor.

496 Internship. (3–12, repeatable once to a combined maximum of 12) An internship in an approved area related to applied mathematics or statistics, conducted at a professional institution or government organization. It is expected that the experience will culminate in a final paper or portfolio. Only 3 s.h. per semester may be included in the major. A maximum of 6 s.h. may be included in the major. Prerequisites: completion of 12 s.h. of upper-division MATH courses and approval of the department. Graded S/U.

497 Honors Mathematics Seminar. (1–3, repeatable to 6) Prerequisites: 3.00 GPA in Mathematics and either MATH 341 or consent of instructor.

STATISTICS (STAT)

#171 General Elementary Statistics. (3) (General Education/Mathematics) Principles and applications of sampling, estimation, and hypothesis testing. Prerequisite: WU placement, or MATH 100 or equivalent (grade of C or better). IAI: M1 902.

276 Introduction to Probability & Statistics. (3) Probability laws, random variables, probability distribution functions, population parameters, counting rules, statistics and sampling, estimating, testing hypotheses, regression, and correlation. Prerequisite: MATH 133 or 137 or equivalent.

471 Introduction to Mathematical Statistics I. (3) The mathematical foundations of probability and statistics, principles of probability, sampling, distributions, moments, and hypothesis testing. Prerequisite: MATH 138 or 231 or equivalent.

472 Introduction to Mathematical Statistics II. (3) Continuation of STAT 471 including further topics in estimation and hypothesis testing. Prerequisite: STAT 471.

473 Nonparametric Statistical Methods. (3) Systematic development of nonparametric statistical methods. Topics include: order statistics, ranks, empirical distribution functions, point and interval estimations, hypothesis tests such as sign rank test, Mann-Whitney-Wilcoxon, Kruskal-Wallis, Kolmogorov-Smirnov, permutation, and bootstrap methods. Prerequisite: STAT 276 or 471 or consent of the instructor.

474 Regression and Correlation Analysis. (3) Least squares theory; correlation theory; simple, multiple, and stepwise regression; computer assisted model building; and applied problems. Prerequisite: STAT 276 or equivalent.

478 Analysis of Variance. (3) A study of analysis of variance and covariance with applications. Includes experimental design. Prerequisite: STAT 276 or equivalent.

PHILOSOPHY (PHIL)

100 (Formerly PHIL 105) Introduction to Philosophy. (3) (General Education/Humanities) An introduction to some of the fundamental problems and major theories in philosophy. Topics may include the existence of God, knowledge and skepticism, the nature of mind, free will and determinism, and the nature of ethical reasoning. IAI: H4 900.

120 Contemporary Moral Problems. (3) (General Education/Humanities) An introduction to ethics, with an emphasis on applied ethics and moral reasoning. Different moral theories will be used to explore topics such as sexuality, reproductive issues, animal rights, environmental ethics, racial and gender discrimination, euthanasia, and capital punishment. IAI: H4 904.

140 Logic and Reasoning. (3) (General Education/Humanities) An introduction to logic and reasoning with emphasis on practical applications including scientific reasoning. The course examines methods for evaluating the structures of inductive and deductive arguments and how language is used in argumentation. IAI: H4 906.

205 Philosophy, Law and Society. (3) (General Education/Humanities) An introductory course considering some fundamental philosophical problems concerned with law and society including power and authority, anarchy and freedom, law and justice, crime and punishment.

220 (Cross-listed with WS 220) Feminism and Ethics. (3) (General Education/Multicultural Studies) A multicultural and comparative investigation of feminist issues in ethics and women's contributions to moral theory. Not open to students with credit in WS 220.

300 History of Ancient Philosophy. (3) A study of the origin of Western philosophy and the development of philosophical ideas in Ancient Greece, beginning with the earliest Pre-Socratic philosophers and including Socrates, Plato, and Aristotle. BGS online writing course. Prerequisite: one 100- or 200-level Philosophy course or consent of instructor.

310 History of Modern Philosophy. (3) An examination of the central metaphysical and epistemological doctrines of such seventeen and eighteenth century philosophers as Descartes, Locke, Berkeley, Hume, and Kant. Topics may include knowledge, skepticism, innate ideas, substance, God, causality, mind, and perception. Prerequisite: one 100- or 200-level Philosophy course or consent of instructor.

312 Philosophical Writing. (1) Instruction and experience in writing a paper which explains and critically evaluates a philosophical text or argument. Writing Instruction in the Disciplines (WID) course. Prerequisites: ENG 280 and consent of department chairperson. Corequisite: any 300- or 400-level Philosophy course.

320 Analytic Philosophy. (3) An examination of twentieth century philosophy through the writings of Russell, Wittgenstein, the logical positivists, and other important figures of the analytic tradition. Topics may include knowledge of the external world, language and reality, and the possibility of metaphysical knowledge. Prerequisite: one 100- or 200-level Philosophy course or consent of instructor.

325 Existentialism. (3) An examination of the ideas of freedom, self/other, the value of authenticity, death, and the meaning of existence in the works of major existentialist philosophers such as Kierkegaard, Nietzsche, Heidegger, Sartre, De Beauvoir, and Camus. Prerequisite: one 100- or 200-level Philosophy course or consent of instructor.

330 Moral Philosophy. (3) A study of classical and contemporary ethical ideas and theories such as moral relativism, utilitarianism, Kantian ethics, virtue ethics, and non-human nature. Topics include the moral status of animals and other living things, environmental justice regarding pollution and conservation of natural resources, and the value of wilderness protection.
Mathematics and Philosophy

Prerequisite: one 100- or 200-level Philosophy course or consent of instructor.

335 Epistemology. (3) A critical study of selected topics in epistemology, such as the analysis of knowledge, skepticism, a priori knowledge, and the nature and structure of justification. Prerequisite: one 100- or 200-level Philosophy course or consent of instructor.

340 Symbolic Logic. (3) A study of deductive logic covering the logic of sentences and the logic of predicates. Prerequisite: PHIL 140 or consent of instructor.

345 Metaphysics. (3) A critical study of selected topics in metaphysics, such as the nature of properties, possible worlds, personal identity, free will, the mind, time, and the possibility of metaphysical knowledge. Prerequisite: one 100- or 200-level Philosophy course or consent of instructor.

400 Social and Political Philosophy. (3) An investigation of some of the philosophical problems arising from political society, such as authority and obligation, freedom and rights, justice and equality, coercion and punishment. Prerequisite: one 100- or 200-level Philosophy course or consent of instructor.

405 Philosophy of Religion. (3) A critical examination of the philosophical issues arising from religious beliefs, utilizing historical and contemporary writings. Topics may include the existence of God, evil, faith, religious pluralism, and the relation between religious beliefs and ethics. Not open to students with credit in REL 405. Prerequisite: one 100- or 200-level Philosophy course or consent of instructor.

415 Philosophy of Science. (3) An examination of philosophical problems arising from the natural sciences such as the nature of scientific explanation and the justification of scientific theories. Prerequisite: one 100- or 200-level Philosophy course or consent of instructor.

420 Philosophy of Law. (3) An examination of philosophical problems raised by law including the nature and aims of law, the relation of law and morality, the rationale of legal responsibility and punishment, and legal obligation and the rule of law. Prerequisite: one 100- or 200-level Philosophy course or consent of instructor.

425 Philosophy of Mind. (3) A critical study of selected topics in the philosophy of mind, such as consciousness, intentionality, dualism, the varieties of materialism, functionalism, and artificial intelligence. Prerequisite: one 100- or 200-level Philosophy course or consent of instructor.

440 Legal Reasoning. (3) An investigation into judicial decision making and legal reasoning focusing on case precedent, logical coherence, and the role of interpretation in the reasoning process. Prerequisite: any 100- or 200-level Philosophy course or permission of instructor.

495 Internship. (1–3, repeatable to 6) One credit hour is available for every 40 hours worked. Supervised work assignments in public or private agencies requiring critical thinking and problem solving tasks. Student is responsible for locating acceptable employment. Work assignments related to legal concerns are encouraged. Prerequisites: 2.50 GPA in the Philosophy major, junior or senior standing, minimum of 12 hours completed in the major, and permission of department chairperson or internship coordinator. A maximum of 3 s.h. may be counted toward the major.

499 Directed Readings. (1–3, repeatable with no maximum) Individual study of particular philosophical texts or problems. Prerequisites: two courses in Philosophy and consent of the instructor. By arrangement.
Program Offering and Locations:
- Minor in Military Science: Macomb

Faculty: Carreathers, Cunningham, Dunsworth, Moore, Porter, Sommers.

The Military Science program provides instruction and practical experience in leadership and management that will help students succeed in any desired career, civilian or military. Students take Military Science course while majoring in any discipline at the University. Those students seeking a commission in the United States Army may minor in Military Science if they desire.

Requirements for Commission
1. Completion of requirements for baccalaureate degree.
2. Departmental core in Military Science under the Four-Year Program (18 s.h.)
   a. MS 111—Leadership and Personal Development and MS 112—Introduction to Tactical Leadership (2 s.h.)
   b. MS 211—Innovative Team Leadership and MS 212—Foundations of Tactical Leadership (4 s.h.)
   c. MS 311—Adaptive Tactical Leadership and MS 312—Leadership in Changing Environments (6 s.h.)
   d. Cadet Leadership Course (CLC) (6 s.h. placement credit)
   e. MS 411—Developing Adaptive Leaders and MS 412—Leadership in a Complex World (6 s.h.)
3. Departmental core in Military Science under the Two-Year Program (18 s.h.)
   a. Cadet Basic Camp or equivalent training (6 s.h. placement credit)
   b. MS 311—Adaptive Tactical Leadership and MS 312—Leadership in Changing Environments (6 s.h.)
   c. Cadet Leadership Course (CLC) (up to 6 s.h. placement credit)
   d. MS 411—Developing Adaptive Leaders and MS 412—Leadership in a Complex World (6 s.h.)
4. Maintain a University cumulative grade point average of 2.00 or better.
5. Meet prescribed medical and fitness standards.
6. Completion of History 304 (earning a minimum grade of “C”).
7. Pass Army required swimming test.

Advanced Placement
Students with prior military service may receive credit for advanced placement.

Minor

Minor in Military Science ........................................................................................................18 s.h.
1. Military Science core (MS 311, 312, 411, 412) at the junior and senior level ................................................................. 12 s.h.
2. HIST 304 ...................................................................................................................... 3 s.h.
3. Approved elective in an area other than the student's major ................ 3 s.h.
Note: Electives must be approved by Professor of Military Science.
Extra-Curricular Activities

Western Illinois University Army ROTC has three extra-curricular teams: Color Guard, Ranger Team, and Rifle Club. These activities involve team competition with other universities. A description of these may be found in the Student Handbook.

Reserve Officers' Training Corps (ROTC)

The Western Illinois University Department of Military Science offers a variety of opportunities for qualified students to earn a commission as an officer in the United States Army. Commissions are earned through ROTC while the students obtain their bachelor's or master's degree in the academic discipline of their choice. Many students earn their degrees with federal or state ROTC scholarship assistance from ROTC. The opportunities to obtain a commission include a four-year program and a two-year program.

Four-Year Program

The Four-Year Program consists of the Basic Course (first two years) and the Advance Course (second two years). University academic credit is earned for all coursework satisfactorily completed.

Basic Course: Basic Course enrollment is usually limited to freshmen and sophomores. Each year, freshmen and sophomores compete for several ROTC state and federal scholarships. Basic Course students do not incur any military obligation. During the period of the Basic Course, the students decide whether they want to enter the Advance Course. The Department of Military Science evaluates their qualifications and determines their eligibility for acceptance.

Advance Course: Advance Course students include all students who have successfully completed the Basic Course or received advanced placement credit for the Basic Course. Entry into the Advance Course is a joint decision by the student and the Department of Military Science. Requirements include being of good character, a U.S. citizen, under 33 years of age (waiver possible) upon graduation and commissioning, medically qualified, not a conscientious objector, and maintaining a 2.50 grade point average. Students entering the Advance Course sign a contract with the government and earn a tax-free stipend each month during their last two years of college. Currently, juniors and seniors earn $420 per month. They continue to compete for numerous federal and state scholarships. Advance Course students incur a military obligation in either the Army Reserve, National Guard, or Active Army. The length of obligation varies depending on the type of commission received. Students can be guaranteed Reserve Forces Duty or National Guard Duty. Coursework for the Advance Course spans two years and is discussed in the Military Science course descriptions. Advance Course students also attend a Cadet Leadership Course of 36 days duration, normally between their junior and senior years. Students receive pay, travel allowance, and room and meal plan while attending the course.

Two-Year Program

The Two-Year Program permits the student who has successfully completed the ROTC Cadet Basic Camp, or who has a status of Veteran, prior service, NG, or USAR, to enter directly into the Advance Course Program. The ROTC Cadet Basic Camp is approximately four weeks long and provides military training in such subjects as leadership, rappelling, map reading, rifle marksmanship, physical fitness, tactics, communications, first aid, and water survival. The student attending ROTC Cadet Basic Camp is paid to attend and receives free lodging, meals, and college credit (up to 6 elective hours). There is no service obligation connected with the course. The course is designed to provide the student with Basic Course credit. Students wishing to attend the Cadet Basic Camp should apply early in the Spring semester. Veterans, prior service students, and junior ROTC students (three or more years) may receive advanced placement credit for the Basic Course.
Scholarships and Financial Aid

Scholarships

Federal and state ROTC scholarships are available on a competitive merit basis to qualified students. Scholarships are awarded based upon merit, not financial need. Scholarships are awarded based upon evidence of scholastic ability, military aptitude, and demonstrated leadership ability. The federal ROTC scholarship covers either tuition and most fees, or room and board. Either option provides a book allowance of $1,200. The State ROTC scholarship pays only tuition and some fees.

Financial Aid

During the last two years of Military Science, contracted Advance Course students receive a total subsistence allowance of approximately $9,500 tax-free. This allowance is received in monthly installments during the school year. Simultaneous Membership Program cadets also receive pay from their Army Reserve or National Guard unit.

Army Nurse Corps Program

The Reserve Officer's Training Corps (ROTC) provides an opportunity for college Nursing students to receive practical, hands-on leadership experience. The ROTC courses provide a chance for students to develop management, communication, and decision-making skills. Students interested in obtaining a Bachelor of Science in Nursing may enroll in ROTC. Students may enroll as a freshman, sophomore, or as late as an entering college junior. Upon completion of the program, students obtain nursing experience as a commissioned officer in the United States Army. Specialized financial and educational benefits are available to qualified students.

Commission as a Second Lieutenant

Upon completion of University and ROTC requirements, students are commissioned as Second Lieutenants. Commissionees fulfill their contractual obligations by serving in the Army Reserve, National Guard, or in the Active Army. Service in the Army Reserve or National Guard is an ideal way of blending a full-time civilian career with part-time service to the country as an officer. Students may request to delay their military duties to attend graduate school or to attain professional degrees. Students desiring further information should visit the Department of Military Science in Horrabin Hall, Room 103, or call (309) 298-1161.

Course Descriptions

MILITARY SCIENCE (MS)

111 Leadership and Personal Development. (1) A course designed to introduce students to Army ROTC and the organization of the U.S. Army and its role in American society. Teach fundamental concepts in leadership in both classroom and outdoor activities. Increase self-confidence through optional activities in rappelling, leadership reaction course, and basic marksmanship.

112 Introduction to Tactical Leadership. (1) A continuation of MS 111. This course continues to build a knowledge base of soldier skills such as first aid, marksmanship, and writing. Expands students' opportunity for and knowledge of leadership skills through basic drill, rappelling, and the leadership reaction course.

211 Innovative Team Leadership. (2) Students participate in discussions of selected leadership principles and the methods of military instruction. Introduction to a Leadership Development Program which assesses using 16 leader dimensions. Instruction in basic individual military skills.

212 Foundations of Tactical Leadership. (2) Continuation of discussions of personal leadership development and individual military skills. Exercises in team building, small unit leadership techniques, and military map reading.

298 Individual Studies. (1–3) Special study in Military Science carried out under the supervision of a faculty member. Limited to enrolled Military Science students. Prerequisite: permission of the department chairperson.

311 Adaptive Tactical Leadership. (3) Theories and techniques of military leadership. Concentration on leader-group interaction, organizational demands, communication, and counseling. Practical opportunities to lead small groups, receive assessment, and lead in situations of increasing complexity. Application of leadership techniques in small unit tactics and preparation for Advanced Camp. Prerequisites: MS 111 and 112, and MS 211 and 212, or Cadet Initial Entry Training, and consent of the department chairperson. Field trips required. 3 hrs. lect.; 2 hrs. lab.

312 Leadership in Changing Environments. (3) Continues methodology of MS 311. Tactical organization and operations, and small unit leadership of rifle squad
and platoon in the attack and defense. Written and oral presentations of operations orders, reports, and control systems. Proficiency in land navigation. Preparation for Advanced Camp. Prerequisites: MS 311 and consent of the department chairperson. Field trips required. 3 hrs. lect.; 2 hrs. lab.

411 Developing Adaptive Leaders. (3) Designed to prepare the cadet for transition to lieutenant. Students will learn the expectations and duties of the newly commissioned officer, including command and staff functions through classroom discussion. They will also function as a battalion level command and staff element. MS 411 will also continue to improve presentation skills, after action review/reports, Army Training Doctrine, operation orders, and military justice. Prerequisites: MS 312 and consent of the department chairperson. 3 hrs. lect.; 2 hrs. lab.

412 Leadership in a Complex World. (3) Culmination of the leader development process at the pre-commissioning level, preparing for the transition from cadet to lieutenant. Training is to solidify the commitment to officership, reinforce individual competencies, and offer practical leader experiences. Includes the study and application of oral and written communications, leadership/professional ethics, logistics, and maintenance. Prerequisites: MS 411 and/or consent of the department chairperson. 3 hrs. lect.; 2 hrs. lab.

498 Individual Studies. (1–3) Special study in Military Science carried out under the supervision of a faculty member. Limited to enrolled Military Science students. Prerequisite: permission of the department chairperson.
Program Offerings and Locations:

- Bachelor of Music: Macomb
- Minor in Jazz Studies: Macomb
- Minor in Music: Macomb
- Minor in Music Business: Macomb

For student learning outcomes, please see wiu.edu/provost/learningoutcomes.

The School of Music has been an accredited member of the National Association of Schools of Music since 1961 and offers a Bachelor of Music degree with options in Applied Music (performance, jazz, composition), Music Business, Music Therapy, and Music Teacher Education. Students may elect to study in keyboard, voice, winds, strings, and percussion as well as specialized study in jazz and composition. Certification as a music therapist is available through the Certification Board for Music Therapists (CBMT). The School of Music also offers minors in Liberal Arts Music, Music Business, and Jazz Studies.

All majors and minors (except Music Business minor) must pass entrance performance auditions. Periodic reviews of student progress include a performance jury examination each semester, the undergraduate mid-career assessment, and recitals. Assessment exams in music theory and keyboard skills must be taken by transfer students before registration for Music courses at the 300 level.

The Music Teacher Education option prepares students to teach Music in the public schools. All Music Education students must appear before the Student Teaching Committee of the School of Music for evaluation of competencies and skills prior to student teaching. Final approval for student teaching is granted only by this committee. Students may obtain Illinois K–12 licensure in Music by completing degree requirements and state licensure tests.

International students seeking admission into the School of Music must have the following scores in English proficiency tests: IBT TOEFL 79 or paper TOEFL 550 or IELTS 6.5.

GradTrac is available to Applied Music majors. See page 79 for information about GradTrac.

Honors Curriculum—Academically qualified students in this School are encouraged to complete an honors curriculum in University Honors, Honors in the Major, or General Honors. All Honors students must complete the one-hour honors colloquium (G H 299). General Honors includes General Honors coursework. Honors in the Major includes honors work in the major. University Honors combines Honors in the Major and General Honors. For more information about honors curricula, see page 100 or visit the Centennial Honors College website at wiu.edu/Honors.

Degree Program

Bachelor of Music

All students seeking the Bachelor of Music must complete I and II, plus III.A, III.B, III.C, or IIID below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.
**Music**

In accordance with the Illinois State Board of Education licensure rule, all candidates seeking a Professional Education License or endorsement are required by Western Illinois University to obtain a grade of "C-" or better in all directed general education courses, all core courses, and all courses in the option. This rule does not supersede course prerequisite requirements in the catalog that specify a letter grade.

Please see the Teacher Education section of this catalog (p. 346) for more information about WIU’s Teacher Education Program.

I. University General Education Curriculum (p. 70).................................43 s.h.
   Option D, Teacher Education, should include a General Education Mathematics course.

II. Core Courses........................................................................................................34 s.h.
   A. MUS 165, 166, 181, 182, 183, 184, 281, 282, 283, 284, 330, 390†, 391† (22 s.h.).
   B. 12 s.h. applied study of one principal performance medium over six semesters.
   C. Seven semesters of MUS 100 with a satisfactory grade (S) are required for graduation. Transfer students require as many semesters of MUS 100 with a satisfactory grade (S) as they are in residence minus one semester (example: a student in residence for five semesters must complete four semesters of MUS 100 with a grade of S).

III. Options of Study (select A, B, C, or D)
   A. Applied Music (Comprehensive)
      1. Special Courses .........................................................................................14 s.h.
         a. MUS 265 and 266 or MUS 365; MUS 381
         b. Choose 9 s.h. from a list of upper-level MUS courses approved by the School of Music
      2. Music Ensembles.........................................................................................8 s.h.
         Students must register each semester for credit and successfully complete the ensembles specified below under a, b, c, d, or e until the 8 s.h. ensemble requirement is met. Students must participate on their principal instrument for the number of hours specified below unless indicated otherwise by the ensemble director. No more than one ensemble per semester can be used to satisfy the ensemble requirements.
      3. Music Electives**....................................................................................20–21 s.h.
         a. Instrumental Performance
            1) Additional principal applied study, to include minimum of four semesters at junior/senior level at 4 s.h. per semester, including one-half junior and full senior recital.
            2) Ensembles:
               a) Winds/Percussion: 8 s.h. total, minimum of 6 s.h. in MUS 101, 113, or 114.
               b) Trumpet, Trombone, and Saxophone principals may satisfy 2 s.h. out of the total 8 s.h. required by registering for MUS 117.
               c) Strings: 8 s.h. in MUS 101 and 102.
               d) Guitar: 4 s.h. in MUS 101, 105, 106, 113, 114, or 117; 4 s.h. in MUS 127 or 128
            3) MUS 332 for Winds/Percussion, or MUS 461 (2 s.h) for Strings, and 483, plus other Music Electives to total 20 s.h.
         b. Piano Performance
            1) Additional principal study to include minimum of four semesters at junior/senior level at 4 s.h. per semester, including one-half junior and full senior recital.
            2) Ensembles: 4 s.h. of MUS 101, 102, 105, 106, 113, 114, 116, or 117; 2 s.h. of MUS 125; 2 s.h. of MUS 127 or 129.
            3) MUS 465, 466, 495, 496.
c. Vocal Performance
   1) Additional principal applied study, to include minimum of four
      semesters at junior/senior level at 4 s.h. per semester, including one-half
      junior and full senior recital.
   2) Ensembles: 8 s.h. total, minimum of 6 s.h. in MUS 105 or 106; by
      advisor approval, 1–2 s.h. out of the total 8 s.h. required may be
      satisfied by performing major operatic roles in MUS 109.
   3) MUS 262, 263, 499, plus other Music Electives to total 20 s.h.

d. Jazz Studies
   1) Additional Applied Study 2 sem. 2 s.h./sem., including one-half junior
      and full senior recital
   2) Ensembles: 4 s.h. in MUS 117. Guitar, Piano, Bass, and Drum set
      principals can substitute up to 2 s.h. MUS 128.
   3) 4 s.h. in MUS 127
   4) MUS 167, 187, 267, 337, 367, 387, 397, 487, 497

e. Composition
   1) 4 s.h. of applied study in principal performance medium.
   2) Ensembles: 8 s.h. total, minimum of 4 s.h. in MUS 101, 105, 106, 113,
      114, or 117.
   3) MUS 215 (2 s.h.), 411 (8 s.h.), 481, 483, 485

4. Electives................................................................. 8–9 s.h.

Students electing groupings a–e in #3 above may select Music or other
 electives. Students selecting 3.a must include MUS 492 (strings) or 1 s.h.
 of MUS 490 (winds/percussion). Students electing grouping 3.b above
 must select 3 s.h. each of MUS 125 and 129 and 1 s.h. of MUS 167 plus
 other electives of the student’s choice. Students electing grouping 3.c
 above must select 4 s.h. each of French and German. Students electing
 grouping 3.d above must choose 8 s.h. from the following: MUS 141, 195,
 341, 344, 345, 348, 481, 483. The student’s course selections for Electives
 must include (but are not limited to) courses from English (literature course),
 History, Religion and Philosophy, Art, and Foreign Languages.

B. Music Business

1. Special Courses ..........................................................15 s.h.
   MUS 141, 195*, 242, 341, 248 or 485, 441, 442

2. Ensembles..............................................................................8 s.h.

Students must register each semester for credit and successfully complete
the ensembles specified below until the 8 s.h. ensemble requirement is
met. No more than one ensemble per semester can be used to satisfy the
ensemble requirement. Students must participate on their principal
instrument for the number of hours specified below unless indicated
otherwise by the ensemble director.

   a. Winds/Percussion: 6 s.h. minimum in MUS 101, 113, 114, 116, 117.
   b. Strings: 6 s.h. minimum MUS 101 or 102.
   c. Piano: 4 s.h. in MUS 101, 105, 106, 113, 114, 116, or 117; 2 s.h. in
      MUS 125; 2 s.h. in MUS 127 or 129.
   d. Voice: 4 s.h. minimum in MUS 105 or 106; 2 s.h. minimum in
   e. Guitar: 4 s.h. in MUS 101, 105, 106, 113, 114, or 117; 4 s.h. in MUS 127
      or 128.

3. Other Requirements..........................................................21 s.h.
   ACCT 200; BCOM 320 or MGT 349; CS 101, 302; ECON 232*; MKTG 327;
   PSY 100*
4. Directed Electives in a grouping approved by advisor to total 16 s.h.
(7 s.h. of which must be in Music) .................................................................................. 16 s.h.
HRM 353, 441, 442, 443, 444, 446, 449
MGT 350, 425, 445, 447, 448, 474, 481, 483, 485
MKTG 317, 331, 333, 335, 343, 371, 411, 417, 431, 432, 441
MUS 241, 342, 343, 344, 345, 348, 485

C. Music Therapy

1. Special Courses ............................................................................................................. 34 s.h.
   MUS 151, 157, 158, 162, 232, 254, 255, 258 (1 s.h.), 261, 355, 358 (2 s.h.),
   451, 452, 453, 454, 455, 457 (4 s.h.), 458 (1 s.h.)

2. Ensembles .................................................................................................................... 8 s.h.
   Students must register each semester for credit and successfully complete
   the ensembles specified below until the 8 s.h. ensemble requirement is
   met. No more than one ensemble per semester can be used to satisfy the
   ensemble requirement. At least 1 s.h. of the total number of ensemble
   hours must be fulfilled by singing in MUS 105, 106, 107, or 108. After the
   principal instrument and singing requirements have been met, students
   may choose any University catalog ensemble to complete the total 8 s.h.
   a. Winds/Percussion: 6 s.h. minimum in MUS 101, 113, 114, 116, 117.
   b. Strings: 6 s.h. minimum in MUS 101 or 102.
   c. Piano: 2 s.h. in MUS 101, 105, 106, 113, 114, 116, or 117; 2 s.h. in
      MUS 125, 127, 128, or 129; 2 s.h. in MUS 101, 105, 106, 113, 114, 116,
      117, 125, 127, 128, or 129.
   d. Voice: 4 s.h. minimum in MUS 105 or 106; 2 s.h. minimum in
   e. Guitar: 4 s.h. MUS 101, 105, 106, 113, 114, 116, or 117; 4 s.h. in
      MUS 127 or 128

3. Other requirements of certifying music therapy association ......................... 18–19 s.h.
   BIOL 100* or 101* or 204*; KIN 290; PSY 100*, 424; PSY 425 or
   SPED 390; SOC 100*

D. Music—Teacher Education

1. Special Courses ........................................................................................................... 10 s.h.
   MUS 130, 300, 333, 334, 394*

2. Music Ensembles ...................................................................................................... 8 s.h.
   Students must register each semester for credit and successfully complete
   the ensembles specified below under 3.a or 3.b until the 8 s.h. ensemble
   requirement is met. No more than one ensemble per semester can be used
   to satisfy the ensemble requirement. Students must participate on their
   principal instrument for the number of hours specified below unless
   indicated otherwise by the ensemble director.

3. Directed Electives ..................................................................................................... 19–22 s.h.
   Choose a or b, as approved by advisor
   a. Instrumental/General
      1) Choose 7 s.h.*** from MUS 132 or 461, 133, 134, 135, 136, 137, 138, 231
      2) Choose one course from MUS 195*, 232, 337, 397
      3) MUS 332, 336, 395; 430 or 461
      4) Ensembles:
         a) Wind/Percussion: 8 s.h. total, minimum of 6 s.h. in MUS 101, 113,
            114, or 117 (maximum 3 s.h. in MUS 117); minimum of 1 s.h. in MUS
            116; minimum of 1 s.h. in MUS 105, 106, 107, or 108.
         b) Piano: 8 s.h. total, minimum of 3 s.h. in MUS 101, 113, 114, or 117;
            minimum of 1 s.h. in MUS 116; minimum of 1 s.h. in MUS 105, 106,
            107, or 108; minimum of 3 s.h. in MUS 125, 127, or 129.
         c) Guitar: 8 s.h. total, minimum of 3 s.h. in MUS 101, 113, 114, or 117;
            minimum of 1 s.h. in MUS 116; minimum of 1 s.h. in MUS 105, 106,
            107, or 108; minimum of 3 s.h. in MUS 127 or 128.
d) Strings: 8 s.h. total, minimum of 7 s.h. in MUS 101 or 102; minimum of 1 s.h. in MUS 105, 106, 107, or 108.

b. Choral/General
   1) MUS 132; 133 or 134; 135 or 136; 137; 231; 232; 262; 263; 265; 266; 331; 335; 396
   2) Choose one course from MUS 195*, 397; THEA 497
   3) Ensembles:
      a) Voice: 8 s.h. total, minimum of 6 s.h. in MUS 105 or 106; minimum of 1 s.h. in MUS 107, 108, and 109.
      b) Piano: 8 s.h. total, minimum of 6 s.h. in MUS 105 or 106; 2 s.h. in MUS 125, 127, or 129.
      c) Guitar: 8 s.h. total, minimum of 6 s.h. in MUS 105 or 106; 2 s.h. in MUS 127 or 128.

4. Professional Education
   ---------------------------------
   - EDUC/MUS 439
   - EDS 202, 301, 303, 401
   - RDG 387
   - STCH 480, 481

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) any major’s discipline-specific global issues course; or 4) an approved Study Abroad program.
* Specific requirements from the University General Education Curriculum.
** Must include MUS 262, 263 for voice principals.
*** The tech course that includes the student's principal instrument does not count towards the required 7 s.h.
† MUS 390 and MUS 391 fulfill the Writing Instruction in the Disciplines (WID) graduation requirement.

Minors

Minor in Music (Liberal Arts)................................................................. minimum 16 s.h.
   Students must complete 1, 2, and 3.
   1. MUS 181 and 183................................................................................. 3 s.h.
   2. Select 5 s.h. from MUS 390, 391, 394, 397............................................ 5 s.h.
   3. Select 8 s.h. of Music Electives to meet student needs and interests.... 8 s.h.
      A maximum of 5 s.h. of ensemble and/or applied study can be counted toward the minor.

Minor in Music Business................................................................. 17 s.h.
   1. MUS 141, 341 ......................................................................................... 4 s.h.
   2. Select 9 s.h. from MUS 180, 190, 195, 196, 394, 397, or 181 and 183................................................................. 9 s.h.
   3. Select 4 s.h. from MUS 242, 342, 343, 344, 345, 441............................ 4 s.h.

Minor in Jazz Studies................................................................. 17 s.h.
   1. MUS 187, 267, 397.................................................................................. 6 s.h.
   2. Select 7 s.h. from MUS 167, 337, 367, 387, 487, 497............................. 7 s.h.
   3. Select 4 s.h. from Jazz Ensembles (MUS 117, 127, and 128) and/or Jazz Applied Study........................................ 4 s.h.
Course Descriptions

MUSIC (MUS)

Ensembles: (All ensembles receive 1 s.h. credit per semester) Open to all University students by permission of instructors.

101 University Orchestra
102 Chamber Orchestra
103 American Traditional Music Ensemble

118 Pep Band
121 Brass Chamber Ensembles
122 Woodwind Chamber Ensembles
125 Percussion Ensemble
124 Steel Band
125 Accompanying
126 String Chamber Ensembles
127 Jazz Combo
128 Guitar Ensemble
129 Piano Chamber Ensembles

Applied Study: (1–4 s.h./semester, repeatable to a maximum of 10 semesters) Private, group, and class study in music performance. Prerequisite: audition and written consent of Music advisor. Music majors receiving a grade of D or F in Applied Study on their principal instrument must reaudition for departmental acceptance. Enrollment in upper division courses (400 level) requires a C or better on the third-semester principal instrument applied jury including sightreading. After a student passes the principal instrument third-semester jury, Applied Study in the principal instrument from the fifth through eighth semester will receive upper division credit.

204/404 Violin 220/420 Saxophone
205/405 Viola 221/421 Flute
206/406 Cello 222/422 Oboe
207/407 Bass 223/423 Bassoon
209/409 Guitar 224/424 Trumpet
211/411 Composition 225/425 Trombone
212/412 Voice 226/426 Euphonium
214/414 Organ 227/427 Horn
215/415 Piano 228/428 Tuba
219/419 Clarinet 229/429 Percussion

100 Recital Attendance. (0) Attendance at ten music concerts/recitals per semester for satisfactory grade. Graded S/U only.

130 Introduction to Music Education. (1) An overview of Music Education, the types of qualifications required for licensure. Correlated public school observations.

132 String Techniques. (1) A study of the basic techniques of playing and teaching the violin, viola, cello, and bass, including arrangements for solo and string ensemble.

133 Woodwind Techniques. (1) A study of the basic techniques of playing and teaching the flute, oboe, and bassoon.

134 Woodwind Techniques. (1) A study of the basic techniques of playing, teaching, and arranging for the clarinet and saxophone.

135 Brass Techniques. (1) A study of the basic techniques of playing and teaching the trumpet, cornet, and horn.

136 Brass Techniques. (1) A study of the basic techniques of playing, teaching, and arranging for the trombone, euphonium, and tuba.

137 Percussion Techniques. (1) A study of the basic techniques of playing, teaching, and arranging for percussion instruments.

138 Vocal Techniques. (1) Development of vocal techniques and methodology for the instrumental Music Education major. Prerequisite: instrumental Music Education major.

139 Band Instrument Maintenance and Repair. (1, repeatable to 2) A study of the principles of maintenance, repair, and adjustment of band instruments. This hands-on course will include mechanical instruction on all brass, woodwind, and percussion instruments. Prerequisite: Music major or consent of instructor.

141 Introduction to Music Business. (2) An introduction to the field of Music Business through a review of the various areas and careers within the music industry including music publishing, recording, merchandising, concert promotion, artist management, and arts administration.

151 Introduction to Music Therapy. (2) Definition of music as therapy; introduction to music as a therapeutic function; scope of music therapy; areas of application; professional aspects; and the role of the music therapist in the therapeutic milieu. Field observations. Course must be completed with a C- or better in order to be eligible for internship (MUS 457).

157 Multicultural Percussion Techniques. (1) Students will gain historical and cultural perspective of non-symphonic percussion instruments, learn care and maintenance for equipment, and develop fundamental percussion techniques necessary to arrange and facilitate group drumming experiences. Students will play in solo and ensemble settings. Prerequisite: MUS 151 or 130.

158 Observation of Music Therapy. (1) Semester long fieldwork course including weekly observation of clinical music therapy. Clinical and professional topics discussed in weekly seminar. Course must be completed with a C- or better in order to be eligible for internship (MUS 457). Open only to Music Therapy majors. Prerequisite: MUS 151 and consent of instructor.

161 Elementary Guitar. (2) Combines beginning guitar techniques and music fundamentals.

162 Group Voice. (1, repeatable to 3) Voice instruction in a group setting.

165 Class Piano I. (1) Keyboard instruction in a classroom setting for Music majors.

166 Class Piano II. (1) Keyboard instruction in a classroom setting for Music majors. Prerequisite: C- or better in MUS 165 or equivalent.

167 Introduction to Jazz Piano. (1) Voicing and comping (piano techniques) for jazz application. Traditional elementary voicings and voice leading applied to jazz. Structures for chord extensions in jazz performance. Piano techniques to realize harmonic notation common to jazz. Prerequisite: MUS 165 or consent of instructor.

180 Fundamentals of Music. (3) An introduction to the basic elements of music. Music reading, sight-singing, and elementary ear training. Open to general University students. Does not apply toward Music major graduation credit. Not open to students who have received credit for MUS 181.

