# The Purpose and Operation of LIFE

## *Promoting Self-Growth/Building Community*

LIFE (Learning Is ForEver) is affiliated with the Road Scholar Elderhostel Institute Network, a national organization of over 150 similar groups devoted to adult education. In the Macomb area, LIFE is sponsored by Western Illinois University's Study Abroad and Outreach office; however, it is a self directed organization, composed of retired and semi-retired area residents who develop courses, select the teachers, establish the fees, and promote the curriculum. Now in its third decade, the LIFE organization is dedicated to providing high-quality, enjoyable educational experiences for very modest fees. The teachers and activity leaders are not paid, but they are all highly competent, engaging, and friendly members of the community who are committed to sharing the joy of lifelong learning.

Any adult is welcome to register for a LIFE course. There are no educational requirements, or any prerequisites or exams. All anyone needs is an interest in sharing an educational experience. The class is commonly a mixture of people with varied backgrounds who want to remain intellectually stimulated, learn new skills, or participate in a cultural event—and probably make new friends in the process. Every class functions in an informal, noncompetitive way, fostering lively engagement with the topic and an enjoyable experience. Designed to be stimulating and fun, the LIFE program provides recreational education and champions the cause of lifelong learning in the Macomb area.

For more information/questions on the LIFE program, or to be put on the list to receive this free, semi-annual course brochure, contact WIU's Office of Study Abroad and Outreach at (309) 298-1911. The brochure can also be viewed on the LIFE website at [wiu.edu/life](http://wiu.edu/life).

Because of increased costs, brochures will be sent via email. Hard copies will be available at numerous locations e.g., Western Illinois Museum, the Macomb Public Library, YMCA Senior Center, several senior living centers, and some local businesses.

**Western Illinois University is not responsible for personal injury or property damage arising out of the voluntary participation in this program.**

Welcome to the LIFE Program for Spring of 2024.

We have a great lineup of courses for you. The range of courses includes cooking classes, outdoor courses, and reading classes – something for everyone! The Curriculum Committee (the members are listed on the previous page) put in many hours in brainstorming topics, finding instructors, and making the final schedule. Please thank them as well as the instructors, when you see them around town.

Please help us make the LIFE program even better by getting involved yourself. Do you have a course you would like to take? Is there a course you might like to teach? Would you like to volunteer to serve on one of our committees? If so, please get in touch with me at danwise19@comcast.com, or contact an officer or committee member you may know.

Registration for LIFE courses can now be done all online. Visit [wiu.edu/life](http://wiu.edu/life) for full details. Payments for online registrations can be made via PayPal, credit/debit card, or check.

I thank you for your support as we continue to provide a LIFE program that offers wonderful opportunities for educational, cultural and social interaction.

### ***Human Enhanced Climate Change***

Climatic change has occurred throughout geologic time. The earth has been much warmer (no polar ice caps) as well as much colder (glaciers over much of the earth's land masses). The cause of these climatic variations has been the "natural phenomenon" (e.g., changes in our earth's orbits, volcanic activity, and fluctuations in solar energy output). So climatic change, caused by "natural phenomenon," has always occurred and will continue to occur—with some periodicity. So, what is the issue of concern — HUMAN ENHANCED climate change.

Natural climatic change takes place slowly – over 10s, 100s, 1,000s or even millions of years. However, changes caused by human activity occur much more rapidly – at a rate of 100s of years. This rapid increase in temperature will impact worldwide temperature and precipitation patterns which in turn will increase the intensity and distribution of severe weather. Ultimately this negatively impacts many facets of human activity.

We will look at the causes and the consequences of human induced climatic change as well as how to slow down its impact.

### ***Some Approaches to Meaningful Life Experiences for Senior Citizens***

As many Americans realize, older individuals now face a variety of cultural and personal forces that foster a sense of disconnection and unrewarding experiences. But there are ways to combat that through awareness of local history, social interaction with others, the development of lasting friendships, association with community causes, and even the writing of personal memoirs – which can all foster a meaningful sense of identity and belonging. This class, taught by Illinois writer, speaker, and social activist John Hallwas, will provide some short readings on this broad concern and also will urge participants to reflect upon their own experience and to share insights that can be helpful. The opening session will focus on the experience of senior citizens in our time and various short readings will be distributed that will prompt discussion in the following two sessions.

### ***We Need to Talk Book Club***

The We Need to Talk Book Club will give us a chance to join in conversation and connect with others. The book selections will center on two works of fiction that remind us of current issues. Our discussion will perhaps allow us to see these contemporary issues in a different light, give us a new perspective, or awaken us to another reality. They may also spark an opportunity for us.

**March 5:** We'll change things up a bit and read a classic book first published in 1899. The book was censored, considered immoral, and banned. *The Awakening* by Kate Chopin is one I'm sure many of you have read, maybe years ago. It will be interesting to review the novel in our 2024 context.

**May 7:** *Prophet Song* by Paul Lynch, the winner of the Booker Prize 2023, will be our book discussion in May. It's a frightening story. Here is what Amazon says about the book, "Ireland is falling apart, caught in the grip of a government turning towards tyranny. As the life she knows and the ones she loves disappear before her eyes, Eilish must contend with the dystopian logic of her new, unraveling country. How far will she go to save her family? And what—or who—is she willing to leave behind?" *Prophet Song* presents a terrifying and shocking vision of a country sliding into authoritarianism and a deeply human portrait of a mother's fight to hold her family together.

An argument is an exchange of reasons. People do this to make joint decisions, test their thinking, or clarify their disagreement.
