

Creating “All About Me” Stacks

To add individual children’s stacks:

Open Class stack and go to the 2nd card. Two invisible buttons are already on this page. Click one of them. This will take you to All About 1 which is a template for individual child stacks. Under File, click on Save As and rename the file as “All about (insert child’s name)”

As you add children’s pictures to the Class stack, link to the template stack All About 1, then rename the stack with the child’s name. After you have completed the child’s stack, you’ll have to go back to Card 2 of the Class stack and edit your button on the child’s photo so that it links to the newly named stacks.

Card 1: All About

Insert child’s digital photo and name on Card 1. Record child’s voice saying the title. There is a link on this card back to the 2nd card of the Class stack.

Card 2: This is what I look like.

Ask child to draw a picture of him/her self. This can be done right on Card 2 with the drawing tools in HyperStudio. If the child prefers he/she can draw a picture in Kid Pix, save it and add it as a graphic to Card 2. Also a picture done off of the computer could be scanned and added here.

Card 3: I like to....

Ask the child about his/her likes and complete the phrase. If possible add a digital photo of what the child likes if it is something in the classroom. Or parents may contribute a photo of a child’s favorite thing at home.

Card 4: At school my friend is

Ask the child about his/her friends in the classroom. Enter the name of one or more friends. Add a picture of the friend(s) to this card. Record something the child says about his/her friend(s).

Card 5: At home I have

Ask the child about family members. Complete the phrase with the child’s response. Scan pictures sent from home or have child draw a family picture.

Card 6: The best thing about school is.....

Ask the child what he/she likes about school and complete the phrase. A digital picture of something the child talks about can be added or the child can draw a picture to be added here.

On each card record the child’s voice or your voice saying the words on that page.

Card 7 and **Card 8** can be used for other things children or you would like to add, one can be The End if you would like, or these cards can be deleted if not used.

If you would like to add another card, copy and paste card 8 so that you have the buttons for turning page.

Good luck! Have fun!