181 Theory I. (2) Techniques and materials of diatonic music. Introduction to tonal harmony through part writing, harmonization of melodies, and analysis. Prerequisite: MUS 183. Three meetings each week.
182 Theory II. (2) Further studies in diatonic techniques and initial studies in chromatic techniques. Continuation of music writing skills and analysis. Prerequisites: a grade of C- or better in MUS 181 and MUS 183. Corequisite: MUS 184. Three meetings each week.

183 Aural Skills I. (1) Aural Skills I studies diatonic material through sight-singing, dictation, and other exercises. Corequisite: MUS 181. Two meetings each week.

184 Aural Skills II. (1) Aural Skills II continues the study of diatonic material through sight-singing, dictation, and other exercises. Prerequisite: a grade of C- or better in both MUS 181 and 183. Corequisite: MUS 182. Two meetings each week.

187 Jazz Fundamentals and Theory. (1) Fundamentals of scales and chords related to jazz, performed in a lab setting. Elementary jazz harmonic practice and the rhythm section. Chord nomenclature common to jazz notation.

190 What to Listen for in Music. (3) (General Education/Fine Arts) An introduction to basic musical principles, as well as the study of music as an aspect of culture, society, and history, with an emphasis on developing listening skills applicable in a broad range of music cultures. IAI: FI 900.

195 American Popular Music. (3) (General Education/Fine Arts or Multicultural Studies) A survey of American popular music from the 19th century to the present. Includes extensive listening to representative styles and outstanding works within those styles, with discussion of historical, sociological, and musical influences. Recommended for those without music background. IAI: FI 904.

196 Music in the Rock Era. (3) (General Education/ Multicultural Studies) An introduction to popular music during the rock era as an expression of multiple cultures; an exploration of the relationship between musical style and the socio-cultural context from which the music emerges, with emphasis on cross-cultural connections.

208 Applied Jazz Studies I. (1–4, repeatable up to 10 semesters) Applied study of performance elements related to jazz style, repertoire, and improvisation.

216 Applied Musical Theatre Voice, Lower Division. (1–4, repeatable to 8) Applied study of vocal technique and style to meet the needs of students in the BFA Musical Theatre degree program and other students interested in learning to sing in a popular style. Prerequisite: Musical Theatre major or permission of instructor.

231 Classroom Instrument Techniques. (1) The study of the basic techniques of playing, teaching, and arranging for classroom and cultural instruments.

232 Dalcroze, Kodaly, Orff in the Classroom. (3) Introduction to Dalcroze, Kodaly, and Orff approaches to American general Music Education. Includes materials, techniques, and arranging for individual clients and classroom combinations.

241 Practicum in Music Business. (1, repeatable to 2) A part-time practical experience in an area of the music industry. Prerequisites: MUS 141 and permission of program director.

242 Music Industry Career Preparation. (1) This course focuses on in-depth career preparation for those interested in the music industry including: goal setting, the job search process and document preparation, best practices in electronic media, and interview techniques. Prerequisite: MUS 141 or consent of instructor.

248 Introduction to Video and Audio Production for Live Music Performance. (3) Provides the technical skills to implement a live video stream of a musical presentation, and to develop an understanding of the specialized uses of microphones, live mixing consoles, streaming video software, and digital audio/video composing within live music production.

254 Methods and Materials in Music Therapy. (1) Acquisition of selected functional instrumental and vocal skills; basic leadership skills for therapeutic interventions involving singing, moving, playing, and improvising; basic skills in selecting and arranging music for therapy. Course must be completed with a C- or better in order to be eligible for internship (MUS 457). Prerequisite: MUS 151 and 158; or permission of instructor.

255 Music Therapy Clinical Skills I. (1) Designing and leading music therapy interventions to achieve specific non-musical goals/objectives. Evaluating and measuring responses to music interventions. Development of clinically relevant accompanied vocal repertoire. Course must be completed with a C- or better in order to be eligible for internship (MUS 457). Prerequisite: MUS 254.

258 Practicum in Music Therapy I. (1, repeatable to 3) Supervised co-lead clinical experience in music therapy focusing upon assessment, treatment, planning, implementation, and evaluation of clinical process. Weekly group supervision. C- or better is required in order to be eligible for internship (MUS 457). Prerequisite: MUS 151 and 158.

261 Intermediate Guitar. (2) Combines intermediate guitar techniques and related music study.

266 Class Piano IV. (1) Keyboard instruction in a classroom setting for Music majors. Prerequisite: C- or better in MUS 262.

265 Class Piano III. (1) Keyboard instruction in a classroom setting for Music majors. Prerequisite: C- or better in MUS 166 or equivalent. Corequisite: MUS 281.

267 Jazz Improvisation I. (2) The elements of jazz improvisation. Listening skills, transcription, and jazz style. Application of tonal harmonic language and scale structures to jazz improvisation. Construction of melodies utilizing voice-leading and counterpoints. Prerequisite: MUS 187.

274 Theory IV. (2) Further studies in chromatic techniques. Continued music writing skills and analysis, including simple part forms. Prerequisite: a grade of C- or better in both MUS 182 and MUS 184. Corequisite: MUS 283. Three meetings each week.

282 Theory IV. (2) Introduction to sonata form and the technical materials of late 19th and early 20th century music through analysis, listening, and music writing. Prerequisite: a grade of C- or better in both MUS 281 and MUS 283. Corequisite: MUS 284. Three meetings each week.

283 Aural Skills III. (1) Aural Skills III studies chromatic material and modulation through sight-singing, dictation, and other exercises. Prerequisite: a grade of C- or better in both MUS 182 and 184. Corequisite: MUS 281. Two meetings each week.

284 Aural Skills IV. (1) Aural Skills IV studies chromatic and twentieth-century material through sight-singing, dictation, and other exercises. Prerequisite: a grade of C- or better in both MUS 281 and 283. Corequisite: MUS 282. Two meetings each week.
300 Music Student Teaching Review. (0, repeatable) Examination of teaching methods and skills prior to student teaching semester. Students are reviewed in fundamental teaching skills and knowledge. Students may retest any area to achieve S grade. Prerequisites: for Instrumental-General major, C- or better in MUS 166, for Choral-General specialization, C- or better in MUS 266; C- or better in MUS 282 and C- or better in MUS 284. Graded S/U only.

301 Chamber Music. (1, repeatable to 4) Chamber music instruction. Prerequisites: Music major; C- or better in third semester applied jury including a sight reading or consent of instructor.

321 Music Entrepreneurship for 21st Century Musicians. (2) Prerequisites: MUS 166, 182, 184, and 280; ENG 180 and 280; Junior/senior standing; full acceptance into Teacher Education Program. Study of the art and technique of conducting and performance management and the role of the conductor as a performer. Directed observations and field experiences. Prerequisite: C- or better in MUS 330.

331 Choral Conducting in the Junior/Senior High School. (2) Study of JH/HS choral program to include choral conducting, rehearsal techniques, literature, methods, programming, style, interpretation, and analysis of choral literature for large and small ensembles, festivals, contests, and concerts. IPTS including classroom management, assessment, reading, and writing. Field experiences. Prerequisite: C- or better in MUS 330.

332 Instrumental Conducting. (2) Advanced exploration into the art and technique of conducting and performance management and the role of the conductor as a performer. Directed observations and field experiences. Prerequisite: C- or better in MUS 330.

333 Teaching and Assessment in Elementary/Middle School General Music. (3) Basic music experiences as related to child development from kindergarten through middle school including reading, academic language, lesson planning, assessment, classroom management, diverse learners, middle school concept, and use of appropriate music literature. Directed observations, field experiences. Open to: Music majors and minors only. Prerequisites: MUS 166, 182, 184, for Choral-General specialization only, MUS 231–232 or consent of instructor; ENG 180 and 280.

334 Music for the Learner with Exceptionalities. (3) Information and practice in various strategies to help Music teachers with the instruction of learners with exceptionalities in Music classrooms. Emphasis on characteristics, Universal Design, accommodations, modifications, and assistive technologies. Discussion of Response to Intervention. Field experiences and teaching experiences. Prerequisites: MUS 166, 182, 184; ENG 180 and 280; Junior/Senior standing; full acceptance into Teacher Education Program.

335 Teaching and Assessment in Middle/High School Choral Music. (3) Study of teaching techniques and organizational procedures of the middle-high school choral programs including resource materials, effective rehearsal and lesson planning methods, vocal pedagogy, repertoire selection/adaptation, classroom management, assessment, and reading/writing in the content area. Directed observations, field experiences. Prerequisites: MUS 166, 182, 184; ENG 180 and 280; C- or better in MUS 330; full acceptance into Teacher Education Program.

336 Teaching and Assessment in Middle/High School Instrumental Music. (3) Study of teaching techniques and organizational procedures of the M-HS instrumental programs including resource materials, effective rehearsal/lesson planning methods, instrumental pedagogy, repertoire selection and adaptation, classroom management, assessment, and reading/writing in the content area. Directed observations, field experiences. Prerequisites: MUS 166, 182, 184; ENG 180 and 280; instrumental techniques courses or equivalent background; full acceptance into Teacher Education Program.

337 Jazz Band Methods and Techniques. (2) A study of the organization of the school jazz band program, methods available for instructors, materials, techniques of rehearsals, and performances. Prerequisite: MUS 166, 182, 184.

341 Music Publishing. (2) A study of publishing as it relates to the music industry. Topics will include how music publishers acquire the rights to music copyrights and how they protect music copyrights from exploitation through music licensing. Prerequisite: MUS 141.

342 Music Administration. (2) A study of not-for-profit music organizations with an emphasis in symphony orchestra and opera company administration. Includes an examination of organization structure, funding, and audience development. Prerequisite: MUS 141 or consent of instructor. Participation in field trips required.

343 The Music Products Industry. (2) A study of the domestic and international music products industry. Topics will include the manufacturing, distribution, and retailing of musical instruments, print music, and accessories. Prerequisite: MUS 141 or consent of instructor. Participation in field trips required.

344 Artist Development. (2) A study of artist development and the live music industry from the perspective of the performing artist. Topics will include the performing artist’s management team, the artist-management agreement, advancing an artist’s career, touring, and concert promotion and production. Prerequisite: MUS 141 or consent of instructor.

345 The Recording Industry. (2) A study of the domestic and international recording industry. Topics will include industry structure, operations, and business and legal affairs. Both major and independent labels will be explored. Prerequisite: MUS 141 or consent of instructor.

348 Advanced Video and Audio Production for Live Music Performance. (3) Continuation of MUS 248. Exposure to the technical skills to master and engineer a live video stream of a musical presentation and to hone digital audio/video composing skills in post production at a professional level. Prerequisite: MUS 248 or consent of the instructor.

355 Music Therapy Clinical Skills II. (1) Designing and implementing music therapy interventions involving composition, improvisation, arranging, and song analysis. Review of research in music therapy clinical methods. Course must be completed with a C- or better in order to be eligible for internships (MUS 457). Prerequisites: MUS 166, 281, 283, 255.

358 Practicum in Music Therapy II. (1, repeatable to 4) Supervised clinical experience in assessing, planning, intervening, measuring, evaluating, and documenting music therapy treatment in an assigned clinical setting. Discussion of clinical and professional topics in a weekly seminar. Prerequisites: MUS 166, 182, 184; MUS 255 and 258 with a C- or better.

365 Keyboard Skills. (2) Development of functional skills for keyboard students of advanced level. Includes sightreading, transposition, harmonization, and improvisation. Prerequisites: MUS 182 and 266 or consent of instructor.
Music

367 Jazz Improvisation II. (2) The elements of jazz improvisation. Listening skills, transcription, and jazz styles. Application of non-tonal harmonic language and scale structures to jazz improvisation. Construction of melodies utilizing voice-leading and counterpoint. Prerequisites: MUS 166, 182, 184, 280.

381 Analysis I. (3) Analysis of common musical forms and genres from the common practice. Prerequisites: MUS 166, 282, 284; ENG 180 and 280.

387 Jazz Arranging and Composition I. (2) The study and analysis of arranging techniques as employed in contemporary jazz with emphasis on the development of arranging and composition skills for ensembles of varied instrumentation. Prerequisites: MUS 166, 182, 184, 187.

390 European Art Music I. (3) (Global Issues) Survey of music history and analysis of musical styles and their social context. Examination of important styles and musical examples cultivated in Western civilization from the Greeks to the middle of the 18th century. Writing Instruction in the Disciplines (WID). Prerequisites: MUS 166, 182, 184, C- or better in 190; ENG 180 and 280.

391 European Art Music II. (3) (Global Issues) Continuation of MUS 390. Examination of important styles and musical examples cultivated in Europe and the U.S. from the middle of the 18th century through the 20th century. Writing Instruction in the Disciplines (WID) course. Prerequisites: MUS 390; minors—consent of the instructor; ENG 180 and 280.

394 Music in World Cultures. (3) (General Education/Multicultural Studies) (Global Issues) Study of the music, dance, and instruments of the peoples of North and South America, the Caribbean, Europe, Africa, Middle East, and Asia with emphasis on non-Western cultures. Prerequisites: ENG 180 and 280.

IAT: FT 903N.

395 Band/orchestra Literature. (2) Historical survey, analysis, assessment, and adaptation of instrumental music literature suitable for all levels. Application of skills acquired in instrumental techniques courses through the reading of school instrumental literature. Prerequisites: one technique class from each of the following groups: MUS 152; 153/154; 155/156; 157; 330.

396 Choral Literature for the Elementary/Junior High/Senior High. (2) Study, analysis, and adaptations of the literature for elementary, middle school, and high school for like and mixed voices in choral groups. Will include both sacred and secular literature of all periods of music. IPTS including assessment, reading/writing. Prerequisites: MUS 166, 182, 184, 282, 284, 322, 262, 263.

397 Jazz Survey. (3) (General Education/Multicultural Studies) Exploration of the origins of jazz, its many forms, and its present day trends.

398 Music and Politics. (3) Study of how music has evolved and been shaped by political discourse across a variety of historical time periods and regions. Cast studies explored include protest songs, music as propaganda, nationalist music, and musical responses to war and conflict. Prerequisites: ENG 280.

400 Independent Study. (1–3, repeatable to 6) A music project outside the regular curriculum for advanced undergraduate students. Each project under the supervision of an instructor and with permission of department chairperson. Course culminates in a written report, examination, and/or performance. Prerequisites: consent of instructor and department chairperson.

401 Thesis. (3) A thesis prepared under the direction of one or more faculty members in the School of Music.

402 Recital Performance. (0) Public performance of a student recital of solo or solo/chamber literature approved by the student’s applied performance teacher. Prerequisite: pre-recital bearing approved by the appropriate applied area faculty. Graded S/U only, to be determined by faculty of the appropriate applied area.

403 Proseminar in Music. (1–3, repeatable to 6) Studies in selected topics in Music. Prerequisites: consent of instructor and department chairperson.

408 Applied Jazz Studies II. (1–4, repeatable up to 10 semesters) Applied study of performance elements related to jazz style, repertoire, and improvisation.

416 Applied Musical Theatre Voice, Upper Division. (1–4, repeatable to 10) Applied study of vocal technique and style to meet the needs of students in the BFA Musical Theatre degree program and other students interested in learning a popular style. Prerequisite: junior Musical Theatre major or permission of instructor.

430 Marching Band Techniques. (2) Teaching, assessment, and management of marching band in secondary schools. Preparation of marching band including music, choreography, and drill for the band show. Subjects include administrative responsibilities; effective lesson planning; assessment; diverse learners; leadership and staff; equipment; and philosophies. Prerequisites: MUS 116, 166, 281, 283.

439 Teaching and Assessment in Secondary School Music. (3) Study of music learning and teaching as related to adolescent development in middle/high school. Topics include effective lesson planning, assessment, classroom management, diverse learners, reading/writing, use of academic language, and appropriate music literature. Directed observations, field experiences. Prerequisites: MUS 166, 282, 284, 330, EDS 301; full acceptance into Teacher Education Program.

441 Current Issues in Music Business. (1) A study of current issues in the music industry. In-depth research into the student’s area of interest in preparation for employment will be included. Prerequisites: MUS 141, 341, and senior standing.

442 Internship. (3–12, not repeatable) A one-semester internship in music business. Prerequisites: completion of all other requirements for Music Business and senior standing. Graded S/U only.

451 Psychology of Music. (2) Psychology and psychocoeffects of music including hearing, perception, values and preferences, musical abilities, music and media, and measurement of responses to music. Course must be completed with a C- or better in order to be eligible for internship (MUS 457). Prerequisites: 3 s.h. of Psychology coursework and MUS 166, 182, 184; or consent of instructor.

452 Research in Music Therapy. (2) Overview of empirical research methods and findings in music and music therapy. Development of APA writing style. Course must be completed with a C- or better in order to be eligible for internship (MUS 457). Prerequisites: MUS 166, 182, 184, and 198; or consent of instructor.

453 Music Therapy in Medicine. (3) Theory, research, and clinical skills related to music therapy in gerontology, neurologic illness and injury, and patients in medical hospitals. Course must be completed with a C- or better in order to be eligible for internship (MUS 457). Prerequisites: MUS 166, 182, 184, 255, 258; or consent of instructor.

454 Music Therapy in Development and Education. (3) Theory, research, and clinical skills related to music therapy in early intervention, special education, and developmental disabilities across the lifespan. Course must be completed with a C- or better in order to be eligible for internship (MUS 457). Prerequisites: MUS 166, 182, 184, 255, 258; or consent of instructor.

455 Psychological Applications and Theories in Music Therapy. (3) Theory, research, and clinical skills related to music therapy in psychotherapy, counseling,
and hospice. Music therapy program design and administration. Discussion of music in therapy and music as therapy. Development of personal philosophy of music therapy. Internship preparation. Course must be completed with a C- or better in order to be eligible for internship (MUS 457). Prerequisites: MUS 166, 182, 184, 255, 258; or consent of instructor.

457 Clinical Internship in Music Therapy. (4–12, not repeatable) A six-month music therapy clinical internship in approved clinical training centers. The clinical internship is in addition to and follows the completion of the undergraduate requirements for Music Therapy. Prerequisites: completion of all other undergraduate requirements for Music Therapy major including obtaining a C- or better in MUS 151, 158, 254, 255, 258, 355, 358 (2 hours required), 451, 452, 453, 454, 455, and 458.

458 Practicum in Music Therapy III. (1, repeatable to 3) Supervised, individually led clinical experience in assessing, planning, intervening, measuring, evaluating, and documenting music therapy treatment in an assigned clinical setting. Discussion of clinical and professional topics in weekly seminar. 1 s.h. required in Music Therapy degree program with a C- or better in order to be eligible for internship (MUS 457). Prerequisites: MUS 166, 182, 184; MUS 358 with a C- or better; or consent of instructor.

461 String Pedagogy. (1–2, repeatable to 8) A study of the methods and approaches to the teaching of strings in class and studio. Laboratory observation and teaching. Prerequisites: string principal and consent of instructor.

465 Piano Pedagogy I. (2) Introduction to the history of piano pedagogy and current learning theories. Examination of teaching methods and materials at the beginning through intermediate levels. Lecture/discussion meetings will be complemented with student presentations. Prerequisites: MUS 182, 184; ENG 180 and 280; PSY 100 and 221; piano principal or consent of instructor.

466 Piano Pedagogy II. (2) Introduction to piano pedagogy research. Examination of teaching methods and materials for advanced and adult students. Students will be asked to complete a teaching demonstration. Prerequisite: MUS 465 or permission of instructor.

481 Counterpoint. (3) Studies in tonal counterpoint. Representative techniques and genres including invention and fugue. Prerequisites: MUS 166, 282, 284.

482 Materials of Post-Tonal Music. (3) An examination of post-tonal compositional practices and styles through exercises and analysis. Prerequisites: MUS 166, 282, 284.

483 Orchestration. (3) Study of instruments and instrumentation through practical exercises. Prerequisites: MUS 166, 282, 284.

485 Techniques of Electronic Music. (3) Fundamental concepts in electronic music and classical techniques in studio work. Prerequisites: MUS 166, 182, 184.

487 Jazz Arranging and Composition II. (2) Composition techniques to include writing for the jazz orchestra in extended non-traditional formal designs. Atonal application for jazz composition, to include pan-diatonicism, polytonality, pitch class set techniques, and serial techniques. Prerequisites: MUS 387, 482, or consent of instructor.

489 Special Topics in Music History. (3, repeatable to 6 with different topics) This course explores selected topics of interest including but not limited to individual composer studies, music and its intersections with historical, sociological, and cultural influences, and musical genre studies. Prerequisites: MUS 390 or 391, or consent of instructor.

490 Literature and Pedagogy of Wind and Percussion Instruments. (1–3, repeatable to 3) Survey of woodwind or brass or percussion literature and pedagogy considered from its historical, formal, stylistic, and aesthetic aspects. Content varies with areas of performance and expertise. Prerequisites: Music major and/or consent of instructor.

491 History of American Music. (3) A history of music in America from colonial times to the present. Prerequisites: MUS 390, or 391, or consent of instructor; ENG 180 and 280.

492 String Literature. (2) History of stringed instruments and early performance practices. Performers, pedagogical treatises, and literature through the twentieth century.

495, 496 Piano Literature I and II. (2 per semester) Survey of keyboard literature considered from its historical, formal, stylistic and aesthetic aspects. Nonsequential. Prerequisites: MUS 182, 184; ENG 180 and 280; piano principal or consent of instructor.

497 Jazz History, Selected Topics. (2, repeatable to 4) An in-depth study of selected topics from the history of jazz. Topics in this course change each time it is taught. Prerequisites: MUS 166, 182, 184, 397; consent of instructor.

499 Vocal Literature and Pedagogy. (2, repeatable to 4) Survey of vocal literature and pedagogical philosophies and techniques considered from historical and applied aspects. Includes performance/pedagogy projects of Early English/Italian repertoires, German “Lieder,” French “Melodie,” English language repertory as well as other selected national and ethnic traditions. Prerequisite: vocal or piano major or consent of the instructor.
Program Offering and Locations:

- Bachelor of Science in Nursing: Macomb, Online (RN–BSN Completion emphasis)

For student learning outcomes, please see [wiu.edu/provost/learningoutcomes](http://wiu.edu/provost/learningoutcomes).

Faculty: Bartlett, Baylor, Eathington, Fox, Harden, Lino, Made Gowda, Monahan, Nash, White, Whitehouse, Wolfe.

The School of Nursing at Western Illinois University is committed to educating future professional nurses who are clinically competent using evidence based practice as the norm, capable of critical thinking using information and information technology to design and redesign care and care systems, and ethically and legally accountable for their actions. The School offers a Bachelor of Science in Nursing (B.S.N.) for pre-licensure students, as well as an RN-BSN Completion Program for those students who are registered nurses.

**GradTrac** is available to Nursing majors. See page 79 for information about GradTrac.

**Honors Curriculum**—Academically qualified students in this School are encouraged to complete an honors curriculum in University Honors, Honors in the Major, or General Honors. All Honors students must complete the one-hour honors colloquium (G H 299). General Honors includes General Honors coursework. Honors in the Major includes honors work in the major. University Honors combines Honors in the Major and General Honors. For more information about honors curricula, see page 100 or visit the Centennial Honors College website at [wiu.edu/Honors](http://wiu.edu/Honors).

Acceptance into the Nursing Major

1. Upon being admitted to Western Illinois University, students indicating a desire to be considered for admission into the School of Nursing will be granted one of the following options:
   a. Early admission into the Nursing major
   b. Accepted in the Pre-Nursing program and required to complete criteria for admission to the Nursing major
2. Complete all General Education and Nursing support course requirements.
3. Students in the Pre-Nursing program must submit a formal application to the Nursing major.

Pre-Licensure Program

Prospective Nursing students must apply for and be granted regular admission to Western Illinois University and declare Pre-Nursing after acceptance to the University.

Admission to the School of Nursing

Individuals who wish to major in Nursing and enter the Pre-Nursing program will declare their intent with Admissions. New freshmen students will be accepted as a Pre-Nursing major if they have an ACT composite score of 20 or higher or SAT composite score of 1020 or higher, and a high school academic GPA of 3.00 (on a 4.0 scale) or higher. For new transfer and current WIU students, their applications to the School of Nursing will be reviewed on the basis of all their previous collegiate coursework.

If a student is not selected for early admission to the School of Nursing or placed in the Pre-Nursing program, the student is placed in a program where the General Education and Nursing support course requirements can be completed. All General Education and Nursing
support courses must be satisfactorily completed by August 1 for Fall semester admission and January 2 for Spring semester admission into the Nursing major.

Students who wish to transfer to the Pre-Nursing program but were not eligible to be placed in Pre-Nursing at the time of admission to the University may do so after they successfully complete at least 24 semester hours with a cumulative GPA of 3.0 (on a 4.0 scale), including at least three (3) of the Nursing support courses with a C+ or better and with permission from the Nursing advisor.

There is no guarantee that students who are in the Pre-Nursing program will be admitted to the Nursing major. Please note that admission to the Nursing major is highly competitive. Students who have completed 60 semester hours of the General Education and support courses or are in the final semester of completing the requirements may formally apply to the School of Nursing for admission to the Nursing major.

Individuals who are registered nurses with either an Associate's degree in Nursing or a Diploma in Nursing will first be admitted to Western Illinois University and request the RN–BSN Completion Program. RN students may formally apply to the School of Nursing for admission to the Nursing major after all General Education and support course requirements have been satisfied. Special consideration may be given to prospective students with documented extenuating circumstances.

Early Admission to the Nursing Major

New freshmen may be selected for early admission to the Nursing major on the basis of their application to the School of Nursing. Students selected for early admission into the Nursing major typically have an ACT composite score of 24 or higher or SAT composite score of 1160 or higher. Students are accepted into the major on a competitive and selective basis; however, students selected for early admission are guaranteed placement into the Nursing major. To maintain early admission into the Nursing major status, students must maintain an overall WIU GPA and a Nursing support course GPA of 3.0 (on a 4.0 scale) or higher. Any student not adhering to the above criteria will be moved to University Advising major status and will need to reapply to the Nursing major during specified time periods. A student admitted via the Early Admission classification must be enrolled full-time at Western Illinois University while completing his/her prerequisite coursework and General Education requirements unless the student receives prior approval from his/her academic advisor. Failure to do so could result in dismissal from the program. The number of students admitted into the major may vary from year to year, depending on program capacity and qualifications of students in the pool. Students granted early admission into the major will complete the admission packet and submit the required paperwork by March 1 but will not be placed in the new applicant pool, as they have already been admitted.

Admission to the Nursing Major

Students who wish to apply to the School of Nursing for admission to the Nursing major must:

1. Have a completed application on file with the Nursing Centralized Application Service (Nursing CAS) no later than the following deadlines:
   - **Pre-Licensure Program**: March 1 for admission to the next Fall semester and October 1 for admission to Spring semester.
   - **RN–BSN Completion Program**: August 1 for admission to Fall semester.

2. Provide evidence of English language proficiency by obtaining a satisfactory score on the Test of English as a Foreign Language (TOEFL) by August 1 for Fall semester admission or by January 2 for Spring semester admission. A satisfactory minimal passing TOEFL score is 560 paper-based, 220 computer-based, or an 83 on the internet Based Version (iBT). Only students whose native language is English are exempt from the English proficiency requirements.
**Pre-Licensure Program:** Students must also successfully completing the English as a Second Language Program through the WESL Institute by these deadlines.

3. Complete all General Education and Nursing support course requirements by August 1 for Fall semester admission.

**Pre-Licensure Program:** Deadline for Spring semester is January 2.

**RN–BSN Completion Program:** Students may also transfer courses to WIU by the August 1 deadline. There are 60 semester hours of General Education and Nursing support course requirements. Special consideration may be given to prospective students with documented extenuating circumstances.

4. Have a minimum cumulative GPA as indicated below. The Nursing support courses must have a grade of C+ (2.33) or better. In addition, only one of the Nursing support courses may be repeated if a grade of C+ (2.33) is not achieved. A student may repeat one course one time. Admission will be denied to any student who receives a second grade of less than C+ (2.33) for any Nursing support course.

**Pre-Licensure Program:** 3.0 on a 4.0 scale for all post-secondary work and for all Nursing support courses. The Nursing support courses must have a grade of C+ (2.33) or better.

**RN–BSN Completion Program:** 2.33 on a 4.0 scale for all post-secondary work. Students may substitute equivalent courses.

5. All Nursing and Nursing support courses must be completed within the last five years. For Nursing courses and/or Nursing support courses more than five years old, the student must submit a portfolio to the School of Nursing Committee for Admission, Progression and Retention as specified below. The five-year requirement for Nursing and Nursing support courses may be waived as indicated below.

**Pre-Licensure Program:** Portfolio is to detail the student’s work experiences and continuing education (CE) (requires documentation) since completing the course(s). May be waived for those students who have maintained continuous work experience related to the Nursing support courses or have continuous continuing education (CE) in Nursing related to the Nursing support courses since completing the courses. Individuals without documented current knowledge may be required to take current Nursing support courses (see page 305).

**RN–BSN Completion Program:** Portfolio is to detail the student’s practice and continuing education (CE) (requires documentation) since graduation from Nursing school. May be waived for those students who have maintained continuous practice or have continuous continuing education (CE) in Nursing since graduation from their Associate's or Diploma program. Nurses without continuous practice or continuous continuing education (CE) in Nursing may be required to take current Nursing support courses (see page 305). The CHEM 101 and CHEM 102 Nursing support course requirement may be waived if the Chemistry course the student completed [at least a C+ (2.33)] was at the college level and included organic chemistry, and the Natural Sciences and Mathematics General Education requirement has been met. The credit hour requirement is not waived, and the student must complete the 125 semester hours required for the degree.

6. Secure letters of reference from two professional references: one academic (i.e., instructor or professor) and one employer (i.e., supervisor). If there has been no employment, students may submit letters from two instructors/professors.

7. By August 1 before Fall semester admission, provide documentation to Certified Background for verification that all University health and safety requirements have been met. (Students are responsible for all costs incurred for admission as well as ongoing health requirements.)
Pre-Licensure Program: Deadline for Spring semester admission is January 2. Students must document that all health and safety requirements for admission to the School of Nursing have been met. Health requirements are different from the standard University requirements.

RN–BSN Completion Program: Students must document that all University health and safety requirements have been met.

8. **Pre-Licensure Program:** Students are responsible for all costs incurred for admission as well as ongoing safety requirements.
   
a. Criminal background check—All applicants are required to submit to a criminal background check. Details will be given to the student upon admission to the program.
   
b. Drug screen—All applicants are required to be drug tested on admission with random drug screens thereafter.
   
c. Applicants with a felony conviction or a positive drug screen may be denied entry into the clinical facility for clinical practice. If a student is denied entry into a clinical facility due to a felony conviction or positive drug screen, the student must withdraw from the program.

Students who do not meet the March 1 and/or the January 2 deadlines may be allowed to begin in the Fall semester if space is available. If space is not available, the student must reapply during the next admission process.

This program is highly competitive. Meeting or exceeding the minimum requirements does not guarantee admission.

9. **RN–BSN Completion Program:** Submit a current copy of the License as a Registered Professional Nurse issued by the state of current residence and practice.

**Advanced Placement Credit**

The registered nurse who has graduated from a state-approved Associate of Applied Science in Nursing or Diploma Nursing program will receive 30 semester hours of “advanced placement credit” provided he/she: 1) graduated within the last five years or 2) graduated more than five years ago and maintained continuous practice or have continuous continuing education (CE) in Nursing since graduation from his/her Associate’s or Diploma program, and 3) successfully completed (C+ or better) the first nine (9) credits of Nursing courses in the RN–BSN Completion Program. The registered nurse who graduated more than five years ago and does not have continuous practice as a registered nurse or continuous continuing education in Nursing must take the RN Comprehensive Predictor from Assessment Technologies Institute to validate current Nursing knowledge. Upon successful completion (C+ or better) of the first nine (9) credits of Nursing courses in the RN–BSN Completion Program, advanced placement credit will be placed on the student’s WIU transcript in lieu of the 30 semester hours of transferred clinical courses required by pre-licensure students.

**Retention in Nursing Major**

1. All students who are admitted to the School of Nursing must attend a mandatory orientation session to be held on the first day of classes. This is an all-day session. Failure to attend orientation will result in the student being dropped, and the student will have to reapply the following admission cycle.

2. A student must earn a minimum grade of C+ (2.33) in all Nursing and support courses. If a student fails to earn a minimum grade of C+ (2.33) in any Nursing or support course, the student may repeat only a single course and only one time. If a student earns less than a C+ (2.33) in more than one support course and one Nursing course, the student will be dismissed from the Nursing program.
3. After acceptance into the Nursing program, each student must maintain a cumulative GPA of 3.0 on a 4.0 scale for the coursework in the Nursing major to remain in the Nursing program. Students with less than a 3.0 GPA for coursework completed after admission to the Nursing major will be dismissed from the Nursing program. In addition, students must meet the standards of professionalism and safe clinical practices as identified in the Western Illinois University School of Nursing Student Handbook. Students who fail to meet the policies and standards outlined in the School of Nursing Student Handbook will be dismissed from the Nursing program. A student who has been dismissed from the program may appeal to the School of Nursing Committee for Admission, Progression, and Retention for readmission to the program. If the committee grants readmission, the student will develop a plan for remediation and continued success with the Nursing academic advisor subject to approval by the Committee for Admission, Progression, and Retention.

4. To register for Nursing courses, students are required to have up-to-date health and safety data on file with Castle Branch. Students will not be allowed in the clinical courses without up-to-date health and safety requirements met.

**Nursing Licensure**

Upon graduation, pre-licensure students must successfully pass the National Council Licensure Examination for Registered Nurses (NCLEX–RN) in order to become a licensed Registered Nurse. Students should plan to take the NCLEX–RN as soon after graduation and completion of their review course as possible.

**Nursing Support Courses**

- ZOOL 330: Human Anatomy and Physiology I
- ZOOL 331: Human Anatomy and Physiology II
- CHEM 101: Principles of Chemistry I
- CHEM 102: Principles of Chemistry II
- EDS 121: Introduction to Life Span Development
- MICR 200: Introductory Microbiology
- NUTR 109: Introduction to Nutrition
- STAT 171: General Elementary Statistics

**Degree Program**

**Bachelor of Science in Nursing**

All students seeking the Bachelor of Science in Nursing must complete I, II, III, and IV below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 125 s.h.

I. University General Education Curriculum (p. 70) .................................................. 45 s.h.
   (To include CHEM 101, 102; NUTR 109; PHIL 120; PSY 100; SOC 100; STAT 171)

II. Core Courses .................................................................................................................. 17 s.h.
   NURS 302, 312, 316#, 408‡, 415, 461

III. Emphasis of Study (Select A or B)
   A. Pre-Licensure
      1. NURS 305, 309, 310, 322, 326, 327, 328, 410, 422, 424, 425, 428 .......... 45 s.h.
      2. Select one course from: NURS 379, 430, 431, 432, 433, 434, 436, 438, 440...3 s.h.
   B. RN–BSN Completion
      1. NURS 300, 308, 405, 409‡ .................................................................................. 13 s.h.
      2. Select two courses from NURS 379, 430, 431, 432, 433, 434, 436, 438, 440...6 s.h.
      3. Transfer Nursing courses from Associate's degree or Diploma in Nursing...30 s.h.

IV. Other Requirements ..................................................................................................... 15 s.h.
   EDS 121; MICR 200; ZOOL 330, 331
Nursing

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing NURS 316.

† NURS 408 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement for the Pre-Licensure emphasis. NURS 408 and 409 fulfill the Writing Instruction in the Disciplines (WID) graduation requirement for the RN–BSN emphasis.

Course Descriptions

NURSING (NURS)

300 Theoretical and Conceptual Foundations of Professional Nursing. (3) The theoretical and conceptual foundations of professional nursing practice are explored. The evolving roles of nursing are analyzed in terms of role preparation, scope of practice, certifications, and career mobility and advance opportunities. Prerequisite: admission to the RN–BSN Completion Program.

302 Health Assessment. (3) This course presents the basic elements of health assessment of all body systems as related to nursing practice and as a part of a patient's medical history. Physical and psychosocial assessment will be practiced. A clinical/laboratory component course. Prerequisite: admission to the BSN program or permission of program director.

305 Introduction to Professional Nursing. (3) This course provides the foundation for professional nursing practice by explaining the American Nurses Association scope and standards of practice as well as the code of ethics for nurses. Prerequisite: admission to the BSN program.

308 Ethical and Legal Issues in Professional Practice. (3) This course examines the legal foundations of nursing practice and the ethical decisions nurses have to make. Prerequisite: NURS 300.

309 Concepts in Community Health Nursing. (1) This course provides an overview of the focus and roles of nurses in community-based practice. Students will explore the development of health educational activities and nursing interventions that are appropriate for nursing care in the community. Prerequisite: NURS 302, 305, and 310.

310 Fundamentals of Nursing. (6) This course introduces the novice nurse to the basic processes, skills, and practice needed to provide care for clients of all ages using a self-care framework. Includes classroom, laboratory, and clinical learning experiences. Corequisites: NURS 302 and 305.

312 Genetics in Nursing Practice. (1) The focus of this course is the use of genetic/genomic information in nursing and health care. Prerequisite: ZOOL 331.

