58th Annual Western Illinois University Mathematics Teachers Conference

Theme:

“Teaching and Learning Mathematics K-14: Reflecting on the Past and Preparing for the Future”

Venue and date:

Western Illinois University Macomb, Illinois
Friday, March 27, 2009, 8 a.m. - 4 p.m.

We are pleased to invite you to attend the 58th Annual WIU Mathematics Teachers Conference on Friday, March 27, 2009 in Macomb, Illinois.

Throughout the years, our conference has attracted high quality speakers and we have seen an increasing number of participants.

We are fortunate this year to have as our Keynote Speakers, Dr. Keith Devlin from Stanford University (<http://www.stanford.edu/~kdevlin/>) and Dr. Roger Eggleton from Illinois State University (<http://www.math.ilstu.edu/roger/>).

Dr. Keith Devlin, the opening speaker, is also known as "the Math Guy" on National Public Radio, and has a wide range of experiences involving the use of different media to teach and communicate mathematics to diverse audiences, the design of information/reasoning systems for intelligence analysis, theory of information, models of reasoning, applications of mathematical techniques in the study of communication, and mathematical cognition.

Dr. Eggleton, the closing speaker, works in Discrete Mathematics generally, with active research projects in Graph Theory, Number Theory and Combinatorics.

This year's conference will feature a wide range of exciting and engaging sessions and workshops (Polynomiography, Career, etc). Speakers are invited to come and share their ideas and experience on topics related to Teaching and Learning Mathematics, at all levels.

This meeting is an opportunity for all teachers of mathematics and prospective mathematics teachers to collaborate and share their math success's story.
