What is Blood Alcohol Content?
Blood Alcohol Content (BAC) is a measure of the concentration of alcohol in the blood. A blood alcohol content of 0.08 can result in an individual being arrested when operating a vehicle under the influence. A blood alcohol content of 0.35 or higher can result in breathing stoppage, coma, and possible death.

Potential Cost of a Minor in Possession
Macomb Police Department

Underage Drinking May Cost You!

- Possession/Consumption of Alcohol by a minor = $250
- Person under 20 years old in a bar = $250
- Possession of open alcohol in public = $250
- The City of Macomb is currently considering raising the cost of some of these tickets from $250 to $300 to $750

Is it worth it?
Be aware and take control of your life!

Don’t forget...

- Alcohol impairs your decision making and sexual consent cannot be given when someone is under the influence of alcohol or any other drug.
- According to AAUW, in 75% of sexual assault cases the offender, the victim, or both have been drinking.

- Be sure to measure out your alcohol before consuming!
- Alcohol can cause Academic Problems:
- About 25% of college students report academic problems linked to alcohol: missing class, falling behind, doing poorly on exams and papers, & receiving lower grades overall.
- What could you be missing?
- How well could you be doing?

Myth Busters

Myth: It’s okay for me to drink to keep up with my bf.
Fact: Women process alcohol differently; no matter how he drinks, if you drink the same amount, you will be more intoxicated and more impaired.