316 Transcultural Nursing. (2) (Global Issues) Students will examine health care systems from a variety of cultures and countries. A global perspective should help students provide culturally appropriate care for clients and also prepare them for the myriad of perspectives they will encounter in professional practice. Prerequisite: admission to the BSN program or permission of the program director.

322 Adult and Child Nursing I. (5) Students provide nursing care for clients from childhood through old age with acute and chronic needs related to cell growth and oxygenation. Clinical experiences will occur in various settings. Prerequisite: NURS 310 and 461.

326 Pharmacology I. (3) This course introduces the pharmacotherapeutics, pharmacokinetics, and pharmacodynamics of agents used in patient care and education. Prerequisite: NURS 310.

327 Pharmacology II. (2) This is the second course in a two course series and continues the discussion of pharmacotherapeutics, pharmacokinetics, and pharmacodynamics of agents used in patient care and education. Prerequisite: NURS 326.

328 Mental Health Nursing. (3) Students provide nursing care for clients from childhood through old age with acute and chronic needs related to mental health. Clinical experiences will occur in various settings. Prerequisite or Corequisite: NURS 322.

405 Nursing and the Community. (4) This course focuses on understanding and practicing public health and community health nursing, including epidemiology, client system, health behavior, health accommodation, stress and adaptation, and levels of prevention, immunizations, home care, clinics, and community agencies. A clinical component course. Prerequisite: NURS 408.

408 Nursing Research. (3) An examination of research methods as they pertain to nursing including the role of theory, modes of inquiry, research models, and ethical issues. Applying research in the development of patient care plans. Writing Instruction in the Disciplines (WID) course. Prerequisites: ENG 280, STAT 171. Corequisite: NURS 322, or credit for NURS 300.†

409 Professional Seminar. (3) This capstone experience course explores the role of baccalaureate preparation for contemporary nursing practice, focusing on the influences of professional organizations, institutional support, and personal change. A professional portfolio will be developed. Writing Instruction in the Disciplines (WID) course. Prerequisite: ENG 280. Corequisite: NURS 415.

410 Public Health Nursing. (3) This course focuses on understanding population-based nursing care and public health nursing concepts including the role of public health nurses, levels of prevention, population-based education, epidemiology, family-based care, immunizations, and specialty areas of population-based care. Prerequisite: NURS 408. Corequisite: NURS 422.

415 Nursing Leadership. Management and Policy. (4) This course focuses on the analysis, integration, and application of principles of leadership and management in health care organizations. Emphasis is placed on skills needed for nurses to succeed as leaders in the professional nursing arena in today’s global care environment. Corequisite: NURS 435.

422 Adult and Child Nursing II. (5) Students provide nursing care for clients from childhood through old age with acute and chronic needs related to metabolic, elimination, and mobility needs. Clinical experiences will occur in various settings. Prerequisite: NURS 322.

424 Adult and Child Nursing III. (7) Students provide nursing care for clients from childhood through old age with acute and chronic needs related to cell growth and neurosensory needs. Clinical experiences will occur in various settings where complex care needs are met. Prerequisites: NURS 328, 422. Corequisite: NURS 425.

425 Senior Seminar. (3) Graduating senior nursing students analyze and synthesize content and experiences from all previous and concurrent Nursing courses. To be taken in the student's final semester of coursework. Prerequisites: NURS 327, 328, 410, 422; special permission of the Director, School of Nursing. Corequisite: NURS 415, 424.

428 Maternal Child Nursing. (4) Students provide nursing care for women of childbearing age and young children. Clinical experiences will occur in various settings that provide health care services for women of childbearing age and young children. Prerequisite or Corequisite: NURS 322.
430 Geriatric Nursing. (3) This course covers issues of health policy, financial and psychosocial support for young elders, functionally able elders, and frail elders. Assessment, diagnosis, and treatment of common health problems of the elderly will be addressed. A clinical component course. Prerequisite: NURS 405, or NURS 405 concurrently, or permission of the program director.

431 Rural Nursing. (3) An examination of rural nursing, focusing on need, delivery, access, availability, acceptability, and types of health care in rural areas. A clinical component course. Prerequisite: NURS 405, or NURS 405 concurrently, or permission of the program director.

432 Nursing Informatics. (3) This course examines the manner in which information, data, facts, and figures are developed, utilized, and analyzed for patient improvement. Prerequisites: NURS 408 and STAT 171 or permission of program director.

433 Community Mental Health Nursing. (3) Explores population-specific mental health issues including access, treatment modalities, and follow-up, and drug and alcohol abuse in the context of community health nursing. A clinical component course. Prerequisite: NURS 328 or permission of program director.

434 Geropsychiatric Nursing I. (3) This course is part one of a two-part series examining nursing care for mental health promotion and nursing care management of adults aged 65 and older. Prerequisite: NURS 302. Corequisite: NURS 405 or 410, or permission of the instructor.

435 Geropsychiatric Nursing II. (3) This course is part two of a two-part series examining nursing care for mental health promotion and nursing care management of adults aged 65 and older. Prerequisite: NURS 434 or permission of the instructor.

436 Forensic Nursing. (3) An introduction into forensic nursing practice. Discusses historical framework of forensic nursing, analyzes concepts, and synthesizes theory and practice. Identifies assessment tools and interprets assessment findings. Discusses management of forensic populations. Prerequisite: NURS 302 or permission of the instructor.

438 Forensic Nursing. (3) An introduction into forensic nursing practice. Discusses historical framework of forensic nursing, analyzes concepts, and synthesizes theory and practice. Identifies assessment tools and interprets assessment findings. Discusses management of forensic populations. Prerequisite: NURS 302 or permission of the instructor.

440 Electrocardiographic Monitoring and Dysrhythmia Management. (3) Focuses on the identification and nursing care management for patients with cardiac dysrhythmias. This course is for students who have completed a medical surgical nursing course where cardiac care was discussed. Prerequisite: NURS 322 or permission of the instructor.

461 (Cross-listed with ZOOL 461) Pathophysiology. (4) Alteration in physiology, pathogenesis of structure and function of the human body leading to disease, and manifestations of disease states are discussed. In addition, body system interaction is analyzed in maintaining physiological homeostasis during disease/ altered states. Not open to students with credit in ZOOL 461. Prerequisites: MICR 200 (C grade or better), ZOOL 330 and ZOOL 331; or consent of instructor.

Program Offerings and Locations:
- Bachelor of Science in Physics: Macomb
- Minor in Physics: Macomb

For student learning outcomes, please see wiu.edu/provost/learningoutcomes.

The science of Physics explores the basic properties of matter, energy, and their mutual interactions. Using precise experimental measurements, physicists formulate laws which describe the observed behavior of the physical world. In the Bachelor of Science program, students gain experience in dealing with a broad range of physical phenomena. They learn the laws of Physics and develop the theoretical, computational, and experimental skills necessary to apply these laws to a wide range of phenomena. With a Bachelor of Science degree in Physics, a student is prepared to do design and development work in industry or a government laboratory or to teach high school science and Physics. Students planning to do Physics research or to teach at the university level should study further and obtain an M.S. or Ph.D. degree.

GradTrac is available to Standard Physics majors. See page 79 for information about GradTrac.

Honors Curriculum—Academically qualified students in this department are encouraged to complete an honors curriculum in University Honors, Honors in the Major, or General Honors. All Honors students must complete the one-hour honors colloquium (G H 299). General Honors includes General Honors coursework. Honors in the Major includes honors work in the major. University Honors combines Honors in the Major and General Honors. For more information about honors curricula, see page 100 or visit the Centennial Honors College website at wiu.edu/Honors.

Integrated Baccalaureate and Master’s Degree Program—An integrated baccalaureate and master’s degree program is available for the Bachelor of Science in Physics: Master of Science in Physics. An integrated degree program provides the opportunity for outstanding undergraduates to earn both degrees in five years. Please refer to the Graduate Studies catalog for details about the integrated program.

Degree Program

Bachelor of Science—Physics

All students seeking the Bachelor of Science in Physics must complete I, II, and III.A, III.B, or III.C below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

In accordance with the Illinois State Board of Education licensure rule, all candidates seeking a Professional Education License or endorsement are required by Western Illinois University to obtain a grade of “C-” or better in all directed general education courses, all core courses, and all courses in the option. This rule does not supersede course prerequisite requirements in the catalog that specify a letter grade.

Please see the Teacher Education section of this catalog (p. 346) for more information about WIU’s Teacher Education Program.

I. General Education Curriculum ........................................................................................................ 43 or 55 s.h.
   Option A Standard Physics: University General Education Curriculum and College of Arts and Sciences Curriculum Requirements—55 s.h. (p. 86)
II. Core Courses .................................................................................................................. 15 s.h.
PHYS 211, 212, 213, 214

III. Options of Study (select A, B, or C)
A. Standard Physics
1. Special Courses ........................................................................................................ 26 s.h.
   PHYS 311&, 354, 420, 427, 428, 430, 470, 490†; and any one of the
   following: PHYS 305, 410, 421, 431, 461, 462
2. Any minor (A minor in Mathematics is recommended. PHYS 406
   may be counted toward a minor in Mathematics.) ........................................ 16–18 s.h.
3. Other........................................................................................................................ 23 s.h.
   a. MATH 133, 134, 231, 333 ................................................................. 15 s.h.
   b. CHEM 201, 202 ............................................................................. 8 s.h.
B. Engineering Physics
1. Special Courses ........................................................................................................ 19–22 s.h.
   a. PHYS 490† .................................................................................... 2 s.h.
   b. Select three of the following: PHYS 310@, 311&, 354,
      420 ........................................................................................... 9–10 s.h.
   c. Select two of the following: PHYS 305, 406, 410,
      421, 430 .................................................................................... 6 s.h.
   d. Select one of the following: PHYS 427, 428, 470 ......................... 2–4 s.h.
2. Engineering courses taken at WIU—QC or a Transfer Institution*
   of which 15 s.h. must be at the upper-division level ..................................... 18 s.h.
3. Other........................................................................................................................ 33–35 s.h.
   a. CHEM 201, 202 ............................................................................. 8 s.h.
   b. CS 225 ............................................................................................ 3 s.h.
   c. ET 105 ............................................................................................ 3 s.h.
   d. MATH 133, 134, 231, 311, 333 ................................................. 18 s.h.
   e. Open Electives .............................................................................. 1–3 s.h.
C. Science/Physics—Teacher Education
1. Special Courses ....................................................................................................... 38 s.h.
   a. BIOL 101, 281, 481 ....................................................................... 8 s.h.
   b. CHEM 201, 202 ............................................................................. 8 s.h.
   c. GEOL 110 ....................................................................................... 4 s.h.
   d. BIOL/GEOL 181; PHYS/GEOG 182 ........................................... 8 s.h.
   e. PHYS 427, 428, 482† .................................................................... 10 s.h.
2. Departmental Electives: Upper-Division Physics Electives ......................... 6 s.h.
3. Science Electives
   Any additional mathematics or science courses leading to additional
   endorsements in mathematics or science (MATH, BIOL, BOT, CHEM,
   GEOG, GEOL, MICR, ZOOL)
4. Other........................................................................................................................ 46 s.h.
   a. EDUC 239, 339, 439, 469 ............................................................. 3 s.h.
   b. EDS 202, 301, 303 (2 s.h.), 304 (1 s.h.), 305, 401 ....................... 13 s.h.
   c. MATH 133, 134, 231 .................................................................... 12 s.h.
   d. ENG 366 ......................................................................................... 2 s.h.
   e. SPED 210 and 390 ........................................................................ 4 s.h.
   f. STCH 480 ...................................................................................... 12 s.h.

# The foreign language/global issues graduation requirement may be fulfilled by successfully
completing one of the following: 1) a designated foreign language requirement [see Foreign
Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3)
any major’s discipline-specific global issues course; or 4) an approved Study Abroad program.
& Students may also fulfill this requirement through the completion of ENGR 212. See advisor.
† PHYS 490 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement for the Standard Physics and Engineering Physics options. PHYS 482 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement for the Science/Physics—Teacher Education option.
@ Students may also fulfill this requirement through the completion of ENGR 211. See advisor.
* When transferring to a different institution, the student must complete the Engineering degree to receive the degree in Engineering Physics from Western under this option.

Minor

Minor in Physics

1. PHYS 300 ................................................................. 3 s.h.
2. Choose one of the following sequences: .............. 8–10 s.h.
   a. PHYS 114, 115
   b. PHYS 124, 125
   c. PHYS 211, 212
   d. PHYS 211, 213

3. 3–5 s.h. of approved Physics elective courses numbered 300 or above; may not include more than 3 s.h. of PHYS 477 .............. 3–5 s.h.

Pre-Professional Programs

A pre-professional program in discipline-specific Engineering is available. See Pre-Professional Programs (p. 318) for detailed descriptions of the requirements.

Course Descriptions

PHYSICS (PHYS)

100 Physics for Society. (4) (General Education/Natural Sciences) A survey course in Physics that introduces basic principles and applications in the modern world. Uses algebra at the high school level. 3 hrs. lect.; 2 hrs. lab. IAI: P1 901L.

101 Introduction to Astronomy. (3) (General Education/Natural Sciences) A basic introduction to modern astronomy, examining the physical principles of telescopes, gravity, radiation and atoms, the solar system, stars, galaxies, and cosmology. No Physics or Mathematical background beyond high school algebra and physical science is assumed. No prerequisites. IAI: P1 906.

Applied Physics (114, 115) is a one-year sequence which stresses basic concepts and applications to practical problems. Designed for the non-science major, it satisfies the general requirements for a laboratory science.

114, 115 Applied Physics. (4 each) (General Education/Natural Sciences) Includes mechanics with hydrostatics and hydrodynamics; heat and thermodynamics; wave motion and optics; D.C. electricity, magnetic induction, and A.C. electricity. Assumes that students have a knowledge of high school algebra and trigonometry. Recommended, but not required, to take the course in sequence. 3 hrs. lect.; 2 hrs. lab.

General Physics (124, 125) is a non-calculus general Physics sequence designed to meet the needs of all science majors who do not plan to take the Physics 211–214 sequence.

124, 125 General Physics. (5 each) A two-semester introduction to basic ideas and experimental methods in such areas as mechanics and the conservation laws; wave motion and sound; heat and temperature; electricity and magnetism; light and optics; atomic and nuclear Physics. Assumes that students have a knowledge of high school algebra and trigonometry. The course must be taken in sequence. 3 hrs. lect.; 1 br. discussion; 2 hrs. lab.

150 Energy and the Environment. (4) (General Education/Natural Sciences) (Global Issues) An introductory course concerned with the global and international topics of energy conversion, air and land pollution, and alternative energy sources. Uses algebra at the high school level. 3 hrs. lect.; 2 hrs. lab.

182 (Cross-listed with GEOG 182) Integrated Science II. (4) (General Education/Natural Sciences) A laboratory course in interdisciplinary science with an emphasis on the Earth's place in the physical universe. Topics address the nature of matter and energy and their impact on the Earth's weather and climate. (Integrated Science I is BIOL/GEOL 181) Not open to students with credit in GEOG 182. Prerequisite: MATH 100. 3 hrs. lect.; 2 hrs. lab. IAI: EGR 913; PHY 913.

211 University Physics I. (4) (General Education/Natural Sciences) Motion, Newton's laws, forces, momentum, energy, work, rotation, and simple harmonic motion. Prerequisite or Corequisite: MATH 133. 3 hrs. lect.; 1 br. discussion; 2 hrs. lab.

212 University Physics II. (4) (General Education/Natural Sciences) (Cross-listed with GEOG 182) Kinetic theory, thermodynamics, wave motion, sound, optics. Prerequisite: PHYS 211. Prerequisite or Corequisite: MATH 134. 3 hrs. lect.; 1 br. discussion; 2 hrs. lab.

213 University Physics III. (4) Electrostatics, electric fields, D.C. circuits, magnetism, A.C. circuits, and introduction to basic electronic devices. Prerequisite: PHYS 211. Prerequisite or Corequisite: MATH 134. 3 hrs. lect.; 1 br. discussion; 2 hrs. lab.

214 University Physics IV. (3) Relativity, blackbody radiation, atomic structure and spectra, introduction to quantum mechanics, selected topics from nuclear and solid state Physics. Prerequisites: PHYS 212 and 213, or 125. 3 hrs. lect.; 2 hrs. lab.
300 Concepts of Modern Physics. (3) This course is intended for Physics minors, and it focuses on the main concepts of modern physics such as relativity, quantum mechanics, statistical mechanics, solid state physics, and nuclear and particle physics. \textit{Cannot be applied toward Physics major. Prerequisite: Students must have completed one of the following sequences required for a Physics minor: PHYS 114/115, 124/125, 211/212, or 211/213, or consent of instructor.}

305 (Formerly PHYS 367) Mathematical Methods of Physics I. (3) Vector analysis, matrices, determinants, infinite series, applications of differential equations, numerical solutions. \textit{Prerequisites or Corequisites: PHYS 214. MATH 333, or consent of instructor.}

310 Statics. (3) Basic concepts of statics with engineering applications including rigid bodies, simple structures, flexible cables, beams, friction, virtual work. Not available to students who are currently enrolled in or have completed ENGR 211. \textit{Prerequisite: PHYS 211.}

311 Classical Mechanics. (3) Basic concepts of dynamics including Newton's laws, energy, momentum, rigid body dynamics, oscillators, Lagrange's method, central forces, accelerated coordinates, mechanics systems. \textit{Prerequisite: PHYS 211. Prerequisite or Corequisite: MATH 333.}

354 Thermodynamics. (3) Concept of temperature; the first, second, and third laws of thermodynamics; applications to gases; change of state; kinetic theory; and applications to simple models of familiar situations. \textit{Prerequisites: PHYS 212 and MATH 333.}

406 (Formerly PHYS 465) Mathematical Methods of Physics II. (3) Complex variables, orthogonal functions, special functions, general solution of partial differential equations in Physics. Fourier series and Fourier integrals. \textit{Prerequisite: PHYS 305.}

410 Computational Methods. (3) Applications of FORTRAN and/or MATHEMATICA to programming of numerical and analytical calculations, data fitting, simulation of physical problems, and individualized work on problems chosen from the student's field of interest. \textit{Prerequisites: basic knowledge of FORTRAN, one year of general Physics, one year of calculus, or consent of instructor.}

418 (Cross-listed with BIOL/CHEM/GEOL 418) Introduction to Scanning Electron Microscopy. (4) The course focuses on capabilities and operation of scanning electron microscopes with emphasis on beam-material interactions, sample preparation, image acquisition and analysis, and X-ray measurements with applications in Biology, Chemistry, Geology, and Physics. \textit{Not open to students with credit in BIOL/CHEM/GEOL 418. Prerequisites: BOT 200 (C grade or better), or CHEM 202, or MICR 200 (C grade or better), or PHYS 125, or PHYS 212, or ZOOL 200 (C grade or better); or consent of instructor. 3 hrs. lect.; 2 hrs. lab.}

420 Electricity and Magnetism I. (3) Electrostatics, magnetostatics, electromagnetic induction, introduction to Maxwell's equations. \textit{Prerequisites: PHYS 213 and MATH 333.}

421 Electricity and Magnetism II. (3) Maxwell's equations, plane EM waves in infinite media, reflection and refraction of EM waves, guided EM waves, radiation of EM waves, relativistic treatment of electricity and magnetism. \textit{Prerequisite: PHYS 420.}

427 Advanced Electronics. (3) Electronic measurement fundamentals, passive circuit elements, analog electronics (op amps, transducers, noise reduction), digital electronics (logic gates, flip flops, counters, combinational and sequential circuits), D/A and A/D conversion, data acquisition techniques. \textit{Prerequisite: PHYS 115 or 125 or 213. 2 hrs. lect.; 2 hrs. lab.}

428 Applied Optics. (4) Geometrical optics, diffraction, interferometry, polarization, laser construction, optical materials, holography. Modern optical techniques and instrumentation are emphasized. \textit{Prerequisite: PHYS 125 or 212. 3 hrs. lect.; 2 hrs. lab.}

430 Introductory Quantum Mechanics I. (3) Atomic nature of matter, introduction to quantum mechanics including Schroedinger equation. \textit{Prerequisite: PHYS 214 and MATH 333.}

431 Introductory Quantum Mechanics II. (3) Spin, fine structure, atomic spectroscopy, perturbation theory, applications. \textit{Prerequisite: PHYS 430.}

461 Astrophysics I. (3) Introduces basic concepts and tools in modern astrophysics, including celestial mechanics, spectroscopy, and telescopes. Provides a comprehensive description of stellar astrophysics. The physical processes and observational characteristics of stars in hydrostatic equilibrium, including our sun, are analyzed. \textit{Prerequisite: PHYS 214 or permission of the instructor.}

462 Astrophysics II. (3) An overview of galactic and extragalactic astrophysics. The Milky Way galaxy is studied in detail, including dark matter and stellar evolution. Other galaxies, the large scale properties of the universe, and cosmology are discussed. \textit{Prerequisite: PHYS 461 or permission of the instructor.}

470 Modern Experimental Physics. (2) Laboratory experiments illustrating both the development of modern physics and modern experimental techniques. Experiments cover a range of topics. \textit{Prerequisite: PHYS 214.}

476 Special Topics in Physics. (1–4, repeatable with no maximum) Lecture course in topics of current interest, to be announced in the class schedule. Topics based on the student's previous training and interests. \textit{Prerequisite: consent of instructor.}

477 Special Problems in Experimental and Theoretical Physics. (1–4, repeatable with no maximum) Individualized study of any phase of Physics not otherwise covered. Opportunity for undergraduates to engage in experimental or theoretical research under staff supervision. \textit{Prerequisite: consent of the instructor.}

478 Physics Internship. (1–12) A one-semester on-the-job experience in an industrial facility or a research laboratory. \textit{Prerequisite: consent of department chairperson and PHYS 477.}

482 (Cross-listed with BIOL 482 and CHEM 482) Science in Context. (3) Interdisciplinary course for science majors in which students explore science through inquiry, the unifying principles of science, and the role of social contexts and ethics in science. \textit{Writing Instruction in the Disciplines (WID) course. Not open to students with credit in BIOL 482 or CHEM 482. Prerequisites: senior standing in one of the following science majors—Biology, Chemistry, Physics, Geology, or Meteorology; ENG 280; or permission of instructor.}

490 Seminar. (2) Reading, discussion, and criticism of selected topics. Oral presentation and formal paper on a chosen topic. \textit{Writing Instruction in the Disciplines (WID) course. Prerequisite: ENG 280.}

491 Honor Thesis. (1–3, not repeatable) A Physics thesis prepared by an Honors student under the direction of one or more members of the Physics Department. \textit{Prerequisite: Honors major in Physics and junior or senior standing.}

\textbf{(Education)}

239 Pre-Teacher Education Program Admittance. (0, repeatable with no maximum) Students pursuing teacher licensure are required to take this course in the semester they plan to be fully accepted in the Teacher Education Program (TEP). Students must meet established departmental criteria for admittance to TEP. \textit{Graded S/U.}
339 Pre-Student Teaching Clearance. (0) Students pursuing teacher licensure are required to take this course prior to their student teaching semester. Students must meet established criteria for departmental clearance to student teach. Prerequisites: Full admittance to the Teacher Education Program (TEP). Graded S/U.

439 Methods of Teaching Middle and High School Science. (3) Study of secondary teaching methods (Grades 6–12) from the standpoints of theory and practice, curriculum objectives and standard implementation, materials, and evaluation and assessment. Included are demonstrations, discussions, lectures, classroom participation, and field observations. Prerequisites: BIOL/GEOL 181 or GEOG/PHYS 182, BIOL 281, and EDS 301 (all with C- grade or better). Corequisite: EDS 303.

469 Pre-Licensure Clearance. (0) Students pursuing teacher licensure are required to take this course in the semester they student teach. Students must meet criteria established by the department in order to be recommended for licensure. Prerequisite: departmental clearance to student teach. Corequisite: Student Teaching (STCH). Graded S/U.

480 Student Teaching. See STCH 480.
Political Science

Chairperson: Dr. Keith A. Boeckelman
Office: Morgan Hall 422
Telephone: (309) 298-1055; Fax: (309) 298-1739
E-mail: p-science@wiu.edu

Program Offerings and Locations:

- Bachelor of Arts in Political Science: Macomb
- Minor in Global Politics: Macomb
- Minor in International Studies: Macomb
- Minor in Political Science: Macomb, Online
- Minor in Public Administration and Public Service: Macomb

For student learning outcomes, please see wiu.edu/provost/learningoutcomes.

Faculty: Albarracin, Auger, Baldi, Boeckelman, Day, Hardy, LaFrance, Lee, Placide, Taylor.

Political Science is both an ancient discipline and one of the most recent social sciences. Political scientists study political institutions, the political behavior of individuals and groups, the formulation and execution of public policy, the relations among states, and also enduring moral issues, such as what is justice and how leaders should be chosen.

The Political Science major prepares the student for a wide range of careers, including: administration of national, state, and local government agencies; preparation for admission to law school; urban and regional planning; political journalism, the conduct and analysis of foreign policy; and preparation for graduate study in Political Science. The departmental advisor has career guides for students interested in law school, graduate study in Political Science, graduate study in public policy, public administration, foreign affairs, and politics.

GradTrac is available to Political Science majors. See page 79 for information about GradTrac.

Honors Curriculum—Academically qualified students in this department are encouraged to complete an honors curriculum in University Honors, Honors in the Major, or General Honors. All Honors students must complete the one-hour honors colloquium (G H 299). General Honors includes General Honors coursework. Honors in the Major includes honors work in the major. University Honors combines Honors in the Major and General Honors. For more information about honors curricula, see page 100 or visit the Centennial Honors College website at wiu.edu/Honors.

Integrated Baccalaureate and Master’s Degree Program—An integrated baccalaureate and master’s degree program is available for the Bachelor of Arts in Political Science: Master of Arts in Political Science. An integrated degree program provides the opportunity for outstanding undergraduates to earn both degrees in five years. Please refer to the Graduate Studies catalog for details about the integrated program.

Degree Program

Bachelor of Arts—Political Science

All students seeking the Bachelor of Arts in Political Science must complete I, II, and III.A, III.B, III.C, III.D, or III.E below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h. A maximum of 6 s.h. of POLS 402 may be counted towards the Political Science major.

I. University General Education and College of Arts and Sciences Curriculum

   Requirements (p. 85) .......................................................... 60 s.h.

II. Core Courses .......................................................................................... 18 s.h.

   POLS 122*, 228*, 267*, 284, 300 or 302, 492†
III. Options of Study (Select A, B, C, D, or E)

A. Political Science—General

1. Directed Electives
   a. At least one course from POLS 381, 382, 383, 389.................................3 s.h.
      *If more than one course is taken, it counts as a Department Elective.
   b. At least one course chosen from POLS 317, 318, 319.............................3 s.h.
      *If more than one course is taken, it counts as a Department Elective.

2. Department Electives.........................................................12 s.h.

3. Any Minor................................................................. minimum 16 s.h.

4. Open Electives ............................................................ 14 s.h.

B. American Government

1. Directed Electives
   a. At least one course chosen from POLS 381, 382, 383, 389........................3 s.h.
      *If more than one course is taken, it counts as a Department Elective.
   b. At least two courses chosen from POLS 317, 318, 319...............................6 s.h.
      *If more than two courses are taken, they count as Open Electives.
   c. Three courses chosen from POLS 223, 308, 311, 315, 317, 318, 319,
      328, 335, 350, 395, 402, 410, 411, 448, 470.................................................9 s.h.

2. Any Minor................................................................. minimum 16 s.h.

3. Open Electives ............................................................ 14 s.h.

C. International Relations/Comparative Politics

1. Directed Electives
   a. At least one course chosen from POLS 381, 382, 383, 389........................3 s.h.
      *If more than one course is taken, it counts as an Open Elective.
   b. Students must take at least one course from the International
      Relations courses listed below and at least one course from the
      Comparative Politics courses listed below. Students should then
      select 3 additional courses from the lists below...........................................15 s.h.
      *International Relations: POLS 331, 334, 338, 340, 353, 440, 446
      *Comparative Politics: POLS 322, 324, 327, 329, 400, 465

2. Any Minor................................................................. minimum 16 s.h.

3. Open Electives ............................................................ 14 s.h.

D. Pre-Law

1. Directed Electives
   a. At least one course chosen from POLS 381, 382, 383, 389........................3 s.h.
      *If more than one course is taken, it counts as an Open Elective.
   b. At least four courses chosen from: POLS 226, 304, 319, 410,
      411, 435, 447, 448.............................................................................12 s.h.
   c. At least one course chosen from: POLS 223, 315, 317..........................3 s.h.

2. Any Minor................................................................. minimum 16 s.h.

3. Open Electives ............................................................ 14 s.h.

E. Public Administration/Public Policy

1. Directed Electives
   a. Select POLS 300 or 302 (whichever was not taken as a Core course)........3 s.h.
   b. At least one course chosen from POLS 381, 382, 383, 389.......................3 s.h.
      *If more than one course is taken, it counts as a Department Elective.
   c. Three courses chosen from POLS 223, 393, 400, 402, 410, 447, 490,
      493, 494........................................................................................9 s.h.

2. Department Electives.........................................................3 s.h.

3. Any Minor................................................................. minimum 16 s.h.

4. Open Electives ............................................................ 14 s.h.

# The foreign language/global issues graduation requirement may be fulfilled by
   successfully completing one of the following: 1) a General Education global issues course
   or 2) a Political Science (POLS) global issues course.

* Two of POLS 122, 228, 267 may count toward the University General Education requirement.
† POLS 492 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.
Minors

Minor in Political Science ................................................................. 18 s.h.
1. Core .......................................................................................... 9 s.h.
   POLS 122
   One course chosen among POLS 381, 382, 383, 388, 389
   One course chosen among POLS 228, 267, 284, 300
2. Political Science Electives ......................................................... 9 s.h.
   At least 6 s.h. of POLS electives must be chosen from courses
   numbered 300 or above.

Minor in Global Politics ................................................................. 18 s.h.
1. POLS 228 and 267 ................................................................. 6 s.h.
2. Political Science Electives ......................................................... 12 s.h.
   a. Select at least two courses from the following:
      POLS 331, 334, 338, 340, 353, 440, 446
   b. In addition, two courses may be chosen from the following:
      POLS 322, 324, 327, 329, 400, 465

Minor in Public Administration and Public Service .......................... 18 s.h.
1. POLS 122, 300 ........................................................................... 6 s.h.
2. Political Science Electives selected among the following courses:
   POLS 302, 393, 402 (maximum of 3 s.h.), 447, 490, 493, 494
   One course may be selected from the following:
   POLS 223, 401 (maximum of 3 s.h.), 470

Course Descriptions

POLITICAL SCIENCE (POLS)

(American Government and Politics)

122 American Government and Politics. (3) (General Education/Social Sciences) Development, organization, powers, limitation, and practical problems of the governmental and political system of the United States. IAI: SS 900.

223 State Government and Politics. (3) The role of state and local governments within the American federal system. IAI: SS 902.

311 (Cross-listed with AAS 311) Race and Ethnicity in American Politics. (3) This course examines how racial and ethnic minority groups shape, and are shaped by, American politics and society. It focuses primarily on the politics of specific racial and ethnic minority groups in the United States. Not open to students with credit in AAS 311. Prerequisite: POLS 122 or permission of instructor.

315 Illinois Government and Politics. (3) A comprehensive study of Illinois government. Special attention to constitutional developments and the organization and functioning of the government. Prerequisite: POLS 122 or 223; or permission of instructor.

317 The Congress. (3) The role of the national legislature in its relationship to the structure of American government and the legislative process. Prerequisite: POLS 122 or permission of instructor.

318 The Presidency. (3) Analysis of the powers of the President and the relationship of the office to the legislative and judicial branches. Prerequisite: POLS 122 or permission of instructor.

319 The Judiciary. (3) Functions and role of the federal court system and the judicial process. Emphasis on decision-making, judges, the legal profession, and administration of the courts. Prerequisite: POLS 122 or permission of instructor.

328 Politics and the Media. (3) This course will explore the power and limits of the media in American politics as well as the ways in which the media defines the "news." Prerequisite: POLS 122 or permission of instructor.

350 Political Campaigns and Elections. (3) Development of a practical understanding and skill in politics and campaigns through classroom instruction and participation in campaigning. Prerequisite: POLS 122 or permission of instructor.

395 Politics and Religion in America. (3) The impact of religion in contemporary American political life, focusing on constitutional issues, electoral politics, and more generally, the interaction between politics and religion. Prerequisite: POLS 101 or 122 or permission of instructor.

410 Constitutional Law: Government Organization and Powers. (3) An examination of constitutional law in the United States with special emphasis on cases dealing with the framework, powers, and functions of the federal system. Prerequisite: POLS 122 or permission of instructor.

411 Constitutional Law: Civil Liberties and Civil Rights. (3) An examination of U.S. Constitutional law, with special emphasis upon civil liberties and civil rights cases. Prerequisite: POLS 122 or permission of instructor.

448 The Supreme Court. (3) An examination of the process and politics of the U.S. Supreme Court with emphasis on decision making and on a simulation of the Supreme Court process. Prerequisite: POLS 122 or permission of instructor.

470 (Formerly 370) Urban Government and Politics. (3) Organization and functions of the government of cities: urban politics, problems, and policies. Prerequisite: POLS 122 or 300 or permission of instructor.
(Comparative Government and Politics)

267 Introduction to Comparative Government and Politics. (3) (General Education/Social Sciences) (Global Issues) An introduction to important analytical concepts in comparative politics, the major types of political systems, and major components of the political process. IAI: SS 905.

322 European Politics. (3) (Global Issues) This course examines the origins and bodies of the European Union, major issues in contemporary European politics and society, and the policies and institutions of European countries, including Britain, France, Germany, and Poland. Prerequisite: POLS 267 or permission of instructor.

324 Politics of Immigration. (3) Course will examine issues related to immigration politics and policy, including how select nations decide how many immigrants should be admitted and who should be admitted. Prerequisites: POLS 101 or 122 or permission of instructor.

327 (Cross-listed with AAS 327) African Politics. (3) This course examines the nature of institutions and political rule in Africa before and after independence. Key topics include the colonial inheritance, ethnicity and social characteristics of African societies, and the nature and role of political institutions. Not open to student with credit in AAS 327. Prerequisite: POLS 267 or permission of instructor.

329 Latin American Politics. (3) (General Education/Multicultural Studies) (Global Issues) An examination of the colonial legacy, role of the United States in the region, current economic and social conditions, and political institutions of different countries including Cuba, Nicaragua, Mexico, Brazil, and Argentina. Prerequisite: POLS 267 or permission of instructor.

331 United States Foreign Policy. (3) (Global Issues) Emphasis on the role of the United States in the family of nations. The significance of foreign policy as part of the foreign policy process, with special emphasis on the United States as a follow-up course to POLS 228 and a theoretical approach in the study of international relations intended as a follow-up course to POLS 228 and a theoretical preparation for other international relations courses. Prerequisites: POLS 228 or permission of instructor.

332 European Politics. (3) (Global Issues) This course examines the origins and bodies of the European Union, major issues in contemporary European politics and society, and the policies and institutions of European countries, including Britain, France, Germany, and Poland. Prerequisite: POLS 228 or permission of instructor.

334 Politics of the Global Economy. (3) (Global Issues) Political analysis of theories and operation of the modern international economy, including international institutions and transnational corporations, the globalization of finance and production, and issues of dominance and dependence. Prerequisite: POLS 228 or permission of instructor.

338 The United Nations and International Organization. (3) (Global Issues) A study of world and regional organization as reflections of world politics, as instruments of foreign policies, and as forces for change and order. Prerequisite: POLS 228 or permission of instructor.

340 US-China Relations. (3) Study of contemporary relations between the United States and China, examining shifting patterns of cooperation and competition on a wide range of issues. Prerequisite: POLS 228 or permission of instructor.

435 Introduction to International Law. (3) A study of theories, origins, sources, development, and trends of international law as a factor in various aspects of international politics. Prerequisite: POLS 228 or permission of instructor.

440 National Security and Arms Control. (3) (Global Issues) Systematic analysis of the disarmament efforts of nations; problems of U.S. national security and arms control; economic and political implications. Prerequisite: POLS 228 or permission of instructor.

446 Conflict Resolution and International Peacekeeping. (3) (Global Issues) Study of the history and practice of international peacekeeping operations. Emphasis on international organizations and the feasibility of conflict resolution and collective security. Prerequisites: POLS 122 and 228.

(Political Theory)

200 Introduction to Political Thought. (3) (General Education/Social Sciences) Survey of political theorists from Socrates to present with special emphasis on the themes of justice, community, equity, liberty, and freedom.

381 Classical Political Theory. (3) The development of Western political philosophy from Plato to Machiavelli with particular emphasis on justice and the good society. Prerequisite: POLS 101 or 122, or permission of instructor.

382 Modern Political Theory. (3) A study of modern and contemporary political theories from Machiavelli to the present with particular emphasis on such concepts as justice, liberty, freedom, and equality. Prerequisite: POLS 101 or 122, or permission of instructor.

383 American Political Thought. (3) Introduction to political theory in the United States designed to present a balanced picture of the origins and development of American political ideas from colonial times to the present. Prerequisite: POLS 101 or 122, or permission of instructor.

389 Politics and Ethics. (3) The course will focus on the ethics of the process of decision making by public officials in a representative democracy. The course also will examine the ethical issues raised by public policies on abortion, affirmative action, and the environment. Prerequisite: POLS 122.

(Public Administration)

300 Introduction to Public Administration. (3) Policy development and the implementation by governmental agencies; the exercise of discretion by administrative bodies; their responsibility to elected public officials, and their responsiveness to societal demands. Prerequisite: POLS 101 or 122, or permission of instructor.

302 Introduction to Public Policy. (3) A comprehensive study of public policymaking and systematic description, explanation, and evaluation of the processes in which public policies are developed, legitimized, funded, implemented, and evaluated in terms of their social impact. Prerequisite: POLS 101 or 122 or permission of instructor.

393 Environmental Politics. (3) A study of the political, legal, administrative, and regulatory aspects of controlling pollution, protecting environmental quality, and managing natural resources. Prerequisite: POLS 122 or permission of instructor.
447 Administrative Law and Politics. (3) A course about the cases and legal system surrounding public administration and public employees. Topics include the delegation of power to agencies, Separation of Powers, due process rights when dealing with the bureaucracy, and contemporary issues in administrative law. Prerequisite: POLS 122 or 300, or permission of instructor.

490 Public Policy Analysis and Bureaucracy. (3) The role of the public bureaucracy in the policy-making and policy-formation process. Legislative and judicial policy-making are contrasted with administrative policy-making. Prerequisite: POLS 300 or 302 or permission of instructor.

493 Seminar in Organization Theory and Behavior. (3) Review of classical and modern theories of administration. Goals and expectations of high echelon administrators. Treatment of authority relationships in formal organizations. Prerequisite: POLS 300 or 302 or permission of instructor.

494 Public Budgeting. (3) Financial and budgetary processes and problems of public agencies at various governmental levels. Incentives and constraints on functions of budgets. Systematic program evaluation and budgetary allocation questions are emphasized. Prerequisite: POLS 300 or 302 or permission of instructor.

(General and Special Courses)

101 Introduction to Political Science. (3) (General Education/Social Sciences) Designed to acquaint the beginning student with the scope and methods of Political Science and with basic elements of democratic theory. IAI: SS 903.

201 Current Events and Politics. (3) Close examination of current political events with consideration of methodologies and resources available to help citizens understand these events. Evaluation of how contested issues and problems are portrayed and debated by political elites, the media, and grassroots organizations.

226 Introduction to Law and Society. (3) An introduction to a variety of perspectives of law and society including the origins and functions of law, law as an agent of social control and social change, tort reform, the role of lawyers, and modern legal controversies.

284 Political Research and Analysis. (3) Designed to acquaint the student with the relationship between political theory and data. Relevant data bases in Political Science (e.g., political socialization, voting behavior) are used to explore and test hypotheses in Political Science. Prerequisite: POLS 101 or 122, or permission of instructor.

298 Individual Studies. (1–3) Special projects in Political Science carried out under the supervision of a faculty member. Prerequisites: at least one other course in Political Science and permission of instructor.

301 Politics and Cinema. (3) An examination of films which deal with political themes such as racism, war, and revolution. This course includes a weekly viewing of a film and a discussion section of 75 minutes. See class schedule for listing of discussion sections. Prerequisite: POLS 101 or 122, or permission of instructor.

304 Judicial Simulation. (3) A course guiding students through basic trial procedure including opening and closing statements, examination of witnesses, rules of evidence, and case themes and strategies. Prerequisite: POLS 122 or permission of instructor.

306 Politics and Game Theory. (3) Game theory is a method to understand the strategic interaction between people in different situations using games. This course introduces game theory and applies it to Political Science topics such as voting, war, bargaining, campaigns, and jury decisions. Prerequisite: POLS 122 or permission of instructor.

308 (Cross-listed with PSY 308) Political Psychology. (3) A study of the psychological underpinnings of political behavior to better understand how individuals make sense of and react to the political world. Not open to students with credit in PSY 308. Prerequisite: POLS 122 or PSY 100, or permission of instructor.

335 (Cross-listed with WS 335) Women and Politics. (3) (General Education/Multicultural Studies) An examination of the changing role of women in American politics. Focus on women as participants in politics, public policies of concern to women, and feminist theories of political change. Not open to students with credit in WS 335. Prerequisite: POLS 101 or 122 or permission of instructor.

353 Terrorism and Political Conflict. (3) (Global Issues) An examination of the political and ideological sources of modern terrorism and the evolving implications for international and domestic politics. Prerequisite: POLS 122 or permission of instructor.

401 Independent Study. (1–6, repeatable to 6) Individual study and research in any subfield of Political Science. Prerequisite: at least sophomore standing and permission of instructor and advisor.

402 Internship in Public Affairs. (1-12, repeatable to 12) Actual work assignments in public or private agencies related to government, politics, or public affairs. A maximum of 6 s.h. may be counted towards the Political Science major. Prerequisite: Political Science major or permission of the department chair and internship coordinator.

415 (Cross-listed with WS 415) Politics of Reproduction. (3) This course examines reproduction as an issue of public interest and considers how public and private interests can conflict regarding women's ability to control their reproduction. Not open to students with credit in WS 415. Prerequisite: WS 190 or permission of instructor.

432 (Cross-listed with SOC 432) Survey Research. (3) An overview of how to design, conduct, and present the results of social surveys. The course includes a familiarization with data preparation for computer processing and an introduction to using computer software statistical packages. Not open to students with credit in SOC 432. Prerequisite: any university level statistics course or consent of instructor.

465 Genocide in Our Time. (3) (Global Issues) Case studies of recent genocides with examples form Europe, the Middle East, Asia, and Africa. Examination of the perspectives of social scientists, victims, perpetrators, and witnesses. Prerequisite: POLS 228 or 267, or permission of instructor.

479 Practicum in Survey Research Methods. (3) Students will work one-on-one with a faculty member on a research project in survey research. This course brings together the theory and practice of survey research methods. Prerequisites: Successful completion of POLS 284 and POLS/SOC 432.

484 Advanced Political Research and Analysis. (3) A hands-on class about the use of statistics to analyze and present quantitative data and account for a variety of political phenomena. Prerequisite: POLS 284 or STAT 171, or permission of instructor.

492 Senior Seminar in Political Science. (3) Survey of major concepts and theories of Political Science. Students will read important works from the discipline and will write a research paper. Writing Instruction in the Disciplines (WID) course. Prerequisites: senior Political Science major, ENG 280, and permission of Political Science advisor.
Pre-Professional Programs

Western Illinois University offers nine pre-professional programs designed to prepare students for professional study at other universities at the undergraduate and graduate levels. Each pre-professional program consists of a series of WIU courses which students are advised to take to gain the knowledge and skills required for professional study in a specific field. An academic advisor is assigned to each of the pre-professional programs. Students should consult with the advisor for information on the entrance requirements of professional schools, recommended WIU courses for professional preparation, and degree completion requirements and options.

Pre-Engineering

Students who wish to transfer to a college of Engineering after two years of pre-professional study should complete the program below, which is designed to meet the requirements from the College of Engineering at the University of Illinois at Urbana/Champaign (UIUC). Any student planning to attend an Engineering school other than UIUC should inform his or her advisor of this fact, so that changes in the program can be suggested. Those who start this curriculum and subsequently decide to remain at WIU usually transfer to related programs without loss of credit.

Students interested in this program should contact the Pre-Engineering advisor in the Department of Physics.

Freshman Year

**Fall Semester**
- ENG 180; ET 105; MATH 133*
- PHYS 211**

**Spring Semester**
- CS 225; MATH 134; PHYS 212; Elective

* Engineering students planning to attend the University of Illinois should keep in mind that any course below the level of MATH 133 will not count toward the Engineering degree. However, several pre-calculus courses are available for students unable to take four years of college preparatory Mathematics in high school.

** PHYS 211 has MATH 133 or the equivalent as a corequisite.

Sophomore Year

**Fall Semester**
- CHEM 201; MATH 231, 311; PHYS 213

**Spring Semester**
- CHEM 202; ENG 280; MATH 333; PHYS 214; PHYS 310

Students may select electives in the Social Sciences and Humanities from a list of transferable electives which can be obtained from a Pre-Engineering advisor; a partial list appears below. Transfer credit for foreign languages courses at the University of Illinois will be approved only after a review of the student’s high school foreign languages background. All transfer students entering the college of Engineering are required to have completed two college/university semesters of a foreign language or three years of a foreign language in high school.

Technical courses are available at WIU which may also be taken as electives. For example, civil engineers may take a course in surveying or Geology. Mathematical Statistics is recommended for some other fields of Engineering.

**Humanities**
- AAS 281, 282, 283
- ARTH 180, 282, 283, 394, 395
- ENG 195, 200, 201, 202, 205, 228, 238, 290, 300, 301
- Foreign Languages: FR/GER/SPAN 121, 122, 223, 224, 325, 326 (Review of high school preparation required by University of Illinois.)
- HIST 105, 106, 115, 116, 300
MUS 190, 195, 393, 397  
Philosophy: all courses except PHIL 140 and 340  
Religious Studies: all courses  
THEA 110, 390, 391  

Social Sciences  
AAS 100, 145, 251, 290, 300  
ANTH 110, 111  
ECON 231, 232; **Note:** ECON 231 is a required course in some Engineering curricula.  
GEOG 100, 110  
POLS 122, 284  
PSY 100, 250, 251  
SOC 100, 200, 250  

Pre-Engineering students should maintain at least a 3.00 (A=4.00) grade point average. Isolated D grades are accepted under certain conditions and may count toward graduation.  

Pre-Forestry  
Students who wish to pursue studies in Pre-Forestry should contact the academic advisor in the School of Agriculture. This two-year curriculum is designed to prepare students to enter a School of Professional Forestry with advanced standing.  
The following is presented as a general outline which will be modified to meet the demands of the school to which the student expects to transfer.  

**First Year**  
AGRI 120; FOR 200; BOT 200; ZOOL 200; CHEM 201, 202; ENG 180; HORT 180  
Kinesiology  
Mathematics (2 semesters)  

**Second Year**  
COMM 241; ECON 231; FOR 208; ENG 280  
Humanities (2 semesters)  
Social Science (2 semesters)  
Physics (2 semesters)  

Pre-Health Program (Medicine, Optometry, Dentistry, Physical/Occupational Therapy)  
Western Illinois University provides excellent instruction to prepare students for a health-related professional degree in Medicine, Optometry, Dentistry, Physical Therapy, and Occupational Therapy. Most students at Western who wish to pursue a professional degree in a health-related field major in Biological Sciences, but other majors may be appropriate, as well. See page 133 of this catalog for information about Western's Medical Sciences option offered by the Department of Biological Sciences. The Medical Sciences option requires a minimum 2.75 grade point average in the major.  

Pre-Law  
Law schools do not require any particular undergraduate major. Students are encouraged to pursue a course of study in line with their intellectual interests. They are cautioned against narrow specialization directed too pointedly toward later professional training and practice. Many of the goals of legal education are also goals of a broad liberal education. It is advisable for students to select intellectually challenging courses which promote the development of skills of comprehension and communication (written and verbal), which enhance creative thinking, and which foster a critical understanding of the human institutions and values with which the law addresses.  

Admission to law school is highly competitive. The two major criteria for admission are the undergraduate grade point average and the score on the Law School Admission Test (LSAT). The LSAT is a standardized examination given multiple times each year. Students intending to apply to law school should plan to take this test no later than December of their senior year.
Pre-Law Advising

All students, whatever their major, may request a Pre-Law advisor to supplement their major advising and assist them in their preparation for law school. Students considering law school are urged to seek Pre-Law advice as early as possible in their undergraduate career. Dr. Lorette S. Oden, Centennial Honors College, and Jill Joline Myers, Juris Doctorate, School of Law Enforcement and Justice Administration, are available for advising students interested in a legal career.

Pre-Law Major Options

Some degree programs at Western Illinois University include a Pre-Law option. Pre-Law options allow students to prepare for success in law school within their major area of study. Brief descriptions of Western's Pre-Law options are provided below.

The B.A. in History Pre-Law Option, offered by the Department of History, emphasizes the origins and evolution of American legal traditions—in enlightenment thought, in the foundations of British and American constitutionalism, and in the evolution of American legal history. Students' History courses will also help them develop the analytical and problem-solving skills, critical reading ability, writing skills, oral communication and listening skills, and general research skills that they will need in law school and when practicing law. For more information about the History Pre-Law Option, see page 230 of this catalog.

The B.A. in Political Science Pre-Law Option, offered by the Department of Political Science, provides students the opportunity to explore law-related topics by studying constitutional law directly. In addition, it emphasizes courses related to law making and interpreting institutions, including the courts, Congress, and state legislatures. This option helps students understand the role of law in society while providing a basis for them to gauge their interest in law school. By analyzing cases, as well as presenting and critiquing arguments, students will develop reading, writing, and presentation skills that foster success in a legal career. For more information about the Political Science Pre-Law Option, see page 314 of this catalog.

Pre-Law Minors

The interdisciplinary Minor in Law and Society helps prepare students for careers in law and related fields, such as the administration of justice. Its interdisciplinary nature provides a solid background in the history and philosophy of law, as well as its current relevance for resolving social, political, and moral questions. In addition to helping students understand legal concepts and the role of law in contemporary society, the minor helps build skills in critical thinking and communication. For more information about the Minor in Law and Society, see page 239 of this catalog.

The Minor in Legal Studies, offered by the School of Law Enforcement and Justice Administration, complements all majors and helps students prepare for law school, paralegal programs, or careers in court related services. The courses selected for the minor offer legal theory and applied knowledge. The minor will assist students in articulating the various processes by which different types of cases proceed within the American legal system, in understanding and analyzing legal conflicts through reading and discussing the practical and theoretical bases of case law, and in communicating effectively through classroom presentations and demonstrations of courtroom activities. For more information about the Minor in Legal Studies, see page 255 of this catalog.

The Pre-Law Honors Minor is a unique interdisciplinary minor for students who are enrolled in the Centennial Honors College and who plan careers in law. The curriculum for this minor is designed to provide students with skills and knowledge important as a foundation for the study of law. Emphasis is given to the development of effective written and oral communication, analytical and critical reasoning, and an understanding of institutions, social processes, and human values important to legal studies. Students from
all majors are eligible for this honors option, and upon completion of the requirements will graduate as Honors Scholars. For more information about the Pre-Law Honors Minor, see page 100 of this catalog.

Pre-MBA

The Pre-MBA minor is designed specifically for students majoring in areas outside the Bachelor of Business who are considering graduate level study in business. Through a set of core business courses, this minor provides students with the fundamentals of business administration and gives them a solid preparation for many entry level positions in business. The minor facilitates the undergraduate's transition to the MBA at Western Illinois University.

The Pre-MBA curriculum has been created to include accelerated courses for the principles of Accounting and Economics. These are complemented by courses in Finance, Information Systems, Management, Marketing, and Statistics. A majority of these courses are at upper-division; this allows students to begin this minor late in their undergraduate programs and complete the requirements without delaying their graduation.

Completion of the Pre-MBA minor does not guarantee admission to an MBA program. Students seeking an MBA at WIU are required to complete the GMAT examination. Admission to the MBA program is based on a combination of undergraduate GPA and GMAT score. The MBA program also requires a minimum grade of “C” and a minimum GPA of 2.75 in the Pre-MBA core courses.

The Pre-MBA minor is not available to students seeking the Bachelor of Business degree.

For more information about the Pre-MBA minor, contact an advisor in the Business Advising Center in Stipes Hall 133 or (309) 298-1619 in Macomb or (309) 762-9481 at the WIU—Quad Cities Riverfront Campus.

Pre-Veterinary Medicine

The WIU School of Agriculture offers a pre-professional program designed to meet the requirements for admission to a School of Veterinary Medicine. Students who wish to pursue studies in Pre-Veterinary Medicine should contact the academic advisor in the School of Agriculture. Due to intense competition for admission to Schools of Veterinary Medicine, most students complete a four-year bachelor's degree program prior to admission. Those students considering a career in Veterinary Medicine should have a good foundation in Biological Sciences and Chemistry, including Biochemistry, as the minimum knowledge base for success in the curriculum. In addition, a course or courses concerning livestock production and animal ethology are highly desirable for all students. Those seeking a career in Veterinary Medicine related to Agriculture should consider additional background in nutrition, livestock management, and the economics of production by working toward a degree in Agriculture prior to admission to veterinary school. Students may also pursue other major fields of study. The 60-hour Pre-Veterinary requirement and the suggested WIU courses for admission to the School of Veterinary Medicine at the University of Illinois are outlined below. Admission requirements for other schools of Veterinary Medicine are different but can be met with advisor consultation.
Pre-Professional and Dual Programs

Required
BIOL 330; BOT 200; CHEM 201, 202, 330, 421; ENG 180 and 280 or COMM 241; MICR 200;
PHYS 114, 115 or 124, 125; ZOOL 200
Humanities or Social Science (12 s.h.)
Junior/Senior level approved Agriculture and science electives (12 s.h.)

Recommended, But Not Required
AGRI 376; ANSC 112, 314, 322, 424; BIOL 340; ZOOL 430
Mathematics—calculus, trigonometry, and statistics

Dual Programs
Western Illinois University has made arrangements with professional schools at other universities so that students can complete requirements for a bachelor's degree in the College of Arts and Sciences while working toward a professional degree or certificate. This is done in cases where credits can be transferred from the professional school in work closely related to that offered in the college. Typically, students complete three years of work at WIU and transfer one year of work from the professional school in satisfaction of WIU degree requirements.

Dual Program in Arts and Sciences and Clinical Laboratory Science
This dual program is four years in length and leads to the degree of Bachelor of Science in Clinical Laboratory Science. The first three years of the program are spent at WIU, followed by 12 months at an approved School of Medical Technology. The clinical year program requires a 2.75 grade point average. After completion of the four-year program, graduates take an examination for registration given by the Board of Registry of Medical Technology of the American Society of Clinical Pathologists. Upon successful completion of the total program, a student receives the Bachelor of Science degree at Western and the MT (ASCP) certificate from the Registry of Medical Technologists. Students enrolling in this program will be advised by the Department of Biological Sciences. The curriculum is given below.

First Year
BIOL 170; BOT 200; CHEM 201, 202; ENG 180; MATH 128, 129 or 133 or equivalent (see advisor); ZOOL 200
Social Science elective (FYE)
Humanities elective
Human Well-Being elective (UNIV 100)

Second Year
CHEM 330 or 331 and 421 (or 332); ENG 280; F L 121, 122 or equivalent (see advisor);
MICR 200, 434
Social Science elective
Social Science elective

Third Year
COMM 241; PHYS (see advisor) 125, 125 or 114, 115; STAT 171; ZOOL 430
2 Electives—BIOL 350 or 340; MICR 400 or 463 or 464 or 460
Humanities elective
Multicultural Studies elective

Fourth Year
Taken at an approved School of Medical Technology (approximately 32 s.h.)
Clinical Biochemistry
Clinical Chemistry
Clinical Hematology
Clinical Microbiology (bacteriology, parasitology, mycology)
Clinical Serology and Immunology
Blood Bank
Dual Program in Arts and Sciences and Engineering

Western Illinois University has an agreement with the College of Engineering at the University of Illinois, whereby students may obtain the bachelor's degree from the College of Arts and Sciences at WIU and a degree from the College of Engineering at the University of Illinois. In general, students spend three years at WIU and two to two and one-half at the University of Illinois or the University of Iowa. The student becomes eligible for both degrees when the entire program is completed.

Students who wish to participate in the Arts and Sciences and Engineering dual program should contact an academic advisor in the Department of Physics. Students who enter the program must complete the Pre-Engineering programs described in the Pre-Professional Programs section and the requirements for the Bachelor of Science degree in the College of Arts and Sciences. Since the granting of the two degrees depends on specified course requirements and not the amount of time on each campus, care in planning a program of courses is essential for students to complete the dual program in five academic years. For students interested in pursuing the dual degree option in Physics along with a bachelor's in Engineering, the Engineering Physics curriculum (p. 309) is recommended.

Similar dual-degree programs are available with other Engineering Schools, including the Binary Program with Case Western Reserve University. Please consult your advisor to ensure successful completion of degree requirements.

Students who begin their Pre-Engineering program at a community college and wish to benefit from the WIU dual program must earn a minimum of 30 s.h. at WIU and satisfy all the requirements for the WIU Bachelor of Science degree, except those requirements dealing with majors and minors.

Dual Program in Arts and Sciences and Law

Exceptionally well-qualified students majoring in English, History, or Political Science at Western Illinois University are eligible to pursue an accelerated admission program at John Marshall Law School (JMLS) in Chicago following the completion of their junior year of undergraduate study at Western. Students must have earned at least 90 WIU semester hours, with the additional 30 hours required for a WIU B.A. in the three stipulated majors (120 semester hours total) completed during two full semesters at JMLS. Program participants will receive a baccalaureate degree from WIU following successful completion of the first year of law school at JMLS, and the law degree (J.D.) from JMLS after successfully completing the required law school curriculum, allowing for the fulfillment of requirements for both degrees in a shorter period.

Students interested in this opportunity must work with the academic advisor in their major to ensure successful compliance with all program requirements. **Note:** Participants are required to meet the WIU graduation requirement of completion of a minor.

Dual Program in General Studies and Chiropractic

Western Illinois University has an agreement with Palmer College of Chiropractic, Davenport, Iowa, whereby students can earn a Doctor of Chiropractic degree from Palmer and a Bachelor of Arts in General Studies degree from Western. The dual degree program requires admission into WIU’s Bachelor of Arts in General Studies degree program and 90 semester hours of credit in approved prerequisite courses prior to enrolling at Palmer. A minimum of 30 semester hours of academic credit from Palmer may be transferred back to WIU to complete the Bachelor of Arts in General Studies degree.
Psychology

Chairperson: Dr. Karen L. Sears
Office: Waggoner Hall 100
Telephone: (309) 298-1593; Fax: (309) 298-2179
Website: wiu.edu/psychology

Program Offerings and Locations:

- Bachelor of Science in Psychology: Macomb, Quad Cities (Psychology option only)
- Minor in Aging Studies: Macomb
- Minor in Forensic Psychology: Macomb
- Minor in Mental Health: Macomb
- Minor in Neuroscience: Macomb
- Minor in Psychology: Macomb, Quad Cities, Online

For student learning outcomes, please see wiu.edu/provost/learningoutcomes.

Faculty: Bainter, Blankenship, Cruise, Dunkel, Dworkin, Goodwin, Hammersley, Harbke, Hemenover, Intrieri, Keefe, Kelly, Lane, Lindemann, Louck Davis, Mathes, McClure, McFadden, McGuire, Morgan, Schmidt, Sears, Sidwell, Sim, Sotozaki.

Psychology is a scholarly and scientific discipline which attempts to understand and explain human behavior, and it is an applied profession which attempts to solve psychological problems and fulfill human potential. Psychology majors therefore acquire knowledge about the principles of human behavior and skill in the application of these principles.

Students seeking to understand why people behave and think as they do should consider a major or minor in Psychology. The study of Psychology prepares students for a wide range of careers in such areas as clinical services, counseling, business, industry, health care, testing, education, and behavioral research. It also prepares students for advancement to graduate studies or enrollment in professional schools. The department has several tracks within the major including Aging Studies, Forensic Psychology, Neuroscience, and Substance Abuse. Anyone whose future involves interacting with others will find the study and exploration of psychological principles valuable.

Honors Curriculum—Academically qualified students in this department are encouraged to complete an honors curriculum in University Honors, Honors in the Major, or General Honors. All Honors students must complete the one-hour honors colloquium (G H 299). General Honors includes General Honors coursework. Honors in the Major includes honors work in the major. University Honors combines Honors in the Major and General Honors. For more information about honors curricula, see page 100 or visit the Centennial Honors College website at wiu.edu/Honors.

Degree Program

Bachelor of Science—Psychology

All students seeking the Bachelor of Science in Psychology must complete I, II, and III below, and the foreign language/global issues requirement for the major*. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

I. University General Education and College of Arts and Sciences Curriculum Requirements (p. 86) ......................................................................................................................................................................................55 s.h.

II. Core Courses ........................................................................................................................................................................11 s.h.

   PSY 100, 223, 323†, 492, 499

III. Options of Study (select A or B)

   A. Psychology ........................................................................................................................................................................55 s.h.

      1. Select 9 s.h. from Category 1: ......................................................................................................................... 9 s.h.
         PSY 340, 343, 344, 443, 444, 456
      2. Select 9 s.h. from Category 2: ......................................................................................................................... 9 s.h.
         PSY 422, 423, 424, 427, 451, 452
3. Select 9 s.h. from any Psychology courses ........................................ 9 s.h.
4. Any Minor ............................................................................................. 16–20 s.h.
5. Open Electives ................................................................................. 8–12 s.h.

**Note:** At least 19 s.h. in the major must be taken at the 300–400 level.

**B. Forensic Psychology** ........................................................................... 55 s.h.
1. PSY 453 ................................................................................................... 3 s.h.
2. PSY 490, taken twice with different topics ........................................ 6 s.h.
3. Directed Electives ............................................................................... 18 s.h.
   Select 18 s.h. from any of the following courses:
   - Clinical Foundations: PSY 334, 335, 336, 424, 442, 451, 454
   - Non-Clinical Foundations: PSY 343, 346, 422, 430, 452, 456;
     PSY/ANTH 353
4. Forensically Related Electives: ............................................................ 12 s.h.
   Select 12 s.h. from the following courses: AAS 270; ANTH 405;
   HIST 303; LEJA 212, 306, 312, 357, 412, 413; PHIL 205, 420;
   POLS 319; PSY 434, 435, 436; SW 325, 380; SOC 255, 300,
   355, 425, 445, 463, 485; SOC/WS 435
5. Any Minor ................................................................................................ 16 s.h.

* The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) any major’s discipline-specific global issues course; or 4) an approved Study Abroad program.
† PSY 323 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.

**Note:** Certain courses taken in the major and minor may also fulfill University General Education requirements.

**Minors**

**Minor in Aging Studies** ........................................................................ 18 s.h.
   See Interdisciplinary Minors (p. 235).

**Minor in Forensic Psychology** ................................................................ 18 s.h.
1. PSY 100, 453, 490* ............................................................................... 9 s.h.
2. Select 6 hours from the following ......................................................... 6 s.h.
   PSY 221, 250, 251, 357, 380, 422, 424, 433, 451, 452, 454,
   456, 457, 490*
3. Select 3 hours from the following: ......................................................... 3 s.h.
   ANTH 405; PHIL 205; POLS 319; SOC 255, 300, 355, 425,
   445, 485; WS/SOC 435
* Seminar course—PSY 490 may be taken twice, once as a core requirement and once
as a Directed Elective, but they must be on different topics in Forensic Psychology.

**Minor in Mental Health** .......................................................................... 18 s.h.
1. PSY 251, 380, 424 .................................................................................. 9 s.h.
2. Choose 9 s.h. from the following: ......................................................... 9 s.h.
   AAS 251; HE 441; HE/WS 321; PSY 243, 334, 336, 353, 355, 427,
   433, 434, 442, 444, 451, 454, 460 or 463 (lab experience or readings
   must be in a mental health area), 487, 490; SOC 424; SW 331, 338
**Note:** PSY 460 and PSY 463 may account for a total of 4 s.h.
**Note:** PSY 487 and PSY 490 may account for a total of 3 s.h.

**Minor in Neuroscience** ........................................................................... 19–21 s.h.
1. PSY 343, 443 .......................................................................................... 7 s.h.
2. Choose two courses from the following: .............................................. 6–7 s.h.
   BIOL 340; PSY 444, 340, 344, 456; ZOOL 432; Neuroscience
   Related Seminar BIOL 470 or PSY 490
Psychology

3. Choose two courses from the following: ............................................. 6–7 s.h.
   BIOL 330; CHEM 221, 350, 421, 422; KIN 270; PHIL 425;
   ZOOL 330, 331, 321, 420, 430; PSY 460 or 463 (lab experience
   or readings must be in the Neuroscience area, 460 and 463 may
   account for 4 total s.h.)

Minor in Psychology .......................................................................................... 18 s.h.
1. PSY 100 ......................................................................................................... 3 s.h.
2. Psychology Electives ....................................................................................... 15 s.h.

Course Descriptions

AGING STUDIES (AGE)
Formerly GERONTOLOGY (GERO)

202 (Cross-listed with ANTH/RPTA/SOC 202)
(Foremerly AGE 200 and GERO 200) Introduction
to Gerontology. (3) An introduction to Gerontology,
including a comprehensive and critical review of
demographic, physiological, activity, and psychosocial
dimensions of aging-related issues and processes. Not
open to students with credit in ANTH/RPTA/SOC 202.

460 Individual Research in Aging Studies. (1–3,
repeatable to 3) The student will design, conduct, and
present the results of his/her research project in writing
or orally. Research content is drawn from interdisciplinary
topics including current issues in aging. Students
considering graduate school are strongly encouraged to
enroll. Prerequisites: junior or senior standing; Aging
Studies minor; minimum GPA of 3.0 in AGE 200, SOC
405, and PSY 423; and consent of Aging Studies advisor.

463 Individual Readings in Aging Studies. (1–3,
repeatable to 3) The student will explore a structured
set of readings concerning the biological, psychological,
and social factors of aging. The student will work in
consultation with a designated aging Studies faculty
member and prepare a written report on the topic.
Prerequisites: junior or senior standing; Aging Studies
minor; minimum GPA of 3.0 in AGE 200, SOC 405, and
PSY 423; and consent of Aging Studies advisor.

487 Practicum in Aging Studies. (2) This is a
supervised practicum in a community agency planning
for or delivering services to older adults. The practicum
focuses on the application of interdisciplinary
knowledge through direct experience. Prerequisites:
junior or senior standing; Aging Studies minor;
minimum GPA of 2.50 in AGE 200, SOC 405, and
PSY 423; and consent of Aging Studies advisor. Corequisite:
AGE 490. Graded S/U only.

490 Seminar in Aging Studies. (1) An
interdisciplinary investigation of selected facets of the
practicum in Aging Studies. Seminar discussions focus
on the application of concepts derived from all Aging
Studies courses and applied to each student’s specific
field experience. Prerequisites: junior or senior standing;
Aging Studies minor; minimum GPA of 2.50 in AGE 200,
SOC 405, and PSY 423; and consent of Aging Studies advisor. Corequisite: AGE 487.

PSYCHOLOGY (PSY)

100 Introductory Psychology. (3) (General
Education/Social Sciences) An introduction to
Psychology including methods, theory, and data
regarding the study of behavior. Topics include
biological, social, learning, personality, motivation,
and abnormal behavior. IAI: SE 900.

200 Careers in Psychology. (1) An overview of career
opportunities for Psychology majors; includes information
on preparation for immediate employment and graduate
school. Students will develop their own career plan.
Prerequisite: Psychology major. Graded S/U only.

211 Psychology of Child Development. (3) (General
Education/Social Sciences) A presentation of the
data and generalizations concerning the development
of children from birth to adolescence. Prerequisite: PSY
100 or permission of instructor. IAI: SE 903.

225 Research in Psychology I: Statistical Methods
and Design. (4) Familiarizes the student with the
logic of experimental design, the use of statistical
procedures, the rationale of measurement techniques,
and the reporting of research results in the behavioral
sciences. Prerequisites: PSY 100 and must have
completed the University General Education Curriculum
baccalaureate-level skills in Mathematics requirement;
Psychology major or permission of instructor.

235 Mind, Brain, and Behavior. (3) This course is a
study of basic principles of brain function and anatomy.
The course covers current scientific methodologies
and modern theories concerning mind and brain
relationships. The course focuses on problem-solving
related to popular topics in brain science. Prerequisite:
PSY 100 or permission of instructor.

250 Human Social Behavior. (3) (General
Education/Social Sciences) An introduction to the
influences of social factors on behavior. Topics include
helping, aggression, interpersonal attraction, attitudes,
prejudice, and behavior in groups. Prerequisite: PSY 100
or permission of instructor. IAI: SE 900.

251 Personality and Adjustment. (3) (General
Education/Social Sciences) An introduction to the
study of personality and its relation to human behavioral
adjustment emphasizing such topics as relating to others,
stress management, needs, values, and self-esteem.
Prerequisite: PSY 100 or permission of instructor.

308 (Cross-listed with POLS 308) Political Psychology.
(3) A study of the psychological underpinnings of political
behavior to better understand how individuals make sense
of and react to the political world. Not open to students
with credit in POLS 308. Prerequisite: POLS 122 or PSY
100, or permission of instructor.

323 Research in Psychology II: Research
Methodology. (3) An introduction to the use of
scientific methods in the study of behavior. Techniques
in designing, conducting, and reporting psychological
research are covered. Lectures and laboratory.
Writing Instruction in the Disciplines (WID) course.
Prerequisites: PSY 223 with a grade of C or better
and ENG 280.

334 Perspectives on Substance Abuse. (3) This
course is designed to provide students with a usable
framework regarding the nature of substance abuse and
dependence. Students will explore various perspectives
on substance use, as well as current issues in the
diagnosis and treatment. Prerequisites: PSY 100 and
251, or permission of instructor.

335 Substance Abuse Assessment, Education and
Case Management. (3) This course is designed to
provide an understanding of the roles of assessment,
education, and case management in substance abuse treatment settings. Prerequisite: PSY 334.

336 Ethics and Special Populations in Substance Abuse Treatment. (3) This course is designed to familiarize students with relevant ethical and practice guidelines in substance abuse treatment, as well as with issues vital to effectively working with diverse populations. Prerequisites: PSY 100 and 251.

340 Fundamentals of Learning and Behavior. (3) A systematic presentation of the empirical findings concerning the acquisition, maintenance, and removal of behavioral patterns. Findings from the study of animal learning are stressed. Prerequisites: BIOL 101 or ZOOL 200, and 6 s.h. of Psychology coursework, or permission of instructor.

343 Behavioral Neuroscience. (3) An examination of physiological or biological psychology emphasizing the relationships between behavior and underlying physiological mechanisms. Prerequisites: BIOL 101 or ZOOL 200, and 6 s.h. of Psychology coursework, or permission of instructor.

344 Perception. (3) A consideration of sensation and perception including color perception, constancies, and illusions. Prerequisite: PSY 223 or permission of instructor.

346 Motivation and Emotion. (3) The role of motives and emotions in the behavior of animals and humans including their physiological and psychological bases. Prerequisite: 6 s.h. of Psychology coursework or permission of instructor.

355 (Cross-listed with ANTH 352) Cultural Psychology. (3) (Global Issues) Examines culture as the physical environment, social institutions and practices, language, and the media that influences human behavior and mental processes. Not open to students with credit in ANTH 353. Prerequisite: 9 s.h. of Psychology coursework and junior standing or permission of instructor.

357 (Cross-listed with WS 357) Women and Work. (3) (General Education/Multicultural Studies) Examination of major psychological issues encountered by women entering the workforce, including career choice, combining work and family life, leadership, and inequities. Not open to students with credit in WS 357. Prerequisite: PSY 100.

360 Research Practicum. (1, repeatable to 2) The course involves a research apprenticeship under the direction of a faculty member wherein the student will be involved in assisting faculty in conducting research and other relevant research activities. Prerequisites: 9 s.h. of Psychology courses and a written contract with the student’s research supervisor.

380 Clinical Psychology. (3) A review of traditional and contemporary developments in clinical psychology with emphasis on recent developments in community mental health, nonbehavioral psychotherapy, group treatment, and clinical research. Prerequisite: PSY 251 or permission of instructor.

422 Adolescent Development. (3) A study of adolescence from the standpoints of growth and adjustment emphasizing the areas of physical, intellectual, social, and emotional development. Prerequisite: PSY 100 and 221, or permission of instructor.

423 Psychology of Adulthood and Aging. (3) A survey of the adult years from early adulthood to old age and the dying process. Emphasis will be placed on psychological theories and research related to aging and its implications. Prerequisite: 9 s.h. in Psychology coursework, or graduate standing, or permission of instructor.

424 Abnormal Psychology. (3) A consideration of the psychological factors in behavior disorders. The problems of recognizing, understanding, treating, and preventing these disorders are surveyed. Prerequisites: PSY 251 and junior or senior standing, or permission of instructor.

425 Psychology of Exceptional Children. (3) A psychological approach to children above and below the normal range in learning and behavior characteristics. Examines assessment techniques, methods of remediation or enhancement, and relevant federal and state legislation. Prerequisite: PSY 221 or graduate standing, or permission of instructor.

427 Health Psychology. (3) Examines how psychological theory and research have been used to study the behavioral, psychological, and social factors that affect physical health. Topics include how social scientists study coping with stress, pain, illness management, and prevention of unhealthy behaviors. Prerequisites: PSY 251 and 223, or permission of instructor.

430 History and Systems of Psychology. (3) A study of the important historical and contemporary schools of Psychology. The systems of Psychology are presented in an historical setting leading to an evaluation of trends in Psychology. Prerequisite: PSY 323 or permission of instructor.

433 (Cross-listed with WS 433) Psychology of Gender. (3) Examines the psychological, social, and biological bases for societal-defined sex roles. The knowledge of these factors will assist students in recognizing and understanding the influence of gender on human experiences (i.e., behaviors, cognitions, emotions, physiology) and relationships. Not open to students with credit in WS 433. Prerequisite: 9 s.h. of Psychology coursework, or graduate standing, or permission of instructor.

434 Substance Abuse Treatment Approaches and Techniques I. (3) This course is designed to provide an introduction to basic therapy and counseling skills that are utilized in the treatment of substance abuse, as well as current brief therapy approaches. Prerequisite: PSY 334.

435 Substance Abuse Treatment Approaches and Techniques II. (3) This course is designed as an extension of Substance Abuse Treatment Approaches and Techniques I. Through more extensive examination of theory, research, and practice, students will be provided with information that guides the understanding and treatment of substance abuse problems. Prerequisite: PSY 434.

436 Substance Abuse Practicum. (3) This practicum will provide an opportunity for students to develop their individual and/or group substance abuse assessment and treatment skills through supervised work in a treatment center. Prerequisites: PSY 336 and 435, or permission of instructor.

442 Principles of Behavior Modification. (3) An application of learning principles to modification of human behavior emphasizing operant and respondent principles. Topics include autistic behavior, academic learning, rehabilitation, token economies. Prerequisite: 9 s.h. of Psychology coursework, or graduate standing, or permission of instructor.

443 Principles of Neuroscience with Laboratory. (4) A study of the nervous system from a multidisciplinary perspective. This perspective emphasizes physiological, genetic, neurochemical, and psychological explanations of nervous system function. This class will include a 3-hour lecture component and a two-hour lab. Prerequisites: PSY 343, BIOL 330 or BIOL 340, or ZOOL 430, or CHEM 330, or CHEM 221, or KIN 270, or permission of instructor.
444 Biopsychology of Drugs and Addiction. (3) A systematic study of the relationships between drugs and psychological processes (i.e., psychopharmacology) with emphasis on the roles of the central nervous system, individual experience, and the environment in determining the outcome of drug use. Prerequisite: PSY 343 or ZOOL 200 or HE 123 or HE 442, or permission of the instructor.

451 Personality. (3) An advanced treatment of the major research concepts and theoretical formulations of personality emphasizing integration of personality with other areas such as learning and social psychology. Prerequisites: PSY 251 and an additional 6 s.h. of Psychology coursework, or graduate standing, or permission of instructor.

452 Advanced Social Psychology. (3) A systematic and critical treatment of current topics in the field of social psychology with emphasis on problems in conducting social psychological research. Prerequisite: PSY 323 or permission of instructor.

453 Psychology and Law. (3) A comprehensive study of the interface between Psychology and the legal system. Topics covered include the insanity defense, eyewitness memory, child interview procedures, and suspect interrogations. Prerequisite: 9 s.h. of Psychology coursework, or permission of instructor.

454 Psychological Tests and Measurements. (3) A study of the basic concepts of measurement, commonly used tests in Psychology, and major findings concerning group and individual differences. Prerequisite: PSY 323 or permission of instructor.

456 Cognitive Processes. (3) A survey of topical areas related to complex thought processes including cognitive neuroscience, attention, knowledge, memory, problem solving, and language. Prerequisites: BOT 200 or COMM 311 or LEJA 303 or PSY 323 or SOC 324 or SW 312 or ZOOL 200 and 9 s.h. of Psychology coursework, or permission of instructor.

457 Industrial/Organizational Psychology. (3) Examines the theory and application of psychological principles to business and other organizational settings. Topics include employee selection and evaluation, work motivation, work attitudes, leadership, and organizational change. Prerequisites: one course in Statistics and either HRM 357 or PSY 100, or permission of instructor.

460 Individual Research in Psychology. (1–4, repeatable to 4) The student designs, carries out, and writes up a research project. Ordinarily, students enroll for two consecutive semesters of two hours credit each semester. This offering is strongly recommended for students planning to do graduate work in Psychology. Prerequisites: open to majors in Psychology having a GPA of at least 3.00 in Psychology and a written contract with the student’s research supervisor.

463 Individual Reading in Psychology. (1–2, repeatable to 3) The student reads extensively on some topic in Psychology, chosen in consultation with a Psychology instructor, and prepares a written report on the topic. Ordinarily, a student will register for 1 s.h. of credit. Prerequisite: written permission of instructor. Corequisite: PSY 460, 487, 491, or a Capstone-designated 400-level course. Graded S/U only.

487 Field Experience. (1–15, repeatable to 15) Practicum course designed to provide supervised practical experiences in applied settings. Students actively participate in the service delivery systems of approved agencies and organizations. Prerequisites: junior or senior Psychology major; 18 s.h. of Psychology coursework, or graduate standing, or permission of instructor. Corequisites: PSY 460, 487, 491, or a Capstone-designated 400-level course, and consent of field experience instructor. Concurrent registration in PSY 490 may be required. Graded S/U only.

488 (Cross-listed with FS 488) Fire-Related Human Behavior. (3) Considers fire related behavior in general including fire detection, suppression action, and evacuation behavior. Also considers fire-setting behavior, fire-prevention education, and eyewitness processes. Not open to students with credit in FS 488. Prerequisite: FS 210, or permission of instructor/ chairperson, or acceptance into the National Fire Academy Certificate program.

490 Seminar. (1–3, repeatable to 12) Instructors of the department may present a seminar on some topic of interest. Seminar descriptions are posted outside of the Psychology Department main office prior to registration periods. Prerequisite: written permission of the instructor.

491 Honors Thesis in Psychology. (1–4, repeatable to 4) The preparation by an Honors student of an undergraduate Psychology thesis or Aging Studies minor. Prerequisites: junior standing and a written contract with the student's research supervisor.

492 Capstone Experience. (1) Students will write a substantive paper that integrates empirical and/or theoretical material from at least two subdisciplines of Psychology. Prerequisites: senior standing; PSY 323; permission of instructor. Corequisites: PSY 460, 487, 491, or a Capstone-designated 400-level course. Graded S/U only.

499 Senior Comprehensive Exam. (0) An exam which all Psychology majors must take during their senior year. Taking the exam will result in a grade of S. Prerequisite: senior standing.
Recreation, Park and Tourism Administration

Interim Chairperson: Dr. Michael D. Lukkarinen
Office: Currens Hall 400
Telephone: (309) 298-1967; Fax: (309) 298-2967
E-mail: rpta@wiu.edu
Website: wiu.edu/rpta

Program Offerings and Locations:
- Bachelor of Science in Recreation, Park and Tourism Administration: Macomb, Quad Cities (RPTA and Community Organizations options only)
- Minor in Event Planning and Management: Macomb, Quad Cities
- Minor in Horticulture: Macomb
- Minor in Hospitality Management: Macomb
- Minor in Nonprofit Administration: Macomb, Quad Cities
- Minor in Outdoor Leadership: Macomb
- Minor in Recreation, Park and Tourism Administration: Macomb, Quad Cities
- Minor in Therapeutic Recreation: Macomb
- Minor in Youth Leadership: Macomb

For student learning outcomes, please see wiu.edu/provost/learningoutcomes.

Faculty: Boston, Broughton, Cassady, Choi, Doh, Eggleston, Lukkarinen, McLean, Owens, Piletic, Porter, Robinett.

Advisor: Dadello.

In a world characterized by new technology and rapidly changing human needs, leisure is increasingly recognized for its contribution to a fulfilling life. Leisure is commonly recognized as arts, recreation, entertainment, health and fitness, hospitality, outdoor activities, sport, travel, and tourism. Leisure services are provided through service agencies found in community, commercial, non-profit, and outdoor settings.

The Bachelor of Science in Recreation, Park and Tourism Administration has been accredited by the Council on Accreditation of Parks, Recreation, Tourism and Related Professions since 1978. In addition to certifications that can be earned through coursework, students graduating from this program are immediately eligible to sit for the Certified Park and Recreation Professional exam, and students who successfully complete the prescribed courses are eligible to sit for the Certified Therapeutic Recreation Specialist examination.

Recent graduates are employed in the design, delivery, management, and evaluation of leisure services across a wide array of industries including:
- Adapted and Therapeutic Recreation
- Outdoor Recreation and Resource Management
- Community Recreation (Park districts, non-profits, youth and public recreation organizations)
- Tourism, Hospitality and Event Management

The B.S. in Recreation, Park and Tourism Administration curriculum allows students to develop leadership skills, problem-solving abilities, and critical thinking skills, and to engage in day-to-day activities associated with managing leisure service industries. Students are able to select among options (Adapted Recreation and Inclusion; Community Organizations; Outdoor Recreation; Recreation, Park and Tourism Administration; and Tourism, Hospitality and Event Management), minors, and electives to enhance their skill sets in preparation for specific careers. A grade of C- or better in each Core Course and a 2.0 GPA for all Core Courses are required for the major. For more information regarding the options and minors, students should speak with the departmental and minor advisors.

In addition to the Environmental Conservation Outdoor Education Expedition (ECOEE), a semester-long experience conducted in national parks, outdoor education centers, and wilderness areas, students are provided opportunities to participate in Study Abroad, to
engage with professionals through experiential education and field trips, to participate in practicums, and to complete a professional internship.

Students earning a B.S. in Recreation, Park and Tourism Administration are well prepared for employment with adapted and therapeutic recreation agencies, non-profit organizations, park districts, university student unions and recreation centers, hospitals, civic and senior citizen centers, state and national parks, camps and outdoor recreation centers, wilderness camping programs, resource management agencies, resorts, destination management organizations, travel and tourism agencies, restaurants, lodging, event planning companies, casinos, private clubs, and cruise lines.

GradTrac is available to Recreation, Park and Tourism Administration majors. See page 79 for information about GradTrac.

Honors Curriculum—Academically qualified students in this department are encouraged to complete an honors curriculum in University Honors, Honors in the Major, or General Honors. All Honors students must complete the one-hour honors colloquium (G H 299). General Honors includes General Honors coursework. Honors in the Major includes honors work in the major. University Honors combines Honors in the Major and General Honors. For more information about honors curricula, see page 100 or visit the Centennial Honors College website at wiu.edu/Honors.

Integrated Baccalaureate and Master's Degree Program—Two integrated baccalaureate and master's degree programs are available for the Bachelor of Science in Recreation, Park and Tourism Administration: Master of Science in Recreation, Park and Tourism Administration and Master of Museum Studies. An integrated degree program provides the opportunity for outstanding undergraduates to earn both degrees in five years. Please refer to the Graduate Studies catalog for details about the integrated program.

**Degree Program**

**Bachelor of Science—Recreation, Park and Tourism Administration**

All students seeking the Bachelor of Science in Recreation, Park and Tourism Administration must complete I, II, III, IV, and V below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h. A grade of C- or better in each Core Course and a 2.0 GPA for all Core Courses are required to complete the Recreation, Park and Tourism Administration major.

I. University General Education Curriculum (p. 70) ..............................................................43 s.h.

II. Core Courses ..................................................................................................................28 s.h.
RPTA 111, 230, 235†, 322†, 398, 497, 499

III. Options of Study (select A, B, C, D, or E) ..................................................................15 s.h.

A. Recreation, Park and Tourism Administration

1. Directed Electives ..................................................... 3 s.h.
   Select 3 s.h. from RPTA 422, 449, 454, 467

2. Departmental Electives ..............................................12 s.h.
   Select 12 s.h. of RPTA courses

B. Adapted Recreation and Inclusion

1. Special Courses: HS 250; RPTA 199, 251, 454 ......................................................... 9 s.h.
2. Select 3 s.h. from the following:
   KIN 473; RPTA 428, 452, 493 ................................................................. 3 s.h.
3. Select 3 s.h. from the following:
   AAS 100; LAS 210; SOC 300; SOC/WS 360 .............................................. 3 s.h.

C. Community Organizations

1. Special Courses: HM 151; RPTA 199, 422 ..................................................... 6 s.h.
2. Select 9 s.h. from the following:
   RPTA 251, 340, 370, 424, 428, 430, 482, 487, 488 .................................. 9 s.h.
D. Outdoor Recreation
1. Special Courses: RPTA 376, 448, 449 .................................................. 9 s.h.
2. Select 6 s.h. from the following:
   RPTA 249, 340, 478, 481, 487, 488, 489 .................................................. 6 s.h.
E. Tourism, Hospitality and Event Management
1. Special Courses: HM 151, 354; NUTR 152, 153;
   RPTA 199, 467 .................................................................................... 12 s.h.
2. Select 3 s.h. from the following:
   HM 359, 451; RPTA 300, 362, 367, 482 .................................................. 3 s.h.
IV. Any approved minor ............................................................................ 16 s.h.
IV. Open Electives ..................................................................................... 18 s.h.
# The foreign language/global issues graduation requirement may be fulfilled by
   successfully completing one of the following: 1) a designated foreign language requirement
   [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global
   issues course; 3) any major's discipline-specific global issues course; or 4) an approved
   Study Abroad program.
† RPTA 235 and 322 fulfill the Writing Instruction in the Disciplines (WID) graduation
   requirement.

Minors

Minor in Event Planning and Management ............................................. 17 s.h.
1. Core Courses.......................................................................................... 8 s.h.
   HM 151, 359; RPTA 367
2. Directed Electives
   a. Choose 6 s.h. from the following.................................................... 6 s.h.
      HM 256, 350, 354, 356, 452; HM/RPTA 455; RPTA 424, 460,
      461, 466, 467
   b. Choose 3 s.h. from the following.................................................... 3 s.h.
      BC&J 340, 346; BCOM 320; COMM 343, 344, 356;
      GCOM 112, 117; HRM 353; MGT 349; MKTG 327, 331, 337;
      THEA 321

Minor in Horticulture .............................................................................. 18 s.h.
See Interdisciplinary Minors (p. 236).

Minor in Hospitality Management ......................................................... 17 s.h.
1. Core Courses.......................................................................................... 14 s.h.
   HM 151, 250, 251, 353; NUTR 152, 153; RPTA 300
2. Select 3 s.h. from the following courses:.......................................... 3 s.h.
   HM 253, 256, 350, 354, 356, 359, 451, 452; HM/RPTA 455;
   NUTR 300

Minor in Nonprofit Administration ......................................................... 19 s.h.
1. Core Courses: RPTA 199, 370, 424 ...................................................... 7 s.h.
2. Choose one of the following courses: ............................................. 3 s.h.
   BC&J 340, COMM 343, MKTG 327
3. Choose one of the following courses: ............................................. 3 s.h.
   AAS 100, LAS 210, SOC 300, SOC/WS 360
4. Choose one of the following courses: ............................................. 3 s.h.
   HS 400; MKTG 349; RPTA 322, 422
5. Choose one of the following courses: ............................................. 3 s.h.
   RPTA 235, 428, 430, 467
Recreation, Park and Tourism Administration

Minor in Outdoor Leadership 24 s.h.
1. Core Courses: RPTA 249, 349, 450 9 s.h.
2. Field Study: RPTA 376, 444, 446, 448, 449 15 s.h.
Note: Admission to the minor requires that the student be in good academic standing and successfully complete the application process for the Environmental Conservation Outdoor Education Expedition (ECOEE). The minor requires a prescribed sequencing of courses, where RPTA 249 and 349 are taken prior to the learning expedition, and all five Field Study courses are taken during the learning expedition.

Minor in Recreation, Park and Tourism Administration 16 s.h.
1. RPTA 111 3 s.h.
2. RPTA Electives (RPTA 398, 399, 499 cannot apply to minimum total) 13 s.h.

Minor in Therapeutic Recreation 19 s.h.
RPTA 199, 251, 451, 453, 454, 464 19 s.h.

Minor in Youth Leadership 18 s.h.
1. Core Courses: HM 151; RPTA 199, 428 6 s.h.
2. Directed Electives
   a. Select 6 s.h. from the following courses: RPTA 230, 235, 249, 251, 322, 340, 497; RPTA/KIN 493 6 s.h.
   b. Select 6 s.h. from the following courses (courses must have two different prefixes): C&I 110; COMM 344, 381; ECH 273, 274; EDS 121; KIN 451, 454, 459; LEJA 201; PSY 221, 422, 425; SOC 370, 425, 480; SPED 210; SW 330 6 s.h.

Course Descriptions

RECREATION, PARK AND TOURISM ADMINISTRATION (RPTA)

110 Concepts of Leisure. (3) (General Education/Human Well-Being) Explores the place of leisure in society. Examines what people do for recreation and leisure in a changing culture. Assists students from all majors to develop a personal leisure life-style that promotes wellness.

111 Introduction to Leisure and Hospitality Services. (3) Examines the purpose and function of leisure and hospitality services delivered by governmental, non-profit, and private agencies.

112 Recreation for Life. (2) (General Education/Human Well-Being) Examines the components of organized recreation to the development and maintenance of individual well-being. This class will assist students' personal exploration of how recreation can enhance body, mind, and spirit. Classroom concepts will be practiced during laboratory hours.

199 Fieldwork in Leisure Services. (1, repeatable to 2) A minimum of 50 clock hours work experience in an approved leisure, nonprofit, therapeutic, or youth service agency. Graded S/U only.

202 (Cross-listed with AGE/ANTH/SOC 202) (Formerly RPTA 200) Introduction to Gerontology. (3) An introduction to Gerontology, including a comprehensive and critical review of demographic, physiological, activity, and psychosocial dimensions of aging-related issues and processes. Not open to students with credit in AGE/ANTH/SOC 202.

230 Leadership in Leisure Services. (3) A study of the theory, principles, and processes of leadership in delivery of leisure services. Laboratory involved.

235 Programming Principles & Applications in Leisure Services. (3) Explores the purpose and functions of programs, planning principles, objectives, organizational behavior, and evaluation. Translation of a program plan into practical situations. Writing Instruction in the Disciplines (WID) course. Field observations required. A one-time charge for online instruction materials applies to this course.

249 Principles of Outdoor Adventure Recreation. (3) Investigates the components of an outdoor adventure experience including environmental behavior, personal growth, technical abilities, and safety. Prerequisite: consent of instructor. Laboratory charge for course.

250 Foundations of Therapeutic Recreation. (3) Provides an introduction to the field of therapeutic recreation, theories and models, orientation to types of disability, interventions, and settings of service. Field experience required.

300 Lodging Industries. (3) Examines the principles, practices, and philosophy of the lodging industries including sectors, legal considerations, professional associations, and industry standards. Prerequisite: junior status or consent of instructor.

322 Administration of Leisure Services. (3) Provides basis for understanding administrative processes related to delivery of leisure services. Explores legal/legislative issues, organizational structure, planning, and human resource management. Writing Instruction in the Disciplines (WID) course. Prerequisites: RPTA 230 and 235, junior status or consent of instructor.
323 Administration of Leisure Services II. (3) Provides a basis for understanding administrative processes related to the delivery of leisure services. Explores fiscal management, human resources management, and legal issues related to leisure services. Prerequisites: RPTA 322 and junior status, or consent of instructor.

340 (Formerly RPTA 240) Camp Leadership. (3) Examines and applies concepts and procedures for designing and organizing a camp program. Laboratory included. Laboratory charge for course. Prerequisite: junior status or consent of instructor.

349 Expedition Planning. (3) Provides students the opportunity to examine the components of an outdoor expedition. An expedition is then planned. Prerequisites: consent of instructor.

351 Therapeutic Recreation Assessment and Evaluation. (3) Examines assessment instruments, techniques, and testing protocols used in the practice of Therapeutic Recreation. Field experience required. Prerequisite: RPTA 251 and junior status, or consent of instructor. Laboratory charge for course and field trip required.

362 Tourism. (3) Examines the principles, practices, and philosophy of the travel industry. No course prerequisite for nonmajors. Prerequisite: junior status or consent of instructor.

366 Commercial Recreation. (3) Examines the diversity of commercial recreation enterprises; also general trends and personal attributes associated with a career in commercial recreation. No course prerequisite for nonmajors. Prerequisite: junior status or consent of instructor.

367 Event Industries. (3) Examines the principles, practices, and philosophy of the meeting, incentives, conferences, and events industries including formats, legal considerations, professional associations, and industry standards. Prerequisite: junior status or consent of instructor.

370 (Formerly RPTA 270) Administration of Nonprofit Organizations. (3) The course will introduce the history, mission, programs, and staffing of nonprofit organizations in the U.S. and focus on the role they have in meeting the needs of youth and adults, including those of under-represented groups, in society. Prerequisite: junior status or consent of instructor.

376 Perspectives in Outdoor Recreation. (3) Examines outdoor recreation movement in America and its impact on natural resources; reviews relationships between changing public demand and the many agencies involved in supplying outdoor recreation. Includes technical writing instruction. Prerequisite: junior status or consent of instructor.

398 Internship Seminar. (1) Assists students to determine personal goals and objectives, conduct survey and apply to various agencies before making final selection for location of internship. Prerequisites: RPTA majors of junior status; RPTA minors by petition.

399 Issues in Leisure Services. (1) Review and discussion of administrative, environmental, ethical, professional, research, and/or technological issues in leisure industries. Prerequisites: RPTA 111.

422 Advanced Administration of Leisure Services. (3) Investigates advanced concepts and processes related to the administration of leisure services, including marketing applications and the management of human and fiscal resources. Prerequisites: RPTA 322 and junior status, or consent of instructor.

424 Fund Raising and Volunteerism in Leisure Services. (3) A study of the principles and practices associated with fundraising and utilization of volunteers in public as well as private nonprofit leisure service organizations. Prerequisite: RPTA 322.

428 Youth and Leisure Services. (3) A study of the theories, principles, and practices related to youth and leisure including social trends and issues, youth development, youth services agencies, program planning and evaluation, behavior management, leadership, and public relations. Fieldwork observations required. Prerequisites: RPTA 111, 230, and 235.

430 Principles of Recreational Sports. (3) The role of sport as a developmental tool by organizations such as local government, youth, and family nonprofit organizations, universities, corporations, military bases, and specialized amateur athletic organizations. Emphasis is placed on various instructional and competitive program delivery models. Prerequisites: RPTA 111, 230, and 235.

444 Outdoor Education. (3) Organization of outdoor education activities emphasizing elementary school classroom participation. Prerequisite: consent of instructor. Laboratory charge for course and field trip required.

446 Wilderness Leadership. (3) Prepares students to become qualified wilderness trip leaders. Expedition behavior, emergency procedures, and wilderness leadership responsibilities will be examined during a five-week expedition. Prerequisite: consent of instructor. Laboratory charge for course and field trip required.

448 Interpretation of Cultural and Environmental Resources. (3) Develops basic understanding of interpretation of natural, environmental, and cultural resources. Includes philosophy and techniques. Prerequisite: junior status of consent of instructor. Laboratory charge for course and field trip required.

449 Management of Outdoor Adventure Recreation. (3) Management of outdoor adventure recreation in both intensity and wilderness/dispersed recreation environments is examined. Prerequisite: consent of instructor. Laboratory charge for course and field trip required.

450 Travel Workshop. (1–3, repeatable to 6) Opportunity for students to observe the operations of a variety of leisure service agencies and to discuss on-location the trends, problems, and techniques in leisure service delivery. Prerequisite: consent of instructor. Laboratory charge for course and field trip required.

451 Principles of Therapeutic Recreation. (3) Examines and applies therapeutic recreation processes and fundamental principles of program planning for people with disabilities in clinical, residential, and community-based settings to provide a conceptual basis for professional practice. Field experience required. Prerequisites: RPTA 251 and junior status, or consent of instructor.

452 Leisure Services for Older Adults. (3) Examines theories and concepts related to leisure and aging; includes field experiences with older adults. Prerequisite: junior status or consent of instructor.

453 Clinical Therapeutic Recreation Processes. (3) Examines interventions, modalities, and relevant terminology used in therapeutic recreation treatment for persons with disabilities in clinical, residential, and community-based settings. Field trip required. Prerequisites: RPTA 251 and junior status, or consent of instructor.

454 Management of Therapeutic Recreation. (3) Understanding and professional practice of Therapeutic Recreation services in health and human-service settings with focus on quality management, finance and reimbursement, budgeting, clinical supervision, risk management, professional ethics, issues, and certification. Field trip required. Prerequisites: RPTA 251, 351, and 451; junior status, or consent of instructor.
455 (Cross-listed with HM 455) Casino Operations. (3) Description of basic casino operations and principles of casino marketing, mathematics of casino games, and utility analysis of gaming motivation and gaming addictions. Exploration of career opportunities in the gaming industry. Historical background and impact of gaming on hospitality industry. Not open to students with credit in HM 455. Prerequisites: junior status, 21 years of age. Activities outside of class and field trips are required.

460 Sustainable Tourism Development. (3) Provides essentials for successful development of a local tourism economy including organizing, planning, developing, and operation. Prerequisites: junior status or permission of instructor.

461 Conference and Convention Planning and Management. (3) Prepares students for positions as planners and managers of conferences and conventions at resorts, hotels, cruise ships, camps, universities, or other private or municipal convention centers. Prerequisite: junior status or consent of instructor.

462 International Tourism. (3) (Global Issues) Analysis of contemporary leisure travel behavior emphasizing world tourism markets, products, attractions, sales, and industry trends. Prerequisite: junior status or consent of instructor.

466 Resort and Country Club Management. (3) Principles and practices to plan, develop, manage, and operate leisure-based facilities and services in resorts and country clubs. Prerequisites: RPTA 362 and junior status, or consent of instructor.

467 Event Planning and Management. (3) The application of methods and techniques to plan, implement, and evaluate successful community events. Content includes selection of event theme and coordination of set up, staff, finance, promotion, partnerships, and operations and evaluation. Prerequisite: RPTA 235 or 367.

476 Special Topics. (3, repeatable to 9 for different topics) This course explores a topic of current interest in recreation, park, and tourism administration. Prerequisites: junior status or permission of instructor.

478 Great Smoky Mountains Outdoor Recreation Consortium. (3) Involves students from several major universities in developing understanding, knowledge, and appreciation of and for agencies and resources in an on-site experience such as at Great Smoky Mountains Institute at Tremont. Prerequisites: junior status or consent of instructor. Trip charge for course.

481 Human Dimensions of Resource Management. (3) Considers the theory and practice for human dimensions oriented use of land, water, and wildlife resources for recreation experiences. Examines social and physical carrying capacity of land and cultural treatment of ecological systems. Prerequisite: junior status or consent of instructor.

482 Facility Management. (3) Explores problems, principles, and techniques of acquisition, management, design, and operation of facilities (e.g., parks, community centers, event venues) commonly used in leisure industries. Consideration given to factors affecting energy conservation and reducing operational costs. Prerequisite: junior status or consent of instructor. Field trip charge for course.

487 Site Planning in Recreation and Parks. (3) Introduction to basic planning principles and techniques as they apply to park and recreation projects. Special consideration given to the use of GIS and GPS technology and field techniques. Emphasis on problem solving in the planning process. Prerequisite: junior status or consent of instructor.

488 Open Space Management. (3) Investigates theory, principles, and methods of planning recreation land systems. Explores procedures to preserve, acquire, and develop recreation lands and green space throughout a district or urban area. Prerequisite: junior status or consent of instructor.

489 Park Maintenance and Operations Management. (3) Explores procedures and problems of recreation area operation with emphasis on planning and management for maintenance efficiency. Topics include planning, scheduling, standards, cost control, vandalism, etc. Prerequisite: junior status or consent of instructor.

490 Independent Study. (1–3, repeatable to 8) Research projects or independent study not covered in other courses. Credit assigned according to the nature and scope of project. Prerequisites: junior status or consent of instructor; written description of proposal including justification, objectives, and procedures must be submitted to department chairperson prior to enrollment; permission of department chairperson required.

493 (Cross-listed with KIN 492) Sport and Recreation for Individuals with Disabilities. (3) The course will provide students with information about sport and recreation opportunities for individuals with disabilities across the lifespan at all levels from community programs to elite levels of competition. Not open to students with credit in KIN 493. Prerequisite: PETE 393, RPTA 251, or consent of instructor. Laboratory charge for course and field trip is required.

497 (Formerly RPTA 397) Research and Evaluation in Leisure Services. (3) Examines and applies concepts and procedures for design and implementation of evaluative research in leisure industries. Prerequisites: RPTA 235 or consent of instructor.

499 Internship in Leisure Services. (12) Field experience provides for practical application of knowledge and theory in a professional setting. Student acquires experience in all phases of leisure service delivery with highly qualified personnel in a selected agency with University faculty supervision. Cannot apply to minor except by petition. Prerequisites: junior status, all Core courses completed with an average of at least C (2.00) with no course below C- (1.67), and approval of departmental committee.

HOSPITALITY MANAGEMENT (HM)

150 Introduction to Hospitality Management. (2) A review of the history, growth, and development of hospitality services including an exploration of career opportunities in contemporary hospitality operation.

151 Principles of Safety, Security and Food Sanitation in Hospitality Operations. (2) Basic principles of sanitation, safety, and security in food, beverage, and lodging operations. Recommended to be taken concurrently with NUTR 152 and 153, or permission of instructor.

159 Hospitality Practicum. (1, repeatable to 3) A course designed to give students practical experience in the hospitality industry. May be waived for students with 200 hours of documented work experience. Prerequisite: HM 150.

190 (Cross-listed with ATM 190 and NUTR 190) Introduction to Professional Practices. (1) This course is designed to introduce DFMH majors to program expectations specific to their careers. Students will be exposed to a variety of resources to aid them in their studies. Not open to students with credit in ATM 190 or NUTR 190.
250 Food Market Production and Service. (2) Planning, production, and service of foods in a commercial/institutional food service operation. Prerequisites: HM 151 with successful ServSafe certification, or demonstrated ServSafe certification and permission of instructor; NUTR 152 and 153. Corequisite: HM 251.

251 Quantity Food Production and Service Laboratory. (1) Practice and application of planning, procurement, production, and service of foods in a commercial/institutional food service operation. Prerequisites: HM 151 with successful ServSafe certification, or demonstrated ServSafe certification and permission of instructor; NUTR 152 and 153. Corequisite: HM 250.

253 Foodservice Procurement. (3) Food markets, regulations, purchasing, procedures, specifications, and standards for procurement of food and equipment. Prerequisites: NUTR 152 and 153.

254 Hospitality Facilities Management. (3) Introduction to building systems and facilities for hospitality operations. Prerequisite: HM 150.

255 Front Office Management. (3) A study of the flow of activities and functions in today's lodging operations. Topics include comparison of manual, machine-assisted, and computer-based methods for each front desk function. Prerequisite: HM 150. Activities outside of class and field trips are required.

256 Bar and Beverage Management. (3) Principles of beverage science, mixology; bar and beverage management including controlling personnel, purchasing, inventory, and equipment; legal issues related to clientele. Prerequisites: HM 150 and 21 years of age. Field trips will be required.

257 Introduction to Club Management. (3) This course introduces students to the role of the food service manager in private clubs. The information presented includes the role of the food service manager in dealing with boards of directors and private club operations. Prerequisite: HM 150.

350 Wedding Planning. (3) This course focuses on the wedding planning process and examines the role of the wedding planner in creating the couple’s timeline and budget, selection of wedding apparel, venue, photography, and music, while honoring features of traditional and non-traditional weddings. Prerequisites: PCS 150, RPTA 110, RPTA 111, or permission of the instructor.

353 Foodservice Financial Systems. (3) Introduction to the principles and procedures employed in the Uniform System of Accounts for the Lodging Industry (USALI). Prerequisites: HM 250, 251, 255.

354 Hospitality Promotions. (3) Study of marketing concepts, methods, and techniques used in the hospitality industry with emphasis on event promotion, customer retention, research, and data analysis. Prerequisite: HM 255.

356 Catering. (2) Principles of catering management including staffing, recipe and menu development, procurement, production, presentation and service, and cost analysis. Prerequisites: HM 250 and 251. 1 br. lect.; 3 hrs. lab.

357 Professional Experience in Food Service/ Lodging Operations. (3) Experience in day-to-day operation and management of a foodservice or lodging operation department, including experience in supervision, financial management, and evaluation. Prerequisites: HM 250 and 251.

358 Hospitality Management Travel Studies. (1–6, repeatable to 6) Studies of domestic and international properties, facilities, and agencies which are related to the hospitality industry. Prerequisites: HM 250, 254, 255, and junior standing.

359 Legal Aspects in Hospitality Management. (3) Survey of laws applied to hospitality establishments with emphasis on managerial approach to solving or avoiding potential tort and contractual violations while managing hospitality establishment. Prerequisites: HM 250 and 251.

451 Hospitality Systems Management. (3) An exploration of theories, principles, and functions of management as they apply to food service operations. Emphasis placed on qualitative and quantitative evaluations of food service operations. Prerequisites: HM 353, MGT 349, and senior standing.

452 Wines of the World. (2) In-depth study of wine producing areas of the world and foods that are specifically paired with these wines. Emphasis includes international to local vineyards and their unique wine products. Industry accepted tasting method presented. Prerequisites: HM 150 or permission of department advisor, and 21 years of age.

453 Lodging Systems Management. (3) An exploration of theories, principles, and functions of management as they apply to lodging service operations. Emphasis on strategic planning and strategic management of lodging systems operations. Writing Instruction in the Disciplines (WID) course. Prerequisites: HM 353, ENG 180 and 280, and MGT 349.

454 Seminar in Hospitality Management. (3, repeatable to 6 on different topics and issues) Review and discussion of technological, operational, and human advancement in hospitality services. Emphasis on communications, human resource development, research, and quality control in the hospitality industry. Prerequisite: HM 451 or 453.

455 (Cross-listed with RPTA 455) Casino Operations. (3) Description of basic casino operations and principles of casino marketing, mathematics of casino games, and utility analysis of gaming motivation and gaming addictions. Exploration of career opportunities in the gaming industry. Historical background and impact of gaming on hospitality industry. Not open to students with credit in RPTA 445. Prerequisites: junior status, 21 years of age. Activities outside of class and field trips are required.

456 Independent Study in Hospitality Management. (1–3) This course is available to students interested in topics not currently part of the curriculum. Students should consult the advisor or department chair about interest(s). Prerequisites: senior standing and permission of the instructor and department chair.

458 Pre-Internship in Hospitality Management. (1) Development of personal professional documents and portfolio. Investigating possible internships and securing an internship. To be taken the semester before the internship. Prerequisites: HM 250, 251, 254, 255, and junior standing.

459 Hospitality Management Internship. (6) Supervised field experience for application of theory and skills in an agency or property approved by the department. Sixty-five clock hours per semester hour are required. Prerequisites: HM 458; senior standing; GPA of 2.5 in four of the five specific courses: HM 353, 354, 451, 453, or 454; site approved by the department; approval of internship coordinator or department chair. Graded S/U only.

477 (Cross-listed with ATM 477) Theory and Research in Apparel Merchandising and Hospitality Management. (3) A study of theory, research methods, and analytical concepts in apparel and textile merchandising, hospitality management, and nutrition. Not open to students with credit in ATM 477. Prerequisites: STAT 171 and junior standing.
Sociology and Anthropology

Interim Chairperson: Dr. Tawnya Adkins Covert
Office: Morgan Hall 404
Telephone: (309) 298-1056; Fax: (309) 298-1857
E-mail: TJ-AdkinsCovert@wiu.edu

Program Offerings and Locations:

- Bachelor of Arts in Anthropology: Macomb, Online
- Bachelor of Arts in Sociology: Macomb, Online (General emphasis only)
- Minor in Anthropology: Macomb, Online
- Minor in Cannabis and Culture: Macomb
- Minor in Sociology: Macomb, Quad Cities, Online

See note in Degree Programs section.

For student learning outcomes, please see wiu.edu/provost/learningoutcomes.

Faculty:

Sociology is the study of human societies, their structure, and the ways individuals and groups relate to one another. Sociological knowledge is vital to the understanding of contemporary issues and topics such as poverty, race and gender relations, crime, delinquency, deviance, mental illness, urban growth and decay, marriage and family life, behavior in bureaucracies, and the organization and delivery of human services.

Since its curriculum emphasizes everyday issues and the workings of society in general, the B.A. in Sociology is useful in a great variety of occupational fields and positions such as personnel, industry, survey research, public-opinion polling, marketing and advertising research, and in government or nonprofit agencies which provide for the delivery of human services. Many Sociology graduates also work in hospitals or health-care organizations as well as in education and business and undertake graduate studies in Sociology and other fields. Majors in other disciplines will find that Sociology courses provide valuable background for careers in law enforcement, medicine, public health, counseling, personnel management, education, and social work.

The B.A in Anthropology provides students with skills to think holistically about human behavior, diversity, and social problems through the combination of human biology, cultural analysis, linguistics, and study of past societies. Graduates from this Anthropology program will gain a broad understanding of human biological and cultural diversity and acquire skills to successfully navigate the rapidly changing global environment. The curriculum of this program enables an opportunity to apply anthropological research to environmental and community-based practical learning experiences.

The degree in Anthropology prepares students interested in a range of professional fields such as law, social work, international economic development, business, public administration, health care, forensic science, human rights advocacy, and other human service professions. Local schools, the National Park Service, consultants, and museums also offer employment opportunities for these students. The Anthropology program also presents a theoretical and practical foundation for graduate studies in Anthropology and Archaeology.

In addition to the major in Sociology and major in Anthropology, the department offers minors in Sociology and Anthropology. Such minors are useful accompaniments to majors in Health, Social Work, Agriculture, Family and Consumer Sciences, the Social Sciences, and Education.

GradTrac is available to Sociology and Anthropology majors. See page 79 for information about GradTrac.
Honors Curriculum—Academically qualified students in this department are encouraged to complete an honors curriculum in University Honors, Honors in the Major, or General Honors. All Honors students must complete the one-hour honors colloquium (G H 299). General Honors includes General Honors coursework. Honors in the Major includes honors work in the major. University Honors combines Honors in the Major and General Honors. For more information about honors curricula, see page 100 or visit the Centennial Honors College website at wiu.edu/Honors.

Integrated Baccalaureate and Master’s Degree Program—An integrated baccalaureate and master’s degree program is available for the Bachelor of Arts in Sociology: Master of Arts in Sociology. Two integrated baccalaureate and master’s degree programs are available for the Bachelor of Arts in Anthropology: Master of Arts in Museum Studies and Master of Liberal Arts and Sciences. An integrated degree program provides the opportunity for outstanding undergraduates to earn both degrees in five years. Please refer to the Graduate Studies catalog for details about the integrated program.

Degree Programs

Bachelor of Arts—Sociology

All students seeking the Bachelor of Arts in Sociology must complete I, II, III, IV, and V below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

I. University General Education and College of Arts and Sciences Curriculum Requirements (p. 85) .................................................................................................................................. 60 s.h.

II. Core Courses ........................................................................................................................................ 21 s.h.
SOC 100, 323‡, 324, 333, 334, 415; ANTH 110

III. Directed Electives ............................................................................................................................ 15 s.h.
Select one of the following emphases:
A. General
Select 15 s.h. of Sociology Electives................................................................................................ 15 s.h.
(may include up to 6 s.h. of Anthropology coursework beyond ANTH 110)

B. Deviance and Criminology
1. Select 9 s.h. from the following courses: .................................................................................. 9 s.h.
2. Select 6 s.h. of Sociology Electives ......................................................................................... 6 s.h.
(including up to 6 s.h. of Anthropology coursework beyond ANTH 110)

C. Environment and Community
1. Select 9 s.h. from the following courses: .................................................................................. 9 s.h.
ANTH 395, 410, 415, 420, 463; SOC 312, 345, 414
2. Select 6 s.h. of Sociology Electives ......................................................................................... 6 s.h.
(including up to 6 s.h. of Anthropology coursework beyond ANTH 110)

D. Social Inequality
1. Select 9 s.h. from the following courses: .................................................................................. 9 s.h.
ANTH 315, 330; SOC 200, 285, 300, 360, 405, 410, 420, 427, 430, 440, 485
2. Select 6 s.h. of Sociology Electives ......................................................................................... 6 s.h.
(including up to 6 s.h. of Anthropology coursework beyond ANTH 110)

E. Social Institutions
1. Select 9 s.h. from the following courses: .................................................................................. 9 s.h.
ANTH 324; SOC 250, 320, 365, 370, 460, 461, 462, 464, 480
Sociology and Anthropology

2. Select 6 s.h. of Sociology Electives ...................................................... 6 s.h.
   (including up to 6 s.h. of Anthropology coursework beyond ANT 110)

F. Sociological Social Psychology
1. Select 9 s.h. from the following courses: ........................................... 9 s.h.
   ANTH 425; SOC 272, 313, 316, 424
2. Select 6 s.h. of Sociology Electives ...................................................... 6 s.h.
   (including up to 6 s.h. of Anthropology coursework beyond ANT 110)

G. Sociology of Health and Illness
1. Select 9 s.h. from the following courses: ........................................... 9 s.h.
   ANTH 420, 463; SOC 365, 405, 424, 430
2. Select 6 s.h. of Sociology Electives ...................................................... 6 s.h.
   (including up to 6 s.h. of Anthropology coursework beyond ANT 110)

IV. Open Electives ................................................................................... 4–8 s.h.

V. Any Minor ......................................................................................... 16–20 s.h.

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) any major's discipline-specific global issues course; or 4) an approved Study Abroad program.
† SOC 323 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.

Bachelor of Arts—Anthropology

All students seeking the Bachelor of Arts in Anthropology must complete I, II, III, IV, and V below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

I. University General Education and College of Arts and Sciences Curriculum Requirements (p. 85) .......................................................... 60 s.h.

II. Core Courses ...................................................................................... 12 s.h.
   ANTH 110, 111, 419†; EDS 440 or ANTH 380

III. Anthropology Directed Electives
A. Complete one of the following ...................................................... 3 s.h.
   ANTH 201 or 249
B. Complete one of the following ...................................................... 3 s.h.
   ANTH 305, 310, 325, or 326
C. Complete at least 15 s.h. of Anthropology coursework (with at least four upper-division courses), with the following additional course options:
   EDS 458 and 440 .................................................................................. 15 s.h.

IV. Any Minor ......................................................................................... 18–24 s.h.

V. Open Electives ................................................................................... 3–9 s.h.

Δ This major is available online with the selection of designated courses. Please contact advisor for details.

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) any major's discipline-specific global issues course; or 4) an approved study abroad program.
† ANTH 419 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.
Sociology and Anthropology

Minors

Minor in Sociology ................................................................. 18 s.h.
1. SOC 100 ................................................................. 3 s.h.
2. Sociology Electives ......................................................... 15 s.h.

Minor in Anthropology ............................................................. 18 s.h.
1. ANTH 110, 111 ............................................................ 6 s.h.
2. Anthropology Electives ................................................... 12 s.h.

Minor in Cannabis and Culture .................................................. 18 s.h.
See Interdisciplinary Minors (p. 235).

Course Descriptions

SOCILOGY (SOC)

100 Introduction to Sociology. (3) (General Education/Social Sciences) Basic sociological concepts and studies in such areas as culture, social organization, personality, family, and community. IAI: ST 900.

200 Contemporary Social Problems. (3) (General Education/Social Sciences) An investigation of problems pertaining to group conflict, race relations, crime, family disorganization, and other significant aspects of contemporary society. Prerequisite: SOC 100 or consent of instructor. IAI: ST 901.

202 (Cross-listed with AGE/ANTH/RPTA 202) (Formerly AGE 200 and GERO 200) Introduction to Gerontology. (3) An introduction to Gerontology, including a comprehensive and critical review of demographic, physiological, activity, and psychosocial dimensions of aging-related issues and processes. Not open to students with credit in AGE/ANTH/RPTA 202.

250 American Institutions. (3) (General Education/Social Sciences) An overview of the more enduring clusters of roles and values by which family, economic, religious, educational, and political processes are conducted. Prerequisite: SOC 100 or consent of instructor.

255 Deviant Behavior. (3) An analysis of research findings and theories relating to a variety of forms of "deviant behavior." Prerequisite: SOC 100 or consent of instructor.

272 Individual and Society. (3) (General Education/Social Sciences) This course explores sociological theories and research on the relationship between the individual and society. Students will learn how individuals participate in the construction of society and how social structure impacts our everyday lives. Prerequisite: SOC 100 or consent of instructor.

285 (Cross-listed with WS 285) Women: A Global Perspective. (3) (General Education/Social Sciences or Multicultural Studies) (Global Issues) This course emphasizes the voices of women across the globe from an interdisciplinary perspective. Special attention will be paid to women's activism, the transnational feminist movement, and an examination of the category "woman" in the global context. Not open to students with credit in WS 285. Prerequisite: SOC 100 or WS 190.

300 Minority Peoples. (3) (General Education/Multicultural Studies) Group relations of ethnic, racial, religious, and sexual minorities. Conflict, separation, assimilation, and related processes. BGS online writing course. Prerequisites: SOC 100 and one additional Sociology course, or consent of instructor. IAI: ST 903D.

312 Community. (3) Systems of interrelated organizations, institutions, and persons clustered in the same locations. Prerequisite: SOC 100 or consent of instructor.

313 Self and Identity. (3) The relationships between culture, social structure, socialization, and self and identity are investigated applying perspectives in sociological social psychology. Prerequisite: SOC 100 or consent of instructor.

316 Collective Behavior and Social Movements. (3) Analysis of group formations, collective activity, and collective action processes including crowds, mass behavior, flash mobs (and other spontaneous events), fads, and social and political movements. Prerequisite: SOC 100 or consent of instructor.

320 Sociology of Work, Occupations, and Professions. (3) Analysis of the relationship between work and social life. Considers occupational structure, worker organization, professional work and socialization, and race, class, and gender issues in the labor market. Prerequisite: SOC 100.

323 Social Research Methods I. (3) Hypothesis construction and testing with emphasis on research design, data-gathering techniques, and scale construction. The course includes the construction of a research proposal. Writing Instruction in the Disciplines (WID) course. Prerequisites: SOC 100 or consent of instructor; ENG 280.

324 Social Research Methods II. (3) Introduction to the application of the scientific method and statistics in sociological research. Emphasis on sampling, measures of central tendency, dispersion, association, and introduction to inferential statistics. Students will gain proficiency with data-analytical software (e.g., SPSS, STAT, or SAS). Prerequisites: SOC 100 and 323, or consent of instructor; completion of the University General Education Curriculum baccalaureate-level skills in Mathematics requirement.

333 Classical Sociological Theory. (3) A critical examination and analysis of major classical theories in Sociology and their influences upon the development of contemporary social thought. Prerequisite: SOC 100 or consent of instructor.

334 Contemporary Sociological Theory. (3) Detailed examination, analysis, and evaluation of selected modern sociological theories. Emphasis on critical analysis and interpretation of schools such as structural functionalism, conflict, neo-Marxian, symbolic interactionism, exchange, network, rational choice, critical race, feminist, and integrative theories. Prerequisites: SOC 100 and 333.

345 Rural Social Organizations. (3) An examination of rural society from feudalism to agri-business. Emphasis on changes wrought by demographic, bureaucratic, and technological factors and their consequences for contemporary farming. Prerequisite: SOC 100 or consent of instructor.

355 Criminology. (3) Theories of crime causation and control are discussed in relation to specific behavior systems in crime. In addition, various problem areas in criminology are discussed. Prerequisite: SOC 100 or consent of instructor.
360 (Cross-listed with WS 360) Gender and Society. (3) (General Education/Multicultural Studies) This course provides a sociological examination of theories of gender, socio-historical gender patterns, gender and American social institutions, social structure and gender, and cross-cultural research methods. Topics include the social construction of illness, the provider-client relationship, and medicalization in Western cultures. Prerequisites: SOC 100 and another Sociology course, or consent of instructor.

365 Sociology of Health and Illness. (3) Examines the medical institution using sociological theories. Focus on illumination of the social context of health and illness, social systems and health, and cross-cultural research methods. Topics include the social construction of illness, the provider-client relationship, and medicalization in Western cultures. Prerequisites: SOC 100 and another Sociology course, or consent of instructor.

370 American Family. (3) A survey of major American marital family trends with an emphasis upon changes in mate selection, marital roles, marital adjustment, family life, and other related issues. Prerequisite: SOC 100 or consent of instructor.

405 Sociology of Aging in Rural and Urban America. (3) An investigation of the social and political consequences for communities and society at large from the expanding populations of the aged and a sociological examination of the relationship between community and institutional arrangements and the social and social-psychological dimensions of aging. Prerequisite: SOC 100 or consent of instructor.

410 (Cross-listed with WS 410) Women and Poverty. (3) The poverty of women in the United States including factors of race, place of residence, and age are covered. Structural hierarchies that maintain poverty are examined from a sociological perspective. Not open to students with credit in WS 410. Prerequisite: WS 190 or SOC 100 or permission of instructor.

414 Population. (3) The distribution, growth, and characteristics of human population and their relationship to social organization. Prerequisites: SOC 100 and one additional Sociology course, or consent of instructor.

415 Social Stratification. (3) Distribution of wealth, power, and prestige and related structures and values. Prerequisite: SOC 100 and one additional Sociology course, or consent of instructor.

420 (Cross-listed with AAS 420 and WS 420) Race, Class, and Gender. (3) The course will examine issues of race, class, and gender in historical, cultural, and contemporary societal contexts. Not open to students with credit in AAS 420 or WS 420. Prerequisite: SOC 100, or AAS 400, or WS 190; or permission of instructor.

424 Sociology of Mental Health. (3) A survey of the history, causes, treatment, and effects of mental illness in the U.S. with emphasis on sociological factors such as social class, race, definitional process, etc. Prerequisites: SOC 100 and one additional Sociology course, or consent of instructor.

425 Juvenile Delinquency. (3) A survey of various theories of juvenile delinquency and an examination of the juvenile justice system and its relationship to rehabilitation prospects. Prerequisites: SOC 100 and one additional Sociology course, or consent of instructor.

427 Sociology of Sexual Identities and Inequalities. (3) Study of issues related to the sociology of sexual identities and the resulting inequalities. While heterosexuality will be discussed, the focus will be on homosexual and bisexual identities and how they are constructed and experienced in a heteronormative society. Prerequisite: SOC 100 or consent of instructor.

430 (Cross-listed with WS 430) Sociology of Women's Health. (3) Uses sociological theories and research to examine the gendered experience of illness.

Includes sociological analysis of medical knowledge about women's health. Topics include medicalization of women's health, the gendered hierarchy of professions, and feminist critiques of scientific research. Not open to students with credit in WS 430. Prerequisite: SOC 100 or WS 190, or consent of instructor.

432 (Cross-listed with POLS 432) Survey Research. (3) An overview of how to design, conduct, and present the results of social surveys. The course includes a familiarization with data preparation for computer processing and an introduction to using computer software statistical packages. Not open to students with credit in POLS 432. Prerequisite: any University-level Statistics course or consent of instructor.

433 Individual Investigations in Sociology. (1–3, repeatable to 3) Students will pursue a topic of special interest to the individual to be chosen in consultation with an instructor. Prerequisites: 12 s.h. of Sociology coursework, 2.70 GPA, and consent of department chairperson.

435 (Cross-listed with WS 435) Women and Crime. (3) Theories of female criminality, patterns of female crime and victimization, women in corrections, and women as criminal justice practitioners are examined. Not open to students with credit in WS 435. Prerequisite: SOC 100 or consent of instructor.

440 Global Sociology. (3) (Global Issues) This course examines socio-cultural, economic, political, and technological processes of globalization using sociological concepts and theories to provide students with a systematic way of studying our interconnected world. Prerequisites: SOC 100 and one additional Sociology course, or consent of instructor.

445 Sociology of Corporate Crime. (3) A sociological analysis of theories and research concerning the nature, extent, costs, and control of crimes committed by corporations. Prerequisite: SOC 100 or consent of instructor.

455 Sociology of Corrections. (3) An analysis of correctional institutions, including the inmate structure, custodial and administrative personnel, treatment programs, and the social factors which affect prison structure and function. Prerequisites: SOC 100 and one additional Sociology course, or consent of instructor.

460 The Family. (3) Institutions and systems of kinship, marriage, family grouping, child rearing, personal maintenance, and status placement. Prerequisites: SOC 100 and one additional Sociology course, or consent of instructor.

461 Educational Sociology. (3) A comparative and functional analysis of education as an institution; the interaction of education and other institutions; and the relation of education to social change. Prerequisites: SOC 100 and one additional Sociology course, or consent of instructor.

462 Political Sociology. (3) An analysis of power structures, decision making systems, conflict, conflict resolution, and various theories of power. Prerequisites: SOC 100 and one additional Sociology course, or consent of instructor.

463 Sociology of Law. (3) An analysis of the social origins of law, the effects of law on human behavior and social institutions, and the relationship between law and social change. Prerequisites: SOC 100 and one additional Sociology course, or consent of instructor.

464 (Cross-listed with REL 464) Sociology of Religion. (3) (Global Issues) An analysis of religious groups and institutions, a comparison of religion in sacred and secular societies, and the effect of religion on behavior and social institutions. Not open to students with credit in REL 464. Prerequisites: SOC 100 and one additional Sociology course, or consent of instructor.
465 Deviance, Crime, and Control in Socio-Historical Perspective. (3) Historical conceptions of deviance, origins of prisons, asylums; emergence of police; rates and types of deviance and varieties of social control in particular historical periods. Prerequisites: SOC 100 and one additional Sociology course, or consent of instructor.

470 Sociology of Popular Culture. (3) This course exposes students to the sociological study of popular culture. Material products and production methods, ideology and symbolic meanings are investigated in relation to social behavior using relevant theories and methodological tools of analysis. Prerequisite: SOC 100 or consent of instructor.

480 Deviance and Disruption in the American Family. (3) A sociological analysis of family deviance, neglect, abuse, and violence including processes leading to major personal crises and family disruption, and social programs and policies. Prerequisite: SOC 100 or consent of instructor.

485 Sociology of Victims. (3) An overview of victimology examining: the socio-political structural arrangements that create and sustain victimization, differing types of victimization, and the practical applications of victimological findings. Prerequisites: SOC 100 and one additional Sociology course, or consent of instructor.

487 Application of Fire Research. (3) Involves the understanding of fire research and its application. Data from available research on fire prevention and protection programs are studied. Prerequisite: permission of instructor/chairperson, or acceptance into National Fire Academy Certificate program, or enrollment as LEJA Fire Protection Services major, or Fire Administration or Fire Science minor.

488 Community and the Fire Threat. (3) Sociological and economic characteristics of communities and their influence on the fire problem. Housing, structure abandonment, rent control, crime, false alarm, and incendiary fire rates are studied. Prerequisite: permission of instructor/chairperson, or acceptance into National Fire Academy Certificate program, or enrollment as LEJA Fire Protection Services major, or Fire Administration or Fire Science minor.

494 (Cross-listed with ANTH 494) Internship. (3) Supervised applied experience in occupationally related area. Seminars and written reports required. Not open to students with credit in ANTH 494. Prerequisites: approval of department chairperson and junior or senior status.

497 Senior Honors Thesis in Sociology. (3–6, repeatable to 6) Thesis research under the direction of at least two Sociology faculty members on a topic of mutual agreement; 6 s.h. required for honors. Prerequisite: approval of departmental honors advisor.

499 Seminar in Sociology. (3, repeatable for different topics) Topics to be announced. Prerequisites: SOC 100 and one additional Sociology course, or consent of instructor.

ANTHROPOLOGY (ANTH)

110 Introduction to Cultural Anthropology. (3) (General Education/Social Sciences or Multicultural Studies) (Global Issues) Survey of basic concepts and approaches of Anthropology to the study of human beings. Study of worldwide cultures from prehistoric to the present. IAI: SI 901N.

111 Introduction to Physical Anthropology and Archaeology. (3) (General Education/Social Sciences) Study of human evolution from the perspectives of both biological and social sciences. Examination of the evolution of culture and the methods of its interpretation. IAI: SI 902.

180 Cannabis Cultures: The Anthropological Study of Cannabis. (3) Examines the anthropological approaches to cultures of cannabis, including medical and recreational marijuana. Two questions frame this course: What is the influence of cannabis on cultures? What is the influence of cultures on cannabis? Prerequisite: ANTH 110 or consent of instructor.

201 World Culture Regions. (3, repeatable to 9 for different culture regions) Surveys of the cultural adaptations of different regions of the world. Either the peoples of Africa, Asia, Latin America, the Middle East, or the Pacific will be studied each time the course is offered. The region will be announced in the time schedule. Prerequisite: ANTH 110 or consent of instructor.

202 (Cross-listed with AGE/RPTA/SOC 202) (Formerly AGE 200 and GER 200) Introduction to Gerontology. (3) An introduction to Gerontology, including a comprehensive and critical review of demographic, physiological, activity, and psychosocial dimensions of aging-related issues and processes. Not open to students with credit in AGE/RPTA/SOC 202.

205 Drugs and Cultures: From Magic Mushrooms to Big Pharma. (3) Examines the nature and use of mind-altering drugs from a cross-cultural perspective, including study of the varieties and effects of drugs around the world, in socio-cultural contexts, and functions of drugs.

210 Medical Anthropology. (3) (General Education/Social Sciences) Introduction to medical anthropology, an area of anthropology concerned with human health and the socio-cultural, political, and economic factors that contribute to illness and suffering.

215 Fantastic Archaeology: Ancient Astronauts, Shape Shifters, and Bigfoot. (3) (General Education/Social Sciences) This course examines alternate interpretations of the human past as a way to explore the nature of knowledge, develop critical thinking skills, and learn how anthropological and archaeological theory and methods may be used to distinguish between science and pseudoscience.

225 (Cross-listed with REL 225) (Formerly REL 457) Myth and Ritual. (3) (General Education/Multicultural Studies) An introduction to the anthropological study of myth and ritual systems and their importance in religious development and anthropological thought. The course focuses on a cross-cultural comparison of myth and its relationship to ritual. Not open to students with credit in REL 225.

249 Native North American Cultures. (3) (General Education/Multicultural Studies) Introduction to aboriginal North American cultures with an examination of the rich diversity of cultural development and its relationship to the natural environment. Prerequisite: ANTH 110 or consent of instructor.

305 Applied Anthropological Methods. (3) (Global Issues) Applies anthropological knowledge and methods to regional, national, and global contemporary problems. Includes current theoretical, ethical, and methodological debates. Social issues may include discrimination, hunger, disease, and underdevelopment. Prerequisite: ANTH 110 or consent of instructor.

310 Methods in Physical Anthropology. (3) This course provides an introduction to physical anthropological methods. An introduction to assessing human variation, interpreting the human fossil record, and techniques in forensic anthropology. Students gain an understanding of the tools used in the analysis of primate and human skeletal remains. Prerequisite: ANTH 111 or ZOOL 200 or permission of instructor.

315 (Cross-listed with WS 315) Gender and Anthropology. (3) Explorations of cross-cultural ethnographies of variations in gender roles in economic, religious, and political domains. This course
also addresses gender identity and gender diversity issues. Not open to students with credit in WS 315. Prerequisite: ANTH 110 or consent of instructor.

320 New World Archaeology: North America. (3) Survey of North American archaeology. Special emphasis on pre-Columbian culture adaptations of eastern United States and the Mississippi Valley, particularly the Illinois region. Prerequisite: 6 s.h. of Anthropology coursework including ANTH 111, or consent of instructor.

321 New World Archaeology: Central and South America. (3) A survey of Central and South American archaeology with emphasis on the prehispanic civilizations of Mexico and Peru. Prerequisite: ANTH 111 or consent of instructor. Recommended: ANTH 110.

324 (Cross-listed with REL 324) Religion, Magic, and Shamanism. (3) (Global Issues) Survey of cross-cultural perspectives on beliefs and practices dealing with the supernatural, magic, and religion. The functions and social positions of spiritual leaders from different cultures are explored. Not open to students with credit in REL 324. Prerequisite: ANTH 110 or consent of instructor.

325 Laboratory Analysis of Archaeological Material. (1–3, repeatable to 6 for different projects) Instruction in the study of material remains recovered from archaeological sites. Processing techniques and methods of analysis presented to introduce students to research in prehistory. Only 3 s.h. may count toward major. Prerequisite: permission of instructor.

326 Archaeological Field Methods. (1–6, repeatable to 12 for different projects) Intensive field training in the theory, problems, methods, and ethics of archaeological research. Usually taught during summer months at a camp located some distance from campus. Only 6 s.h. may count toward major. Prerequisite: permission of instructor.

330 (Cross-listed with WS 330) Sex and Gender in Archaeology. (3) The study of sex, gender, and power in archaeological investigations and theory, including cross-cultural comparison of gender and social differentiation in past societies. Changing perspectives on the roles of females in human evolution and prehistory are emphasized. Not open to students with credit in WS 330. Prerequisite: ANTH 110 or 111 or WS 190, or consent of instructor.

353 (Cross-listed with PSY 353) Cultural Psychology. (3) (Global Issues) Examines culture as the physical environment, social institutions and practices, language, and the media that influences human behavior and mental processes. Not open to students with credit in PSY 353. Prerequisites: 9 s.h. of Psychology coursework and junior standing or permission of instructor.

380 Language and Culture. (3) Study of language as an aspect of culture. Structural and historical analysis of language. Examination of the relationship of language to social structure. Prerequisite: ANTH 110 or consent of instructor.

395 (Cross-listed with WS 395) Gender, Race, and the Environment. (3) General Education/ Multicultural Studies) Explores research, scholarship, and fictional ecocitizen works. Students will consider the influence of women, feminists, and ecocitizen writings on local and global environmental movements. Not open to students with credit in WS 395. Prerequisite: ANTH 110 or WS 190 or permission of instructor.

405 Forensic Anthropology. (3) Forensic Anthropology deals with the medicolegal problem of identifying human skeletal remains. This course provides an elementary understanding of human skeletal biology, forensic archaeology, and the recovery and identification procedures involved when unknown or fragmented skeletal remains are discovered. Prerequisite: ANTH 111 or consent of instructor.

410 Anthrozoology. (3) Anthrozoology examines human-animal relationships from the perspectives of Anthropology with an emphasis on culture and its influence on attitudes toward animals. Prerequisite: ANTH 110 or consent of instructor.

415 Environmental Anthropology. (3) (Global Issues) Study of environmental issues from the perspectives of different cultures; students will study ecological and cultural adaptations of humans, and explore strategies for solving environmental problems involving cross-cultural stakeholders. Topics may include global climate change, forest loss, and environmental sustainability. Prerequisite: ANTH 110 or permission of instructor.

419 Anthropological Theory. (3) Study of the intellectual currents which led to the establishment of Anthropology as a discipline. Writing Instruction in the Disciplines (WID) course. Prerequisites: 12 s.h. of Anthropology coursework including ANTH 110 and 111.

420 Cultural Feast: The Anthropology of Food. (3) Anthropological study of food symbolism, rules, consumption, health, and the gendered dimensions of food, including gathering, preparation and distribution, and commoditization of food. Issues of scarcity and links to environmental sustainability, global social hierarchies, and power relations are also addressed. Prerequisite: ANTH 110.

425 Culture and Catastrophe: The Anthropology of Disaster. (3) Introduces critical theoretical and methodological approaches in the anthropological study of disasters. Examines human preparedness and response to disaster events, issues of social stratification and inequality, and environmental and social forces that influence vulnerability and social policy from an international perspective. Prerequisite: ANTH 110.

451 Special Topics in Anthropology. (1–2, repeatable for different topics to 6) In-depth investigations of special topics from broader subfields of Anthropology. Prerequisite: 6 s.h. of Anthropology coursework including ANTH 110 or 111 (as most relevant), or consent of instructor.

463 (Cross-listed with BOT 463) Ethnobotany. (4) (Global Issues) A survey of how indigenous people use and classify plants in comparison to modern, scientific principles of botany and plant chemistry, and the use of traditional knowledge by modern science. May require field work travel at student expense. Not open to students with credit in BOT 463. Prerequisites: BIOL 100, 101; BOT 200 (C grade or better); ZOOL 200 (C grade or better); ANTH 110 or SOC 100; or permission of instructor.

490 Individual Investigation in Anthropology. (1–3, repeatable to 3) Students will pursue a topic of special interest to the individual to be chosen in consultation with an instructor. Prerequisites: permission of instructor and department chairperson.

494 (Cross-listed with SOC 494) Internship. (3) Supervised applied experience in occupationally related area. Seminars and written reports required. Not open to students with credit in SOC 494. Prerequisites: approval of department chairperson and junior or senior status.
Chairperson: Dr. Amanda B. Silberer  
Office: Memorial Hall 232  
Telephone: (309) 298-1955; Fax: (309) 298-2049

Program Offerings and Locations:

- Bachelor of Science in Speech Pathology and Audiology: Macomb
- Minor in American Sign Language: Macomb

For student learning outcomes, please see wiu.edu/provost/learningoutcomes.

Faculty: Burke, Cox, Curless, Elbe, Martin-Prudent, McGarry, Pierson, Ruebush, Sharp, Silberer.

Academic Advisor: Grimm

The Department of Speech Pathology and Audiology offers a Bachelor of Science degree in Speech Pathology and Audiology. Undergraduates in Speech Pathology and Audiology study speech and language development; anatomy and physiology of speech and hearing; speech and hearing science; speech, language, and hearing disorders; and evaluation and treatment procedures.

Most undergraduates plan to apply to graduate school and pursue careers as speech-language pathologists or audiologists. The undergraduate program in Speech Pathology and Audiology provides the foundation for graduate work in either speech-language pathology or audiology. For students who plan to seek employment immediately after graduation, the major provides a solid background in typical and atypical communication, professional report writing, and scientific thinking, all of which are useful in many professional settings.

GradTrac is available to Speech Pathology and Audiology majors. See page 79 for information about GradTrac.

Honors Curriculum—Academically qualified students in this department are encouraged to complete an honors curriculum in University Honors, Honors in the Major, or General Honors. All Honors students must complete the one-hour honors colloquium (G H 299). General Honors includes General Honors coursework. Honors in the Major includes honors work in the major. University Honors combines Honors in the Major and General Honors. For more information about honors curricula, see page 100 or visit the Centennial Honors College website at wiu.edu/Honors.

Degree Program

Bachelor of Science—Speech Pathology and Audiology

All students seeking the Bachelor of Science in Speech Pathology and Audiology must complete I, II, III, IV, and V below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

I. University General Education Curriculum (p. 70) .......................................................... 43 s.h.

II. Core Courses ................................................................. 45 s.h.
   SPA 100, 121, 210, 212, 311, 312, 381, 383, 385, 386, 390, 472, 481†, 482, 494

III. Any Approved Minor* .................................................. 16–20 s.h.

IV. Open Electives* .......................................................... 11–15 s.h.

V. Other ................................................................................. 14 s.h.
   A. PSY 100
   B. STAT 171
   C. One of: BIOL 100, 101, 204; ZOOL 200
   D. One of: PHYS 100, 114, 115, 211; CHEM 101, 102, 150, 201, 202

Note: 3 s.b. of Category A and 10 s.b. of Categories B–D may count toward the University General Education Curriculum requirement.
Course Descriptions

SPEECH PATHOLOGY AND AUDIOLOGY (SPA)
Formerly COMMUNICATION SCIENCES AND DISORDERS (CSD)

100 (Formerly CSD 100) Introduction to Communication Sciences and Disorders. (3)
Introduction to the fields of speech-language pathology and audiology including theories and methods related to typical and disordered speech, language, and hearing. Examination of how communication disorders impact a person's psychological and social functioning. Opportunity to observe clinical procedures.

121 (Formerly CSD 121) American Sign Language I. (3) Introduction to American sign language with special focus on topics dealing with the Deaf community's culture, heritage, and language.

122 (Formerly CSD 122) American Sign Language II. (3) An intermediate course that builds on introductory signs, focuses on supplemental areas of sign language including profession-specific signs, and American Sign Language (ASL). Prerequisite: SPA 121 or permission of instructor.

210 (Formerly CSD 210) Anatomy and Physiology of the Speech and Hearing Mechanism. (3) Study of the anatomy, physiology, and neurology of the human speech and auditory mechanisms. Consideration of the processes of respiration, phonation, resonation, and audition.

212 (Formerly CSD 212) Phonetics. (3) Study of the articulatory and acoustical nature of speech sounds used in English and other phonetic-phonemic phenomena. Instruction in using the International Phonetic Alphabet for transcription. Some attention to dialectal differences.

223 American Sign Language III. (3) An advanced course focused on continued development of receptive and expressive skills in American Sign Language and an introduction to ASL grammar, incorporating a bilingual-bicultural approach and interaction with Deaf organizations. Prerequisites: SPA 121 and 122, or permission of instructor.

225 Deaf Culture. (3) This course provides an overview of the lives and experiences of Deaf individuals. Topics include: education of the D/deaf, Deaf films, preservation of American Sign Language, technology for communication, safety, education, and vocational services, cochlear implantation, and more.

311 (Formerly CSD 211 and 311) Speech and Hearing Science. (3) Introduction to acoustics, perception of sound by normal hearing listeners, acoustic characteristics of speech, and speech perception. Prerequisite: SPA 210 or consent of instructor.

325 Teaching Deaf and Hard of Hearing Students. (3) Focus on the education of d/Deaf and hard of hearing individuals in the school setting. Specific components include special education, behavior interventions, collaboration with families/other team members, assistive technology, language and literacy development, cultural influence, assessment, and differentiating instruction. Prerequisites: SPA 225.

381 (Formerly CSD 381) Speech Sound Development and Disorders. (3) Study of speech sound development of General American English. Investigation of production, perception, evaluation, and treatment of children's articulatory and phonological disorders and childhood apraxia of speech. Cleft lip and palate and its effects on speech sounds are included. Prerequisite: SPA 212.

383 (Formerly CSD 383) Neuroscience for Speech, Language, and Hearing. (3) Overview of the neuro-anatomy and neuro-physiology related to speech, language, and hearing. Emphasis will be placed on both the central and peripheral nervous systems. Prerequisite: SPA 210.

385 (Formerly CSD 385) Developmental Language Disorders. (3) Study of the characteristics, etiology, assessment, and treatment of developmental language disorders. Prerequisites: SPA 212 and 312.

386 (Formerly CSD 386) Acquired Communication Disorders. (3) Study of the characteristics, etiology, assessment, and treatment of acquired communication disorders. Topics will include aphasia, apraxia, dysarthria, voice disorders, and dementia. Prerequisite: SPA 383.

390 (Formerly CSD 390) Audiology and Hearing Disorders. (3) The study of the problem of hearing loss, diagnosis, and audiological testing. Prerequisite: SPA 210, 311, or consent of instructor.

400 (Formerly CSD 400) Senior Honors Thesis Research. (3) Bibliographic and other preliminary work in preparation for a senior honors thesis (see SPA 401). Students will produce a final, graded project for this course. This course may not be taken concurrently with SPA 401. Prerequisites: ENG 180 and 280; students must be in good standing in the Centennial Honors College and must be second-semester juniors or first-semester seniors majoring in Speech Pathology and Audiology.

401 (Formerly CSD 401) Honors Thesis. (3) Students will write a senior honors thesis under the supervision of a faculty member. This course may not be taken concurrently with SPA 400. Prerequisites: SPA 400, ENG 180 and 280; students must be in good standing in the Centennial Honors College and must be seniors majoring in Speech Pathology and Audiology.
Independent Research in Communication. (1–6, repeatable to 6) Individual reading or research under supervision of the faculty. Open to juniors and seniors who have demonstrated competence in speech-language-hearing sciences. Prerequisites: ENG 180 and 280, consent of instructor and department chairperson.

Scientific Thinking in Communication Sciences and Disorders. (3) Overview of the scientific method and interpretation of research literature in the field of communication sciences and disorders. Emphasis will also be placed on the use of evidence based practice in the fields of audiology and speech-language pathology. Prerequisites: ENG 280 and STAT 171 and either junior or senior standing in SPA or permission of instructor.

Evaluation Procedures in Speech-Language Pathology. (3) Consideration of the general role of evaluation in speech and language therapy with intensive study of diagnostic tests and procedures used to assess communication disorders. Writing Instruction in the Disciplines (WID) course. Prerequisites: ENG 180 and 280; SPA 390.

Clinical Methods in Speech-Language Pathology. (3) Study of the clinical management of communication disorders with particular emphasis on intervention methods such as developing treatment plans and monitoring treatment progress. Interviewing and counseling skills will also be addressed. Prerequisites: SPA 385 and 386.

Clinical Practicum in Speech-Language Pathology. (1, repeatable to 3) Supervised clinical practice with children and adults having speech or language disorders. Students must meet academic and observation hour requirements. Prerequisites: SPA 385 and 386; 30 clinical observation hours; minimum GPA of 3.0 in SPA coursework.

Clinical Practicum in Audiology. (1, repeatable to 3) Supervised clinical practice in the Speech-Language-Hearing Clinic with children and adults having hearing disorders. Students must meet academic and clinic observation hour requirements. Prerequisites: SPA 390; 30 clinical observation hours; minimum GPA of 3.0 in SPA coursework.
Teacher Education

Office of Teacher Education
Licensure Officer: Ms. Tammy Wilson
Field and Clinical Coordinator: Jackie Richmond
Office: Horrabin Hall 40
Telephone: (309) 298-2117; Fax: (309) 298-3386
E-mail: tep@wiu.edu
Website: wiu.edu/teacher

The Office of Teacher Education provides services to undergraduate and graduate students seeking teaching, school administration, and school service personnel licensures and endorsements. The Center's staff is responsible for advising services, field and clinical supervision, and licensure issues for prospective teachers, school support personnel, and school administrators.

To be recommended for teacher licensure, an individual must complete a State-approved Teacher Education Program, be of good character, in good health, and legally present in the United States and authorized for employment. Individuals seeking licensure must complete all University requirements as well as Teacher Education requirements. Early and continuous consultation and careful advising and planning are essential for individuals seeking initial teacher licensure.

Admission to the University does not automatically constitute acceptance to the Teacher Education Program. Candidates for baccalaureate degrees who plan to complete licensure requirements for teaching must make special application for admission to the Teacher Education Program. Application and requirements for full acceptance are available in the online Teacher Education Program Handbook at wiu.edu/teacher.

Western Illinois University must meet the mandates issued by the Illinois State Board of Education and the State Licensure Board. State Licensure Board requirements take precedence over the catalog of record for individuals seeking teacher licensure recommendation.

Accreditation

Western Illinois University is accredited by the Higher Learning Commission, and the Teacher Education Program is approved by the Illinois State Board of Education.

Approved Teacher Licensure Programs

The Illinois State Licensure Board mandates that each institution list in its catalog those programs which are classified as approved programs. The following programs at Western Illinois University have been approved by the Illinois State Licensure Board:

I. Secondary (9–12)
   Agriculture Education (6–12)
   English
   Mathematics
   Science/Biology
   Science/Chemistry
   Science/Physics
   Social Science/History

II. Middle Grades (5–8)
   Language Arts
   Mathematics
   Science
   Social Science

III. Elementary Education (1–6)

IV. Early Childhood Education (Age 0 through Grade Two)
V. Special (K–12)
   Art
   French
   Music
   Physical Education
   Reading Specialist (graduate program)
   Spanish
   Special Education—Learning Behavior Specialist I
   Technology Specialist (graduate program)

VI. Bilingual/English as a Second Language Education (approved major at WIU; endorsement only at ISBE)

VII. Administrative (graduate programs)
   School Principal
   Superintendent

VIII. School Service Personnel (graduate programs)
   School Counseling
   School Psychology
   Speech and Language Impaired

Teacher Education Program

The University Committee for Educator Preparation (UCEP) has oversight for all Teacher Education Programs approved by the Illinois State Board of Education (ISBE) at both the Macomb and Quad Cities campuses. UCEP determines all procedures, requirements, and student discipline protocol for the Teacher Education Program as a whole. It also approves unique requirements for discipline-specific programs.

Individuals who intend to earn a teaching license must be formally admitted to the Teacher Education Program as outlined in the Teacher Education Program Handbook. Once admitted, the student becomes a teacher education candidate and must conform to all requirements and regulations of the Teacher Education Program. Candidates who fail to meet all programmatic expectations may be dismissed from the Teacher Education Program.

Individuals seeking teacher licensure must complete an approved Teacher Education Program. An approved program consists of the following components: General Education, major program, professional education including core courses, Special Education requirement, reading in the content area requirement, pre-student teaching clinical experiences, student teaching, technology competency, curriculum modules addressing English Language Learners (ELL), and supporting coursework. In addition, candidates will undergo periodic disposition assessments, criminal background investigations, and national registry checks. The prospective teacher must be able to perform the essential functions of teaching, with or without a reasonable accommodation, as approved by the Western Illinois University Disability Resource office in collaboration with the Assistant Dean for Teacher Education in the College of Education and Human Services.

Candidates are required to exhibit the following professional dispositions at all times during their enrollment at Western: collaboration, commitment to learning, valuing diversity and equity, responsibility, and respect. Failure to adhere to these professional dispositions is grounds for dismissal from the program.

Teacher Education candidates must comply with fingerprint background investigation requirements as set forth by the Illinois State Board of Education and the Illinois school code. Prior to any field work in schools/agencies, candidates are to supply verification of having a completed fingerprint background investigation to each school/agency assigned. In addition, the National Sex Offender Registry, the National Registry of Violent Acts Against Children, and the Illinois Methamphetamine Manufacturer Registry are checked for each candidate. Candidates may be prohibited from completing field work if the background checks or registry checks disclose arrests and/or convictions deemed problematic.
Formal Admission and Retention in the Teacher Education Program

Candidates are to consult with their academic advisor to determine the appropriate time for formal admission to the Teacher Education Program. Candidates must satisfy all requirements of the approved Illinois State Board of Education program. Candidates are responsible for expenses related to program and/or licensure requirements. Full acceptance into the Teacher Education Program is required prior to enrolling in EDS 303 or any field experience that requires teaching (see departmental program requirements), EDS 401, and applying to student teach. An appropriate committee will screen all applicants according to the following criteria:

1. Completed 30 s.h. of college-level coursework and an established WIU GPA, including the following courses:
   - ENG 180 with a grade of C or better. A transferred course equivalent must have a C grade or better.
   - General Education Mathematics course with a grade of C- or above (MATH 101, 102, 123, 133, 134, 137, 138, 139; STAT 171). **Note**: Math Competency does not satisfy this Teacher Education requirement.

2. Earned, in accordance with the Illinois State Board of Education licensure rule, a “C-” or better in all directed general education courses, all core courses, and all courses in the option. This rule does not supersede course prerequisite requirements in the catalog that specify a letter grade.

3. Earned WIU cumulative and WIU major grade point averages (GPAs) of 2.75 or above for Bilingual/English as a Second Language, Early Childhood, Elementary, History, Middle Level, and Special Education majors, and WIU cumulative and WIU major grade point average of 2.50 or above for all other programs.

5. Successfully completed the online ELL Modules.

6. Successfully completed the online Teacher Education Technology Competency Assessment.

7. Cleared all applicable background registries.

8. Received and submitted a positive recommendation from the major department.

The above requirements apply to all persons (graduate and undergraduate) who wish to participate in the Teacher Education Program. More detailed information about selection and retention of candidates may be requested from the Office of Teacher Education. This includes information for candidates who may be transferring from other institutions or who may wish to change programs within this University at times other than those noted in the preceding paragraphs.

Appeals Procedures

The Selection, Retention, and Appeals Committee considers various appeals for candidates enrolled in the Teacher Education Program. Should an appeal be necessary, candidates should contact their advisor. The appeal form is available in Horrabin Hall 40 or on the website at wiu.edu/teacher.

Retention

Candidates must continue to maintain good standing in the Teacher Education Program once admitted. Candidates must continue to exhibit the required professional dispositions at all times during their enrollment at Western. These include: collaboration, commitment to learning, valuing diversity and equity, responsibility, and respect. Failure to adhere to these professional dispositions is grounds for dismissal from the program.
Professional Education

All persons seeking initial teaching licensure in the Teacher Education Program must complete the professional education sequence offered by the School of Education. The sequence includes EDS 202, 301, 305, and 401*. (Exception: Early Childhood Education majors consult department advisors.) Full acceptance to the Teacher Education Program is required to enroll in EDS 303 or any field experience requiring teaching. The Teacher Education program requires a cumulative and major 2.50 GPA or a cumulative and major 2.75 GPA (depending on the major) to enroll in EDS 303 or any field experience that requires teaching (see departmental program requirements). A grade of C- or better is required for all professional education courses. In addition, a minimum of 12 s.h. of student teaching is required (see departmental program requirements).

A grade of C- or better is required for all professional education courses, whether completed at WIU or transferred from another institution. All courses in the professional education sequence completed at other institutions must be evaluated by the School of Education for equivalency. Evaluation forms are available in the Office of Teacher Education.

Special Education

All persons seeking an Illinois professional educator license (early childhood, elementary, middle grades, secondary, or special) must satisfy a State mandate which requires coursework in the identification, psychology, and methods of teaching the exceptional child, including without limitation, the learning disabled child. Courses at Western Illinois University which satisfy this requirement are (grade of C- or better required):

- SPED 210—The Exceptional Learner and SPED 390—Differentiating Instruction for Learners with Special Needs
- PETE 393—Physical Activity for Learners with Exceptionalities and PETE 395—Assessment in Adapted Physical Education (Satisfies the requirement for Physical Education majors)
- MUS 334—Music for the Exceptional Child (Music majors only.)

Candidates should check with their advisors to determine the course(s) required for their major.

Reading in the Content Area

All persons seeking an Illinois professional education license (early childhood, elementary, middle grades, secondary, or special) must satisfy a state mandate which requires coursework in reading in the content area. Courses at Western Illinois University which satisfy this requirement are (grade of C- or better):

- ENG 366—Reading Instruction in Middle and High Schools
- RDG 382—Literacy Development: Birth through Preschool
- RDG 383—Literacy Instruction in the Early Grades
- RDG 384—Literacy Instruction in the Intermediate Grades
- RDG 387—Literacy Instruction in Content Areas

Candidates should check with their advisors to determine the course(s) required for their major.

Pre-Student Teaching Field Experiences

The Teacher Education Program requires that all persons seeking teacher licensure must complete the college-supervised, pre-student teaching field experiences in the major. A grade of C- or above or Satisfactory is required for all field experiences completed. A successful fingerprint background investigation and clearance of applicable registries
Teacher Education

are required prior to participating in any pre-student teaching field experience. Field experiences will typically be provided in the following courses:

a. EDS 202  
b. EDS 303/304  
c. Major Methods Course(s)  
d. Major Department Pre-Student Teaching Field Experiences

Also available are experiences which may be provided in other courses in the major.

Each candidate should consult his/her major department advisor to determine how this requirement will be met for that major’s program.

Candidates who transfer courses with a required field experience will need to provide verification of clinical experiences completed or supplement the transferred course with comparable clinical experiences at Western.

Application for Student Teaching

It is the responsibility of the candidate to apply for a student teaching assignment one year prior to the semester in which it is anticipated that the student teaching assignment will be completed. This application is reviewed and approved by the candidate’s academic advisor and the Coordinator of Field and Clinical Experiences. A clinical/student teaching application meeting will be held in September for those requesting student teaching assignments the following Fall semester. Similarly, a meeting will be held in February for those persons eligible to student teach in the Spring of the following year. Specific dates will be announced and posted. No summer session student teaching program is available.

Student Teaching Admission Requirements

Student teaching credit is required for graduation in the Teacher Education Program and is open to qualified candidates who are enrolled in the Teacher Education Program. Candidates must fulfill the requirements for admission to and retention in the Teacher Education Program and are responsible for meeting the student teaching admission requirements listed below:

1. Maintain the required major and cumulative GPAs for the program: 2.75 required for Bilingual/English as a Second Language, Early Childhood, Elementary, History, Middle Level, and Special Education majors. 2.50 required for Agriculture, Art, English, French, Mathematics, Music, Physical Education, Science/Biology-Chemistry-Physics, and Spanish majors.
2. Complete EDS 202, 301, 305, and 401 with a grade of C- or better. (Exception: Early Childhood Education majors consult department advisors).
3. Complete all required coursework with a grade of C- or better, unless specified otherwise.
4. Complete all pre-student teaching field experiences as described on page 349 with a grade of C- or better or a grade of Satisfactory.
5. Meet all departmental prerequisites for student teaching.
6. Receive and submit a positive recommendation from the major department.
7. Successfully complete the required Illinois state-mandated licensure tests, including the basic skills requirement and applicable content(s) tests.
8. Successfully complete a criminal fingerprint background investigation and clear all applicable registries.
9. Complete a state-mandated physical.

The candidate must continue to exhibit the dispositions and professional behaviors needed to perform the essential functions of teaching, with or without reasonable approved accommodations. Failure to adhere to these professional dispositions is grounds for dismissal from the program.
Student Teaching Field Experience Requirements

Each candidate must complete a minimum 12 s.h. (16 weeks) student teaching experience to meet graduation requirements. Some programs necessitate split assignments in two fields or at two grade levels for a total of 16 weeks. A maximum of 12 s.h. of STCH hours may be included in the minimum total of 120 s.h. required for graduation.

The student teaching experience semester provides direct teaching experience in a public school under the supervision, and with the guidance of, a highly qualified classroom mentor teacher and a University supervisor.

Requirements for Illinois licensure include passing the edTPA, which must be completed during the student teaching experience.

Student teachers may not participate in campus-based extra-curricular activities such as athletics or the Student Government Association and are discouraged from working while student teaching. Candidates wishing to enroll in additional coursework while student teaching must appeal to the Selection, Retention, and Appeals Committee prior to the student teaching term.

Student Teaching Sites

The Office of Teacher Education offers the following regional sites for clinical (student teaching) experiences: the Quad Cities area, Western Illinois area, Chicago, and Suburban Chicago area(s). Specific student teaching sites are determined by the field supervisors charged with the responsibility for placement and supervision of student teachers in each region. Providing student teachers with quality student teaching experiences in school districts with outstanding teaching reputations is the primary objective of each field supervisor. Housing arrangements and transportation during the student teaching semester are the responsibility of each student teacher.

Grading of the Student Teaching Experience

The clinical/student teaching experience is evaluated on an S/U grading system. Candidates must have satisfactorily completed all specific departmental/program requirements to satisfactorily complete student teaching.

Teaching Licensure

Candidates must complete all graduation, teacher education assessments, and major department requirements before recommendation will be made to the Illinois State Board of Education.

Candidates planning to teach should keep in mind the special requirements of the licensure laws in Illinois or other states where they may plan to teach. Recommendation for licensure is made only by the University Licensure Officer located in Horrabin Hall 40.

Candidates seeking an Illinois professional educator license must apply online for the license after the student teaching semester.

Any candidate seeking a teaching license must pass the following State-mandated licensure assessments:

1. Illinois Licensure Content Test(s) required prior to student teaching.
2. Illinois edTPA, a subject-specific assessment, must be passed prior to licensure.

Note: Some candidates may be required to take more than one content test. (See education advisor for additional information.)

Note: Tests are offered online at various approved testing sites throughout the country. Advanced registration and payment of the test fee is required.

Note: Registration information is available in Horrabin Hall 40 and online at il.nesinc.com.
Note: Program/licensure requirements are subject to change without notice. Any new state-mandated requirements will supersede program requirements identified herein.

Office of Teacher Education

Candidates are encouraged to contact their education advisor or the Field and Clinical Coordinator in Horrabin Hall 40 if additional information is needed regarding the academic semester of student teaching.

Course Descriptions

Student teaching is the process whereby a prospective teacher candidate demonstrates his/her competence as an effective beginning teacher. Each student teacher is expected to possess, or develop, the knowledge, skills, and dispositions needed to successfully manage a classroom teaching-learning situation. The successful completion of an approved student teaching experience is documented through one or more of the following courses.

STUDENT TEACHING (STCH)

430 Student Teaching—Special Needs—Elementary Level. (1–16) Kindergarten through the sixth grade.

431 Student Teaching—Special Needs—Secondary Level. (1–16) Grades 7–12.

437 Student Teaching—Bilingual. (1–16) Bilingual student teaching in grades kindergarten through eighth grade.

459 Student Teaching in Early Childhood Education (PK–K). (1–16) A pre-school through kindergarten level student teaching experience. Open only to persons in the Early Childhood program.

460 Student Teaching—Primary Grades (1–3). (1–16) Student teaching in grades 1, 2, or 3.

462 Student Teaching—Middle Level. (1–16) Student teaching in middle level departmentalized settings, grades 5–8.

480 Student Teaching—Secondary. (1–16) Student teaching in grades 9–12.

481 Student Teaching in Music. (1–16) Grades kindergarten through the sixth grade.

482 Student Teaching in Art. (1–16) Grades kindergarten through the sixth grade.

483 Student Teaching in Physical Education. (1–16) Grades kindergarten through the sixth grade.

485 Student Teaching in Elementary Foreign Languages. (1–16) Student teaching in a foreign language in grades K–6.
**Program Offerings and Locations:**

- Bachelor of Arts in Theatre: Macomb
- Bachelor of Fine Arts in Musical Theatre: Macomb
- Minor in Dance: Macomb
- Minor in Stage Combat: Macomb
- Minor in Theatre: Macomb

For student learning outcomes, please see [wiu.edu/provost/learningoutcomes](http://wiu.edu/provost/learningoutcomes).

**Faculty:** Blackinton, Clow, Conner, Fox, Galioto, House, Kamminga-Peck, Killian, Lewis, Nott, Petrin, Wright, Wroblewski.

The Department of Theatre and Dance offers a Bachelor of Arts (B.A.) degree in Theatre, a Bachelor of Fine Arts (B.F.A.) degree in Musical Theatre, and minors in Theatre, Dance, and Stage Combat.

The *B.A. in Theatre* degree program offers options in Performance and Production/Design. The program develops skilled and creative artists for vocational and professional careers and/or future study in Theatre and related arts and aims: (1) to develop creativity, artistic skills, and professionalism in students through an active production program that melds scholarship and practice; (2) to encourage and develop skills in communication, problem solving, research, and effective writing; (3) to enable majors and non-majors to expand and perfect their knowledge of the literary, historical, and philosophical aspects of Theatre through a rich curriculum that has both depth and breadth; (4) to foster students’ understanding and appreciation of the arts; and (5) to enhance the cultural life of the campus and the region.

The *B.F.A. in Musical Theatre* degree program is a comprehensive pre-professional training program, teaching students to combine and synthesize the areas of singing, acting, and dancing. Students in the Musical Theatre program are afforded a variety of in-class and onstage performance opportunities throughout the undergraduate career, culminating in a final senior project. A professional summer experience is an integral part of the requirements for graduation.

**GradTrac** is available to Theatre majors. See page 79 for information about GradTrac.

**Honors Curriculum**—Academically qualified students in this department are encouraged to complete an honors curriculum in University Honors, Honors in the Major, or General Honors. All Honors students must complete the one-hour honors colloquium (G H 299). General Honors includes General Honors coursework. Honors in the Major includes honors work in the major. University Honors combines Honors in the Major and General Honors. For more information about honors curricula, see page 100 or visit the Centennial Honors College website at [wiu.edu/Honors](http://wiu.edu/Honors).

**Degree Programs**

**Bachelor of Arts—Theatre**

All students seeking the Bachelor of Arts in Theatre must complete I, II, and III.A, III.B, or III.C below, and the foreign language/global issues requirement for the major*. The minimum semester hour requirement for the baccalaureate degree is 120 s.h.

I. University General Education Curriculum (p. 70) ................................................................. 43 s.h.

II. Core Courses ............................................................................................................................. 28 s.h.

THEA 100, 101*, 150, 151, 172*, 251, 321, 381, 390, 391†, 392
Theatre and Dance

III. Options of Study (Select A or B)

A. Performance
   1. Special Courses ................................................................. 10 s.h.
      a. THEA 170 and 171 ......................................................... 4 s.h.
      b. Either THEA 145 or 165 .............................................. 3 s.h.
      c. Either THEA 311 or 382 ................................................ 3 s.h.
   2. Directed Electives ............................................................ 9 s.h.
   3. Minor .............................................................................. 16–24 s.h.
   4. Open Electives ................................................................. 9–17 s.h.

B. Production/Design
   1. Special Courses ............................................................... 9 s.h.
      a. THEA 350, 450, and 451 .............................................. 6 s.h.
      b. Either THEA 145 or 165 .............................................. 3 s.h.
   2. Directed Electives ............................................................. 10 s.h.
   3. Minor .............................................................................. 16–24 s.h.
   4. Open Electives ................................................................. 9–17 s.h.

* May count toward the University General Education requirement.
† THEA 391 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.

Bachelor of Fine Arts—Musical Theatre

Program Admission: Admission to the program is by audition only. In order to be admitted to the B.F.A. program, students will present two contrasting songs, two contrasting monologues, and be prepared to learn a dance combination. The audition also qualifies the students for consideration for departmental scholarships. Auditions are held on campus in the Fall and the Spring. Video auditions may also be considered.

Program Requirements: Students accepted into the B.F.A. in Musical Theatre program must pass a proficiency test on basic music skills. All B.F.A. students also participate in an annual proficiency exam (at the end of the Spring semester) involving all three skill areas (acting, singing, and dancing), and may be put on probation in one or more areas. Those put on probation must pass a Fall proficiency exam the following semester in the area(s) of weakness. Faculty may provide individual guidance and coaching through this probationary process. After the Fall proficiency, students are either removed from probation or asked to leave the program. B.F.A. students also successfully pass voice juries in the School of Music at the end of each semester.

All students seeking the Bachelor of Fine Arts in Musical Theatre must complete I, II, and III below, and the foreign language/global issues requirement for the major#. The minimum semester hour requirement for the baccalaureate degree is 132 s.h.

I. University General Education Curriculum (p. 70) .................................................. 43 s.h.

II. Core Courses .......................................................................... 74 s.h.
   THEA 101*, 130, 171, 172*, 176, 230, 270, 271, 274, 276, 311, 330, 430, 476, 479 (6 s.h.), 492, 497†, 499; MUS 216 (8 s.h.), 416 (8 s.h.); DAN 110, 112, 113, 116, 212, 216, 316

III. Directed Electives ..................................................................... 21 s.h.
   Theatre (minimum 5 s.h.): THEA 150, 151, 269, 273, 337, 370, 372, 373, 381, 390, 391, 392, 470, 472, 473, 479
   Music (minimum 5 s.h.): MUS 105, 106, 107, 108, 109, 141, 181, 190, 195, 196, 242, 248, 394, 397
   Dance (minimum 5 s.h.): DAN 119, 210, 213, 219, 310, 313, 413

# The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) THEA 390; or 4) an approved Study Abroad program.

354
The foreign language/global issues graduation requirement may be fulfilled by successfully completing one of the following: 1) a designated foreign language requirement [see Foreign Language/Global Issues Requirement, p. 64]; 2) a General Education global issues course; 3) THEA 390; or 4) an approved Study Abroad program. *May count toward the University General Education requirement.

† THEA 497 fulfills the Writing Instruction in the Disciplines (WID) graduation requirement.

Minors

Minor in Dance ........................................................................................................19 s.h.

1. Required Courses ........................................................................................................ 11 s.h.

3. Theatre (THEA) electives ................................................................................. 6–7 s.h.

Course Descriptions

THEATRE (THEA)

100 Theatre Arts: Practice and Profession. (3) An introduction to all elements of the theatre by providing students with lecture/demonstrations and hands-on experience in eight areas of theatre study. Primarily for Theatre majors. Lab.

101 Play Analysis. (3) (General Education/Fine Arts) Analysis of plays in terms of plot, theme, character, dialogue, etc., preparatory to approaching the dramatic materials in terms of theatrical production. Production attendance is required.

110 Introduction to the Theatre. (3) (General Education/Fine Arts) Designed to acquaint the student with an overview of the aesthetics of drama and the practical aspects of the living theatre. Production attendance is required. IAI: F1 907.

130 Theatre Practice. (1, repeatable to 2) Designed to increase proficiency in preparation and presentation of theatrical performance. At least one facet of the student’s contribution must be carried out under the direct supervision of a member of the Theatre faculty. Open to freshmen only.

145 Fundamentals of Lighting and Sound. (3) An introduction to stage lighting and audio production including basic electrical theory, control systems, instrumentation and equipment, industry practices, and safety.

150 Stagecraft. (3) Study of basic skills of play production including carpentry, scenic painting, and prop construction.

151 Technical Theatre Practicum I. (1) Training and supervised work in theatre production, including costume construction, set and prop construction, and crew assignments. Prerequisite: THEA 150.

165 Fundamentals of Costume Construction. (3) An introduction to costuming and costume production for the theatre including sewing, draping, crafts, and wardrobe.

170 Movement I. (2) This course will develop an awareness of the actor’s physical self while expanding the actor’s physical potential. This course will also develop the actor’s kinesthetic awareness to be sensitive to stimuli such as other people, various environments, and psychological moods.

171 Voice Techniques I. (2) Development of the physical and aesthetic nature of voice production. Individual analysis of voices directs attention to improvement of quality, articulation, and pronunciation.

172 Acting I. (3) (General Education/Fine Arts) Fundamental concepts, terms, and techniques in acting. Participation in class exercises and problems give the student an opportunity to begin developing skills in performance. IAI: TA 914.

176 Techniques of Musical Theatre Performance. (3) Designed to introduce the student to the practical demands and staging of musical comedy in the theatre. Emphasis will be placed on specific dance routines, musical comedy styles, and audition pieces. Prerequisite: permission of instructor.
201 Multiculturalism in Theatre. (3) (General Education/Multicultural Studies) An analysis of multicultural issues found in drama. The class will survey cultural differences as well as the issues and topics unique and specific to various cultures and minorities.

230 Theatre Practice. (1, repeatable to 2) Same as THEA 130. Open to sophomores only.

251 Technical Theatre Practicum II. (1) Continuation of THEA 151. Training and supervised work in theatre production including costume construction, set and prop construction, and crew assignments. Prerequisite: THEA 151.

260 Make-Up. (2) Practice and theory of make-up in the theatre. Designed to develop proficiency in the various techniques and styles of make-up application. Lab fee: purchase of make-up kit required.

270 Movement II. (3) Continuation of THEA 170—Movement I. This course explores the actor’s own movement habits and patterns, and develops methods for altering and implementing new physical manners for created characters through movement and masks. Prerequisite: THEA 170 or permission of instructor.

271 Music Skills for Musical Theatre I. (2) Basic musicianship skills with specific applications to Musical Theatre situations. Prerequisites: Musical Theatre major with sophomore standing or B.F.A. music fundamentals proficiency or MUS 180—Fundamentals of Music; B.F.A. piano proficiency.

273 Improvisation for Theatre. (3) Designed to enhance intuitive and spontaneous skills of acting through a series of structured exercises focusing on conflict, situation, and characterization. Prerequisite: THEA 172.

274 Music Skills for Musical Theatre II. (2) A continuation of THEA 271. Prerequisites: Musical Theatre major with sophomore standing and THEA 271; B.F.A. music fundamentals proficiency or MUS 180—Fundamentals of Music; B.F.A. piano proficiency.

276 Musical Theatre Studio. (3) Performance of major roles of Musical Theatre in studio projects. Emphasis on the student’s integration of singing, acting, and movement into a unified performance. Prerequisite: Musical Theatre major with sophomore standing or permission of the instructor.

298 Independent Study. (1–3) Private work on specific problems in performance or tech/design with an approved advisor. Student must request course the semester before enrolling.

311 (Formerly THEA 272) Acting II. (3) Continuation of THEA 172—Acting I, with the emphasis on script analysis and in-class scene study. Prerequisites: THEA 170 or DAN 113; and THEA 171 and 172.

321 Stage Management. (3) Study of the procedures involved in stage management with opportunities for the student to gain experience in this area.

323 Theatre Organization and Management. (3) Study of the procedures involved in theatre publicity and sales with opportunities for the student to gain experience in this area.

330 Theatre Practice. (1, repeatable to 2) Same as THEA 130. Open to juniors only.

337 Professional Semester. (12) Designed to give the undergraduate student the opportunity and the learning experience to practice the craft of theatre off-campus in a professional situation. Students may enroll in this course only after they have been accepted into a reputable theatre organization and have received approval from the Theatre faculty. Because most of the student’s time will be spent off-campus working in a theatre, or with a theatre organization, students should not enroll in any other courses during the semester they are enrolled in THEA 337.

338 Advanced Topics in Technical Theatre. (2) Creative and practical projects assigned in conjunction with major campus productions. Prerequisite: THEA 150 or permission of instructor.

345 Lighting Design I. (3) In-depth investigation of the varied aspects of stage lighting theory, design, and practice. The practice will include theoretical production experiences. Prerequisite: THEA 145.

350 Technical Theatre Practicum III. (1) Continuation of THEA 251. Training and supervised work in theatre production including costume construction, set and prop construction, and crew assignments. Prerequisite: THEA 251.

354 Theatrical Drafting. (3) Advanced study of the principles and methods of drafting conventions and techniques employed by the theatre designer or technician. Prerequisite: THEA 150 or permission of instructor.

355 Scene Design I. (3) Introduction to the methodology and practice of scene design. Application of knowledge through a series of fundamental design projects. Prerequisite: THEA 354 or permission of instructor.

356 Theatrical Rendering. (3) Media and techniques employed in the presentation of theatrical designs. Prerequisite: permission of instructor.

370 Movement III. (3) This course is an exploration into the techniques of physical comedy as the actor learns to develop his/her sense of comic timing. This course will also offer an introduction to the techniques and stock characters of Italian Commedia dell’Arte. Prerequisite: THEA 270 or permission of instructor.

372 Acting: Characterization. (3) Intense and extensive character analysis and improvisation exploring possible strategies and approaches an actor may take in presenting a character. Prerequisite: THEA 270 and 311.

373 Acting: Shakespeare. (3) Designed to deal with individual problems of the actor. Consideration is given to acting in verse drama, particularly the works of Shakespeare. Prerequisite: THEA 270 and 311.

381 (Formerly THEA 282) Directing I. (3) The director’s function in theatrical production from an aesthetic and practical standpoint. Prerequisite: THEA 101, 172, and 321.

382 Directing II. (3) A continuation of the development of directorial skills using classroom exercises, discussions, and scene work. Prerequisite: THEA 381 or permission of instructor.

390 World Theatre History I. (3) (Global Issues) A survey of world theatre history and literature from its origins in antiquity through the 17th century, tracing the social, political, and economic conditions in which theatre has developed around the world. Prerequisites: successful completion of ENG 180 and 280.

391 World Theatre History II. (3) A survey of world theatre history and literature from the 17th century to the 1930s, tracing the social, political, and economic conditions in which theatre has developed around the world. Writing Instruction in the Disciplines (WID) course. Prerequisites: successful completion of ENG 180 and 280.

392 World Theatre History III. (2) A survey of world theatre history and literature from the 1930s to the present, tracing the social, political, and economic conditions in which theatre has developed around the world. Prerequisites: successful completion of ENG 180 and 280.
400 Independent Research and Projects. (1–6, repeatable for different topics to 6) Individual study or research under supervision of the faculty. Open to seniors who have demonstrated special competence in Theatre. By permission of the department chairperson only. Student must request course the semester before enrolling.

401 Honors Thesis/Project. (3) A capstone course for students pursuing Departmental Honors in Theatre. Students will write a senior honors thesis or produce a final graded creative project. Prerequisite: G H 299 and 6 s.b. of in-course honors in Theatre; good standing in the Centennial Honors College; senior Theatre major.

409 Playwriting I. (2) Designed to instruct in the basic principles of the art of playwriting: objective, development of obstacles in incidents, characterization, and climax. Prerequisite: ENG 180 and 280.

419 Playwriting II. (2) Continuation of THEA 409. Students who have achieved a basic level of proficiency in the art of playwriting are encouraged to further develop their skills. Prerequisites: THEA 409; ENG 180 and 280.

430 Theatre Practice. (1, repeatable to 2) Same as THEA 130. Open to seniors only.

446 Lighting Design II. (3) Continuation of THEA 345. The varied aspects of production experience. Prerequisite: THEA 345.

450 Technical Theatre Practicum IV. (1) Continuation of THEA 350. Training and supervised work in theatre production including costume construction, set and prop construction, and crew assignments. Prerequisite: THEA 350.

451 Decor. (4) Survey of architectural elements, furnishings, and decorative motifs useful to theatre designers: prehistoric through modern including Far Eastern styles.

455 Scene Design II. (3) The effects of the elements of scene design in the theatre and the designer's methods of working on design problems. Individual design skill development through creative project assignments. Prerequisite: THEA 355.

456 Scene Painting. (2) Introduction to painting for the stage with an emphasis on materials, texturing techniques, and three-dimensional effects. Lab fee required.

465 Costume Design II. (3) Projects assigned in interpreting historical clothing into theatrical costume. Prerequisite: THEA 365 or permission of instructor.

470 Stage Combat: Unarmed. (4) Students will learn safe, effective techniques for performing unarmed stage fights, falls, and rolls. Emphasis on acting the fight, safety, and realism. Prerequisites: THEA 170 and 172, or permission of instructor.

472 Auditions. (2) Designed to prepare the advanced acting student in the techniques, opportunities, and procedures of auditioning, interviewing, and constructing resumes for advanced study or career placement. Prerequisite: THEA 372 or 373.

473 Acting and the Camera. (3, repeatable to 9) A course designed to incorporate skills learned in basic acting classes and basic video or film production courses, emphasizing camera students working with actors and actors working in front of the camera. Prerequisite: Performance students: THEA 311 or permission of instructor; Camera students: BC 110 or BC&J 311 or permission of instructor.

474 Stage Combat: Armed. (4, repeatable to a maximum of 12) Designed to teach safe, effective techniques for various weapons. Weapons could include broadsword, sword and shield, quarterstaff, rapier, and dagger. Emphasis on acting the story and safety. Prerequisites: THEA 470 and/or permission of the instructor.

476 Advanced Techniques of Musical Theatre. (3) Continuation of THEA 176. Further development of singing and acting abilities, enabling the student to fuse these talents and perform with greater success in the genre of Musical Theatre. Prerequisites: at least two acting classes, proficient music skills, and permission of the instructor.

477 Dialects. (3) Training in American regional and foreign dialects most frequently required in performance. Various approaches are introduced so that individuals may develop personal working methods. Prerequisite: THEA 171 and 172, or permission of instructor.

479 Professional Summer Semester. (1–12, repeatable to a maximum of 12) Practical and theoretical work in all aspects of production during intensive eight-week rehearsal and performance of Summer Music Theatre. Auditions required.

481 Rehearsal Techniques. (3) The examination and practical application of techniques for the development of creative rehearsal environments, effective actor/director communication, and strategies for exploring the moment to moment dynamics of a scene. Prerequisite: THEA 382.

482 Independent Projects in Directing. (3) Supervised independent projects in directing. Prerequisite: THEA 481 with a B or better.

483 Assistant Director Practicum. (1) Designed to give the directing student the opportunity to participate in a mainstage production, the student will work on all aspects of the artistic development of a production under the mentorship of the faculty director. Prerequisites: THEA 481 and permission of instructor.

492 Musical Theatre Auditions and Professional Preparation. (3) Designed to prepare students to be successful at professional Musical Theatre auditions and to provide them with practical skills and information related to show business (i.e.: agents, managers, unions, negotiating, contracts, headshots, resumes, casting directors, etc.). Prerequisite: THEA 276.

496 Experiments and Topics in Theatre. (1–3, repeatable to 12) Investigation and exploration of special projects or experiments which will immerse students in a specific topic, technique, or concept. Prerequisites: ENG 180 and 280; junior or senior standing.

497 Musical Theatre History. (3) History of Musical Theatre, primarily focusing on American Musical Theatre, from its defining influences and roots to the present. Topics to be covered include significant productions, composers, lyricists, librettists, choreographers, directors, designers, and actors. Writing Instruction in the Disciplines (WID) course. Prerequisites: THEA 101 or permission of instructor, and successful completion of ENG 180 and 280.

498 Individual Study. (1–3) Special projects in performance or design. Prerequisites: junior or senior standing, and permission of advisor.

499 BFA Senior Project. (3) BFA Musical Theatre seniors are to mount a fully-staged, recital format, production demonstrating high proficiency in the three primary areas of study: acting, singing, and dancing. Seniors are expected to direct their own productions, with faculty guidance. Prerequisites: Musical Theatre major and senior standing.

DANCE (DAN)

110 Ballet I. (2, repeatable to 4) Introduction to exercises at barre, exercises at center, simple allegro work, and simple adagio.
112 Jazz Dance I. (2, repeatable to 4) Survey of the historical influences from which jazz dance evolved and beginning jazz techniques.

113 Modern Dance I. (2, repeatable to 4) Beginning modern dance technique and creative approach.

116 Tap Dance I. (1, repeatable to 2) Fundamentals of tap and soft shoe.

119 Improvisation. (1) Exploration of individual and group movement potential in a spontaneous context, as it relates to dance.

210 Ballet II. (2, repeatable to 6) Intermediate technique and skill. Continuation of Ballet I. Prerequisite: permission of instructor.

212 Jazz Dance II. (2, repeatable to 6) Intermediate skill, techniques, and movement combinations. Continuation of Jazz I. Prerequisite: permission of instructor.

213 Modern Dance II. (2, repeatable to 6) Intermediate level skills and techniques. Continuation of Modern Dance I. Prerequisite: permission of instructor.

216 Tap Dance II. (1, repeatable to 2) Intermediate tap dance and soft shoe skills and continued study of beginning skills and theory. Prerequisite: DAN 116 or permission of instructor.

219 Composition. (2) Introduction to application of choreographic principles with emphasis on movement invention and development of evaluative skills. Prerequisite: DAN 119. Concert attendance required

310 Ballet III. (2, repeatable to 6) Continuation of Ballet II. Prerequisites: DAN 210 and permission of instructor.

313 Modern Dance III. (2, repeatable to 6) Prerequisites: DAN 213 and permission of instructor.

316 Musical Theatre Dance. (2, repeatable to 6) This dance performance course focuses on the specific needs for a performer in Musical Theatre. Students will gain practical experience in dance areas pertinent to Musical Theatre performance such as partnering, solo work, and dancing in a chorus. Prerequisites: Musical Theatre major and permission of instructor.

382 Dance History and Philosophy. (3) A survey of dance from pre-literary times to the present in relation to philosophical and sociological factors of dance as an art form in society. IAI: FI 906.

385 Movement and Music Analysis. (3) Review of musical notation and application through playing of keyboard and percussion instruments. Analysis of recorded music for meter, rhythmic pattern, and phrasing.

386 Special Projects in Dance. (1–6, repeatable for different topics to 6) By arrangement with Dance advisor one semester in advance.

413 Advanced Techniques of Modern Dance. (2, repeatable to 6) Advanced modern dance techniques with emphasis on performance qualities in projection, vitality, and execution. Prerequisites: DAN 313 and permission of instructor.

490 Independent Study. (1–3, repeatable for different topics to 6) By arrangement with instructor.
The courses listed below are designed to support graduation requirements, Study Abroad, and other opportunities for study not associated with academic departments.

**Course Descriptions**

**LIBRARY (LIB)**

201 Using Libraries Today I—Information Access and Evaluation. (1) Introduces concepts and techniques required to determine information need, develop search strategies, and access and evaluate print and online resources effectively and efficiently. The course provides hands-on experience with a focus on WIU Libraries information resources.

360 (Cross-listed with UNIV 360) Research Methods for General and Professional Studies. (3) Course covers the research process and application of methods appropriate to professional studies. Includes an introduction to research methodologies, project planning, and reporting. Not open to students with credit in UNIV 360. Prerequisites: junior standing; ENG 180 and 280; or permission of instructor.

**UNIVERSITY (UNIV)**

099 BGS Prior Learning Portfolio Tutorial. (0) An online introduction to the development of a Prior Learning Portfolio. This is a required tutorial to be completed before creating a Prior Learning Portfolio. Prerequisite: admission to the Bachelor of Arts in General Studies degree program. Graded S/U only.

100 Personal Growth and Well-Being in Higher Education. (1) (General Education/Human Well-Being) This course provides first-year students with an introduction to social, intellectual, personal, and physical wellness as they relate to college-level success. Credit cannot be given for both UNIV 100 and CSP 110. Prerequisite: freshman standing with fewer than 24 s.h. earned, or permission of University Courses Coordinator.

200 Career Exploration. (1) Introduces the concept of career exploration and lifelong career development. Guides students through researching career options and knowledge of one’s personality, interests, and values in relation to career decision making.

360 (Cross-listed with LIB 360) Research Methods for General and Professional Studies. (3) Course covers the research process and application of methods appropriate to professional studies. Includes an introduction to research methodologies, project planning, and reporting. Not open to students with credit in LIB 360. Prerequisites: junior standing; ENG 180 and 280; or permission of instructor.

390 Career Preparation. (1) Assist students in developing tools and skills to effectively market and transition themselves into the workforce, increase student understanding of the job search process, and strengthen the students’ confidence level in setting and reaching their professional goals. Prerequisite: sophomore, junior, or senior standing.

490 Career Internship. (2–12, repeatable to 12) Appropriate, supervised practical work experience in a career related setting. BGS online writing course. Prerequisites: junior/senior standing, 2.00 GPA, and permission of instructor. Graded S/U only.

**WESL INSTITUTE (WESL)**

010 Foundation in English as a Second Language. (0, repeatable) Basic language and academic skills in reading, writing, listening, speaking, integrated skills, and grammar. Reading strategies; sentence to paragraph writing; guided note-taking; conversation and simple discussion; computer skills. Orientation to American life and culture. 20 hours per week. Prerequisite: admission to WESL Institute. Graded S/U only.

020 Intermediate English as a Second Language. (0, repeatable) Continued development of intermediate language and academic skills in reading, writing, listening, speaking, integrated skills, and grammar. Reading strategies; sentence to paragraph writing; guided note-taking and lecture comprehension; conversation and simple discussion; speeches; computer skills. Orientation to American life and culture. 20 hours per week. Prerequisite: admission to WESL Institute. Graded S/U only.

030 University Preparation in English as a Second Language. (0, repeatable) Continued development of advanced academic and language skills in reading, writing, listening, speaking, integrated skills, and grammar. Reading and writing strategies; sentence to paragraph writing; guided note-taking and lecture comprehension; interpersonal and intercultural communication; public speaking; computer skills. 20 hours per week. Prerequisite: admission to WESL Institute. Graded S/U only.

040 Dual Program in Listening/Speaking or Reading/Writing. (0) For students with advanced skills in English who need additional instruction in either listening/speaking or reading/writing as determined by the WESL Placement Test. Students enroll in University Preparation class 10 hours a week and up to 6 hours of graduate courses or 8 hours of undergraduate courses in the University. Prerequisite: admission to WESL Institute and WIU. Graded S/U only.

060 TOEFL Preparation. (0) Intensive preparation and practice for the TOEFL, test of English as a foreign language, for matriculated non-native speakers of English. University Preparation student enrolled in WESL Institute. Prerequisite: Fully matriculated non-native speaker of English. University Preparation student enrolled in WESL, or Dual Program student enrolled in WESL. Graded S/U only.
Experimental Studies Program

Western Illinois University offers students and faculty the opportunity to explore experiments in learning which lie outside the existing traditional curriculum structure. Under the framework of the Experimental Studies Program, students may design courses (298/498) to fit their specific interests and needs and receive academic credit through sponsorship by a faculty coordinator. Faculty in turn, may propose new and innovative courses (275/475) for presentation to students on a trial basis with a minimum of the regular approval procedure, thereby permitting an experimental period for refinement before the course is proposed through regular channels for approval. The appropriate department chairperson should be contacted for additional information about the Experimental Studies Program.

275–475 (Title to Be Assigned by Department). (1–3 each) Students should consult the department to determine which experimental courses, if any, are being offered under this number during the current academic year. *May not be counted in the General Education Curriculum. Students pursuing undergraduate degree programs may take a maximum of 3 s.h. of 275 and 3 s.h. of 475 from one department for credit toward graduation. A student pursuing the B.A. in General Studies degree may take up to 12 hours of 275/475 courses from one department for credit toward graduation.

298–498 Individualized Studies. (1–3 each) This course is available to students who are interested in the study of topics which are not currently a part of the curriculum. Students should consult their advisor or the department chairperson about procedures. *May not be counted in the General Education Curriculum.

Overseas Study

The following courses facilitate the registration and tracking of students who enroll for study outside the U.S.

OVERSEAS STUDY (All)

279 Overseas Study*. (Repeatable to a maximum of 18 s.h.) Coursework undertaken as part of an approved University overseas study program. Prerequisite: approval of Study Abroad advisor and department chair.

379 Overseas Study*. (Repeatable to a maximum of 18 s.h.) Coursework undertaken as part of an approved University overseas study program. Prerequisite: approval of Study Abroad advisor and department chair.

* Title is flexible as approved by department chair.

OVERSEAS STUDY (OVST)

279 Overseas Study. (0–18) Participation in an approved overseas study for up to one year at another approved university. Prerequisite: approval of Study Abroad advisor.

379 Overseas Study. (0–18) Participation in an approved overseas study for up to one year at another approved university. Prerequisite: approval of Study Abroad advisor.

Academic Advising

At Western Illinois University, academic advising is an intentional, educational partnership between advisors and students. Grounded in teaching and learning, and approached from a developmental perspective, this multidimensional process considers and respects students’ diverse backgrounds, interests, and abilities, while facilitating the identification and achievement of educational, career, and life goals. Every student is assigned an academic advisor based on the student's major or admission program. Once a student is admitted, information about the advisor can be found on the online student record system (STARS).

Advising and Academic Support Center
Memorial Hall Lower Level; (309) 298-1846 or -1871

The University Advising and Academic Support Center (UAASC) houses the First Year Advising Program and is responsible for the academic advisement of WIU’s new freshmen in all majors, including students admitted through the Reach Program. We also offer advising services to area high school students taking college classes while still in high school and guest students. During the school year, the UAASC helps students resolve academic problems by offering free tutoring and success workshops through our Rocky’s Resources Program. Students wanting individualized assistance can get it through our Academic Success Coaching Program.

Council on Admission, Graduation, and Academic Standards (CAGAS)
Sherman Hall 110; (309) 298-3101

This Faculty Senate council (CAGAS) may be contacted through the Office of the Registrar in Sherman Hall. Undergraduate students seeking information concerning academic appeals (e.g., late withdrawals, course substitutions, and waivers of University requirements) may contact CAGAS at (309) 298-3101 or CAGAS@wiu.edu. Students filing such appeals may send them to CAGAS, Sherman Hall 110.

Global Education and Outreach
Horrabin Hall 6; (309) 298-1929

The School of Global Education and Outreach (wiu.edu/global) includes non-credit programs, and distance learning. The School provides educational and public service opportunities through a variety of delivery technologies. Courses are offered in more than two dozen disciplines each term. Extension coursework is delivered on-site or through distance learning technology to locations throughout Illinois. WIU also provides online courses which allow individuals to study wherever they may be located.

A wide variety of programs in the form of conferences, workshops, short-term international programs, sponsored credit, and residential programs are coordinated through the Office of Study Abroad and Outreach. Staff develop programs independently as well as in cooperation with University departments.

Another component of the School is the Center for International Studies. This office is involved in coordination with government agencies for visas and immigration problems; provides an orientation program for new international students; coordinates special programs such as International Neighbors and Conversation Partners; University representation for international and intercultural matters; and publicity related to all University international activities. The Western English as a Second Language (WESL) Institute provides an intensive program in academic English for international students who are preparing to enter an American college or university. The Office of Study Abroad and Outreach sponsors a variety of educational programs in more than 60 countries worldwide. Students may participate in Study Abroad throughout the year.
Academic Services

Graduate Studies
Sherman Hall 116; (309) 298-1806
The School of Graduate Studies (wiu.edu/grad) is the coordinating agency for the University’s graduate programs and international admissions. The Graduate School processes graduate student admissions, writes graduate assistantship contracts, verifies degree completion, and provides immigration services to all graduate and international students at the University. The School of Graduate Studies is responsible for implementing the policies, procedures, and academic standards established by the Graduate Council, a representative body elected by members of the graduate faculty.

Registrar
Sherman Hall 110; (309) 298-1891
The Office of the Registrar (wiu.edu/registrar) determines the residency status of students, administers the registration of students, verifies degree completion, maintains student academic records, and reviews applications for undergraduate readmission. The office is also responsible for certifying NCAA academic eligibility, issuing official transcripts and verifications, printing diplomas, publishing class schedules, coordinating Commencement, issuing grade reports, processing student requests to change a major, minor, or address, and administering academic room scheduling. The Office of the Registrar also facilitates the GradTrac program.

University Libraries
(309) 298-2705
University Libraries is comprised of the main Leslie F. Malpass Library, the Music Library, the Curriculum Library, and the WIU-Quad Cities Library in Moline. Together the libraries house an extensive collection; deliver online access to thousands of journals, documents, and e-books; offer research assistance both in person and virtually; and provide library instruction. All branches offer group study spaces, wireless access, computers, and printers. WIU Libraries is a member of the Consortium of Academic and Research Libraries in Illinois, giving our users easy access to the collections of 90 other libraries. In addition, WIU Libraries participates in the federal and Illinois depository programs and is a designated Patent and Trademark Resource Center. Archives & Special Collections is the official repository for university records and scholarship, and collects materials that document the cultural, economic, and natural heritage of west-central Illinois. For more information, please visit wiu.edu/libraries.

University Technology
Stipes Hall 126; (309) 298-TECH
University Technology (uTech) supports computer resources used by students and faculty for research and instruction. Computers are available for use in most instructional and residential buildings on both the Macomb and Quad Cities campuses. Wireless access is available in all academic buildings and in residence halls.

Computer labs are staffed by trained student personnel and are available for student use in Stipes, Horrabin, Memorial, and Morgan Halls and at Western Illinois University—Quad Cities. Residence hall students in Macomb may use computer labs in each hall complex. Two labs are available 24 hours a day, while late-night access is available for off-campus students in the University Union and Malpass Library. Internet access is available in all residence hall rooms, including graduate and family housing.

Each student is provided a WIU e-mail account, space to create a personal home page, and file storage. Google Apps for Education and Office 365 accounts are free to all students. Discounted software is also available for purchase. Details regarding discounted and free software available to students can be found on the WIU website (wiu.edu/university_technology/student_resources/software.php). WIU Mobile is a free mobile app available for download on Apple and Android devices. The app offers the ability to view important
Academic Services

campus resources such as a campus map, dining menus, campus directory, news, Western Online, computer lab hours, and current events from the convenience of a mobile device.

The uTech Support Center provides walk-in support for student, faculty, and staff technology needs. Walk-in technical support is available in Stipes Hall 126 from 8:00 a.m. to 4:30 p.m. Monday–Friday. For technical assistance, please contact the uTech Support Center at (309) 298-TECH [(309) 298-8324] or support@wiu.edu.

Western Illinois University—Quad Cities
3300 River Drive, Moline, IL; (309) 762-9481

Located in a community with a population over 380,000, WIU—Quad Cities is the public University in the Quad Cities area. WIU—Quad Cities is a metropolitan, commuter campus that offers bachelor’s, master’s, and doctoral degrees, as well as post-baccalaureate certificate programs. WIU—Quad Cities welcomes freshmen, transfers, and graduate students who seek an engaging university experience in and out of the classroom, with opportunities for experiential and service learning, networking, and internships that prepare students for a career and life after WIU.

Writing Center
Malpass Library, Third Floor (Macomb); Quad Cities Complex, Room 2219 (QC); (309) 298-2815

The University Writing Center (UWC), including the QC-based U.S. Bank Writing Center, provides a wide range of writing services to students, faculty, and staff. The UWC is staffed by highly qualified undergraduate students, graduate students, and faculty who can assist with writing from any discipline, at any academic level, and at any point in the writing process. For more information on locations and hours or to self-schedule an appointment, please visit us at wiu.edu/uwc.
Beu Health Center  
**Corner of Western Avenue and Murray Street; (309) 298-1888**

Beu Health Center, located on the Macomb campus, provides outpatient primary care services for students and their spouses or domestic partners. The Center is equipped with its own pharmacy, laboratory, and x-ray facilities, and the Center's physicians and mid-level practitioners provide diagnosis, treatment, and prescriptive services for individuals. There are fees associated with services such as x-ray examinations, pharmacy products, injection services, laboratory services, equipment, and office visits. Information about Beu Health Center services can be found at [wiu.edu/beu](http://wiu.edu/beu), and appointments may be scheduled online at [http://beuonline.wiu.edu](http://beuonline.wiu.edu).

Campus Recreation  
**Donald S. Spencer Student Recreation Center; (309) 298-1228**

Campus Recreation provides students the opportunity to pursue a healthy lifestyle and explore recreational interests through a variety of programs, facilities, and services. The Spencer Student Recreation Center features five multipurpose gym courts, two group fitness studios, a one-eighth mile elevated track, three weight rooms, three cardio areas, a boxing room, a core room, four racquetball courts, and an aquatics center with a pool, aqua climb, and hot tub. Intramural Sports offer over 30 events annually with leagues, tournaments, and events in men's, women's, co-recreational, and Greek divisions at competitive, intermediate, and recreational levels of play. Sport Clubs provide recreational opportunities, as well as regional and national competition. A variety of group fitness classes are offered daily. Informational programs and personal trainers are available to assist students with fitness equipment and goals. Please visit [wiu.edu/campusrec](http://wiu.edu/campusrec) for on-campus recreational facilities and activities. Add [wiurec](http://wiurec) on Snapshot, and follow [wiucampusrec](http://wiucampusrec) on Instagram, Twitter, and Facebook. Some spaces/programs may be altered or offline due to COVID-19 restrictions.

Casa Latina Cultural Center  
**Multicultural Center, Suite 202; (309) 298-3379**

At Casa Latina Cultural Center, we are passionate about social justice, intersectionality, and developing students through education, engagement, and leadership. Casa provides a safe, unique, and empowering space for students to experience college life. Casa is a home away from home that offers a variety of events and programming during the academic year ranging from music performances, cultural celebrations, and our annual legacy programs BYOT (Bring Your Own Tortilla), Día de los Muertos, and Calle Murray. In addition, we house five student organizations: LASO (Latin American Student Organization), Tradición Latin Dance Team, Amplify, Mariachi de Oro, and the Latin American Literary Society. We look forward to having you visit our beautiful space at the Multicultural Center, featuring lounges, a computer lab, a dance studio, a kitchen, and a conference room. Please visit [wiu.edu/casa](http://wiu.edu/casa) for more information, follow [casa_linta_wiu](http://casa_linta_wiu) on Instagram, and like our Facebook page [Casa Latina Cultural Center at WIU](http://Casa Latina Cultural Center at WIU).

Counseling Center  
**Memorial Hall 102; (309) 298-2453**

The University Counseling Center (UCC) provides free and confidential counseling to enrolled students. We are committed to providing comprehensive mental health services that promote the overall wellness and personal growth of our students. We offer a wide range of services to the WIU community that address students' psychological, developmental, interpersonal, and academic concerns. The Center is staffed by licensed mental health professionals who provide ethical, inclusive, culturally sensitive, and progressive treatment options to students working on self-identified goals. We believe in affirming the dignity, worth, and value of all students in our diverse population and strive to create an environment of openness, safety, and respect. More information about the Counseling Center is available online at [wiu.edu/ucc](http://wiu.edu/ucc).
Financial Aid  
**Sherman Hall 127; (309) 298-2446**

The Office of Financial Aid administers a variety of student assistance programs, including grants, scholarships, federal work study, tuition grants and waivers, and low interest loan funds. More than 76 percent of WIU students receive financial aid from private, federal, state, or University sources. Additional information about financial assistance and applications are available at [wiu.edu/fa](http://wiu.edu/fa).

**Go West Transit**  
**Macomb Transit Center; (309) 575-3333**

Go West Transit provides students with safe, convenient transportation from and around campus and with service to the entire Macomb community. Carrying more than 1 million riders per year, Go West provides students with a reliable, low-cost public transportation system. Maps and schedules are available online at [wiu.edu/gowest](http://wiu.edu/gowest).

**Gwendolyn Brooks Cultural Center**  
**Multicultural Center; (309) 298-2220**

The Gwendolyn Brooks Cultural Center is named after the first African-American Pulitzer Prize-winning poet and Poet Laureate of Illinois, Gwendolyn Brooks. Founded in 1970, the Gwendolyn Brooks Cultural Center supports all students and promotes student success through cultural awareness, academic achievement, and social advocacy. Join one of our many student organizations: African Student Association, Black Male Achievement Network, Black Student Association, Black Student Summit, Cultural Expressions, Christian Faith Campus Ministry, GBCC Dance Troupe, and National Association for the Advancement of Colored People. Celebrate a wide variety of cultural events like Taste of Africa, Black History Month, and Feel Good Fridays! Visit our space and meet our wonderful team that is committed to your success. Please visit [wiu.edu/gbcc](http://wiu.edu/gbcc) for more information, and follow us on social media!

**LGBT*QA Resource Center**  
**Multicultural Center; (309) 298-4004**

The Lesbian, Gay, Bisexual, Trans*, Queer/Questioning, Asexual/Ally (LGBT*QA) Resource Center offers a welcoming and inclusive environment for people of all sexualities and gender identities/expressions. The LGBT*QA Resource Center also serves as connection for LGBT*QA individuals to resources, support, education, programming, and advocacy. Everyone is welcome to join our student organization Unity and our Queer book club. A gender affirming closet (The Qloset) is also available free of charge. The Big Picture Picnic, Camp OUT, Trans* Day of Remembrance, Drag Shows, and Pride Week are a few of the great events you can be part of each year. Please visit [wiu.edu/lgbtqa](http://wiu.edu/lgbtqa) for more information, and follow us on social media!

**Student Development and Success Center**  
**Memorial Hall 125; (309) 298-1884 (voice), (309) 298-1856 (TTY)**  
[wiu.edu/sdsc](http://wiu.edu/sdsc)

The Student Development and Success Center is located in Memorial Hall and combines Disability Resources, Health Education and Wellness, Student Development, and Student Rights and Responsibilities into one office that is focused on providing students with the resources to overcome educational challenges.

Western Illinois University is committed to equity, social justice, and diversity. To that end, the **Disability Resource** office collaborates with faculty and staff to facilitate inclusion and ensure accessibility to University programs for students with disabilities. Students experiencing barriers in the academic or physical environment or who are interested in accommodations such as alternative testing arrangements, sign language interpreters, text...
conversion (i.e., Braille, electronic, enlarged) services, and note-taking assistance should contact Disability Resources at (309) 298-1884 or disability@wiu.edu.

The Health Education and Wellness office contributes to the overall responsibility of Western Illinois University for the education of students in the area of lifestyle and behavior that promotes individual as well as community health. Professional staff, graduate assistants, and student health peer mentors provide a wide variety of wellness outreach programs and services. Outreach programs, as well as individual consultations regarding specific health issues are available to WIU students at no fee.

Student Development provides programs, services, and support to enhance student success, learning, and personal development focusing specifically on college transition. Staff also interact with family members, University faculty and personnel, and community agencies in assisting students with crisis situations. Student Development is the liaison that assists students who experience any trauma due to emergency health or personal problems. In addition, Student Development conducts interviews for students contemplating a University withdrawal and hears late total University withdrawal appeals for the current term.

Student Rights and Responsibilities (SRR) strives to support safe, inclusive, and educational learning environments aiding in student success. SRR informs students and organizations of their rights and responsibilities through publication of the Code of Student Conduct and numerous program presentations. Through coordination and management of the conduct review process, Student Rights and Responsibilities endeavors to support Western Illinois University’s core values by reinforcing standards of academic excellence, promoting educational opportunities both inside and outside the classroom, enhancing personal growth of community members, and highlighting the importance of social responsibility while protecting student rights and addressing behavioral problems.

Student Engagement
University Union; (309) 298-3232

The Office of Student Engagement, located on the first floor of the University Union, is the primary resource for student organizations and programs. Student life at WIU is enriched by involvement in any of the hundreds of campus organizations that meet the diverse, cultural, intellectual, and social interests of students. Opportunities for student involvement include leadership development, volunteer services, student programming, Student Government Association, fraternities and sororities, and 250+ student organizations. Co-curricular activities provide opportunities to develop leadership, organizational, and communication skills, and to meet new people and have some fun. The Office of Student Engagement provides students with developmental learning experiences while ensuring that a spectrum of programs is provided to enhance the campus community.

Student Publications: The Western Courier
Heating Plant Annex; (309) 298-1876

The Western Courier is a student-run newspaper and news website (westerncourier.com). The paper is published three days per week during the regular academic year. Advertising revenue and a student publication fee provide funding for the newspaper and website. Students who work at The Western Courier are paid for their efforts.

Transitional Programs
Orientation/Camp Leatherneck: Memorial Hall 08; (309) 298-1131
Career Development: Memorial Hall 014; (309) 298-1838

Transitional Programs, located on the lower level of Memorial Hall, provides various services and areas of support that assist students toward a successful transition into the Western Illinois University community. These services include fall, spring and summer Orientation programs, which are designed to introduce new students and their families to Western Illinois University, provide them with resources and various involvement...
opportunities, and officially welcome them to “Leatherneck Country”; Camp Leatherneck, which is an interactive, two-day retreat prior to the start of the academic year, focuses on community building, leadership skills, and service to others in an effort to help incoming students prepare for many aspects of collegiate life; and Career Development, which offers career guidance and support to all students including career exploration, resume and cover letter building, mock and/or Skype interview preparation and facilitation, creation of LinkedIn accounts, and offers advice on how to transition into the workforce. Current students and alumni also have access to Handshake, an on-line platform that can match students with internships, career fairs, and job opportunities based upon their majors and interests. Additional services provided by Career Development include a career exploration course for credit and a FREE clothing closet for students who need professional attire.

University Housing and Dining Services
Seal Hall; (309) 298-3000; wiu.edu/uhds

The mission of University Housing and Dining Services is to provide safe, clean, comfortable residence halls and apartment facilities; a nutritious, well-balanced food service program; and programs that support students’ academic goals. The University Housing and Dining Services staff provide a wide range of services and programs for students living on campus. A wide variety of options are available to make life in WIU’s residence halls a unique educational experience. Living Learning Community floor options include Agriculture, Broadcasting and Journalism, Business Studies, CLASS (Community of Liberal Arts and Sciences Students), Fine Arts, Honors, ROTC (Reserve Officers’ Training Corps), STEM (Science, Technology, Engineering, and Mathematics), and Transfer Year Experience. All residence hall rooms have access to the internet through either wireless or LAN connections. WIU offers one-bedroom apartments for graduate and non-traditional students and for students who are married, are in a documented domestic partnership, or have a child. Learn more at wiu.edu/uhds.

University Union
(309) 298-1986

The University Union is the community center of the University. It provides a variety of meeting and dining facilities for students, faculty, staff, and friends of the University. Union services include a food court, meeting and banquet rooms, ballrooms, a bookstore, hotel rooms, computer stations, a small theatre, check cashing, ATM machines, fax service, cashier services, and a convenience store.

Veterans Resource Center
Wright Residence; (309) 298-3505

The Veterans Resource Center is committed to assisting those who have served or are currently serving in the U.S. military and their family members. The Center, in collaboration with University departments and community organizations, provides coordinated services and resources in one centralized location to ensure that all veterans and service members are afforded the greatest opportunities for success. Students receive assistance with obtaining educational and military transcripts; completing applications for the GI Bill®, Illinois Veterans Grant, Illinois National Guard Grant, Illinois MIA/POW Scholarship, Federal Tuition Assistance, and federal student aid programs; identifying policies regarding military activation and deployment; securing appropriate housing accommodations; requesting military records; and acquiring community living information, outreach services, and health benefits. GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government Web site at https://www.benefits.va.gov/gibill.
WIU Harry Mussatto Golf Course
1215 Tower Road, Macomb, IL; (309) 298-3676
The Harry Mussatto Golf Course is a scenic and challenging 18-hole championship venue featuring beautiful vistas, spectacular elevation changes, four sets of tees, undulating greens, and bentgrass tees and greens. The newly-opened Arthur D. & Roselyn Chown Golf Learning Center offers the latest in golf equipment, apparel, and accessories. The facility also includes a full-service driving range with multiple short game areas and a large putting green. University golf classes, clinics, and individual instruction are also offered to help the golfer get started. More information about the course and daily fee rates can be found at wiu.edu/student_services/golf_course/.

Women’s Center
Multicultural Center, Suite 209; (309) 298-2242
The mission of the Women’s Center is to support a welcoming and gender-inclusive campus community. Student development is at the core of our work. We advocate for gender equity through examinations of feminisms, sexism, patriarchy, and misogyny. We lead the campus community in explorations of how gender is a social construction that influences power dynamics and intersects with all other identities, such as, but not limited to: ability, age, citizenship status, ethnicity, race, religion, sex, sexual orientation, and socioeconomic class. We promote opportunities to celebrate women, collaborate in programming and outreach, and seek unity and understanding. Students are encouraged to stop by the Center to hang out between classes and/or to get involved. The Women’s Center team advises several student organizations and implements various educational opportunities throughout the year. Our programs, events, and resources are available to all, regardless of gender identity or expression. For additional information, please check out our website at wiu.edu/wc and “like” us on Facebook!

Assistant Women's Basketball Coach—Intercollegiate Athletics  
B.S.—Missouri State University (2009)

Cordes, Christopher Sean (2007)  
Professor—University Libraries  
Ph.D.—Iowa State University (2013)

Covert, Jason Stanley (2003)  
Senior Instructor—Computer Sciences  
M.S.—Western Illinois University (2005)

Cox, Julie L. (2012)  
Assistant Professor—Speech Pathology and Audiology  
Ph.D.—Western Michigan University (2018)

Creasey, Susan Rene (2001)  
Assistant Professor—Management and Marketing  
M.B.A.—Western Illinois University (1992)

Crosby, Amy L. (2009)  
Director of Development—College of Arts and Sciences  
M.S.—Western Illinois University (2017)

Cruise, Tracy K. (1998)  
Professor—Psychology  
Ph.D.—Illinois State University (1998)

Curless, Julie L. (2018)  
Instructor—Speech Pathology and Audiology  
M.S.—Eastern Illinois University (2009)

Czechowski, Susan Ann (2001)  
Professor—Art and Design  
M.F.A.—Syracuse University-Main Campus (2002)

Dace, Marsha J. (2006)  
Counselor—University Counseling Center  
M.S.Ed.—Western Illinois University (1991)

Dadello, Cynthia (2006)  
Academic Advisor—Health Sciences and Social Work  
M.S.W.—University of Illinois at Urbana-Champaign (2003)

Daugherty, Glenn R. (2014)  
Assistant Professor—Law Enforcement and Justice Administration  
D.Ed.—University of Phoenix (2017)

Davis, Christina (2012)  
Associate Professor—Sociology and Anthropology  
Ph.D.—University of Michigan-Ann Arbor (2011)

Davis, Tracy L. (1998)  
Professor—Education—Quad Cities  
Ph.D.—University of Iowa (1997)

Associate Professor—Political Science  
Ph.D.—University of Iowa (2010)

Daytner, Gary Thomas (2001)  
Associate Professor—Education  
Ph.D.—Indiana University at Bloomington (2005)

Daytner, Katrina M. (2001)  
Associate Dean—College of Education and Human Services  
Professor—Education  
Ph.D.—Indiana University at Bloomington (2003)

Professor—Accounting, Finance, Economics and Decision Sciences  
Ph.D.—Louisiana State University (1995)

Professor—Education  
D.Ed.—Northern Arizona University (1997)

Deng, Yanrong (2006)  
Instructor—Computer Sciences  
M.S.—Western Illinois University (2006)

Deng, Yongxin (2005)  
Professor—Earth, Atmospheric, and Geographic Information Sciences  
Ph.D.—University of Southern California (2005)

Determan, John J. (2014)  
Assistant Professor—Chemistry  
Ph.D.—University of North Texas (2011)

DeVolder, Dennis M. (1996)  
Professor and Director—Computer Sciences  
Ph.D.—Florida State University (1996)

Di Carmine, Roberta (2006)  
Professor—English  

Professor—Mathematics and Philosophy  

Doh, Minsun (2006)  
Professor—Recreation, Park and Tourism Administration  
Ph.D.—Texas A&M University (2006)
Dorsett, Stephanie (1996)
Academic Advisor—Office of Teacher Education
B.A.—Western Illinois University (1989)

Dunkel, Curtis (2007)
Professor—Psychology
Ph.D.—University of Nebraska-Lincoln (2002)

Dunlap, Isaac Hunter (1997)
Professor—Libraries

Duvall, Elizabeth L. (2018)
General Counsel Attorney—Legal Services
J.D.—Valparaiso University (2004)

Dworkin, Steven L. (2009)
Professor—Psychology
Ph.D.—University of Florida (1981)

Ealy, Clifton F. (2007)
Professor—Mathematics and Philosophy

Easton, Tyler C. (2009)
Counselor—Undergraduate Admissions
M.S.—Western Illinois University (2018)

Eathington, Patricia K. (2009)
Associate Professor—Nursing
D.N.P.—University of Illinois at Chicago (2013)

Eck, Shelby R. (2013)
Development Research Analyst Specialist—Foundation and Development Office
M.A.—Ashford University (2008)

Edwards, Shikita Monet (2017)
Counselor—Undergraduate Admissions

Eggleston, Julie A. (2017)
Instructor—Recreation, Park and Tourism Administration
M.S.—Western Illinois University (2008)

Ekanyake, Amy J. (2009)
Professor—Mathematics and Philosophy
Ph.D.—Texas Tech University (2009)

Ekanyake Dinesh B. (2009)
Professor—Mathematics and Philosophy
Ph.D.—Texas Tech University (2009)

Ekici, Niyazi (2018)
Assistant Professor—Law Enforcement and Justice Administration
Ph.D.—Rutgers University-Camden (2009)

Elbe, Heidi L. (2016)
Instructor—Speech Pathology and Audiology
M.S.—Western Illinois University (2005)

Ellerfritz, Benjamin P. (2019)
Supervision Field Specialist—Office of Teacher Education
M.S.Ed.—Western Illinois University (2005)

Elliott, Jared (2016)
Assistant Football Coach—Intercollegiate Athletics
B.S.—Miami University Main Campus (2008)

Engel, Jeffrey E. (2000)
Associate Professor—Biological Sciences
Ph.D.—University of Iowa (1995)

Entzminger, Phillip C. (2018)
Assistant Professor—Law Enforcement and Justice Administration
J.D.—Campbell University (2009)

Eskridge, Monica J. (2000)
Academic Advisor—Office of Teacher Education
M.S.—Western Illinois University (2009)

Eudy, Victoria N. (2017)
Instructor—Museum Studies—Quad Cities
Ph.D.—Florida State University (2019)

Fansler, Michael J. (2001)
Professor—Music
D.M.Ed.—University of Illinois at Urbana-Champaign (2009)

Feld, Tara Nussman (1998)
Interim Associate Dean—College of Business and Technology
Associate Professor—Accounting, Finance, Economics and Decision Sciences
Ph.D.—University of South Carolina (1998)

Fernandez, Jose O. (2011)
Associate Professor—English
Ph.D.—Northern Illinois University (2012)

Professor—History

Finch, Redina Lee (2005)
Professor—Earth, Atmospheric, and Geographic Information Sciences
Ph.D.—University of Illinois at Urbana-Champaign (2005)

Finley, Thomas Edward (1997)
Senior Instructor—Libraries—Quad Cities
M.L.S.—University of Kentucky (1996)

Senior Instructor—Accounting, Finance, Economics and Decision Sciences
M.Acct.—Western Illinois University (2002)

Foulk, Stephanie S. (2010)
Assistant Director of Development—WIUM

Fox, Kaila R. (2015)
Instructor—Nursing
M.S.N.—Olivet Nazarene University (2015)

Fox, Lysa (2012)
Associate Professor—Theatre and Dance
M.F.A.—California State University-Long Beach (2010)

Franken, Jason R. (2011)
Assistant Professor—Agriculture
Ph.D.—University of Illinois at Urbana-Champaign (2008)

Director—Undergraduate Admissions
M.S.—Wayne State University (1994)

Gabbei, Ritchie C. (1999)
Professor—Kinesiology
Ph.D.—University of South Carolina (2002)

Gage, Jeanne C. (2005)
Academic Advisor—Office of Teacher Education
M.S.Ed.—Northern Illinois University (2000)

Galio, Jeannie M. (2016)
Assistant Professor—Theatre and Dance
M.F.A.—San Diego State University (2008)

Assistant Professor—Music
D.M.A.—Northwestern University (2018)

Gates, Janice S. (1997)
Senior Instructor—Management and Marketing
M.B.A.—Western Illinois University (1992)

George, Binto (1999)
Professor—Computers Sciences
Ph.D.—Indian Institute of Science (1999)

George, Sunita (2009)
Associate Professor—Earth, Atmospheric, and Geographic Information Sciences
Ph.D.—University of Georgia (1999)

Assistant Professor—Accounting, Finance, Economics and Decision Sciences
Ph.D.—Western Michigan University (2013)

Gibson, Sarah J. (2015)
Counselor—Undergraduate Admissions
M.S.Ed.—Western Illinois University (2009)

Ginsberg, Eric L. (1996)
Professor—Music
M.M.—The Juilliard School (1974)

Go, Eun (2015)
Assistant Professor—Broadcasting and Journalism

Gorshtunov, Mikhail A. (2018)
Assistant Professor—Management and Marketing
Ph.D.—Auburn University-Main Campus (2018)

Gorsuch, Kathryn Lynne (2017)
Counselor—Undergraduate Admissions
M.S.Ed.—Western Illinois University (2017)

Grachev, Mikhail V. (2002)
Professor—Management—Quad Cities
Ph.D.—Russian Academy of Sciences (1998)

Grant, Zachary Steele (2020)
Assistant Football Coach—Intercollegiate Athletics
M.Ed.—University of Illinois at Urbana-Champaign (2018)

Gravina, James D. (2011)
Head Women's Basketball Coach—Intercollegiate Athletics
M.S.—Emporia State University (2007)

Gravitt, Denise D. (2010)
Professor—Engineering Technology
Ph.D.—Indiana State University (2004)

Assistant Professor—Accounting, Finance, Economics and Decision Sciences
D.B.A.—University of Wisconsin-Whitewater (2017)
Faculty and Professional Staff

Harden, Laura B. (2016) Instructor—Nursing M.S.N.—Lewis University (2016)

Harlan, Jack Master Sergeant—Senior Instructor—Military Science

Henning, Shelby (2017) Assistant Professor—Agriculture Ph.D.—University of Illinois at Urbana-Champaign (2012)

Hsu, Yu-Ping (2018) Assistant Professor—Engineering Technology Ph.D.—University of Kansas (2014)

Huang, Jenq-Kuen (1990) Professor—Chemistry Ph.D.—Kansas State University (1985)

Hunter, Garrett D. (1996) Professor—Engineering Technology Ph.D.—Purdue University Main Campus (1994)

1—Western Illinois University Riverfront Campus, 3300 River Drive, Moline
2—Figge Art Museum, 225 West 2nd Street, Davenport, IA
The academic year consists of the Fall and Spring semesters and one eight-week Summer session. Each semester includes 15 weeks of instruction and one week of final examinations. The Summer session includes a pre-session, one eight-week, one six-week, and two four-week periods of instruction.

### Fall Semester, 2020
- **August 24**, Monday
- **August 28**, Friday
- **August 31-September 4**, Monday–Friday
- **September 7**, Monday
- **September 8**, Tuesday
- **October 19**, Monday
- **October 30**, Friday
- **November 1**, Saturday
- **November 2**, Monday
- **November 3**, Tuesday
- **November 4**, Wednesday
- **November 23–27**, Monday–Friday
- **November 26–27**, Thursday–Friday
- **November 30**, Monday
- **December 14–18**, Monday–Friday
- **December 19**, Saturday

### Spring Semester, 2021
- **January 18**, Monday
- **January 19**, Tuesday
- **January 25**, Monday
- **January 26–February 1**, Tuesday–Monday
- **February 12**, Friday
- **February 15**, Monday
- **March 15–19**, Monday–Friday
- **March 22**, Monday
- **April 1**, Thursday
- **April 4**, Sunday
- **April 9**, Friday
- **April 12**, Monday
- **May 10–14**, Monday–Friday
- **May 14**, Friday
- **May 15**, Saturday
- **May 16**, Sunday

### Summer Session, 2021

**Summer session open registration, restricted registration, and withdrawal dates vary.**

- **May 17**, Monday
- **May 31**, Monday
- **June 1**, Tuesday
- **June 4**, Friday
- **June 7**, Monday
- **July 2**, Friday
- **July 5**, Monday
- **July 6**, Tuesday
- **July 16**, Friday
- **July 30**, Friday
